- 1. Our business is primarily dependent on the availability/supply and cost of raw materials which are agri produce which we source from different suppliers. Any significant increase in the prices of these raw materials or decrease in the availability of the raw materials, could adversely affect our results of operations.***

Our company is mainly engaged in the business of refining and trading of Soya bean oil, cotton seed oil, sunflower oil etc., raw oil for refining and refined oil for trading are the major raw materials for our business, and represent a significant portion of our expenses. Any significant increase in the prices of these raw materials or decrease in the availability of the raw materials, due to insufficient production due to low rainfall or for any other reason, could adversely affect our results of operations and consequently, our sales and profitability. Our failure to procure the raw materials in the required quantities at favorable prices, on schedule or of a specified quality and specification may adversely affect our production, loss of reputation and customer base which could adversely affect our business, financial condition and results of operation.

2. We have not entered into any formalized agreements with the suppliers. Any disruption in the supply chain might affect our production processes and consequently our results of operations.

The major raw material used in the production process are raw oil used in the refining process and refined oil which is used in the trading. The raw material is procured from local sources. Our top three suppliers constitute over 90% of our total purchase of F.Y. 2020-21. We have not entered into any long-term agreements with our suppliers nor have we entered into any supply contracts with such parties to ensure regular and timely supplies of raw materials. The major deciding factor in determining the purchase of raw and refined oil is the purchase price and the availability of the oil which varies based on the agri produce in the local market. In the event our suppliers default in the supply of the raw materials required by us, we may have limited legal recourse against them or we shall not be in a position to demand specific performance. We are unable to assure you that in case of any such event, we shall be able to identify alternative source of supply in time. Such disruption in the supply chain would delay our production process and consequently, our results of operations.

3. Our Company does not have any long-term contracts with our dealers and distributors which may adversely affect our results of operations.

Over the years we have established a network of dealers and distributors who sell and market our product to the customers. Our Company has not entered into any long-term contracts with any of our dealers or distributors nor do we have entered into any marketing tie up for our products with any of retail chain operators. The loss of any of our dealer or distributor who markets our product may have an adverse effect on our revenue and operations. Our inability to sell our existing products as well as products to be produced after any proposed expansion, may adversely affect our business and profitability in future.

4. Any change in our consumer's tastes, preferences or a change in their perception regarding the quality of our products may negatively affect the image and our reputation and in turn affect our revenues and profitability.

The industry in which we operate is highly competitive and where goodwill, reputation and quality of product are of huge significance. Although we have been in the business of refining and trading of edible oils for around two decades, any occurrence of negligence and/or oversight in the process of refining, may lead to impure oil being sold in the market which could be harmful for the consumers. Any change in consumer's tastes, preferences or a change in their perception regarding the quality of our products, for reasons including those mentioned above, may negatively affect the image and reputation of our products and consequently that our Company. Further, such incidences may expose our Company to liabilities and claims which may adversely affect our reputation, growth and profitability.

5. Our Company's inability to maintain or expand distribution network can adversely affect our revenues and future growth prospects.

We sell our products with the help of distribution network of various dealers and distributors. Over the year we have developed a network of distributors which help us in selling and distribution of edible oil. The distribution network sells our products to end users. Our inability to maintain our existing distribution network or to expand it further as per the requirement of our proposed business plans, can adversely affect our growth and revenues. In case, if we are not able to market our manufactured products, it may affect our operations and profitability adversely.

6. The shortage or non-availability of power may adversely affect the manufacturing processes and our performance may be affected adversely.

The refining process of edible oil requires substantial amount of power and fuel. Though we have made proper arrangements for power and fuel requirements, in addition we have also installed solar power for captive consumption at our manufacturing facility still we may in future face power interruptions due to power cuts and as a result our operations or financial condition may be adversely affected. The shortage of electricity supply may increase our dependency on the usage of generators. In case we are required to install more generators for uninterrupted power supply we may be required to undertake additional capex and fuel cost. The same can increase our cost of power and may have an adverse impact on our profitability.

7. Our Company in the past has not complied with certain statutory provisions under the Companies Act. Such Non-Compliances may attract penalties.

Our company has not complied with certain statutory provisions in the past including but not limited to the details mentioned in this Prospectus which may result in penalties or prosecution on the Company and its Directors. For instance,

- The Company has made error while filing the list of allottees with the Registrar of Companies for the allotment made during the year 2003-04. However, same error was later rectified while filing the List of members in the Annual return and subsequent forms. The Company has also filed incorrect details of share transfers and transmission in its annual return for the FY 2018-19.
- Our Company has in the past has failed to file charge form for the vehicle loans taken by the company. However, now the company is not able to file the Charge form for the creation of the charge on these vehicle loans due to technical error.

Such corporate guarantee given to entities in which directors are interested is a non-compliance of section 185 of the Companies Act, 2013, however on getting information of the same the company has applied to the Bank for revocation of the guarantee and rectify the said non-compliance.
- Also, there have been instances of delay and discrepancies by our Company in relation to certain filings and disclosures made to the RoC such as, delay in filing the charge form with RoC, such as wrong attachment of share transfer details and clerical errors in certain disclosures made to Registrar of Companies.
- The company is not in possession of some forms filed with the Registrar of Companies, Mumbai, particularly relating to forms filed prior to the year 2006 including, inter alia, in respect increase in authorized share Capital during the year 2003-04.
- Also, in the past the company has not complied with the provisions of AS 15 “Accounting for Employee Benefits”, AS 18 “Related Party Disclosures” and AS 29 “Provisions, Contingent Liabilities and Contingent Assets”. However, the company has made the necessary adjustments and have complied the same in the restated financial statement of the company.

Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent. Such non-compliance may in the future render us liable to statutory penalties, prosecution on directors and reversal of actions executed, which may have consequence of change in the management or financial distress to the company.

8. Our agreements with various banks for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.

We have entered into agreements for short term and long term borrowings with certain banks and financial institutions. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, declaring dividends, further expansion of business, taking up new business activity or setting up/ investing in subsidiary except in the ordinary course of business and which require our Company to obtain prior approval of the lenders for any of the above activities. If we are unable to obtain the approvals for any of the restriction may have an adverse impact on our operations and profitability. For details of these restrictive covenants, please see, “Financial Indebtedness” beginning on page 158 of the Prospectus.

9. Our success is largely dependent on the quality of the product and the quality control processes and any failure to maintain the quality of our products may affect our reputation and business.

We believe that our success is largely dependent on the quality of the product we sell in the market which is further dependent on the quality control processes at our manufacturing facilities. Our quality assurance department ensures quality controls at every stage of production, commencing from the selection of the raw oil used in refining, refining of oil to the packaging of the finished product. We believe we have built strong relationships with our customers and brand image due to the quality of our products which has translated into operational growth. In the event we are unable to maintain the quality of our product or any lapse in our quality control processes, for any reason whatsoever, our business, reputation and results of operations would be adversely affected.

10. Our inability to develop and promote our brands may impede our growth rate and our profitability.

We believe that brand building is an essential component of business growth particularly in the industry in which we operate. An established brand name enables the customer to distinguish the products from competitors’ and other players in the unorganized sector. While we believe that we have established our brands “Rich Soya” in certain regions of Maharashtra, and we further intend to expand our operations to other regions also which would require additional investment towards brand promotion. Our inability to successfully develop, promote and market our brands may adversely affect our business and results of operations.

11. Some of our trademarks pertaining to our name, logo and products which we use are not registered and it may lead to the dilution of our trademarks and limits our ability to defend our trade marks in infringement or passing off proceedings.

We have filed application for registering the name and logo of our Company  under classes 29 under the Trade Marks Act, 1999 and the application for the same is objected. There can be no assurance that our trade mark applications will be accepted and the trade marks will be registered. Further, our applications for the registration of certain trademarks in present opposed by third parties, and we may have to incur significant cost and spend time in litigations in relation to these oppositions. In the event we are not able to obtain registrations or if any injunctive or other adverse order is issued against us in respect of any of our trademarks for which we have applied for registration, we may not be able to avail the legal protection and legal remedies (in case of infringement) or prohibit unauthorised use of such mark by third parties by means of statutory protection, available as a proprietor of registered trademarks.

12. We are dependant on our promoters and senior management team and any change in the senior management may adversely affect our business or results of operations.

Our success and future performance is substantially dependent on the guidance and foresight of our Promoters and Directors. Our success and future performance is substantially dependent on the expertise and services of our management team, including our senior management team i.e. our Directors and other key managerial personnel. Any change in the management personnel or other key personnel could have an adverse effect on our business and results of operations. Further, our ability to maintain our leadership position in the edible oils business depends on our ability to attract, train, motivate and retain highly skilled personnel. If we are unable to recruit and retain the requisite personnel's, our business and results of operations may be adversely affected.

13. During the process of refining the edible oil our Company deals in chemicals and if we fail to comply with environmental laws and regulations, our operations might be affected.

During the process of refining of the edible oil we use certain chemicals in our manufacturing process. The use of such chemicals is required to be done as per the specified standards and discharge of effluents, which may be hazardous to environment and biological lives. If we fail to comply with these laws and operational regulations, then we may be imposed with penalties, fines or imprisonment. As a result of the same, operations of our Company can be suspended and our manufacturing licenses/ permissions can be withdrawn or terminated which may adversely affect our operations and in turn our profitability. Further in case, any new regulation is imposed in this regard, we may have to incur additional expenditure or be required to acquire additional equipment with such specification as may be prescribed by the concerned authorities, in order to comply with such new law or regulation.

14. Being part of the food industry, we may be subject to inspections at local levels which may result in imposition of penalty on us.

Inspection proceedings are undertaken at local levels, under the Prevention of Food Adulteration Act, 1954, at regular intervals. The inspecting authorities collect the edible oil samples manufactured by us which are then send for inspection. We may not receive timely communication regarding the food sample inspections etc., collected by the food inspectors from the various storage and distribution centres like shops, depots or godowns. Consequently, we may fail to adhere to the directions of the authorities in a timely manner which may attract penal sanctions.

15. Our business is dependent on approvals from relevant regulatory and food authorities. Any delay or failure to obtain or renew such required regulatory approvals, registrations or any change in the regulatory environment in relation to our products may significantly impact our business and strategy affecting our overall profitability.

Our business is subject to regulation under the Prevention of Food Adulteration Act, 1954, the Edible Oils Packing (Regulation) Order, 1998, Vegetable Oil Products (Control) Order, 1947 etc., in the areas in which we operate, pollution control laws like the Environmental Protection Act, 1986, the Water (Prevention and Control of Pollution) Act, 1981, the Air (Prevention and Control of Pollution) Act, 1981 and the Hazardous Waste (Management and Handling) Rules, 1989. Further, some of our licenses for our existing operations have expired and we are in the process of renewing the same. Though we believe that we have procured all the necessary licenses and approvals required to carry on the business but we are yet to apply for registration under the Contract Labour (Regulation and Abolition) Act, 1970 for the contract labour employed at the factory premises. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

18. Our results of operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.

We employ significant number of employees at our production facilities. We currently fulfil the requirement of the employees required at our production facilities by employing labour on contract and casual basis. But, we are unable to assure you that we will not experience any disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock - outs or increased wage demands or shortage in the availability of the required work force. Such issues could have an adverse effect on our business, and results of operations.

19. Any under-utilisation of our installed capacities may adversely impact our financial performance and results of operations.

We have installed the production capacities based on our estimates of market demand and profitability. Though, we have in the past been able to efficiently utilize the installed production capacity. However, there may be certain event under which we may not expect order flow for our products, such as adverse economic scenario, change in demand or for any other reason, our capacities may not be fully utilised thereby adversely impacting our financial performance and results of operations.

Further, the information relating to our production capacities and capacity utilization of our production facilities included in this Prospectus is based on various assumptions of our management. Undue reliance should therefore not be placed on our production capacity or capacity utilization information for our existing facilities included in this Prospectus. The amount due from trade receivable for the FY 2020 was Rs. 1173 Lakhs which is around 27% of the total current assets of the company which was Rs. 27.99 Lacs for the FY 2021. We maintain a healthy relationship with our customers also; we have over the years developed a healthy payment cycle with our customers. Although we take all the possible steps to maintain good customer relationship but there can be scenarios where there are delays by the customers in payment or non-payment due to any reason which may be beyond their control which could result in our working capital being blocked and our cash flow would be affected and thereby adversely affecting our results of operations.

Guarantees given on Behalf of the Company	1,307.00	1,307.00	-
Total	1472.30	1472.30	-

22. The insurance coverage taken by our Company may not be adequate to protect against certain business risks. This may adversely affect our financial condition and result of operations.

Operating and managing a business involves many risks that may adversely affect our Company's operations, and the availability of insurance is therefore important to our operations. Our Company believes that our insurance coverage is generally consistent with industry practice though we are yet to undertake insurance w.r.t. Cash in Transit, Burglary Insurance, Marine Insurance, Employee Compensation Insurance and Product Liability Insurance. However, to the extent that any uninsured risks materialize or if it fails to effectively cover itself for any risks, we could be exposed to substantial costs and losses that would adversely affect financial condition. In addition, our Company cannot be certain that the coverage will be available in sufficient amounts to cover one or more claims, or that our insurers will fully reimburse the claims made or not. A successful assertion of one or more claims against our Company that exceeds our available insurance coverage or that leads to adverse changes in our insurance policies, including premium increases or the imposition of a large deductible or coinsurance requirement, could adversely affect our financial condition and results of operations.

23. We appoint contract labour for carrying out certain operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an effect on our results of operations and financial condition.

In order to retain flexibility and control costs, our Company appoints independent contractors who in turn engage contract labour for performance of certain of our operations at our manufacturing facility. Although our Company does not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an impact on our results of operations and financial condition. Additionally, non adherence of any regulatory compliance under the Contract Labour (Regulation and Abolition) Act, 1970, as amended will affect our business. Thus, any such order from a regulatory body or court may have an effect on our business, results of operations and financial condition.

24. We do not own our office situated at Pune. Any dispute in relation to the lease of the said premises would have a material adverse effect on our business and results of operations.

Our Company do not own the office in Pune, the said premises have been taken on rented and leased basis. If the owners of this premises do not renew the agreements under which we occupy the premises or renew such agreement on terms and conditions that are unfavorable to our Company, it may suffer a disruption in our operations or we may be required to pay increased rentals which could

have a material adverse effect on our business, financial condition and results of operations. Further, the said premises have been jointly taken on lease by our company and ShriKrupa Ginners Private Limited and there are no MOU between our company and our Group Company regarding the use and demarcation of space between us. In case any dispute arise in future regarding the said premises, the same may affect the operations of the company being carried on from said office and may also create legal issues for the company. For more information, see “Business Overview” on page 83 of the Prospectus.

25. Our Company faces stiff competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

The market for our products is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as technical competence, quality of products, brand image, distribution network, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

26. Any inability to manage our growth could disrupt our business and reduce our profitability.

We have experienced significant growth in our total income in recent years. We expect this growth to place significant demands on both our management and our resources. This will require us to evolve and improve our operational, financial and internal controls across our organization. In particular, continued expansion increases the challenges involved in recruiting, training and retaining sufficient skilled technical, sales and management personnel; adhering to our quality and process execution standards; maintaining high levels of customer satisfaction; and developing and improving our internal administrative infrastructure, particularly our financial, operational, communications and other internal systems. Any inability to manage growth may have an adverse effect on our business, results of operations and financial condition.

27. Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital and cash flow required for our business may impact our operations adversely.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors, and inventories. As on March 31, 2021, we have been sanctioned working capital limit of Rs. 3400 lakhs from Bank of Baroda Limited. Our business demands substantial fund and non-fund based working capital facilities. Also, our growing scale and expansion, if any, may result in increase in the quantum of current assets. In case there is insufficient cash flows to meet our working capital requirement or our inability to arrange for the same from other sources or due to other factors including delay in disbursement of arranged funds, resulting in our inability to finance our working capital needs when needed or there is any increase in interest rate on our borrowings, it may adversely affect our performance, financial conditions and result from operations.

We have incurred substantial amount of debt from banks and financial institutions, thus we are exposed to interest rate risk. As of March 31, 2021, our Company had an indebtedness of total Rs. 5795.51 lakhs. We have not entered into any interest rate hedging contracts or other financial arrangements to mitigate our exposure to interest rate fluctuations. Any increase in interest rates may have an adverse effect on our business prospects, financial condition and results of operations.

28. We have entered into a number of related party transactions, which may involve conflict of interest.

Our Company has entered into various transactions with our Directors, Promoters and Promoter Group. These transactions, inter-alia includes issue of shares, remuneration, loans and advances, sales, purchase, reimbursement of expenses etc. Our Company has entered into such transactions due to easy proximity and quick execution. While we believe that all such transactions have been conducted on an arm’s length basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects. For details of transactions, please refer to “Note W - Related Party Transactions” of the Auditor’s Report under Section titled “Financial Information of the Company” beginning on page 128 of this Prospectus.

29. We have incurred significant indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on March 31, 2021, our total outstanding indebtedness was ₹ 5795.51 Lakhs. Our significant indebtedness results in substantial amount of debt service obligations which could lead to:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse effect on our cash flow and financial conditions of the Company. For further details regarding our indebtedness, see the Section titled “Financial Information of our Company” beginning on page 128.

30. We may be unable to attract and retain qualified, skilled employees necessary to manage, maintain and grow our business.

Our success depends in large part on our ability to attract and retain highly skilled and qualified personnel, such as engineers, sales and service staff. Skilled employees with appropriate experience in the edible oil refining industry may be scarce. We may experience a reduction in the experience level of our personnel as a result of any increased attrition, which could lead to higher downtime and more operating incidents, which in turn could decrease revenues and increase costs. Competition may result in inflationary pressure on hiring, training and retention costs for such personnel.

Additionally, we also employ labours on contract basis, which may vary from month to month. Ensuring and maintaining contractual labour at required levels is also challenging given the non-availability of adequate number. The financial resources required to continue to attract and retain such personnel may adversely affect our operating margins.

31. One of our Group Companies has incurred losses during the last three years as per their audited financial statements, as set forth in the table below.

One of our Group Companies has incurred losses as set forth in the table below:

After completion of the Issue, our Promoters and Promoters Group will collectively own 73.53% of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

38. *Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.*

We depend on transportation services to deliver our products. We rely on third parties to provide such services. Disruptions of transportation services because of weather related problems, strikes, lock-outs, inadequacies in road infrastructure or other events could impair our procurement of raw materials and our ability to supply our products to our customers. There is no assurance that such disruptions will not occur in the future. Any such disruptions could materially adversely affect our business, financial condition and results of operations.

39. *Industrial accidents at our production facility may adversely affect our operation*

Usage of boilers, ET Plant and chemicals by the labour during the process of refining the edible oil may result in accidents which can cause injury to the labour and employees of the company and this could also cause damage to the property and plant and machinery situated at the factory which could have an adverse affect on our operation. Though, we have taken adequate safety measures and also insurance policies to safeguard from damage but we cannot assure you in case of any such accident will be honored by the insurance companies or not. Further occurrence of such accidents could impact our production and consequently affect our profitability and cash flows.

40. Any change in the technology may render our current technologies obsolete or require us to make substantial capital investment to cope with the market.

Technology upgradation is a regular process and it is also essential for providing the desired quality to the customers. We are taking all the possible steps to keep our manufacturing facilities in line with the latest technology. However, any further upgradation in the technology may render our current technology obsolete and require us to upgrade the existing technology or implement new technology. Further, implementing new technology may require us to incur huge capital expenditure which could affect our cash flows and result of operations.

41. Excessive dependence on Bank of Baroda Limited for obtaining financial facilities.

Most of our fund based and non fund base financial assistance has been sanctioned by Bank of Baroda Limited. We have been sanctioned the financial assistance on the security of assets and personal guarantee of our Promoter and Promoter Group member. Any default under such arrangement or non renewal or renewal of the sanction on adverse term with such lender may result into difficulty in arranging of funds for re-payment and may also adversely affect our operations and financials. Also we have provided the collateral security of our registered office and factory for the above loan taken from Bank of Baroda Limited. Any impairment in the right to use the above property may require us to arrange for the additional security or arranging the funds for the pre-payment which may adversely affect the financial position of our Company. For further details on the Cash Credit Limits and other banking facilities, please see “Statement of Financial Indebtedness” on page 158 of the Prospectus.

42. Obsolescence, destruction, theft, breakdowns of our major plants or machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations

Obsolescence, destruction, theft or breakdowns of our major plants or machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all, particularly where our plants or machineries are not readily available from the market or require services from original machinery manufacturers. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect our business, cash flows, financial condition and results of operations For further details of our Plant and Machineries, please refer to chapter titled “Our Business” beginning on page 83 of the Prospectus.

43. Exchange rate fluctuations may adversely affect our financial performance.

We are exposed to exchange rate risk. From time to time, we enter into foreign currency transactions in respect of our international imports. We use to import raw oil for refining purpose as well as edible oil for trading purpose. Foreign currency is subject to change which may be as a result of change in interest rate or development in the economy. Further, we may not engage in any forward hedging contract to mitigate the risk of loss due to foreign currency change. Any adverse movement in the foreign exchange rate may result in loss due to more payment is required to be made to the vendors, which may have an adverse impact on the financial conditions of the company. For further details, please see “Financial Statements” on page 128 of this Prospectus.

44. There is no existing market for our Equity Shares, and there can be no assurance that one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.

Prior to this Issue, there has been no public market for our Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. The Issue Price of the Equity Shares may bear no relationship with the market price of the

Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our operating results, competitive conditions, general economic, social and political factors, volatility in Indian and global securities market or significant developments in India's fiscal regime. There has been significant volatility in the Indian stock markets in the recent past, and our share price could fluctuate significantly as a result of market volatility. A decrease in the market price of our Equity Shares could cause you to lose some or all of your investment.

45. Any future issuance of Equity Shares by us may dilute your shareholding and adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by us may dilute your shareholding in our Company, adversely affect the trading price of our Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, any disposal, pledge or encumbrance of Equity Shares by any of our major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

46. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.

Our revenues are dependent on various factors such as future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements. Our business is capital intensive and we may require additional capital expenditures for our expansions or to undertake new projects. Our ability to pay dividends may also get restricted under certain financing arrangements that we have entered into and expect to enter into.

The combination of these factors may result in significant variations in our revenues and profits and thereby may impact our ability to pay dividends. Therefore, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indicative of our future performance. If in the future our results of operations are below market expectations, the price of our Equity Shares could decline.

47. Outbreak of contagious diseases in India may have a material adverse impact on our business and results of operations.

Recently, there have been threats of epidemics, including the Covid19, H1N1 virus that causes "swine flu" and which the World Health Organization has declared a pandemic. If any of our personnel are suspected of having contracted any of these infectious diseases, we may be required to quarantine such persons or the affected areas of our facilities and temporarily suspend a part or all of our operations. Further, such contagious diseases could prevent our clients from travelling, which would have a material adverse effect on our business, prospects, financial condition and results of operations.

48. The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.

The deployment of funds as stated in the "Objects of the Issue" beginning on page 65 of the Prospectus is entirely at the discretion of our management and has not been appraised by any independent agency. Further, the purposes for which the Net Proceeds are to be utilised have not been appraised by an independent entity and are based on our estimates and on third-party quotations. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability.

49. We have not entered into any definitive agreements to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lacs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure

Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

50. *We have not identified any alternate source of raising the working capital and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”.*

Our Company has not identified any alternate source of funding for our working capital requirement and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may result in borrowing funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings.

For further details of our working capital requirement, Please refer chapter titled “Object for the Issue” beginning on page 65 of this Prospectus.

51. *Certain data mentioned in this Prospectus has not been independently verified.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

EXTERNAL RISK FACTORS

52. *We are dependent on the availability of agri-commodities, which in turn is impacted by several factors including weather condition including flood and famines.*

Our business activities are dependent upon numerous factors including the availability of raw oil for refining which are dependent on the proper availability of agri-commodities. Production of agri-commodities is linked to various factors, including the weather conditions and natural disasters, change in cropping pattern, and fertility of land and other factors beyond the control of our Company. Poor weather conditions, amongst other such factors, could result in unavailability of agri-commodities for our business, which could adversely affect our business, financial condition and results of operations.

53. *Our business is dependent on the Indian economy.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India’s economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors’ reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

54. *Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.*

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighbouring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

55. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For instance, the applicability of the Farmers (Empowerment and Protection) Agreement of Price Assurance and Farm Services Bill; the Farmers Produce Trade and Commerce (Promotion and Facilitation) Bill; and the Essential Commodities (Amendment) Bill may affect the agri commodities market which may have an adverse effect on our raw material availability and prices which may have an adverse effect on our business operations. For further details please refer to the chapter “Government and Other Approvals” beginning on page 172 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations.

56. Instability in financial markets could materially and adversely affect our results of operations and financial conditions.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in benchmark index of stock exchanges i.e. NSE-NIFTY and BSE-SENSEX. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

57. Natural calamities could have a negative impact on the Indian economy and cause our Company’s business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

58. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

59. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

60. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive Indian governments have pursued policies of economic liberalization and financial sector reforms. The current Government has announced its general intention to continue India's current economic and financial sector liberalization and deregulation policies. However, there can be no assurance that such policies will be continued and a significant change in the government's policies in the future could affect business and economic conditions in India and could also adversely affect our business, prospects, financial condition and results of operations. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

Pandemic, Recession: The Global Economy

Following a collapse last year caused by the COVID-19 pandemic, global economic output is expected to expand 4 percent in 2021 but still remain more than 5 percent below pre-pandemic projections. Global growth is projected to moderate to 3.8 percent in 2022, weighed down by the pandemic’s lasting damage to potential growth. In particular, the impact of the pandemic on investment and human capital is expected to erode growth prospects in emerging market and developing economies (EMDEs) and set back key development goals. The global recovery, which has been dampened in the near term by a resurgence of COVID-19 cases, is expected to strengthen over the forecast horizon as confidence, consumption, and trade gradually improve, supported by ongoing vaccination. Although aggregate EMDE growth is envisioned to firm to an average of 4.6 percent in 2021-22, the improvement largely reflects China’s expected rebound. Absent China, the recovery across EMDEs is anticipated to be more muted, averaging 3.5 percent in 2021-22, as the pandemic’s lingering effects continue to weigh on consumption and investment.

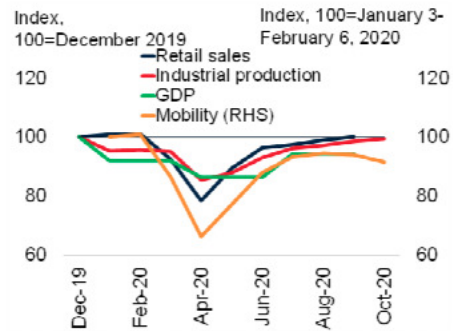

Despite the recovery, aggregate EMDE output in 2022 is expected to remain about 6 percent below its prepandemic projection. Downside risks to this baseline predominate, including the possibility of a further increase in the spread of the virus, delays in vaccine procurement and distribution, more severe and longer-lasting effects on potential output from the pandemic, and financial stress triggered by high debt levels and weak growth. Limiting the spread of the virus, providing relief for vulnerable populations, and overcoming vaccine-related challenges are key immediate policy priorities. As the crisis abates, policy makers need to balance the risks from large and growing debt loads with those from slowing the economy through premature fiscal tightening. To confront the adverse legacies of the pandemic, it will be critical to foster resilience by safeguarding health and education, prioritizing investments in digital technologies and green infrastructure, improving governance, and enhancing debt transparency. Global cooperation will be key in addressing many of these challenges.

Prospects for the global economy are uncertain, and several growth outcomes are possible. In the baseline forecast, global GDP is expected to expand 4 percent in 2021, predicated on proper pandemic management and effective vaccination limiting the community spread of COVID-19 in many countries, as well as continued monetary policy accommodation accompanied by diminishing fiscal support. Nonetheless, the level of global GDP in 2021 is forecast to be 5.3 percent below pre-pandemic projections—or about \$4.7 trillion.

INDIAN ECONOMY AT A GLANCE

Since the 2000s, India has made remarkable progress in reducing absolute poverty. Poverty levels are estimated to have declined from 21.6 percent in 2011 to 13.4 percent in 2015 (at the international poverty line), lifting more than 90 million people out of extreme poverty. In recent years it has undertaken important reforms to spur economic growth - introducing the bankruptcy code, implementation of the GST to integrate the national market and undertook a series of reforms to ease the conduct of business.

Growth was, however, already slowing when the Covid-19 pandemic struck. This was mostly due to a combination of domestic issues - including impaired balance sheets in the banking and corporate sectors and weak growth in rural incomes – as well as the slowdown in global trade.

Shri Venkatesh Refineries Limited

After March 25, 2020, when a national lockdown, forced by the onset of Covid - 19, was implemented and several states imposed additional curfew measures, economic activity - particularly industry and services - slowed sharply. Real GDP contracted by an unprecedented 23.9 percent (year-on-year) in Q1 FY21.

The response of the Government of India to the COVID-19 outbreak has been swift and comprehensive. The government implemented a national lockdown to contain the health emergency. This was followed by a comprehensive policy package to mitigate the impact on the poorest through various social protection measures as well as liquidity and financial support for small and medium enterprises.

The impact of pandemic, however, as in most large countries continues to be severe. The informal sector, where the vast majority of India's labor force is employed, has been particularly affected. Half of India's population already lives precariously close to the poverty line and any income and job losses will increase their risk of slipping back into poverty. The pandemic has also exacerbated the vulnerabilities for traditionally excluded groups, such as youth and women.

Recognizing these challenges, India is reworking its social protection architecture to protect its workers, particularly informal sector workers, hit hard by the COVID-19 pandemic. Until now, 70 percent of its vast social protection programs focused on the rural poor. Internal migrants who crossed state borders to work were not covered. The country is now pivoting from a social protection program with a primarily rural focus into an integrated pan-India system that encompasses the informal sector and the urban poor.

The Indian Government has also announced range of other initiatives including – MSME incentives, infrastructure sector boost, Agriculture infrastructure, micro food enterprises, increased public employment outlay, special liquidity window, etc.

To build back better, it will be essential for India to continue to keep a strong focus on reducing inequality, as it seeks to implement growth oriented reforms to get the economy back on track. The World Bank is partnering with the government in this effort by helping strengthen policies, institutions, and investments to create a better future for the country and its people.

Economic Outlook

Before the pandemic, the economy was already decelerating. Real GDP growth had moderated from an average of 7.4 percent in FY16/19 to 4.2 percent in FY19/20 due to long-standing structural rigidities in key input markets; continuing balance sheet stress in the banking and corporate sector, compounded more recently by stress in the non-banking segment of the financial sector; increased risk aversion among banks and corporates; a decline in rural demand; and a subdued global economy. Although the government initiated several policy actions to arrest the slowdown, the pandemic accentuated the down turn and real GDP contracted by an unprecedented 23.9 percent (year-on-year) in Q1 FY21.

In the fiscal year starting in April 2020, India's economy is expected to contract by 9.6 percent, and recover only very gradually thereafter, with risks tilted on the downside. Weak activity, domestically and abroad, is also likely to depress both Indian imports and exports.

The significant fiscal and other policy responses announced by both the federal and state governments are expected to provide some relief, mostly to avoid an even deeper contraction. But, a potential source of risk to this effort stems from preexisting financial sector weaknesses and high levels of NPLs, which have been amplified by the crisis.

Global trend in Oilseeds and Edible oil

Market situation

The downward trend in vegetable oil prices continued in 2018, with average prices reaching a ten-year low. For oil meals and seeds, however, prices peaked in the first half of 2018, but have since experienced a similar, although less dramatic, decline. The high levels of stocks among major exporters, coupled with market uncertainties related to trade talks between the United States and People's Republic of China (hereafter "China"), have influenced these price trends.

Global soybean production increased in 2018, with the United States and Brazil recording bumper crops, contributing to inventory build-ups. Demand for protein meals has tapered off given China's imposition of additional tariffs on US soybean exports and subsequent moves to lower the share of protein meal in feed rations. African swine fever continued to affect China's livestock sector,

curbing feed demand. The government recently also supported to decrease the minimum share of protein in feed rations, which was first proposed by a major industry association.

The vegetable oil sector was characterized by a slowdown in global trade, largely reflecting a decrease in edible oil imports by India in 2018. This resulted from an expansion in domestic oilseeds production, combined with increased import tariffs. Several countries also expanded their crushing capacity, thus increasing their seed imports at the expense of oil and meal purchases. Accordingly, exports by the main suppliers of vegetable oil, such as Indonesia and Malaysia, expanded less than average, leading to rising stocks and lower prices. The combination of these factors led to the introduction of higher biodiesel mandates in Indonesia, which drove domestic take up of palm oil for biodiesel production from 3.5 million litres in 2017 to 5.1 million litres in 2018.

During the outlook period, global soybean production is projected to continue to expand at 1.6% p.a., with the expansion of area harvested accounting for 53% of global output growth. With its domestic output reaching 144 Mt by 2028, Brazil will become the world’s largest producer, overtaking the United States, for which output is projected to be 121 Mt by 2028. Production of other oilseeds will increase by 1.4% p.a. over the next decade, reflecting slower growth relative to the last ten years, due in part to curbed demand for rapeseed oil as a feedstock in European biodiesel production. Crushing of soybeans and other oilseeds into meal (cake) and oil will continue to dominate usage and increase faster than other uses, such as direct food/feed consumption of soybeans, groundnuts and sunflower seeds. Overall, 91% of world soybean output and 87% of world production of other oilseeds are projected to be crushed in 2028.

Vegetable oil includes oil obtained from the crushing of soybeans and other oilseeds (about 55% of world vegetable oil production), palm oil (35%), as well as palm kernel, coconut and cottonseed oils. Despite a slowdown in the expansion of the mature oil palm area, significant production growth is projected in Indonesia (4.6 Mt) and Malaysia (2.3 Mt). However, the rise in Indonesia’s domestic biodiesel requirement will place pressure on vegetable oil supplies in the medium term. Global demand for vegetable oil will expand by +28 Mt by 2028, which is likely to draw down high inventories and support vegetable oil prices over the outlook period.

Soybean meal dominates protein meal production and consumption. Compared to the past decade, the expansion of protein meal utilisation (1.5% p.a. vs. 4.1% p.a.) will be constrained by slower growth in global production of pork and poultry, and by efforts in China to adopt a lower protein meal share in livestock feed rations. As a result, Chinese protein meal use is projected to grow slightly slower than animal production.

Vegetable oil has one of the highest trade shares (40%) of production of all agricultural commodities. Indonesia and Malaysia, the world’s two main suppliers of palm oil – the greatest single component of vegetable oil – will continue to dominate vegetable oil trade, exporting over 70% of their combined production and jointly accounting for nearly 60% of global exports.

Growth in world trade of soybeans, dominated by the Americas, is expected to slow considerably in the next decade, a development directly linked to the projected slower growth in the crushing of imported soybeans in China. In parallel, Brazil will consolidate its position as the world’s largest exporter of soybean.

Prices

Vegetable oil prices, which stand at a thirteen-year low in real terms, are expected to begin an upward trend. Prices are set to recover as the ongoing global expansion of food and oleo-chemical demand for vegetable oil coupled with new domestic demand for vegetable oil as a biodiesel feedstock in selected countries, notably Indonesia will bring down its stocks, which currently stand at a ten-year high level. At the same time, production constraints in major palm oil-producing countries will hamper any major expansion of supplies over the next decade, thus consolidating the upward trend of real vegetable oil prices.

Real prices for soybean, other oilseed and protein meals will decline slightly as demand growth is expected to expand slightly slower than global supplies. Real prices will nonetheless remain above historical troughs. In nominal terms, prices of oilseeds and oilseed products are expected to rise over the medium term, although they are not expected to attain previous highs.

Domestic production of edible oils is unable to meet domestic demand. As per the 4th Advance Estimates released by the Department of Agriculture, Cooperation and Farmers Welfare the estimated production of oilseeds for 2019-20 is 334.23 lakh MT as against 315.22 lakh MT in 2018-19 and the 1st advance Estimates at 257.29 Lakh MT. The total availability of edible oils from all sources (primary and secondary) for 2018-19 is estimated at 103.52 lakh MT as against 103.80 lakh tons in 2017-18. The gap between demand and supply is about 60% and is met through imports. Out of the total quantity of oils imported, Palm oils (Crude + Refined) constitute around 60% and are imported mainly from Indonesia and Malaysia, while Soyabean oil constitutes around 20% and is imported from Argentina and Brazil. Sunflower oil constitutes around 15% and is imported mainly from Ukraine. The domestic production and import of edible oils during the last five years is as follows:

PRODUCTION TREND OF DOMESTIC OILSEEDS & DOMESTIC EDIBLE OILS

Shri Venkatesh Refineries Limited

India's edible oil imports for March 2020 recorded a decrease of 32.44% from a year before. Imports for March 2020 were registered at 941,219 tonnes, a stark comparison to 1,393,255 tonnes registered in March 2019. The decline is mainly attributed to the government restrictions on purchase of refined palm oil from the overseas market. Market share of palm oil is more than 60% of the total vegetable oils imported into India. Heavily relying on importation of oils and fats, domestic production of the edible oils is insufficient and could only fulfil around 40% of local consumption. The HoReCa (Hotel, Restaurants and Cafeterias) sector accounts for 40% of the 23 million tonnes edible oil demand required annually.

EXPORT IMPORT POLICY ON EDIBLE OILS

The country has to rely on imports to meet the gap between demand and supply. Import of edible oil is under Open General License. In order to harmonize the interests of farmers, processors and consumers and at the same time, regulate large import of edible oils to the extent possible, import duty structure on edible oils is reviewed from time to time. W.E. F. 14.06.2018, the import duty on all

Shri Venkatesh Refineries Limited

crude and refined edible oils was raised to 35% and 45% respectively while the import duty on Olive oil was increased to 40%. The import duty on Crude and Refined Palm Oil was revised to 40% and 50% respectively for imports from ASEAN countries and 40% and 45% respectively for imports from Malaysia.

In order to ensure availability of edible oil in the country, export of edible oil has been banned w.e.f. 17.03.2008, which was extended from time to time. With effect from 06.02.2015, export of ricebran oil in bulk has been permitted. With effect from 27.03.2017, export of groundnut oil, sesame oil, soyabean oil and maize (corn) oil has been permitted. With effect from 06.04.2018, export of all edible oils except mustard oil was made free without quantitative ceiling; pack size etc, till further orders. Export of mustard oil is permitted in packs of up to 5 Kg with a Minimum Export Price (MEP) of USD 900 per MT.

MAJOR RECENT DECISIONS IN RESPECT OF EDIBLE OILS

- Vide Notification No. 84/2018-Customs and No. 82/2018-Customs dated 31.12.2018, import duty on Crude and Refined Palm Oils was revised to 40% & 45% respectively for imports from Malaysia and 40% & 50% respectively for import from ASEAN Countries.
- Vide Notification No. 01/2015-20 dated 06.04.2018 export of all edible oils except Mustard oil made free without quantitative ceiling, pack size etc till further orders. Export of Mustard oil is permitted to be exported in consumer packs of upto 5Kg with a minimum export price of USD 900.
- Vide Notification No. 01/2015-20 dated 06.04.2018 export of all edible oils except Mustard oil made free without quantitative ceiling, pack size etc till further orders. Export of Mustard oil is permitted to be exported in consumer packs of upto 5Kg with a minimum export price of USD 900.
- Vide Notification No. 29/2018 dated 01.03.2018, customs duty on Crude Palm Oil increased to 44% and customs duty on Refined Palm/Palmolein increased to 54%.
- With the implementation of FSSAI Act, 2006 w.e.f. 5th August, 2011, the edible oil industries is now governed by FSSAI for issue of license, safety and standard parameters. However, the data monitoring of procurement for the edible oil industries are being administered by the Directorate under Vegetable Oil Products, Production and Availability (VOPPA)(Regulation) Order, 2011.

PROCESS DESCRIPTION

1. Water Degumming:

Crude oil is pumped in the continuous and constant stream by pump heated to required temperature in the heat exchanger, mixed with pre-calculated quantity of acid in a gum conditioning mixer and fed to a in line mixer where the pre-calculated quantity of water is added. Oil water mixture is fed to the hydration tank and allowed sufficient residence time for the gums to agglomerate on hydration and then pumped to separator where the oil and hydrated gums are separated and pumped to storage of gum drying plant in the case of soyabean gums.

2. Neutralization and washing:

Gum conditioning: Degummed oil from separator above is pumped to plate heat exchanger. Oil is heated to suitable neutralization temperature (80 to 85) by dry saturated steam in the heat exchanger. The hot oil is fed to knife mixer where it is intensively mixed with requisite quantity of concentrated phosphoric acid dosed into the mixer by metering pump. The oil acid mixture is allowed a brief holding time in the mixer and the precipitation of phosphatides and trace metals takes place.

Neutralization: Degummed oil after gum conditioning in mixer is fed into the disc mixer where it is mixed with calculated quantity of caustic soda solution of suitable strength. Free fatty acids in the oils react with caustic soda to form soap. The mixture of oil and soap along with precipitated gums is fed the hermetic separator to separate oil and soap stock.

Water washing: Neutralized oil is heated to about 90°C in the heat exchanger and pumped to the knife mixer. Traces of soap in the neutralized oil is extracted by water from oil phase. Oil and soapy water are separated in separator.

Shri Venkatesh Refineries Limited

Vacuum drying: Washed oil is fed to continuously to the vacuum drier and spared through the specially designed nozzles. The vacuum drier is kept under vacuum of 70 torr. The dried oil from vacuum chamber is continuously pumped by the pump to the bleaching section directly through the economizer, this avoids any quality deteriorations of oil to storage under ambient condition. Refining for washed cottonseed oil: Neutralized oil after neutralization is fed in to knife mixer where it is mixed with calculated quantity of caustic soda solution of suitable strength. Free fatty acids in the oil react with caustic soda forms soap. The mixture of oil and soap along with the precipitated gums is fed to the hermetic separator to separate the oil and soap stock.

3. Continuous Bleaching Section

Slurry preparation and bleaching: The neutralized oil is heated to 90-110 Deg. C in the plate heat exchanger and is sprayed in to the compartment of Bleacher which operated under vacuum. Here it is dried and subsequently mixed with beaching earth. The earth is automatically proportionate by the hermetic earth proportioning system.

Bleaching: Directly from the earth / carbon feed hoppers in the bleacher via a pipe located below the oil spray to prevent dust from entering the vacuum system. The earth proportioning system is operated by two automated butterfly valves with an intermediate dosing chamber in glass. The valves are sequenced by a timer in the control panels. In the bleacher which is equipped with three agitated compartments to ensure proper mixing and retention time, colour bodies, oxidizing material etc. in the oil gently absorb by the earth.

Filtration: The filtration takes place in two alternatively operating pressure leaf filters where the bleaching earth is completely removed from the oil. While one filter is in operation, the other filter is blown with the steam, in order to recover residual oil in the bleaching earth. This oil from exhaust steam is separated in the cyclone separator. After the filtration the oil is passed through one of two alternatively working security filters.

4. Continuous Deodorisation Section

The bleached oil is heated up to 100 Deg C. either by steam during start up or by deodorized oil during continuous operation in plate heat exchanger. The hot oil is mixed with citric acid before spraying into the deaerator vessel. Where dissolved air removed from oil. This vessel is also capable to level out variations in to oil flow to the plant. The deaerated oil is pumped through polishing filter to remove the solid particles if any.

The deaerated oil is further heated in two steps, first by deodorized oil in regenerative heat economizer and then by thermic fluid final oil heater to required deacidification temperature. Next the oil enters the stripper where it flows continuously over specially designed structure packing which ensures effective distillation of free fatty acids. As the oil flows down the stripper the steam strips away the volatile material from the oil at the given temperature and system pressure. The steam used for stripping of volatile material in the oil, is distributed evenly and intensively by separate spargers installed between two baffles. Finally, the oil is passed through two alternatively working polish filters before cooling in the plate heat exchanger and then sending to storage.

5. Vapours scrubbing:

The volatile matter consisting of free fatty acids and other odoriferous matter stripped from stripping section are led to vapour scrubber located outside the deodorizer column. In the scrubber the volatile material rises through the structured packing and meets liquid fats spreads from top. Vapors are condensed, cooled, and then re circulated for condensing fresh vapors. Excess distilled collected into a storage tank, whenever the high level is reached in the storage space below the scrubber. The scrubber is designed to ensure minimum carryover of fatty matter into the vacuum system.

6. Refined oil transferred to storage tanks

After the above processes the refined oil is produced which is transferred to the storage tanks meant for the storage for the storage of the edible oil before the same is packed

7. Filling station and packaging

This step involves the movement of the edible oil from the storage tank to the filling station. The filling station is equipped with the packing machine where the oil is packed into containers and packing of different sizes like 1 ltr, 5 ltr can and 15 ltr. tin etc. which are based on the market demand.

BUSINESS AND TRADE RELATED REGULATIONS

Food Safety & Standards Act, 2006 [“Food Act”]

Food Safety and Standards Act, 2006 is an integrated law that seeks to consolidate the laws relating to food and establish the Food Safety and Standards Authority of India (FSSAI).

It lay down science based standards for articles of food and regulates their manufacture, storage distribution, sale and import, to ensure availability of safe and wholesome food for human consumption and for matters connected therewith or incidental thereto.

The Food Act seeks to harmonise Indian standards with international standards like CODEX and facilitates international trade in food articles. The Act lays down general provisions for food additives and processing of food items as well.

The standards prescribed by the FSSAI include specifications for ingredients, contaminants, pesticide residue, biological hazards and labels. FSSAI also specifies procedures for accreditation of laboratories and provides advice to Central and State Government in matters relating to food safety.

Under Section 31 of the Food Act, no person may carry on any food business except under a license granted by the FSSAI. The Food Act sets forth the requirements for licensing and registering food businesses in addition to laying down the general principles for safety, responsibilities and liabilities of food business operators.

The Enforcement of the Food Act is generally facilitated by ‘state commissioners of food safety’ and other officials at local level.

Under section 51 of the Food Act, any person who manufactures sub-standard food for human consumption is liable to pay a penalty which may extend up to Rs. 5.00 lakh. The Food Act has defined sub-standard food as an article of food which doesn’t meet the specified standards but not so as to render the article of food unsafe.

The provisions of the Food Act require every distributor to be able to identify any food article by its manufacturer, and every seller by its distributor that should be registered under the Food Act and every entity in the sector is bound to initiate recall procedures if it finds that the food marketed by the entity has violated specified standards. Food business operators are required to ensure that persons in their employment do not suffer from infectious or contagious diseases. The Food Act also imposes liabilities upon manufacturers, packers, wholesalers, distributors and sellers requiring them to ensure that inter alia unsafe and misbranded products are not sold or supplied in the market.

In order to address certain specific aspects of the Food Act, the FSSAI has framed several regulations such as the following:

- Food Safety and Standards (Contaminants, Toxins and Residues) Regulations, 2011;

Shri Venkatesh Refineries Limited

- Food Safety and Standards (Food Products Standards and Food Additives) Regulations, 2011;
- Food Safety and Standards (Licensing and Registration of Food Businesses) Regulation, 2011;
- Food Safety and Standards (Packaging and Labelling) Regulations, 2011; and
- Food Safety and Standards (Prohibition And Restrictions on Sales) Regulations, 2011.
- Food Safety and Standards (Laboratory and sampling analysis) Regulations, 2011.

In addition to the six principal regulations as stated above, notified on 1st August 2011, following new regulations are notified. These include:

- a) Food Safety and Standards (Food or Health Supplements, Nutraceuticals, Foods for Special Dietary Uses, Foods for Special Medical Purpose, Functional Foods and Novel Food) Regulations, 2016
- b) Food Safety and Standards (Food Recall Procedure) Regulation, 2017
- c) Food Safety and Standards (Import) Regulation, 2017
- d) Food Safety and Standards (Approval for Non-Specified Food and Food Ingredients) Regulations, 2017.
- e) Food Safety and Standards (Organic Food) Regulation, 2017.

The Central Government has also framed the Food Safety and Standards Rules, 2011 (the “FSSR”) which have been operative since August 5, 2011. The FSSR provides the procedure for registration and licensing process for food business and lays down detailed standards for various food products. The FSSR also sets out the enforcement structure of ‘commissioner of food safety’, ‘the food safety officer’ and ‘the food analyst’ and procedures of taking extracts, seizure, sampling and analysis.

Essential Commodities Act, 1955

The Essential Commodities Act, 1955 vests Government of India with the authority to issue notifications for controlling the production, supply and distribution of certain essential commodities, which include edible oilseeds and edible oils.

The ECA was enacted in 1955, and has since been used by the Government to regulate the production, supply, and distribution of a whole host of commodities that it declares ‘essential’ in order to make them available to consumers at fair prices. Additionally, the government can also fix the minimum support price (MSP) of any packaged product that it declares an “essential commodity”. This act was modified by the Essential Commodities (Amendment) Act, 2020 as part of the 2020 Indian farm reforms.

The Amended law allow the Government of India to delist certain commodities as essential, allowing the government to regulate their supply and prices only in cases of war, famine, extraordinary price rises, or natural calamities. The commodities that have been deregulated are food items, including cereals, pulses, potato, onion, edible oilseeds, and oils. These can only be regulated in the extraordinary circumstances previously mentioned, by imposing limits on the number of stocks of such items that can be held by persons. The law states that government regulation of stocks will be based on rising prices, and can only be imposed if there is a 100% increase in retail price (in the case of horticultural produce) and a 50% increase in retail price (in the case of non-perishable agricultural food items). These restrictions will not apply to stocks of food held for public distribution in India.

Agricultural Produce (Grading and Marketing) Act, 1937 (Agmark)

The Directorate of Marketing and Inspection [DMI] enforces the Agricultural Produce (Grading and Marketing) Act, 1937. Under this Act Grade standards are prescribed for agricultural and allied commodities. These are known as Agmark standards. Grading under the provisions of this Act is voluntary. Manufacturers who comply with standards laid down by DMI are allowed to use "Agmark" labels on their products.

The Bureau of Indian Standards Act, 2016

A new Bureau of Indian standards (BIS) Act 2016, has replaced Bureau of Indian standards (BIS) Act of 1986 and was notified on 22nd March, 2016, was brought into force with effect from 12th October, 2017. The Act establishes BIS as the National Standards Body of India. The Act has enabling provisions for the Government to bring under compulsory certification regime any goods or article of any scheduled industry, process, system or service which it considers necessary in the public interest or for the protection of human, animal or plant health, safety of the environment, or prevention of unfair trade practices, or national security. Enabling provisions have also been made for making hallmarking of the precious metal articles mandatory. The new Act also allows multiple type of simplified conformity assessment schemes including self-declaration of conformity against a standard which will give simplified options to manufacturers to adhere to the standards and get certificate of conformity. The Act enables the Central Government to appoint any authority/agency, in addition to the BIS, to verify the conformity of products and services to a standard

and issue certificate of conformity. Further, there is provision for repair or recall, including product liability of the products bearing Standard Mark but not conforming to the relevant Indian Standard.

The Prevention of Food Adulteration Act, 1954 and rules thereunder

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘the Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act. The accounting policies adopted in the preparation of financial statements have been consistently applied. All assets and liabilities have been classified as current or non-current as per the company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

USE OF ESTIMATES

The preparation of financial statements is in conformity with Indian GAAP requires judgments, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known / materialized.

C) ACCOUNTING CONVENTION

The company follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern. Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Sale of goods

Shri Venkatesh Refineries Limited

Revenue is recognised when the significant risks and rewards of ownership of the goods have been passed to the buyer. Sales are disclosed net of sales tax /GST/ VAT, trade discounts and returns, as applicable. Excise duties deducted from turnover (gross) are the amounts that are included in the amount of turnover (gross) and not the entire amount of liability that arose during the year.

Income from services

Revenue from services is recognised when services have been rendered and there should be no uncertainty regarding consideration and its ultimate collection.

Interest Income

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable."

2. Property, plant & equipment

- a) Property, plant and equipment are stated as per Cost Model i.e., at cost less accumulated depreciation and impairment, if any;
- b) Costs directly attributable to acquisition are capitalized until the property, plant and equipment are ready for use, as intended by the management;
- c) Subsequent expenditures relating to property, plant and equipment are capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs & maintenance costs are recognized in the Statement of profit & Loss when incurred;
- d) The cost and related accumulated depreciated are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit or Loss. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;
- e) The Company depreciates property, plant and equipment pro-rata to the extent of depreciable amount on Straight Line Method (SLM). Depreciation is provided based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013.
- f) Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end;
- g) The adjustment for change in depreciation after the introduction of Companies act, 2013 has been done in the financial statements of FY 14-15.

3. IMPAIRMENT

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. INVENTORIES

Inventories are valued after providing for obsolescence, as follows:

- a) Raw Materials, Stores & Spare parts and Packing Material-Lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on a First-in-First-Out Method basis.
- b) Finished goods and Stock-in-Trade-Lower of cost and net realizable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity. Cost is determined on a Retail Method basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale, however due to the nature of the company the own manufactured goods are valued at a Retail Method basis on a consistent basis, however the Trading Goods are valued at the lower of Cost or Net Realisable Value.

5. RETIREMENT BENEFITS & OTHER EMPLOYEE BENEFITS

Defined-contribution and benefit plans:

All short term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees.

The Company's contribution to Provident Fund is determined based on a fixed percentage of the eligible employees' salary and charged to the Statement of Profit and Loss on accrual basis.

Revenue, expense and cash-flow items denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction.

Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for current tax is made on the basis of Minimum alternative tax (MAT) for the current accounting year in accordance with the Provisions of Section 115JB of The Income Tax Act, 1961.

Deferred tax is recognised for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

10. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

11. PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

12. CASH & CASH EQUIVALENTS

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

13. SEGMENT REPORTING

The Company's only identifiable reportable Business segment is Manufacturing and Trading of Refined Oil and Raw Oil. Further, the Company operates and controls its business activities within/from India, except export of goods. Hence disclosure of Segment wise information is not applicable under Accounting Standard - 17 "Segment Information" (AS-17)

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed).  - b. The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank; and
