INDUSTRY OVERVIEW

Introduction

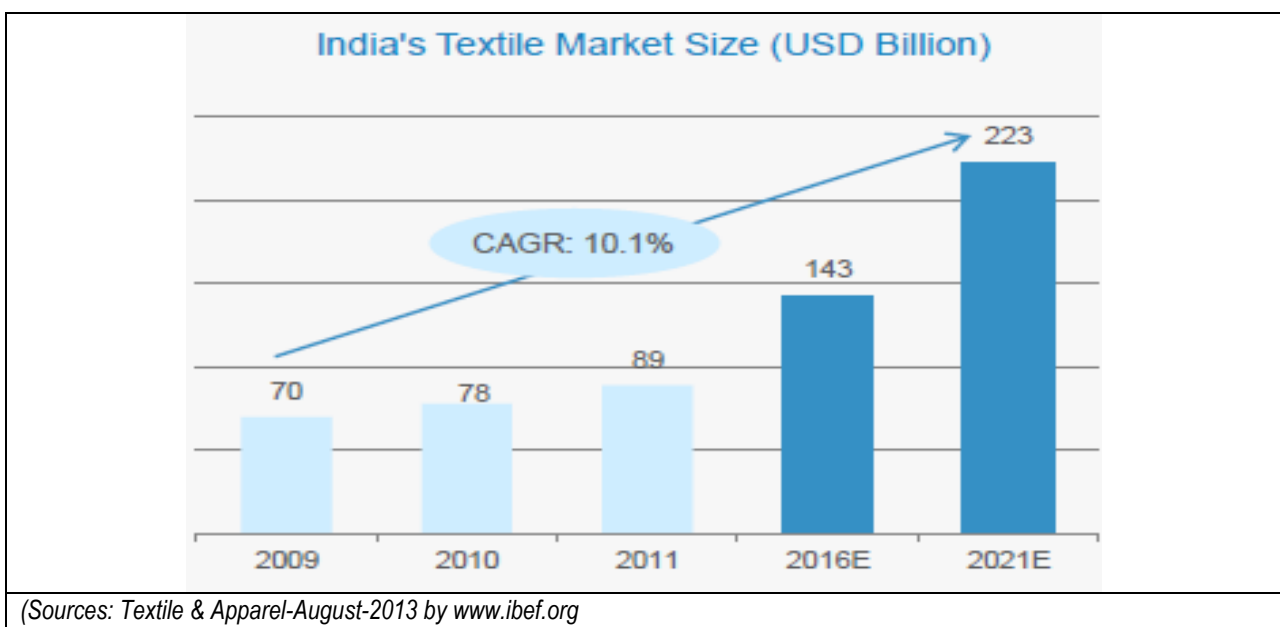

Indian Textile Industry has an overwhelming presence in the economic life of the country. Apart from providing one of the basic necessities of life, the textile industry also plays a pivotal role through its contribution to industrial output, employment generation and the export earnings of the country. It contributes about 14% to the industrial production, 4% to the GDP and 11% to the country's export earnings. The textile sector is the second largest provider of employment after agriculture.

The Indian textiles industry is extremely varied, with the hand-spun and handwoven sector at one end of the spectrum, and the capital intensive, sophisticated mill sector at the other. The decentralized powerlooms/ hosiery and knitting sector form the largest section of the Textiles Sector. The close linkage of the Industry to agriculture and the ancient culture, and traditions of the country make the Indian textiles sector unique in comparison with the textiles industry of other countries. This also provides the industry with the capacity to produce a variety of products suitable to the different market segments, both within and outside the country. The major sub-sectors that comprise the textiles sector include the organized Cotton/Man-Made Fibre Textiles Mill Industry, the Man-Made Fibre/Filament Yarn Industry, the Wool and woolen Textiles Industry, the Sericulture and Silk Textiles Industry, Handlooms, Handicrafts, the Jute and Jute Textiles Industry, and Textiles Exports.

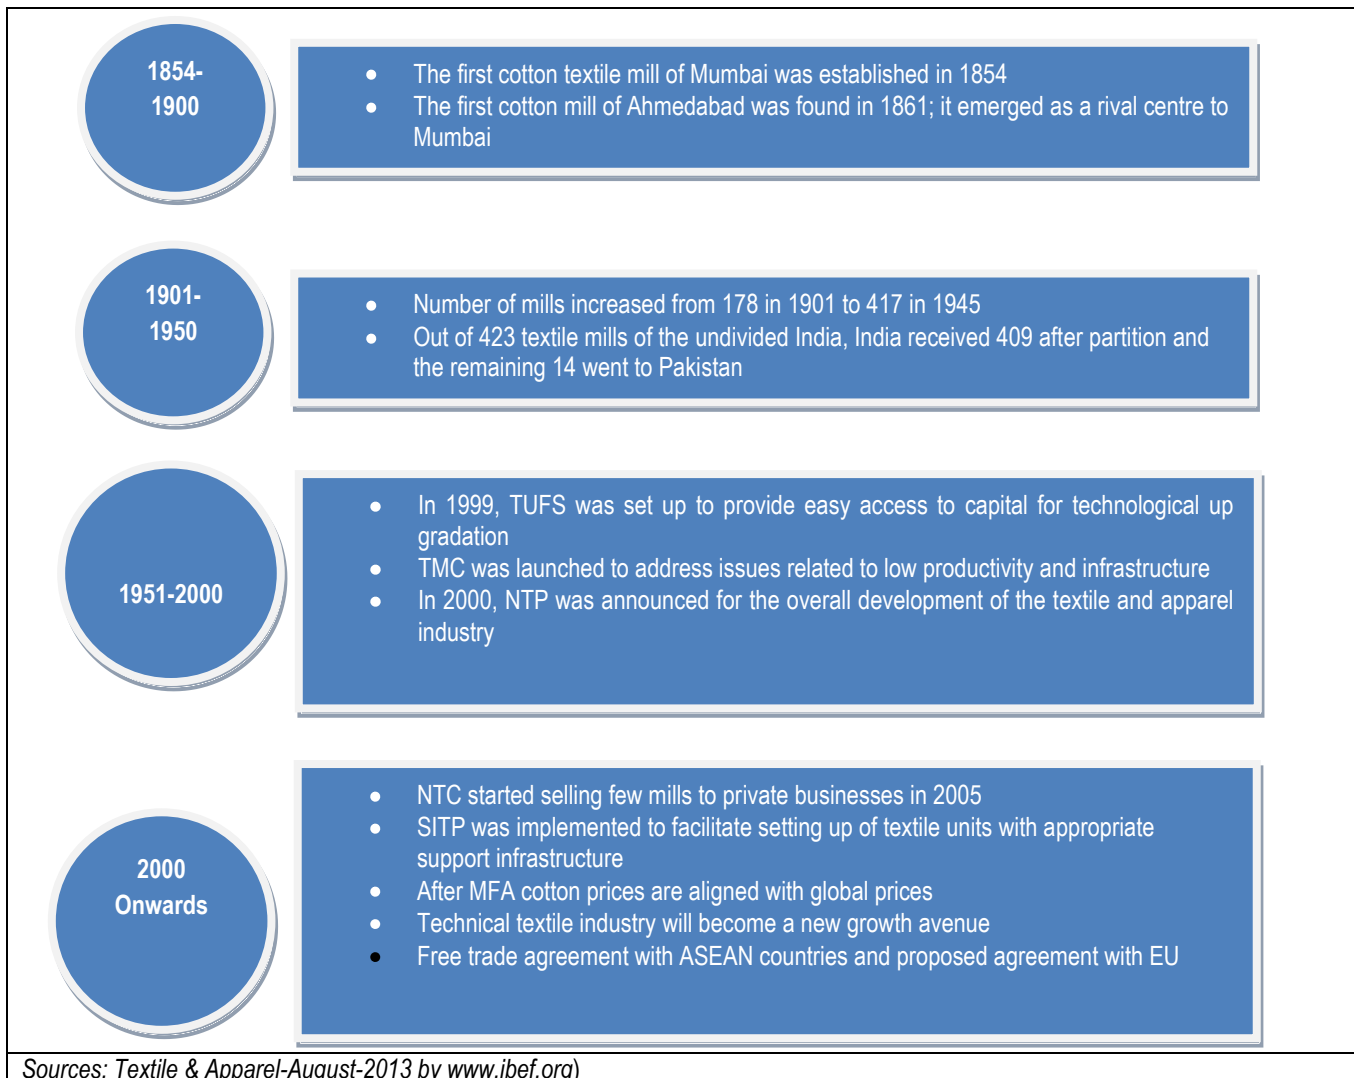

HIGHLIGHTS:

1. Textile plays major role in the Indian economy
2. It accounts for 27 per cent of foreign exchange inflows.
3. It contributes 14 per cent to industrial production and 4 per cent to GDP
4. With over 45 million people, the industry is one of the largest source of employment generation in the country
5. The industry accounts for nearly 11 per cent of total exports

7. India is the world's second largest producer of textiles and garments.
8. Indian textile industry accounts for about 24 per cent of the world's spindle capacity and eight per cent of global rotor capacity.
9. India has the highest loom capacity (including hand looms) with 63 per cent of the world's market share
10. India accounts for about 14 per cent of the world's production of textile fibre and yarns (largest producer of jute, second largest producer of silk and cotton; and third largest in cellulosic fibre)

The size of India's textile market in 2011 was USD89.0 billion; the market is expected to expand at a CAGR of 10.1 per cent over 2009–21

Evolution of Indian Textile Industry

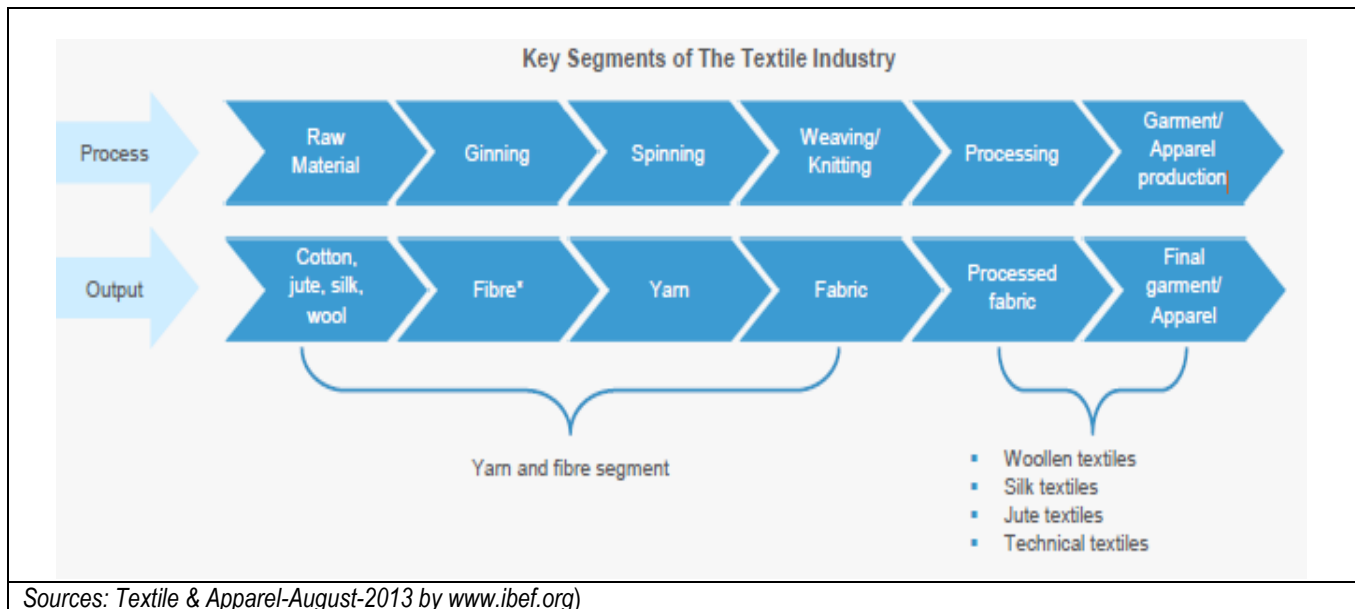

Segments in Textile and Apparel Sector:

The textile and apparel industry can be broadly divided into two segments:

- Yarn and fibre (include natural and man-made)
- Processed fabrics (including woolen textiles, silk textiles, jute textiles, cotton textiles and technical textiles), readymade garments (RMGs) and apparel

Key Segments in Textile Industry:

Market Size

The industry is expected to touch US\$ 223 billion by 2021(E). Also, India has the capacity to improve its textile and apparel share in the world trade from the current 4.5 per cent to 8 per cent and reach US\$ 80 billion by 2020.

Garment exports from India grew by 19 per cent in the period July 2012–July 2013 to touch US\$ 1.27 billion, on the back of increasing demand in developed economies such as the US, according to data released by the Apparel Export Promotion Council (AEPCC).

India has the advantage of abundant resources of raw materials. It is one of the largest producers of cotton yarn in the world and there are good resources of fibres such as polyester, silk, viscose, etc. The country is also home to a wide range of cotton fibre and has a rapidly developing synthetic fibre industry.

The most significant change in the Indian textile industry has been the advent of man-made fibres (MMF). India's innovative range of MMF textiles finds presence in almost all the countries across the globe. MMF production recorded an increase of 7 per cent in the month of August 2013 and grew by 4 per cent during April–August 2013.

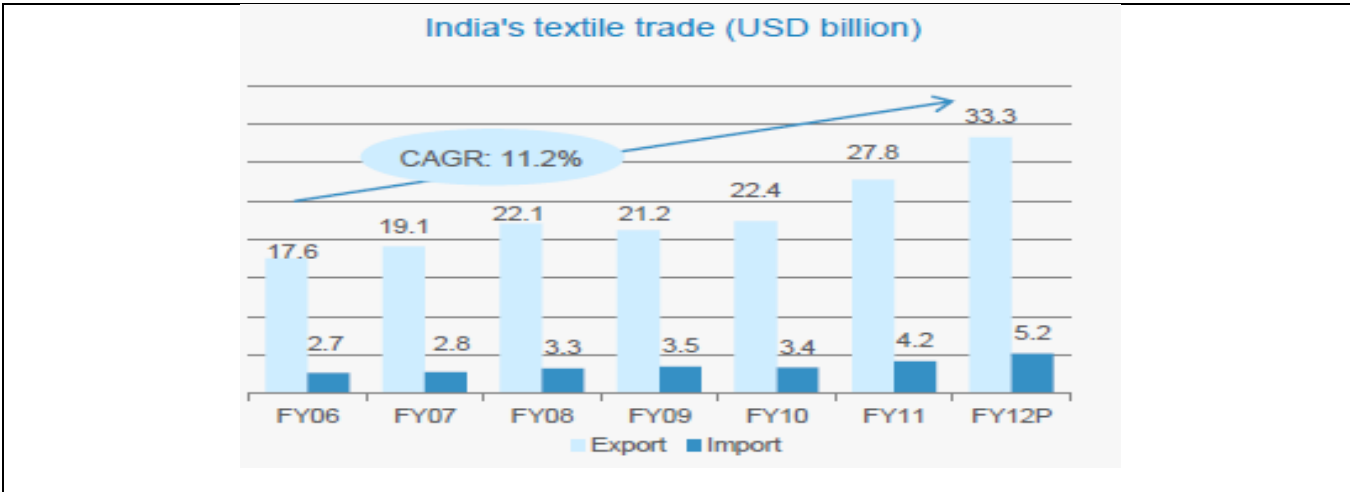

Cotton yarn production increased by about 10 per cent during August 2013 and by about 11 per cent during April–August 2013. Blended and 100 per cent non-cotton yarn production increased by 5 per cent during August 2013 and by 8 per cent during April–August 2013. Cloth production by mill sector registered a growth of 4 per cent during August 2013 and 10 per cent during April–August 2013. EXPORTS GAINS FROM STRONG GLOBAL DEMAND:

- Capacity built over years has led to low cost of production per unit in India's textile industry; this has lent a strong competitive advantage to the country's textile exporters relative to key global peers
- The sector has also witnessed increasing outsourcing over the years as Indian players moved up the value chain from being mere converters to vendor partners of global retail giants
- The strong performance of textile exports is reflected in the value of exports from the sector over the years; In FY12, textile exports jumped by 19.4 per cent to USD33.3 billion
- In the coming decades, Africa and Latin America could very well turn out to be key markets for Indian textiles

INDIAN DENIM INDUSTRY

India was a late entrant in denim manufacturing. Arvind started off with manufacturing denim fabric in the later half of the decade of 1980. For a long time, denim manufacturing remained concentrated in Gujarat, in and around Ahmedabad. Even today, Arvind continues to be the leader, in terms of both volume and quality, in India, with more than 100 million metres of fabric being produced by the company every year. However, several other players have been catching up with Arvind, in Gujarat, and also in other regions of the country. At the same time, along with the growth and expansion in fabric capacities, machinery manufacturers located in Gujarat have also contributed significantly in the evolution of denim industry in India.

Made in India - Indigenous Machinery Manufacturers for Denim Mills

The Denim story of India began at Ahmedabad, in Gujarat, with Arvind setting up the first denim fabric manufacturing unit there. Ahmedabad is often referred to as the Denim capital of India and rightly so. Ahmedabad is home not only to over 10 denim fabric manufacturers, but also to indigenous textile machinery manufacturers and dyes and chemicals. The machinery manufacturers at Ahmedabad are established leaders and are offering a diverse range of indigenously manufactured machines for the various operations in denim fabric manufacturing. These companies are providing state-of-the-art machines which are at par in terms of performance with International machines, but are available at a lower cost. Here we are taking a closer look at four industry leaders, all machinery manufacturers, based at Ahmedabad, namely Dhall Group, Jaytex, Jupiter and Prashant.

Manufacturing Process:

The process sequence of manufacturing denim fabrics is (i) Procurement of Yarn (ii) Warping (iii) Sizing (iv) Air Jet Weaving v) Singeing (vi) Foam Finishing (vii) Inspection (viii) Packing & Dispatch. Each sequence is discussed in brief as under:

Procurement of Yarn: Our Company purchases yarn from the local market. Our Company uses cotton yarn and synthetic yarn to manufacture Denim fabrics. These raw materials are received on paper tubes, packed in cartons.

Warping: This is a process of preparing beams for the looms. The rolls are loaded on the creel stand of the warping machines. The purpose of warping is to arrange the threads parallel to one another, before further processing. The ends of the yarn are withdrawn from warping creel, evenly spaced in a sheet form and wound onto a beam of substantial length.

Sizing: Sizing leads to formation of a film around the yarn (size solution) thereby leading to improvement in abrasion resistance of the yarn and facilitating its running on the loom.

Air Jet Weaving: It is shuttle less loom, which uses a high-pressured burst of air to propel the filling thread through the shed; no mechanical device is needed to direct the filling thread.

In air jet weaving machine, weft thread is carried from left to right end of warp sheet using air pressure with the help of main air jet nozzles and relay nozzles. The air passage is through the profile reed having integrated tunnel or by the separate guide brought into the warp shed. As such thread travels in a guided air path created by relay nozzles. Relay nozzles are fixed in front of the reed at regular intervals and thread passes along the reed tunnel subject to air pressure.

Singeing : It removes protruding fibre by burning to make surface of the fabric smoother.

Foam Finishing: Final finishing machine for shrinkage and various finishes can be applied to the fabric.

Inspection: The product is made to pass onto inspection equipment for quality checkup before sending it for the mill process.

Packaging & Dispatch: After Inspection the fabric is packed and dispatch as per the orders.

Infrastructure & Utilities:

Power: Our Company meets its power requirements by purchasing electricity from Dakshin Gujarat Vij Company Limited which has released connected load of 2000 KVA.

In addition to above arrangement, our Company has one D.G. (Diesel Generator) Set of 250 KVA as a standby arrangement. Our fuel requirement for running DG set is 300 Litres/month.

Water: Our water requirement is low, as it is required only for the Siezing process. We use ground water to meet our current water requirements.

Manpower: Our Manufacturing facility is located near Surat, Gujarat which is one on the well known Textile Market in country. Therefore availability of and recruitment of the requisite quality manpower is ample. Further, trained and skilled manpower is also available. The contracting parties themselves decide the rights and duties of parties and terms of agreement. ***The Specific Relief Act, 1963***

The Specific Relief Act is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract.

Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. 'Specific performance' means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

The Companies Act, 1956

The Companies Act, 1956 deals with laws relating to companies and certain other associations. It was enacted by the parliament in 1956. The Companies Act primarily regulates the formation, financing, functioning and winding up of companies. The Act prescribes regulatory mechanism regarding all relevant aspects, including organizational, financial and managerial aspects of companies. Therefore, foreign investment up to 100% is permitted in the Company under the automatic route. No approvals of the FIPB or the RBI are required for such Allotment of Equity Shares under this Issue. Our Company will be required to make certain filings with the RBI after the completion of the Issue for the allotment made to NRIs, PIOs and other persons resident outside India.

Foreign investment in Indian securities is governed by the provisions of the FEMA read with the applicable Regulations. The DIPP has issued 'Circular 1 of 2013' (the "FDI Circular") which consolidates the policy framework on FDI, with effect from April 05, 2013. The FDI Circular consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till April 04, 2013. All the press notes, press releases, clarifications on FDI issued by DIPP till April 04, 2013 stand rescinded as on April 05, 2013. Under the approval route, prior approval of the GoI through FIPB is required. FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the FIPB, the RBI would continue to be the primary agency for the purposes of monitoring and regulating Foreign Investment. In cases where FIPB approval is obtained, no approval of the RBI is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company.

RBI has also issued Master Circular on Foreign Investment in India dated July 1, 2013. The said Circular shall stand withdrawn from July 2, 2014. In terms of the said Circular, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, which eligibility criteria are as prescribed). Taxes on income (AS 22)

Current tax -Provision for current tax/minimum alternate tax (MAT) is made based on tax liability computed after considering tax allowances and exemptions.

Deferred tax -Deferred tax is recognised on timing differences between the accounting income and the taxable income for the year and quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. Deferred tax assets are recognised and carried forward to the extent that there is a reasonable or virtual certainty, as may be applicable, that sufficient future taxable income will be available against which such deferred tax asset can be realised.

Impairment of assets (AS 28)

An impairment loss is charged to the Statement of profit and loss in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount

Provisions and contingent liabilities (AS 29)

A provision is recognised when the company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to their present value and are determined based on best estimates required to settle the obligation at the balance sheet date.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Contingent Liability of the Company (to the extent not provided for) as on 30th Sep 2013 is as tabulated below.
