SECTION III: RISK FACTORS

An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Red Herring Prospectus, particularly the “**Financial Information of the Company**” and the related notes, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on page 154, 112 and 203 respectively of this Draft Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “**Risk Factors**” on page 28 and “**Management Discussion and Analysis of Financial Condition and Results of Operations**” on page 203 of this Draft Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “**Restated Financial Statements**”.

INTERNAL RISK FACTORS

1. **Our business is capital intensive in nature. If we are unable to raise additional funds whenever required, or on terms acceptable to us, we may be required to scale down or abandon our expansion & growth plans and/or reduce capital expenditures and the size of our operations, any of which could materially and adversely affect our business, financial position and results of operations.**

We require significant amount of capital for purchasing the FRP manufacturing equipment such as FRP Pultrusion Machines, FRP Grating Machines, FRP Rod Line machines etc. and failure to obtain additional financing on terms commercially acceptable to us may adversely affect our ability to grow our business and increase/maintain our future profitability. As of February 29, 2024 and March 31, 2023, 2022 and 2021 our net fixed assets towards plant and machinery were Rs. 851.53 lakhs, Rs. 675.12 lakhs, Rs. 528.70 lakhs and Rs. 525.14 lakhs, respectively which accounts for 52.37%, 73.28%, 70.12% and 66.80% of the total net block for the respective period. As a result, we may need to incur additional indebtedness in the future to meet the requirement of our capital expenditure. Our ability

to obtain such financing on acceptable terms is dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, levels of our existing indebtedness, future financial condition, results of operations and cash flows and other factors beyond our control. However, in past the company has raised required debt and/or equity funding with substantial comfort to support the business growth, there can be no assurance that we will be able to raise additional financing on favorable terms in a timely manner or at all. If we are unable to raise additional funds whenever required, or on terms favorable/acceptable to us, we may be required to scale down or abandon our expansion & growth plans and/or reduce capital expenditures and the size of our operations, any of which could materially and adversely affect our business, financial position and results of operations.

Our capital expenditure requirements and growth strategy require continued access to significant amounts of capital on acceptable terms, as our continuous cash flows are the source for purchase of new equipment, which is directly responsible for our business growth. We cannot assure you that market conditions and other factors will permit financing through debt or equity, on terms acceptable to us or at all. We strive to maintain strong relationships with banks to increase our financing flexibility. However, we cannot assure you that our relationships with lenders will not change or that lenders will continue lending practices we are familiar with. Our lenders may implement new credit policies, adopt new pre - qualification criteria or procedures, raise interest rates or add restrictive covenants in loan agreements, some or all of which may significantly increase our financing costs, or prevent us from obtaining financings totally. As a result, our revenue growth may reduce, and our business, financial condition and results of operations may be materially and adversely affected. All of these factors may result in an increase in the amount of our borrowings and the continued increase in capital requirements may have an adverse effect on our financial condition and results of operations. For further details, kindly refer section titled “**Financial Information of the Company**” beginning on Page 154 of this Draft Red Herring Prospectus.

2. We derive a significant portion of our revenues and a portion of our expenditures from various countries outside India. Any adverse developments in these markets along with fluctuations in Exchange rates, may negatively impact our results of operations.

Our Company has diversified revenue from multiple geographical locations including export sales to various countries. Revenue from sale of products from locations outside India amounted to Rs. 9919.94 Lakhs and Rs. 9307.21 Lakhs for the period and financial year ending February 29, 2024 and March 31, 2023 respectively, and represented 56.16% & 52.38% of our revenue from sale of products, in such periods, respectively. Apart from export sales, we are also importing some portion of our purchases from outside India which amounted to Rs. 1572.20 Lakhs and Rs. 2912.81 Lakhs for the period and financial year ending February 29, 2024 and March 31, 2023 respectively, and represented 14.24% & 25.41% of our total purchases in such periods, respectively.

Our revenues from export of goods and our import purchases may decline as a result of increased competition, regulatory action, pricing pressures, fluctuations in the demand for or supply of our products, or the outbreak of an infectious disease such as COVID-19. Our failure to effectively react to these situations or to successfully introduce new products could adversely affect our business prospects, results of operations and financial condition. Further, international operations are subject to risks that are specific to each country and region in which we operate, as well as risks associated with international operations, in general. These risks include complying with changes in foreign laws, regulations and policies, including restrictions on trade, import and export license requirements, and tariffs and taxes, intellectual property enforcement issues and changes in foreign trade and investment policies.

Further, due to such export and import transactions which are in foreign currency including the US dollar, we are exposed to foreign exchange related risks also. While we make provisions for foreign exchange fluctuations, a significant or frequent fluctuation in the exchange rate between the Indian Rupee and other currencies, may adversely affect our results of operations. The exchange rate between the Indian Rupee and foreign currencies, primarily the USD, has fluctuated in the past and our results of operations have been impacted by such fluctuations in the past and may be impacted by such fluctuations in the future. For example, during times of strengthening of the Indian Rupee, we expect that our revenue from offerings overseas will generally be negatively impacted as foreign currency received will be translated into fewer Indian Rupees. However, the converse positive effect of depreciation in the Indian Rupee may not be sustained or may not show an appreciable impact in our results of operations in any given financial period due to other variables impacting our business and results of operations during the same period. Accordingly, any appreciation or depreciation of the Indian Rupee against these currencies can impact our results of operations. We may from time to time be required to make provisions for foreign exchange differences in accordance with accounting standards.

Our ability to foresee future foreign currency fluctuations is limited and due to the time gap between the accounting of sales and actual receipts, the foreign exchange rate at which the sale is recorded in the books of accounts may vary with the foreign exchange rate at which the receipt is made, thereby benefiting or affecting us negatively, depending on the appreciation or depreciation of the Rupee. We may, therefore, be exposed to risks arising from exchange rate fluctuations and we may not be able to pass on all losses on account of foreign currency fluctuations to our clients, and as a result, suffer losses on account of foreign currency fluctuations. There is no guarantee that we may be able to manage our foreign currency risk effectively or mitigate exchange exposures, at all times and our

inability may harm our results of operations and cause our results to fluctuate and/or decline. We may experience foreign exchange losses and gains in respect of transactions denominated in foreign currencies.

For further details, kindly refer section titled “*Financial Information of the Company*” beginning on Page 154 of this Draft Red Herring Prospectus.

3. Increase in the prices of raw materials and labour could have an adverse effect on our business, results of operations and financial condition.

The raw material consumption contribution is 65.28%, 68.05%, 75.65% and 61.38% of revenue from manufacturing activities for the period ended February 29, 2024 and financial year ended March 31, 2023, 2022 and 2021 respectively. We are vulnerable to the risk of rising and fluctuating prices of raw materials which are determined by demand and supply conditions in the global and Indian markets. Any unexpected price fluctuations after placement of orders, shortage, delay in delivery, quality defects, or any factors beyond our control may result in an interruption in the supply of such materials and adversely affect our business, financial performance and cash flows.

We may suffer significant cost overruns or even losses in our projects due to unanticipated cost increases resulted from a number of factors such as unavailability or unanticipated increases in the cost of raw materials, labour and stores and spares, changes in applicable taxation structures or the scope of work, delays in obtaining requisite statutory clearances and approvals, disruptions of the supply of raw materials due to factors beyond our control, unforeseen design or engineering challenges, severe weather conditions or force majeure events. If any of these risks materialize, they could adversely affect our profitability, which may in turn have an adverse effect on our overall results of operation.

Additionally, we do not enter into any long-term supply agreements with our suppliers and we purchase all these raw materials on a need basis primarily through the spot market purchase mechanism and seek to source such raw materials from diverse suppliers. We may at times also face the risks associated with compensating for or passing on increase in our cost of production on account of fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins directly or indirectly and thereby have a direct bearing on our profitability, resulting in a material adverse effect on our business, financial condition and results of operations. In the past few years, there has been a growing demand for FRP products necessitating continuing expansion of this industry. In the future, there may be industry-wide fluctuations in the supply of raw materials due to the growing demand for FRP products. We may, from time to time, experience late delivery from suppliers and may have to purchase raw materials at a higher price or with lower conversion efficiencies / specifications, which in turn may result in reduced revenues.

There can be no assurance that the current procurement efforts will be successful in ensuring an adequate supply of raw materials at viable prices to meet our production requirements. If we are unable to meet customer demand for our products or if our products are only available at a higher price because of a shortage of raw materials, we could lose customers, market share and revenue. Further, many of our competitors, that also purchase raw materials from our suppliers, may have stronger relationships as well as greater bargaining power with the suppliers. This may materially and adversely affect our business, financial condition, results of operations and cash flow.

In addition, any restrictions, either from the Central or state governments, or from countries which we import from, on the import of our raw materials or any adverse change in policies by India or other countries, in terms of tariff and non-tariff barriers, may adversely affect our business, prospects, financial condition and results of operations. There can be no assurance that such restrictions/ regulations would not be made more stringent which would consequently restrict our ability to import raw materials from other jurisdictions. Further, there can be no assurance that, under these circumstances, we will be successful in identifying alternate suppliers for raw materials or we will be able to source the raw materials at favourable terms in a timely manner. Any restriction on import of raw materials could have an adverse effect on our ability to deliver products to our customers, business and results of operations. For further details, kindly refer section titled “*Financial Information of the Company*” beginning on Page 154 of this Draft Red Herring Prospectus.

4. We are primarily dependent upon few key suppliers within limited geographical location for procurement of raw materials. Any disruption in the supply of raw materials from such selective suppliers and geographical location could have a material adverse effect on our business operations and financial conditions.

We procure a large portion of our raw materials from a few key suppliers, with whom we do not have any long-term supply contracts and therefore, we cannot assure you that we shall always have a steady supply of raw materials at prices favourable to us. For the period ending February 29, 2024 and financial year ended March 31, 2023, 2022 and 2021, purchases from our top ten suppliers amounted to Rs. 6505.15 Lakhs, Rs. 7292.40 Lakhs, Rs. 5430.39 Lakhs and Rs. 3015.32 Lakhs respectively which represented 58.92%, 63.60%, 66.70% and 59.83% of our total raw material purchases.

Further, we source major portion of our raw materials requirement indigenously. Major portion of our purchases of raw materials for the period ending February 29, 2024 and financial year ended March 31, 2023, 2022 and 2021 is from the state of Gujarat which is 49.58%, 48.05%, 53.53% and 47.80% of the total purchases of raw material, respectively, for the said period. We are also exposed to foreign exchange related risks as some portion of our expenditure is denominated in foreign currencies. Our total import purchases were Rs. 1572.20 Lakhs and Rs. 2912.81 Lakhs for the period and financial year ending February 29, 2024 and March 31, 2023 respectively, and represented 14.24% & 25.41% of our total purchases in such periods, respectively.

Inadequate supply of raw material caused either by a sudden loss of any of our existing major vendors for any reason could have a material adverse effect on our business operations and profitability. Further, any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments of Gujarat may affect continuing operations at our manufacturing unit and result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry.

Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations. There can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Any delay in the supply or delivery of raw materials to us by our suppliers in may in turn delay our process of manufacture and delivery of products to our customers and this may have an adverse effect on our business, cash flows and results of operations. Additionally, our inability to predict market conditions may result in us placing supply orders for inadequate quantities of such raw materials. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms.

5. Our Company, Directors, Promoters and Group Companies are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.

Note: The amount mentioned above may be subject to additional interest, rates or Penalties being levied by the concerned authorities for delay in making payment or otherwise.

Further, in addition to that, there could be other litigations & claims filed against the Company, Directors & Promoters which the Company may not be aware of as on the date of this Draft Red Herring Prospectus. There can be no assurance that these litigations will be decided in favour of our Company, Directors, Promoters and Group Companies, respectively, and consequently it may divert the attention of our management and Promoter and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations. For the details of the cases please refer the chapter titled “**Outstanding Litigations and Material Developments**” on page 213 of this Draft Red Herring Prospectus.

- 6. *If there are delays in setting up the Proposed manufacturing unit or if the costs of setting up and the possible time or cost overruns related to the Proposed manufacturing unit or the purchase of plant and machinery for the Proposed manufacturing unit are higher than expected, it could have a material adverse effect on our financial condition, results of operations and growth prospects.***

To expand our manufacturing capabilities, we are currently in the process of setting up a new manufacturing unit in Mehsana district of Gujarat, measuring 51,671 sq. mtr, which is owned by the company and where the entire existing set up (i.e. current manufacturing unit) will be shifted for which construction of a part of factory building is already initiated. Additionally, new product line will be started in this new manufacturing unit for which requisite machineries like Auto clave machine, Composite Rebar Machine, Carbon Fiber Pneumatic Caterpillar Pultrusion Machine etc. will be purchased and installed. Such purchase and installation of machines along with required civil construction and installation of solar power plant is to be funded from net issue proceeds of Rs. 3,557.26 Lakhs. For further details, please refer to chapter titled “*Objects of the Issue*” beginning on page 80 of this DRHP.

The completion of the setting up of the Proposed manufacturing unit is dependent on our ability to arrange finance through Net Proceeds or otherwise, the performance of external agencies which are responsible for inter alia construction of buildings, installation and commissioning of plant and machinery along with installation of Solar Power Plant. We cannot assure you that we will be able to arrange for such finance on time. Our expansion plans remain subject to the potential problems and uncertainties that construction projects face including cost overruns or delays, labour shortages, increased costs of equipment or manpower, inadequate performance of the equipment and machinery installed in our manufacturing unit, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory and other regulatory approvals, incremental pre-operating expenses, environment and ecology costs and other external factors which may not be within the control of our management.

There can be no assurance that our budgeted costs may be sufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. Further, we cannot assure you that the performance of external agencies will meet the required specifications or performance parameters. We may not be able to identify suitable replacement external agencies in a timely manner. If the performance of these agencies is inadequate in terms of the requirements, this may result in incremental cost and time overruns.

The estimated costs for setting up the Proposed manufacturing unit are based on the certificate dated June 24, 2024 given by Dinesh P. Jani, Chartered Engineers, and are based on management’s estimates and current conditions which are subject to change, owing to prospective changes in external circumstances, costs and other financial conditions.

Our return on our investment depends upon, among other things, successful implementation of our strategy, competition, demand of our products, government policies, interest rates and general economic conditions. If our return on investment does not meet our or market expectations, this could materially and adversely affect our business, cash flows, results of operations and financial condition.

- 7. *Our Company is yet to place orders for the machinery for the expansion of the proposed manufacturing unit. Any delay in placing orders or procurement of such machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.***

Our Company has received third party quotations for the machinery proposed to be installed at our proposed Manufacturing unit to be established in Ahmedabad, Gujarat. Although, we have identified the type of machinery proposed to be purchased from the Net Proceeds, we are yet to place orders for the proposed machinery approximately amounting to Rs. 1051.73 Lakhs. The cost of the proposed purchase of machinery is based on the quotations received from third party vendors and contractors and such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. For details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 80 of this Draft Red Herring Prospectus.

We cannot assure that we will be able to procure the machinery in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the Machinery or in the event the vendors are not able to provide the machinery in a timely manner, or at all, we may encounter time and cost overruns in expanding the capacity of the Manufacturing unit. Further, if we are unable to procure machinery from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the machinery which satisfy our requirements at acceptable prices. Our inability to procure the machinery at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

8. *We rely on our in-house designing and engineering team for production of FRP Products. Loss of employee(s) may have an adverse effect on the production of desired quality products which may adversely affect results of our business operations and financial condition.*

We are engaged in the business of manufacturing and supplying of Fiber Glass Reinforce Polymer Products and provide complete solution which includes conceptual design, prototype development, testing, manufacturing, logistic support, installation and after sales service.

Designing is the first step towards final production of our FRP products to make the products as per customer's specifications and requirements. We have an in-house team for designing and engineering which makes us self-reliant on all aspects of our business. We have a team of 07 engineers in designing and engineering to ensure compliance and quality standards laid down by the customers. Additionally, we have a team of 15 employees in our Research & Development department. This team focuses on addressing changing consumer trends and industry developments, developing innovative processes, and enhancing cost and operational efficiencies.

During the execution of our contracts, our design and engineering team designs the pre-engineered FRP products and on the basis of such design the final production of the products is planned. While we ensure that the quality of our design and engineering team is such that it designs the pre-engineered FRP products in the most efficient manner, however, there is no assurance that our competitors will not be able to increase the designing efficiency of pre-engineered FRP products by using latest technology. Any failure in designing of the product in the cost-efficient manner, would reduce our margins and would materially and adversely affect our profitability.

Our ability to effectively design, execute and manage contacts is crucial to our continued success. We understand that maintaining quality, minimizing costs and ensuring timely completion of our products depends largely on the skill and workmanship of our employees. As competition for qualified personnel increases, it is difficult to retain highly skilled and trained employee by any organization. Replacement of such employees is difficult and may require time to find and employ a suitable replacement. Loss of skilled employees from our designing, engineering and R&D teams may affect our ability and capability to execute projects and may also affect our growth prospects.

9. *A notable portion of our revenue is from limited number of customers, the loss of such customers, the deterioration of their financial position or prospects, or a reduction in their demand for our products could affect our business, financial position and future prospects of our Company.*

Notable portion of our revenue has been dependent upon few customers. For instance, our top ten customers for the eleven months' period ended February 29, 2024 and financial year ended March 31, 2023, 2022 and 2021, accounted for 40.61%, 40.38%, 34.02% and 39.84% of our revenue from operations for the said period. Our reliance on a selected group of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our customers, failure to negotiate favorable terms or the loss of these customers, all of which could affect financial position and future prospects of our Company. Further, we have not entered into any definitive agreements with our customers and the success of our business is dependent on maintaining good relationship with them.

There is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. The deterioration of the financial position or business prospects of these customers could reduce their requirement of our products and result in a decrease in the revenues we derive from these customers. In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfil their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be affected.

10. *Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain our historical growth rates.*

Our business has experienced significant growth in past. Our revenue from operations has increased from Rs. 7882.23 Lakhs in F.Y 2020-21 to Rs. 10833.53 Lakhs and Rs. 17938.42 Lakhs in Financial Years 2021-22 and 2022-23 respectively. This growth represents a Compound Annual Growth Rate (CAGR) of approximately 50.86% over the past three years. For further details, kindly refer section titled "**Financial Information of the Company**" beginning on Page 154 of this Draft Red Herring Prospectus

However, we acknowledge the dynamic nature of our industry and the challenges that come with sustaining such remarkable growth rates. While our past performance reflects our ability to capitalize on market opportunities, we cannot provide absolute assurance

regarding the continuous maintenance of these elevated levels of revenue growth. In the FRP products manufacturing industry, we operate competition from both organized and unorganized players from various regions in India. These competitors offer products similar to ours, potentially gaining a competitive edge in aspects such as pricing, durability, product quality, user experience, operational efficiency, timely delivery, and reliability. Keeping pace with the ever-changing technology landscape in the industry is crucial, and our ability to adapt will significantly impact our competitive standing.

Additionally, several of our strategic initiatives are currently in their nascent stages. While initial success is a possibility, the long-term success of these initiatives is not guaranteed. The inherent uncertainties in the early stages of strategic endeavours necessitate a cautious approach, and we cannot assure sustained success without potential challenges and adjustments along the way. We remain vigilant and adaptable, ready to navigate the evolving landscape and optimize our strategies for long-term success.

11. Changes in technology render our current fleet of equipment obsolete and require us to make substantial capital investments.

Our fleet of equipment for production of FRP products are subject to continuous change and development. Our inventory of existing equipment becomes obsolete on introduction of newer and better technologies. We must continuously update our existing equipment in order to meet our clients' requirements and remain competitive in the market. In addition, rapid and frequent technological and market demand changes often render our equipment obsolete and result in requirements for additional and substantial capital expenditures and/or significant write downs of our assets. The cost of upgrading our existing equipment could be significant. Our inability to successfully adopt new technologies in a cost effective and a timely manner could increase our costs and adversely affect our competitive position in terms of pricing or quality of service. Further, if we fail to anticipate or respond adequately to our clients' changing requirements or keep pace with the latest technological developments, our business, prospects, financial condition and results of operations may be materially and adversely affected.

12. Our Business is dependent on our manufacturing unit. Any disruption, breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our manufacturing unit, may have a material adverse effect on our business, results of operations, financial condition and cash flows.

We have a manufacturing unit at Changodar, Ahmedabad in Gujarat, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe climate conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair breakdown of machinery in a timely manner or at all, our operations may need to be suspended until we procure new machinery to replace the same. In addition, we may be required to carry out planned shutdowns of our manufacturing unit for cleaning and maintenance, statutory inspections and testing, or may shut down certain manufacturing unit for capacity expansion and equipment upgrades.

Obsolescence, destruction, theft or breakdowns of our machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect our business, cash flows, financial condition and results of operations.

Although we have not experienced any significant disruptions at our manufacturing unit in the past, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shut-down of our operations for limited time or under-utilization of our manufacturing unit, which in turn may have an adverse effect on our business, results of operations and financial condition.

13. Our operating results could be materially harmed if we are unable to accurately forecast customer demand for our products or manage our inventory.

We strive to keep optimum inventory to control our costs and working capital requirements. To maintain an optimal inventory, we monitor our inventory levels based on our projections of demand as well as on a real-time basis, hence the balance of the inventory can be maintained, but we need to keep a strict check on the requirement. However, unavailability of products, due to high demand or inaccurate forecast, may result in loss of sales and adversely affect our customer relationships. We manage our inventory by constantly monitoring and tracking our current inventory levels, while keeping a small portion of reserve stock, based on our forecast customer demand. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. Inventory levels in excess of customer demand may result in inventory write-offs and the sale of excess inventory at

discounted prices, which may cause our gross margin to suffer and could impair the strength of our brand. On the other hand, in the case we experience shortage of products, we may be unable to meet the demand for our products, and our business and operating results could be adversely affected.

Therefore, an inaccurate forecast can also result in an over-supply of products, which may increase inventory costs, negatively impact cash flow, reduce the quality of inventory, shrinkages and ultimately lead to reduction in margins. Further, some of our products can become obsolete in terms of designs, and any inventory that we hold with respect to old designs may not get sold or replaced by our suppliers. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition. During the stub period ended on February 29, 2024 and Fiscal 2023, 2022 and 2021 our inventories were Rs 2284.50 lakhs, Rs. 1912.30 lakhs, Rs 2169.54 lakhs and Rs 1127.83 lakhs. For details regarding inventories, please refer to section titled “**Financial information of the company**” beginning on page 154 of the Draft Red Herring Prospectus.

14. We depend on our customers and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.

Our business operations are dependent on our customers and the loss of our customers may adversely affect our sales and consequently our business and results of operations. To effectively manage our customers and trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. Our Company had written off bad debts on account of non-recoverability of the dues from the Debtors which amounted to Rs. 162.60 lakhs in F.Y. 2022-23 and Rs. 153.66 lakhs in F.Y. 2020-21.

During the stub period ended on February 29, 2024 and FY 2022-23, FY 2021-22 and FY 2020-21, our trade receivables were Rs. 4496.82 lakhs, Rs. 3107.66 lakhs, Rs. 2071.73 lakhs and Rs. 1905.46 lakhs, respectively. Our working capital position also depends on the period of time taken by customers to certify the invoice issued by us and release payment. All of these factors may result in an increase in the amount of our receivables. A liquidity crunch may also result in case of increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability. We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. For details regarding trade receivables, please refer to section titled “**Financial information of the company**” beginning on page 154 of the Draft Red Herring Prospectus.

15. We do not own the registered office & manufacturing unit and marketing office from which we carry out our business activities. In case of nonrenewal of rent agreements or any dispute in relation to usage of the said premise, our business and results of operations can be adversely affected.

Our registered office & manufacturing unit and marketing office, from which we carry out our business activities, are being taken by us on rent. Even though we currently are in process of setting up a new manufacturing unit in Mehsana district of Gujarat, which will be owned by the company and where the entire current set up will be shifted in near future, yet in the event of termination/non-renewal of said agreements till then, we may be required to vacate the said premises which may cause disruption in our inventory management, corporate affairs and business and impede our effective operations which could have a temporarily impact on our business operations until we get suitable alternative premises. For details on the duration of existing rent/lease agreements for our premises, please refer to the section titled “**Our Business**” beginning on page 112 of this Draft Red Herring Prospectus.

Until completion of proposed manufacturing unit, there can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favourable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our manufacturing operations which could materially and adversely affect our business, financial condition and results of operations.

16. We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.

Quality of our product is very important for our customers and their brands equity. All our products go through various quality checks at various stages. We supply FRP products covering a variety of applications for the industrial segments each of which have different

product specifications. Our Company is committed to provide quality products to our customers and in this relation has also received quality certification i.e. ISO 9001:2015 for our products. Our company is also equipped with Universal Testing Machine, Muffle Furnace Machine and other equipments to check the quality of our products as per the the specification of our customers. Our Company ensures that its products are tested for various application tests such as sample test, performance, durability, product safety etc., in line with applicable standards. Failure of our products to meet prescribed quality standards may result in rejection and reworking and replacement of product. Any failure on our part to successfully maintain quality standards for our products may affect our business and operations.

17. Under-utilization of our manufacturing capacities and an inability to effectively utilize our existing manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing unit as well as on the market demand of the products sold by us. Among others, the capacity utilization also depends upon the availability of raw materials, labour, industry/ market conditions and procurement practice followed by our customers. For the period ending February 29, 2024 and in Fiscals 2023, 2022 and 2021, our overall capacity utilization is detailed below:

Particulars	FY 2020-21	FY 2021-22	FY 2022-23	(In '000)
				For period ended February 29, 2024*
Installed Capacity (KG)	14549.68	14549.68	16503.37	17274.56
Actual Production (KG)	4570.38	6329.71	8905.96	10592.08
Capacity Utilization (in %)	31.41%	43.50%	53.96%	61.32%

*For 11 Month Period

In the event we are unable to achieve considerable capacity utilization of our current manufacturing unit, it would result in operational inefficiencies which could have a material adverse effect on our business, results, financial condition and future prospects. Under-utilization of our manufacturing capabilities over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance.

18. Our Group Company i.e. Chamak Polymers Private Limited operate in the similar line of business as us, which may lead to conflict of interest.

Our Group company i.e. Chamak Polymers Private Limited, is in the similar line of business as of our Company. Hence, we may have to compete with our Group Company for business, which may impact our business, financial condition and results of operations. We cannot assure that our Promoters who have common interest in said company will not favour the interest of said company. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and this group company in circumstances where our respective interests' conflict. In cases of conflict, our Promoter may favour this company and there can be no assurance that our Promoters or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours.

However, our Company will ensure necessary procedures and practices as permitted by laws and regulatory guidelines to address situations of conflict of interest as and when they arise. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations. For further details, see "Our Group Companies" and Note 26 - Related Party Transactions" under Section titled "Financial Information of the Company" on page 222 and 189 respectively of this Draft Red Herring Prospectus.

19. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.

Our operations are subject to accidents which are inherent to any business such as risks of employee accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including accidents that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environment. We have taken New India Bharat Laghu Udyam Suraksha Policy from The New India Assurance Co. Ltd. for our Registered office & manufacturing unit which provide insurance against loss from fire, explosion, lighting, earthquake, volcanic eruptions, riots, strike, malicious damage etc. We have also taken Marine Cargo Open Policy Insurance from Tata AIG which covers expenses and financial liabilities that are incurred in the transportation of goods and other items along with various Vehicle Insurance policies, Group personal Accident policy, Money Insurance, Directors & Officers Liability Insurance, Comprehensive General Liability Insurance, Contractor All Risk Insurance Policy and Employees compensation insurance policy. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages

suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

20. *Our Group Company had incurred losses and had negative net worth in past and any operating losses in the future could adversely affect the results of operations and financial conditions of our group company.*

Our Group Company i.e. Chamak Polymers Private Limited, incorporated in October 1991, had incurred loss in F.Y 2020-21, 2021-22 and 2022-23 for an amount of Rs. 202.26 Lakhs, Rs. 65.09 Lakhs and Rs. 22.99 Lakhs, respectively and had negative net worth in the said periods amounting to Rs. 68.11 Lakhs, Rs. 133.19 Lakhs and Rs.156.18 Lakhs, respectively. Any operating losses could adversely affect the overall operations of the group and financial conditions and also divert the attention of the management and promoter towards the group company which could have an adverse effect on our operations and financials. For more information, regarding the Company, please refer chapter titled “**Our Group Companies**” beginning on page 222 of this Draft Red Herring Prospectus.

21. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations.*

We may encounter problems in executing the orders in relation to our products or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customer’s discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, cancellation, execution difficulty, payment postponement or payment default with regard to the orders placed with us, or disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. In the ordinary course of business, we extend credit to our customers. Our results of operations and profitability depend on the creditworthiness of our customers. Certain of these customers may have weak credit histories and we cannot be assured that these counterparties will always be able to pay us in a timely fashion, or at all. Any adverse change in the financial condition of our customers may adversely affect their ability to make payments to us. Default or delays in payments by a significant portion of our customers may have an adverse effect on cash flows, results of operations and financial condition.

22. *We may be subject to risks associated with product warranty. In case any product warranty getting materialized due to product defect, we may be subject to additional cost, product liability claims or loss of future purchase orders from customers which may affect our business and results of operations.*

We are subject to risks and costs associated with product warranties and supply of defective products within the warranty periods for some of our products. We usually provide warranty against manufacturing defects on our products, other than for physical damages during transit. Any defects in the finished products in future may result in invocation of such warranties issued by us and may require repair or replacement resulting in additional costs to the Company. Further, apart from the additional cost relating to repair and replacement, our company may be subjected to product liability claims. There can be no assurance that we will be able to successfully defend or settle such claims and lawsuits against defective products. Multiple instances of manufacturing defects in our products or any product liability claim against us could generate adverse publicity, leading to a loss of reputation, customers and/or increase in our costs, thereby materially and adversely affecting our reputation, business, results of operations, financial condition and cash flows.

23. *We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained requisite permits and licenses which are adequate to run our business, however we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

Also, our Company is in the process of making application for change in name in all the permits, licenses and approvals, which are under Company's former name. Further, Company has applied for renewal of No Objection Certificate to Abstract Ground Water (NOCAP) Under Gujarat State Water Policy-2015, on January 21, 2024, bearing application number 21-4/6678/GJ/IND/2020 with department of Water Resources, River Development and Ganga Rejuvenation Central Ground Water Authority. The current status of Application is "In Process". For details regarding pending approvals, please refer to section titled "**Government and Other Approvals**" beginning on page 217 of the Draft Red Herring Prospectus. There can be no assurance that the relevant authorities will issue or renew these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

24. We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realisation of the price for our product, which may adversely affect our business operation and financial condition.

The market for our products is competitive on account of existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, sales network, pricing and timely delivery. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offer their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

We operate in a rapidly consolidating industry. The strength of combined companies could affect our competitive position in all of our business areas. Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

25. Failure to protect our intellectual property rights may adversely affect our competitive business position, financial condition and profitability.

Presently, our Company is using copyright & logo  which is registered under the Deputy Registrar of Copyright and Trade Marks Act, 1999. Any other vendor in the similar line of business as ours may use the above-mentioned trademark/copyright and we may have a lesser recourse to initiate legal proceedings to protect our brand name. In the event of any opposition by third parties or if any injunctive or other adverse order is issued against us in respect of our trademark/copyright, we may not be able to use such intellectual property or avail the legal protection or prevent unauthorized use of such trademark/ copyright by third parties, which may adversely affect our goodwill and business. Further, we may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects. In case we are unable to protect our trademark/copyright from any unauthorized use, our business revenues and profitability may be impacted.

26. Compliance with and changes in safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.

Due to the nature of our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labour, workplace and related law and regulations. We are also subject to environmental laws and regulations, including but not limited to:

- Environment (Protection) Act, 1986
- Air (Prevention and Control of Pollution) Act, 1981
- Water (Prevention and Control of Pollution) Act, 1974
- Hazardous Waste Management & Handling Rules, 2008
- The Indian Boilers Act, 1923
- Other regulations promulgated by the Ministry of Environment and Forests and the Pollution Control Boards of the state of Gujarat

which govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from the operations of our business. The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and management time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations

27. We are heavily dependent on our Promoter and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Promoter and Key managerial personnel, particularly Chirag Chandulal Patel, Pankaj Shantilal Dadhaniya and Ravi Pankajkumar Patel. We depend significantly on them for executing our day-to-day activities. The loss of any of our Promoter or Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section **“Our Management”** on page 133 of this Draft Red Herring Prospectus.

28. Excessive dependence on HDFC Bank Limited and Yes Bank Limited in respect of loan facilities obtained by our Company.

Our company has been sanctioned credit facilities by HDFC Bank Limited and Yes Bank Limited and the Company is dependent on such facility for meeting its working capital requirements and other funding requirements. Any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. At the same time this may result into difficulty in arranging for funds for re-payment and may also adversely affect the financial position of the Company. For further details regarding loans availed by our Company, please refer **“Statement of Financial Indebtedness”** on page 199 of this Draft Red Herring Prospectus.

29. We have in the past entered into related party transactions and may continue to do so in the future.

In the ordinary course of business, we have entered into transactions with certain related parties in the past and may continue to do so in future. We have entered into various transactions with our Directors/ Promoters, Promoter Group members and group companies. These transactions, interalia include, rent, interest, dividend, remuneration, purchase of immovable property, loans and advances, salary, sales, purchases, etc. For details, please refer to **“Note-26 Related Party Transactions”** under Section titled **“Financial Information of the Company”** on page 189 of this Draft Red Herring Prospectus. Our Company has entered such transactions due to easy proximity and quick execution on arms-length price in compliance with provisions of Companies Act 2013 and other applicable laws. Although all related-party transactions that we may enter into in the future are subject to approval by Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

30. Our Contingent Liability and Commitments could affect our financial position.

As on February 29, 2024, we had Contingent Liability of Rs. 781.31 lakhs, which have not been provided in our financial statements and which could affect our financial position. For further details, please refer to **Note-25 – Contingent Liabilities** in the chapter titled **“Financial Information of the Company”** on page 188 of this Draft Red Herring Prospectus.

31. *If we are not able to successfully manage our growth, our business and results of operations may be adversely affected.*

Continued growth of our business and customer base requires us to expand our product portfolio, strengthen our product quality, expand and enhance our sales channels, better manage our supply chain, upgrade our information systems and technologies and devote other resources to our business expansions, among others. As we continue to grow, managing our business will become more complicated as we develop a wider product mix, some of which we may have less experience in. In addition, as we increase our product offerings, we will need to work with a larger number of business partners and maintain and expand mutually beneficial relationships with our existing and new business partners. Our inability to manage the expansion of our products range, customer base and manufacturing capacities, and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition.

We cannot assure you that we will be able to effectively manage our growth, that our current personnel, infrastructure, systems, procedures and controls or any measures to enhance them will be adequate and successful to support our expanding operations or that our strategies and new business initiatives will be executed successfully. Our failure to manage our anticipated growth effectively could reduce our ability to execute our business strategies, recruit and retain personnel, innovate, and manage costs all of which could adversely affect our business, results of operations, cash flows and financial condition. In addition, the availability of funds plays a crucial role for growth and expansion of the business. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. Any downgrade in our credit ratings could increase our borrowing costs and adversely affect our access to capital. Further, in case we decide to raise additional funds through the issuance of equity or equity linked instruments, the interests of our shareholders may be diluted. Further, if we decide to meet our capital requirements through debt financing, our interest obligations shall increase and we may be subject to additional restrictive covenants under our respective financing arrangements. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations and financial condition could be adversely affected.

32. *Adverse publicity regarding our products could negatively impact us.*

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

33. *The average cost of acquisition of Equity Shares by our Promoters, is lower than the face value of Equity Share.*

The average cost of acquisition of Equity Shares of our Promoters are lower than the face value of Equity Shares i.e. ₹ 10/-. For further details regarding the average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares of our Promoters in our Company, please see Chapter titled “**Capital Structure**” beginning on page 65 of this Draft Red Herring Prospectus.

34. *We have issued Equity Shares in the last 12 months at a price which could be lower than the Issue Price.*

Our Company has during the preceding one year from the date of this Draft Red Herring Prospectus has made below mentioned allotments which were at a price lower than the Issue Price.

- Bonus issue of 1,09,65,500 shares of face value of Rs. 10/- each was made on May 02, 2024 in the ratio of 7:1 i.e., 7 (Seven) Equity shares of face value of Rs. 10/- each for every 1 (One) Equity shares of face value of Rs. 10/- each.

For details, please refer to section titled “**Capital Structure**” on page 65 of this Draft Red Herring Prospectus.

35. *We may be subject to labour unrest, operating risks, slowdowns, increased wage costs, and shut-downs.*

Our manufacturing activities are labour intensive and consequently our success depends upon maintaining good relations with our workforce. As of April 30, 2024, we had 768 employees including contractual labour. India has stringent labour legislations that protect the interests of workers, including legislation that set forth detailed procedures for the establishment of unions, dispute resolution and employee removal, and legislations that imposes certain financial obligations on employers upon retrenchment. Our employees are not unionized currently. However, there is no assurance that our employees will not seek unionization in the future. In the event that employees at our manufacturing unit take any steps to unionise, it may become difficult for us to maintain flexible labour policies, and may increase our costs and adversely affect our business.

Further, our business operations, specifically our processing manufacturing unit are subject to certain operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence and natural disasters.

Any strikes or lock-outs, work stoppages, slowdowns, shut downs, supply interruptions or costs or other factors beyond our control, may disrupt our operations and could negatively impact our financial performance or financial condition. Additionally, our inability to recruit employees, in particular skilled employees and retain our current workforce could have a material adverse effect on our business, financial condition and profitability. There can be no assurance that we will not experience slowdowns or shutdowns in the manner described above, or in any other manner, in the future, for reasons which are beyond our control. Any slowdown or shutdown will adversely impact our results of operations, market share and financial condition.

36. *Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.*

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a need basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

37. *The Promoters (including Promoter Group) and Directors hold almost 100% of the Equity Shares of our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

Our Promoter and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company or their relatives, dividend entitlement, or loans advanced by them to the Company, and benefits deriving from the directorship in our Company. There can be no assurance that our Promoter will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. For further information, please refer to the chapters/section titled “*Our Business*”, “*Our Promoter and Promoter Group*” and “*Note 26 - Related Party Transactions*”, beginning on pages 112, 147 and 189 respectively of this Draft Red Herring Prospectus.

38. *We have incurred significant indebtedness which exposes us to various risks which may have an adverse-effect on our business and results of operations*

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As February 29, 2024, our total outstanding indebtedness was Rs. 1,204.56 lakhs.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “*Statement of Financial Indebtedness*” on page 199 of this Draft Red Herring Prospectus.

39. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue price is based on numerous factors. For further information, see the chapter titled “**Basis for Issue Price**” beginning on page 89 of this Draft Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market

price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. The factors that could affect our share price are:

- Variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

40. *Our operations are dependent on a significant number of contract labour and an inability to access adequate labour at reasonable costs at our sites across India may adversely affect our business prospects and results of operations.*

Our operations as a manufacturer of FRP products are significantly dependent on access to a large pool of contract labour for the execution of our work orders. The number of labourers employed by us varies from time to time based on the nature and extent of work we are involved in. Our dependence on such contract labour may result in significant risks for our operations, relating to the availability and skill of such contract labourers, as well as contingencies affecting availability of such contract labour during peak periods in labour intensive sectors such as ours. There can be no assurance that we will have adequate access to workmen at reasonable rates and in the areas in which we execute our work orders. As a result, we may be required to incur additional costs to ensure timely execution of our work orders.

41. *Our Company may not be successful in penetrating new export markets.*

Expansion into new export markets subjects us to various challenges, including those relating to our lack of familiarity with the culture and economic conditions of these new regions, language barriers, difficulties in staffing and managing such operations and the lack of reputation in such regions. In addition, the risks involved in entering new geographic markets and expanding operations, may be higher than expected, and we may face significant competition in such markets. By expanding into new geographical regions, we could be subject to additional risks associated with establishing and conducting operations, including compliance with a wide range of laws, regulations and practices; exposure to other government actions; and political, economic and social instability.

42. *Loans availed by Our Company has been secured on personal guarantees of our Director. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees provided by our Directors.*

Our Promoters & Directors, i.e. Chirag Chandulal Patel, Dilipkumar Ratilal Patel, Pankaj Shantilal Dadhaniya and Ravi Pankajkumar Patel have provided corporate/personal guarantee to secure a significant portion of our existing borrowings taken from the banks and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal/corporate guarantees provided by the aforesaid may be invoked which could negatively impact their reputation and net worth. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “*Statement of Financial Indebtedness*” on page 199 of this Draft Red Herring Prospectus.

43. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

44. *Our lenders have charge over immovable and movable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over movable and immovable properties in respect of financial facilities availed by us from HDFC Bank Limited and Yes Bank Limited. We have been extended such loan against hypothecation of certain movable and immovable properties. For further information on the financing and loan agreements along with the total amounts outstanding and the details of the financial facilities, please refer to chapter “*Statement of Financial Indebtedness*” beginning on page 199 of this Draft Red Herring Prospectus.

45. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

46. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement for setting up of proposed manufacturing unit and purchase of plant and machinery, as detailed in the section titled "*Objects of the Issue*" is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled "*Objects of the Issue*" beginning on page 80 of this Draft Red Herring Prospectus.

47. We may not be able to sustain effective implementation of our business and growth strategy.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

48. We are subject to the restrictive covenants of banks in respect of the Loans/ Credit Limits and other banking facilities availed from them.

Our financing arrangements contain restrictive covenants whereby we are required to obtain approval from our lender, regarding, among other things such as major changes in share capital, management, changes in fixed assets, creation of any other charge, undertake any guarantee obligation etc. There can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see "*Statement of Financial Indebtedness*" on page 199 of the Draft Red Herring Prospectus.

49. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

We specialize in the manufacture and supply of FRP products which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, ESI etc. Any demand or penalty raised by the concerned authority in future for any previous years or current year will affect the financial position of the Company.

50. The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled "*Objects of the Issue*". The fund requirement and deployment, as mentioned in the "*Objects of the Issue*" on page 80 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter "*Objects of the Issue*" is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter "*Objects of the Issue*" will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on

our expected revenues and earnings.

51. Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Draft Red Herring Prospectus. For further information, see the section titled “**Our Business**” on page 112 of this Draft Red Herring Prospectus.

52. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “**Dividend Policy**” on page 153 of the Draft Red Herring Prospectus.

53. The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

54. We are exposed to the risks of malfunctions or disruptions of information technology systems

We depend on information technology systems and accounting systems to support our business processes, including designing, planning, execution, procurement, inventory management, quality control, product costing, human resources and finance. Although these technology initiatives are intended to increase productivity and operating efficiencies, they may not achieve such intended results. These systems may be potentially vulnerable to outages due to fire, floods, power loss, telecommunications failures, natural disasters, computer viruses or malware, break-ins and similar events. Effective response to such disruptions or malfunctions will require effort and diligence on the part of our third-party distribution partners and employees to avoid any adverse effect to our information technology systems.

55. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

56. Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

Our promoter along with the promoter group will continue to hold majority of the Equity share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

57. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuance by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Offer, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

58. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.

These facts and other statistics include the facts and statistics included in the chapter titled "**Industry Overview**" beginning on page 96 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

59. Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

60. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

61. QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Issue Closing Date.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Issue within three (3) Working Days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement

of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing.

Retail Individual Investors can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Issue within three Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS

62. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries.

63. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

64. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by center or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including

the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

65. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter “**Government and Other Approvals**” on page 217 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax (“**GST**”) regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

66. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE’s benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

67. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Famine, War, Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, famine, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Our operations may be adversely affected by natural disasters and/or severe weather conditions, which can result in damage to our seeds inventory and hamper our productivity and may slow down our business operations temporarily or any other factor, which can adversely affect agriculture market in which we operate. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

In addition, India has witnessed local civil disturbances in recent years, in particular communal violence across ethnic or communal lines involving conflicts, riots and other forms of violence between communities of different religious faith or ethnic origins, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

68. *If certain labour laws become applicable to us, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for

dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

69. *Our performance is linked to the stability of policies and the political situation in India.*

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse affect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

70. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

71. *Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.*

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or man-made disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavourable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

72. *Changing regulations in India could lead to new compliance requirements that are uncertain.*

The regulatory environment in which we operate is evolving and is subject to change. The Government of India may implement new laws or other regulations that could affect the logistics industry or the sectors we serve, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Any such changes and the related uncertainties with respect to the implementation or change in the legal framework may have a material adverse effect on our business, financial condition and results of operations.

73. *Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption

from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. ANNEXURE TO THE STATEMENT OF SPECIAL TAX BENEFITS

The information provided below sets out the special tax benefits available to the Company and the Equity Shareholders under the Income Tax Act, 1961 presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

A. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE COMPANY:

- The Company is not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

B. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE SHAREHOLDERS:

- The Shareholders of the Company are not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

NOTES:

1. The above Annexure of special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
2. The above Annexure covers only the special tax benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This Annexure also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
3. The above Annexure of special tax benefits is as per the current direct tax laws relevant for the assessment year 2024-25. Several of these benefits are dependent on the Company or its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
4. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
5. A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 ('the Amendment Act, 2019') with effect from Financial Year 2019-20 granting an option to domestic companies to compute corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and cess of 4%), provided such companies do not avail specified exemptions/ incentives. The option under section 115BAA of the Act once exercised cannot be subsequently withdrawn for any future financial year. The Amendment Act, 2019 further provides that domestic companies availing such option will not be required to pay Minimum Alternate Tax ('MAT') under Section 115JB. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available.

In such a case, the Company is not allowed to claim any of the following deductions/ exemptions under the Act: -

- ✓ Deduction under the provisions of Section 10AA.

INDUSTRY OVERVIEW

WORLD ECONOMIC OUTLOOK

Economic activity was surprisingly resilient through the global disinflation of 2022–23. As global inflation descended from its mid-2022 peak, economic activity grew steadily, defying warnings of stagflation and global recession. Growth in employment and incomes held steady, reflecting supportive demand developments— including greater-than-expected government spending and household consumption—and a supply-side expansion amid, notably, an unanticipated boost to labor force participation. The unexpected economic resilience, despite significant central bank interest rate hikes aimed at restoring price stability, also reflects the ability of households in major advanced economies to draw on substantial savings accumulated during the pandemic.

Global growth, estimated at 3.2 percent in 2023, is projected to continue at the same pace in 2024 and 2025. The forecast for 2024 is revised up by 0.1 percentage point from the January 2024 World Economic Outlook (WEO) Update, and by 0.3 percentage point from the October 2023 WEO. The pace of expansion is low by historical standards, owing to both near-term factors, such as still-high borrowing costs and withdrawal of fiscal support, and longer-term effects from the COVID-19 pandemic and Russia’s invasion of Ukraine; weak growth in productivity; and increasing geoeconomic fragmentation. Global headline inflation is expected to fall from an annual average of 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025, with advanced economies returning to their inflation targets sooner than emerging market and developing economies. The latest forecast for global growth five years from now—at 3.1 percent—is at its lowest in decades. The pace of convergence toward higher living standards for middle- and lower-income countries has slowed, implying a persistence in global economic disparities.

The Outlook: Steady Growth and Disinflation

Latest projections are for the global economy to continue growing at a similar pace as in 2023 during 2024–25 and for global headline and core inflation to decline steadily. There is little change in the forecast for global growth since the January 2024 WEO Update, with some adjustments for major economies, including a further strengthening in the projection for the United States, offset by modest downward revisions across several other economies. The forecast for global growth remains higher, however, than in the October 2023 WEO. The outlook for inflation is broadly similar to that in the October 2023 WEO, with a downward revision for advanced economies, offset by an upward revision for emerging market and developing economies. Medium-term prospects for growth in world output and trade remain the lowest in decades, with the pace of convergence toward higher living standards slowing for middle- and lower-income countries.

The baseline forecasts for the global economy are predicated on a number of projections for global commodity prices, interest rates, and fiscal policies

Monetary and Fiscal Policy Projections

Source: IMF staff calculations

- **Commodity price projections:** As explained in the Commodity Special Feature in this chapter, prices of fuel commodities are projected to fall in 2024 by, on average, 9.7 percent, with oil prices falling by about 2.5 percent. The decreases reflect abundant spare capacity and strong non-OPEC+ (Organization of the Petroleum Exporting Countries plus selected nonmember countries, including Russia) supply growth. Coal and natural gas prices are expected to continue declining from their earlier peaks, by 25.1 percent for coal and 32.6 percent for natural gas in 2024, with the gas market becoming

increasingly balanced on account of new supply, dampened demand, and high storage levels. The forecast for nonfuel commodity prices is broadly stable in 2024, with prices for base metals expected to fall by 1.8 percent, on account of weaker industrial activity in Europe and China. Food commodity prices are predicted to decline by 2.2 percent in 2024. Compared with those in the January 2024 WEO Update, forecasts for food prices have been revised slightly downward, driven by expectations of abundant global supplies for wheat and maize.

- *Monetary policy projections:* With inflation projected to continue declining toward targets and longer-term inflation expectations remaining anchored, policy rates of central banks in major advanced economies are generally expected to start declining in the second half of 2024. Among major central banks, by the fourth quarter of 2024, the Federal Reserve's policy rate is expected to have declined from its current level of about 5.4 percent to 4.6 percent, the Bank of England to have reduced its policy rate from about 5.3 percent to 4.8 percent, and the European Central Bank to have reduced its short-term rate from about 4.0 percent to 3.3 percent. For Japan, policy rates are projected to rise gradually, reflecting growing confidence that inflation will sustainably converge to target over the medium term despite Japan's history of deflation.
- *Fiscal policy projections:* Governments in advanced economies are expected to tighten fiscal policy in 2024 (Figure 1.13) and, to a lesser extent, in 2025–26. Among major advanced economies, the structural fiscal-balance-to-GDP ratio is expected to rise by 1.9 percentage points in the United States and by 0.8 percentage point in the euro area in 2024. In emerging market and developing economies, the projected fiscal stance is expected to be, on average, broadly neutral in 2024, with a tightening of about 0.2 percentage point projected for 2025.

Growth Forecast for Emerging Market and Developing Economies

In emerging market and developing economies, growth is expected to be stable at 4.2 percent in 2024 and 2025, with a moderation in emerging and developing Asia offset mainly by rising growth for economies in the Middle East and Central Asia and for sub-Saharan Africa. Low-income developing countries are expected to experience gradually increasing growth, from 4.0 percent in 2023 to 4.7 percent in 2024 and 5.2 percent in 2025, as some constraints on near-term growth ease.

World Trade Outlook: Stable, in Line with Output

World trade growth is projected at 3.0 percent in 2024 and 3.3 percent in 2025, with revisions of a 0.3 percentage point decrease for 2024 and 2025 compared with January 2024 projections. Trade growth is expected to remain below its historical (2000–19) annual average growth rate of 4.9 percent over the medium term, at 3.2 percent in 2029. This projection implies, in the context of the relatively low outlook for economic growth, a ratio of total world trade to GDP (in current dollars) that averages 57 percent over the next five years, broadly in line with the evolution in trade since the global financial crisis.

Global Trade Outlook: Stable
(Percent of GDP)

Source: IMF staff calculations

Even as world trade-to-GDP ratios remain relatively stable, significant shifts in trade patterns are taking place, with increasing fractures along geopolitical lines, especially since the start of the war in Ukraine in February 2022. IMF staff analysis indicates that growth in trade flows between geopolitical blocs has declined significantly since then compared with growth of trade within blocs.

THE INDIAN ECONOMY: A REVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024. Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments-

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- As of April 12, 2024, India's foreign exchange reserves stood at US\$ 643.162 billion.
- Merchandise exports in March 2024 stood at US\$ 41.68 billion, with total merchandise exports of US\$ 437.06 billion during the period of April 2023 to March 2024.
- In March 2024, the gross Goods and Services Tax (GST) stood at second highest monthly revenue collection at Rs.1.78 lakh crore (US\$ 21.35 billion), of which CGST is Rs. 34,532 crore (US\$ 4.14 billion), SGST is Rs. 43,746 crore (US\$ 5.25 billion).
- In February 2024, the overall IIP (Index of Industrial Production) stood at 147.2. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 139.6, 144.5 and 187.1, respectively, in February 2024.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 8.06 billion) in India during January-April 2024.

Road Ahead-

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12

billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

MANUFACTURING SECTOR IN INDIA:

INTRODUCTION

Manufacturing is emerging as an integral pillar in the country's economic growth, thanks to the performance of key sectors like automotive, engineering, chemicals, pharmaceuticals, and consumer durables. The Indian manufacturing industry generated 16-17% of India's GDP pre-pandemic and is projected to be one of the fastest growing sectors.

The machine tool industry was literally the nuts and bolts of the manufacturing industry in India. Today, technology has stimulated innovation with digital transformation a key aspect in gaining an edge in this highly competitive market.

Technology has today encouraged creativity, with digital transformation being a critical element in gaining an advantage in this increasingly competitive industry. The Indian manufacturing sector is steadily moving toward more automated and process-driven manufacturing, which is projected to improve efficiency and enhance productivity.

India has the capacity to export goods worth US\$ 1 trillion by 2030 and is on the road to becoming a major global manufacturing hub. With 17% of the nation's GDP and over 27.3 million workers, the manufacturing sector plays a significant role in the Indian economy. Through the implementation of different programmes and policies, the Indian government hopes to have 25% of the economy's output come from manufacturing by 2025.

India now has the physical and digital infrastructure to raise the share of the manufacturing sector in the economy and make a realistic bid to be an important player in global supply chains.

A globally competitive manufacturing sector is India's greatest potential to drive economic growth and job creation this decade. Due to factors like power growth, long-term employment prospects, and skill routes for millions of people, India has a significant potential to engage in international markets. Several factors contribute to their potential. First off, these value chains are well positioned to benefit from India's advantages in terms of raw materials, industrial expertise, and entrepreneurship.

Second, they can take advantage of four market opportunities: expanding exports, localising imports, internal demand, and contract manufacturing. With digital transformation being a crucial component in achieving an advantage in this fiercely competitive industry, technology has today sparked creativity. Manufacturing sector in India is gradually shifting to a more automated and process driven manufacturing which is expected to increase the efficiency and boost production of the manufacturing industry.

India is gradually progressing on the road to Industry 4.0 through the Government of India's initiatives like the National Manufacturing Policy which aims to increase the share of manufacturing in GDP to 25 percent by 2025 and the PLI scheme for manufacturing which was launched in 2022 to develop the core manufacturing sector at par with global manufacturing standards.

India is planning to offer incentives of up to Rs. 18,000 crore (US\$ 2.2 billion) to spur local manufacturing in six new sectors including chemicals, shipping containers, and inputs for vaccines.

India's mobile phone manufacturing industry anticipates creating 150,000 to 250,000 direct and indirect jobs within the next 12-16 months, driven by government incentives, and increased global demand. Major players like Apple and its contract manufacturers, along with Dixon Technologies, are expanding their workforce to meet growing production needs.

MARKET SIZE

Manufacturing exports have registered their highest ever annual exports of US\$ 447.46 billion with 6.03% growth during FY23 surpassing the previous year (FY22) record exports of US\$ 422 billion. By 2030, Indian middle class is expected to have the second-largest share in global consumption at 17%.

India's gross value added (GVA) at current prices was estimated at US\$ 770.08 billion as per the quarterly estimates of the first quarter of FY24. India's GDP surged by 8.4% in the October-December quarter, surpassing expectations. GDP growth was driven by robust performances in the manufacturing and construction sectors, with the manufacturing sector expanding by 11.6% annually and the construction sector growing by 9.5%.

India has potential to become a global manufacturing hub and by 2030, it can add more than US\$ 500 billion annually to the global economy. As per the economic survey reports, estimated employment in manufacturing sector in India was 5.7 crore in 2017-18, 6.12 crore in 2018-19 which was further increased to 6.24 crore in 2019-20. India's display panel market is estimated to grow from ~US\$ 7 billion in 2021 to US\$ 15 billion in 2025.

The manufacturing GVA at current prices was estimated at US\$ 110.48 billion in the first quarter of FY24.

GOVERNMENT INITIATIVES

The Government of India has taken several initiatives to promote a healthy environment for the growth of manufacturing sector in the country. Some of the notable initiatives and developments in the Interim Union Budget 2024-2025 are:

- In the interim budget 2024, the allocation for the Production Linked Incentive (PLI) Scheme for various sectors saw a substantial increase, with notable examples including a 360% rise to Rs 6,903 crore (US\$ 830 million) for the Semiconductors and Display Manufacturing Ecosystem and a 623% surge to Rs 3,500 crore (US\$ 421 million) for the Automobile sector.
- In the interim budget 2024, there was commendable fiscal responsibility demonstrated alongside significant investments in infrastructure, including emphasis on affordable housing, clean energy, and technological advancement. Additionally, the budget allocated funds for the creation of a Rs 1-lakh crore (US\$ 12 billion) innovation fund for sunrise domains, providing a substantial boost for the start-up industry. Moreover, there was a notable focus on promoting the shift to electric vehicles (EV) through the expansion of EV charging networks, thereby offering opportunities for small vendors in manufacturing and maintenance.
- In the Interim Union Budget 2024-25, the Ministry of Defence has been allocated Rs. 621,541 crore (US\$ 74.78 billion), marking a significant increase of approximately 4.72% from the previous allocation of Rs. 593,538 crore (US\$ 71.41 billion).

ROAD AHEAD

India is an attractive hub for foreign investments in the manufacturing sector. Several mobile phone, luxury, and automobile brands, among others, have set up or are looking to establish their manufacturing bases in the country. The manufacturing sector of India has the potential to reach US\$ 1 trillion by 2025. The implementation of the Goods and Services Tax (GST) will make India a common market with a GDP of US\$ 3.4 trillion along with a population of 1.48 billion people, which will be a big draw for investors. The Indian Cellular and Electronics Association (ICEA) predicts that India has the potential to scale up its cumulative laptop and tablet manufacturing capacity to US\$ 100 billion by 2025 through policy interventions.

One of the initiatives by the Government of India's Ministry for Heavy Industries & Public Enterprises is SAMARTH Udyog Bharat 4.0, or SAMARTH Advanced Manufacturing and Rapid Transformation Hubs. This is expected to increase competitiveness of the manufacturing sector in the capital goods market. With impetus on developing industrial corridors and smart cities, the Government aims to ensure holistic development of the nation. The corridors would further assist in integrating, monitoring, and developing a conducive environment for the industrial development and will promote advance practices in manufacturing.

COMPOSITE MATERIAL:

MARKET SIZE

The Indian composites market is expected to reach an estimated value of US\$ 1.9 billion by 2026 with a CAGR of 16.3% from 2021 to 2026 and the Indian consumption of composite materials will touch 7,68,200 tonnes in 2027.

The global composites market size is projected to grow from USD 74.0 billion in 2020 to USD 112.8 billion by 2025, at a CAGR of 8.8%. The composites industry is growing due to the rise in demand for high performance materials, globally. The automotive segment is becoming increasingly obsessive with consumption of carbon fiber and has increased significantly over the past years. The increasing demand for electric vehicles in countries like China and United States is also a major driving factor for the demand for composite material.

Asia Pacific had the largest composite material demand and is anticipated to continue dominance owing to favorable FDI policies by Indian and Chinese Governments over the next seven years. Developed regions including North America and Europe are expected to follow Asia Pacific over the next seven years on account of rising lightweight materials used for vehicle components. Nonetheless, lower per capita composite materials consumption in BRIC is expected to provide an impetus for market growth over the forecast period. Favorable government regulations are anticipated to lower entry barriers for new market participants in emerging economies resulting in higher market fragmentation over the next seven years. Increasing demand for lightweight materials in the aerospace and defense industry is expected to drive the demand.

Composite materials are more expensive than other plastic materials that are utilized in the manufacture of vehicles. This is expected to restrain the automotive composite materials market to some extent in the near future. The basic cost of carbon fiber is way higher than that of metal. Furthermore, the processing of carbon fibers is an expensive process, especially when it comes to mass production of automotive components. However, the development of low-cost manufacturing methods for automotive composites is receiving a lot of attention from leading vehicle manufacturers across the world. These drawbacks of composite materials are expected to hamper the automotive composite materials market.

India is poised to initiate the manufacturing of T100 carbon fibre within the next 2.5 years, aiming to overcome import licensing restrictions that impede its use in strategic applications, according to NITI Aayog member Mr. V K Saraswat. T100 carbon fibre finds extensive utility in defence, aerospace, and civil engineering sectors, encompassing the production of hydrogen cylinders, missiles, launch vehicles, aircraft, bulletproof jackets, and bridges. Saraswat expressed confidence in India's ability to achieve indigenous production of T100 carbon fibre, thereby mitigating dependence on foreign suppliers and addressing licensing constraints.

Engaged in this pivotal endeavour are key institutions including Bhabha Atomic Research Centre (BARC), Hindustan Aeronautics Limited (HAL), and Mishra Dhatu Nigam Limited (MIDHANI). This strategic initiative underscores the government's commitment to fostering domestic manufacturing capabilities and enhancing self-reliance in critical sectors. Saraswat articulated these developments during a CII conference on Advancements in Composites, Speciality Fibres, and Chemicals, emphasizing India's proactive stance towards technological advancement and industrial autonomy.

Manufacturing Unit

OUR MANUFACTURING PROCESS-

Set forth below is a brief description of the process carried out in our manufacturing unit to manufacture FRP Pultruded Products, FRP Moulding Gratings and FRP Rods.

Manufacturing Process for FRP Pultruded Products

Pultrusion is a manufacturing process used to produce continuous lengths of fiber-reinforced polymer (FRP) profiles with constant cross-sections. The process involves pulling fiber reinforcements, such as glass fibers or carbon fibers, through a resin bath, where

they are thoroughly impregnated with a liquid resin. The impregnated fibers then pass through a shaping die, where they are formed into the desired profile shape. Finally, the profile is pulled through a heated die or curing chamber, where the resin is cured (polymerized), resulting in a solid, composite profile with excellent strength-to-weight ratio and corrosion resistance.

Here's a detailed explanation of the Pultrusion process:

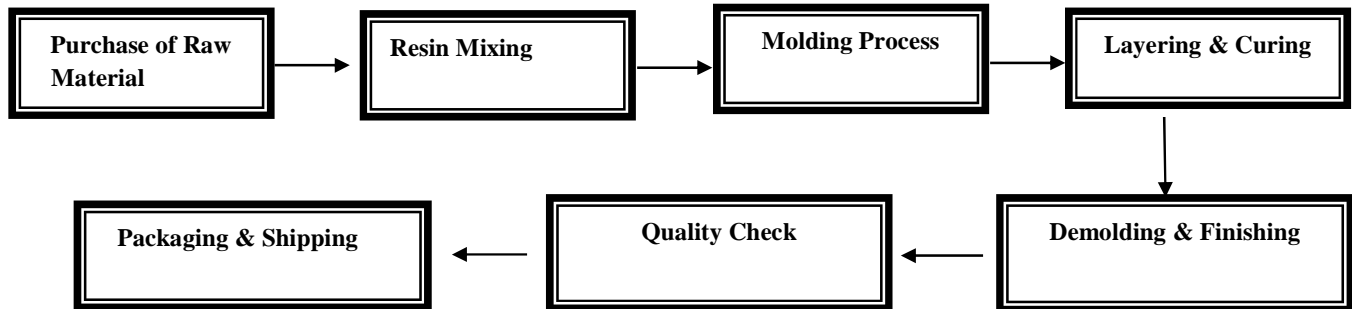

The manufacturing operations described through above diagram is explain as follows:

1. **Purchase, preparation & feeding of Raw Material:** Raw material for production of FRP Pultruded Products majorly includes fibreglass roving, fibreglass mats and resins. Once inward material is checked and approved by material quality check department, fibreglass roving and mat is feeded into the machinery through the performing guides and go through a wet-out bath for resin impregnation. The type of resin used can vary depending on the desired properties of the final product, such as strength, flexibility, or resistance to chemicals.
2. **Fibre Placement:** The process begins with the preparation of the reinforcement fibres, which can be made from materials such as glass, carbon, aramid, or basalt. These fibres are typically provided in continuous forms such as roving (bundles of fibres) or mats (woven or non-woven fabrics). The impregnated fibres are then pulled through a shaping die or series of dies.
3. **Resin Mixing:** The resin system, which acts as a matrix binding the fibres together, is prepared. Common resins include polyester, vinyl ester, epoxy, and phenolic resins. The resin may also contain additives such as pigments, UV stabilizers, and fire retardants. The Resin and additive are mixed in stirrer.
4. **Heating:** Once the fibres are positioned in the die, they pass through a heated die. The temperature is controlled to initiate the curing process of the resin. As the profile moves through the die, the resin cures and hardens thus bonding the fibres together and forming the final shape of the product.
5. **Pulling:** The material is pulled using hydraulic pullers, As the profile exits the die, it passes through a pulling mechanism, which applies tension to ensure uniformity and proper alignment of the fibres. Simultaneously, and the profile is trimmed to the desired length using cut-off saw.
6. **Final Inspection and Quality Control:** Once the profile is cooled, it undergoes inspection for defects such as cracks, voids, or dimensional inaccuracies. Quality control measures ensure that the finished product meets the required specifications and standards.
7. **Finishing:** Depending on the application and customer requirements, additional finishing processes may be applied to the pultruded profiles. This includes surface treatments such as coating, painting, or sanding to provide additional protection against environmental factors.
8. **Packaging & Shipping:** Finally, the finished pultruded products are packaged and prepared for shipping to customers or further processing facilities.

Manufacturing Process for FRP Moulded Gratings:

Molded gratings are made through a process involving the combination of continuous glass fibers and resin in an open mold. Typically, this process starts with the placement of continuous glass fibers (usually in the form of roving) into a mold. The fibers are then impregnated with a liquid resin, often polyester or vinyl ester, using either a vacuum infusion or hand lay-up method. Once the mold is filled, the resin is cured through heat and/or chemical catalysts to solidify the composite material. After curing, the molded gratings are demolded/ejected and trimmed to the desired dimensions.

The manufacturing operations described through above diagram is explain as follows:

1. **Purchase of Raw Material:** The process begins with the purchase of raw material which majorly includes Fibreglass rovings and liquid resins.
2. **Resin Mixing:** The resin system, which acts as a matrix binding the fibres together, is prepared. Common resins include polyester, vinyl ester and phenolic resins. The resin may also contain additives such as pigments, UV stabilizers, and fire retardants. The Resin and additive are mixed in stirrer.
3. **Molding Process:** The mold for the grating is prepared according to the desired dimensions and pattern. Liquid resin and continuous glass rovings are systematically layered in the mold, manually, to desired dimensions and thickness.
4. **Layering & Curing:** The rovings are layered into the mold in a specific orientation to achieve the desired mechanical properties in the final product. This can involve alternating layers of rovings oriented in different directions for added strength and stiffness. The resin is poured in the mould after specific layers of fiberglass.

Once the desired number of layers of fiberglass and resin is achieved, the pressure is applied to compact the layers and remove any air bubbles. The mold with the layered materials is then subjected to heat to cure the resin. Curing times and temperatures vary depending on the resin system used.

5. **Demolding & Finishing:** Once the curing process is complete, the molded grating is removed from the mold and after demolding, the grating may undergo additional finishing processes such as trimming excess material, sanding or grinding edges, and surface treatment if necessary.
6. **Quality Check:** Throughout the manufacturing process, quality control measures are implemented to ensure the final product meets specifications and standards. This includes dimensional checks, visual inspection, and testing for mechanical properties such as strength and stiffness.
7. **Packaging & Shipping:** The finished FRP molded gratings are packaged securely and prepared for shipment to customers.

Manufacturing Process for FRP Rods

This is a variation of the Pultrusion process where UV (ultraviolet) curing is employed to cure the resin rather than traditional heat curing. In this process, UV-sensitive resins are used, which polymerize when exposed to ultraviolet light. The impregnated fibers pass through a UV curing chamber where they are exposed to UV light, causing rapid curing of the resin and solidification of the composite material. This method is often used for producing FRP rods used as central strength members in Optic fibre cables.

The manufacturing operations described through above diagram is explain as follows:

1. **Raw Material Selection:** The process begins with selecting raw materials, including fiberglass strands and resin.
2. **Resin Mixing:** The resin, which acts as the matrix in the composite material, is prepared by mixing it with catalysts, accelerators, initiators, and other additives as required. The precise formulation depends on factors like desired properties, curing time, and environmental conditions.
3. **Impregnation:** In this step, the fiberglass strands are impregnated with the resin mixture. This can be achieved using Pultrusion method where continuous strands of fiberglass are pulled through a resin bath and then through a shaping die to form the rod shape profile.
4. **Curing:** Once impregnated, the resin undergoes curing or polymerization. This process may involve exposure to heat, ultraviolet (UV) light, or chemical catalysts, depending on the type of resin used. Curing transforms the resin from a liquid to a solid state, bonding the fiberglass strands together and forming the final FRP rod.
5. **Cutting and Rewinding:** After curing, the FRP rods are cut to the desired lengths. They may also undergo additional finishing processes such as rewinding or coating to achieve precise dimensions and surface smoothness.
6. **Quality Control:** Throughout the manufacturing process, quality control measures are implemented to ensure that the FRP rods meet specifications and standards. This may involve visual inspections, dimensional checks, and mechanical testing to verify strength, stiffness, and other properties.
7. **Packaging and Shipping:** Finally, the finished FRP rods are packaged for protection during transportation and storage. They are then shipped to customers for use in various applications.

The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. CODE OF CIVIL PROCEDURE, 1908

The Code of Civil Procedure, 1908 is a procedural law related to the administration of civil proceedings in India. The Civil Procedure Code consolidates and amends the law relating to the procedure of the Courts of Civil jurisdiction. The Code of Civil Procedure is an adjective law it neither creates nor takes away any right. It is intended to regulate the procedure to be followed by Civil Courts. The Civil Procedure Code consists of two parts. 158 Sections form the first part and the rules and orders contained in Schedule I form the second part. The object of the Code generally is to create jurisdiction while the rules indicate the mode in which the jurisdiction should be exercised.

The Code does not affect any special or local laws nor does it supersede any special jurisdiction or power conferred or any special form of procedure prescribed by or under any other law for the time being in force. The Code is the general law so that in case of conflict between the Code and the special law the latter prevails over the former. Where the special law is silent on a particular matter the Code applies, but consistent with the special enactment.

CODE OF CRIMINAL PROCEDURE CODE, 1973

It is the main legislation on procedure for administration of substantive criminal law in India. It was enacted in 1973 and came into force on 1st April, 1974. It provides the machinery for the investigation of crime, apprehension of suspected criminals, collection of evidence, determination of guilt or innocence of the accused person and the determination of punishment of the guilty.

Criminal law occupies a pre-dominant place among the agencies of social control and is regarded as a formidable weapon that society has forged to protect itself against anti-social behaviour. The law of criminal procedure is meant to be complimentary to criminal law. It is intended to provide a mechanism for the enforcement of criminal law. The Code of Criminal Procedure creates the necessary machinery for apprehending the criminals, investigating the criminal cases, their trials before the criminal courts and imposition of proper punishment on the guilty person. The Code enumerates the hierarchy of criminal courts in which different offences can be tried and then it spells out the limits of sentences which such Courts are authorized to pass.

The law of criminal procedure is intended to provide a mechanism for the enforcement of criminal law. Without the proper procedural law the substantive criminal law which defines offences and provides punishment for them would be almost worthless.

ARBITRATION AND CONCILIATION ACT, 1996

The Arbitration and Conciliation Act, 1996 is an act to consolidate and amend the law relating to domestic arbitration, international commercial arbitration and enforcement of foreign arbitral awards as also to define the law relating to conciliation and for matters connected therewith or incidental thereto. It aims at streamlining the process of arbitration and facilitating conciliation in business matters. The Act recognizes the autonomy of parties in the conduct of arbitral proceedings by the arbitral tribunal and abolishes the scope of judicial review of the award and minimizes the supervisory role of Courts. A significant feature of the Act is the appointment of arbitrators by the Chief Justice of India or Chief Justice of High Court. The Chief Justice may either appoint the

arbitrator himself or nominate a person or Institution to nominate the arbitrator. The autonomy of the arbitral tribunal has further been strengthened by empowering them to decide on jurisdiction and to consider objections regarding the existence or validity of the arbitration agreement.

Section 138 of the Act, creates statutory offence in the matter of dishonour of cheques on the ground of insufficiency of funds in the account maintained by a person with the banker which is punishable with imprisonment for a term which may extend to two year, or with fine which may extend to twice the amount of the cheque, or with both.

The applicable rates for stamp duty on instruments chargeable with duty vary from state to state. The amended Act provides for regulation of energy consumption by equipment, appliances, vehicles, vessels, industrial units, buildings or establishments that consume, generate, transmit or supply energy. With special focus on promotion of new and renewable energy and the National Green Hydrogen Mission, the amendment seeks to (i) facilitate the achievement of “Panchamrit” — the five nectar elements presented by India in COP-26 (Conference of Parties -26) in Glasgow 2021.

In addition to facilitating the achievement of ‘Panchamrit’, the amended Act aims to promote renewable energy and develop the domestic carbon market to combat climate change and introduce new concepts such as carbon trading and mandate the use of non-fossil sources to ensure faster decarbonisation and help achieve sustainable development goals in line with the Paris Agreement and various other actions related to climate change.

INFORMATION TECHNOLOGY ACT, 2002 (“INFORMATION TECHNOLOGY ACT”)

The Information Technology Act seeks to (i) provide legal recognition to transactions carried out by various means of electronic data interchange involving alternatives to paper-based methods of communication and storage of information; (ii) facilitate electronic filing of documents; and (iii) create a mechanism for the authentication of electronic documentation through digital signatures. The Information Technology Act facilitates electronic commerce by recognizing contracts concluded through electronic means, protects intermediaries in respect of third party information liability and creates liability for failure to protect sensitive personal data. The Information Technology Act empowers the Government of India to formulate rules with respect to reasonable security practices and procedures and sensitive personal data. In exercise of this power, the Department of Information Technology, Ministry of Electronics and Information Technology, Government of India (“DoIT”), on April 11, 2011, notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 (“IT Security Rules”) which prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate. The IT Security Rules require every such body corporate to provide a privacy policy for handling and dealing with personal information, including sensitive personal data, ensuring security of all personal data collected by it and publishing such policy on its website. The IT Security Rules further require that all such personal data be used solely for the purposes for which it was collected and any third party disclosure of such data is made with the prior consent of the information provider, unless contractually agreed upon between them or where such disclosure is mandated by law. The DoIT also notified the Information Technology (Intermediaries Guidelines and Digital Media Ethics Code) Rules, 2021 (“IT Intermediaries Rules”) on February 25, 2021, requiring intermediaries receiving, storing, transmitting, or providing any service with respect to electronic messages to not knowingly host, publish, transmit, select or modify any information prohibited under the IT Intermediaries Rules, to disable hosting, publishing, transmission, selection or modification of such information once they become aware of it, as well as specifying the due diligence to be observed by intermediaries.

Further, pursuant to the notification of the Trade Marks (Amendment) Act, 2010, simultaneous protection of trade mark in India and other countries has been made available to owners of Indian and foreign trade marks. Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability.

15. IMPAIRMENT OF ASSETS

The carrying values of assets at each Balance Sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, except in case of revalued assets.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

17. PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Contingent assets are neither recognized nor disclosed in the financial statements. However, Contingent assets are assessed continually and when it becomes reasonably certain that inflow of economic benefit will arise.

18. CONTINGENCIES AND EVENTS OCCURRING AFTER THE BALANCE SHEET DATE

Events that occur between balance sheet date and date on which these are approved, might suggest the requirement for an adjustment(s) to the assets and the liabilities as at balance sheet date or might need disclosure. Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company.
