For further details of our group company please refer chapter titled "*Promoter and Promoter Group*" beginning on page 156 of this Draft Prospectus.

21. ***Company has given loans to its key Managerial Personal and no agreement for such loan has been entered by the Company.***

Our company has given interest free unsecured loans to our Key Managerial Personnel and other employees in due course. However no agreement in relation to same has been entered into with the KMPs or employees of the company. In absence of any agreement or understanding with the employees in relation to same, we cannot assure that the same shall be re-paid in time or at all. Moreover, the financial position of the company has been adversely affected to the extent of opportunity cost of the funds advanced to the Employees. For further details of loans advanced to our KMPs and other employees, please refer to section titled "Our Management" beginning at page no. 137 and Section titled "Financial Information" beginning at page no 164 of this Draft Prospectus.

22. ***Any future labour disputes or strikes or work stoppages could lead to loss of revenue and/or increased costs which could adversely affect our business, financial condition and results of operations.***

We believe that we are enjoying good relationships with our KMP's, employees, workers and labour. Although we have not had strikes or work stoppages by our employees, workers and labour in the past, any strikes or work stoppages, we may face in the future could have an adverse impact on our operations, particularly given our dependence on our skilled workforce. Any strike or work stoppage by our employees could have a material adverse effect on our business, financial condition and results of operations.

23. ***Excessive dependence on the HDFC and ING Vyasa Bank, in respect of obtaining financial facilities.***

All our fund based and non fund base financial assistance have been sanction by the banks, i.e. the HDFC bank and ING Vysya Bank and on the security of same assets on a parri-passu arrangement. Therefore any default under an arrangement

with one lender may trigger cross default with other lender, which may crystallize our liability to re-pay to both the lenders at a same time this may result into difficulty in arranging for funds for re-payment and may also adversely affect the financial position of the Company.

24. Any downgrading of India's debt rating by a domestic or international rating agency could have a negative impact on our business.

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares

25. We rely significantly on our Dealers/Distributors and Agents network in open market for sale of our products.

We sell our products in open market through our network of dealers. Furthermore, our business growth in open markets depends on our ability to attract additional dealerships to our distribution network. While we believe that we have good relations with our dealers but there is no assurance that our current dealers will continue to do business with us or that we can continue to attract additional dealers to our network. If we do not succeed in maintaining the stability of our dealership network, our market share may decline, materially affecting our results of operations and financial condition.

26. We have an unrealized foreign exchange in contravention of regulations framed under Foreign Exchange Management Act, 1999 (FEMA) and any further delay in realization of same may subject us to penalty under the provisions of FEMA

We have unrealized export proceeds of USD 4000 pending to be realized since 2010. As per provisions of Foreign Exchange Management (Export of Goods and Services) Regulations, 2000, the amount of export are required to realized and repatriated to India within 6 (six) months from the date of export and in the event of delay an application is required to be made to the concerned branch of RBI for extension of time limit for realization of same. However we have not filed for any extension and accordingly have attracted the penal provisions under FEMA. We may accordingly be subjected to a penalty of thrice the amount related with the contravention which may adversely affect our financial position.

27. We are dependent on our Promoters, directors and key managerial personnel of our Company for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.

Our Promoters, Directors and key managerial personnel collectively have many years of experience in the industry and are difficult to replace. They provide expertise, which enables us to make well informed decisions in relation to our business and our future prospects. For further details of our Directors and key managerial personnel, please refer to **Section "Our Management"** on page 137 of this Draft Prospectus. Our success largely depends on the continued services and performance of our management and other key personnel. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently.

Further, the loss of any of the senior management or other key personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

28. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

As per SEBI (ICDR) Regulations, 2009, as amended, appointment of monitoring agency is required only for Issue size above ` 50,000.00 Lacs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of Clause 52 of SME Listing Agreement. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

29. *We are yet to place orders for certain plant and machinery, equipment's etc. as stated on section titled "Objects of the Issue" stated on page 66 of this Draft Prospectus*

The net proceeds of the Issue are proposed to be utilized for the expansion of production capacity and installation of new machineries amounting to ` 257.96 Lacs. We are yet to place orders for some of procuring machinery to the tune of ` 233.96 lacs, which forms 90.70% of the total cost. Any delay in placing the orders or procurement of plant and machinery may delay implementation schedule of the proposed project. Such delays may also lead to increase in prices of these equipment further affecting our cost and profit estimates.

30. *Our insurance coverage may not adequately protect us against certain operating risks and this may have as adverse effect on the results of our business.*

We are insured for a number of the risks associated with our manufacturing business, through policies such as Standard Fire and Allied Perils Insurance, Workman Compensation Insurance, Burglary (House Breaking) Insurance, Marine Cargo Open Policy-Inland. We believe we have got our assets adequately insured; however there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, to cover all material losses. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business and results of operations could be adversely affected. We may also be subject to claims resulting from defects in the engineering design and commissioning of our products. Our policy of covering these risks through insurance may not always be effective or adequate. Failure to effectively cover ourselves against the associated risks for any of these reasons including other unforeseen circumstances could expose us to substantial costs and potentially lead to material losses. Faults in designing and installation might also require repair work, which may not be foreseen or covered by our insurance. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us. For details on insurance policies taken by our Company please page no. 95 in chapter titled "**Our Business**".

31. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, as detailed in the section titled "**Objects of the Issue**" is to be fully funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe.

32. *Changes in consumer preferences that are largely beyond our control could adversely affect our business, financial condition, results of operations and prospects.*

Our business may be sensitive to changing consumer preferences, including changes in consumer acceptance of our amusement park concepts, all of which may be caused by many factors that are generally beyond our control. Some or all of our concepts may become less attractive in light of changing consumer preferences, and we may be unable to adapt to such changes in a timely manner. Any change in consumer preferences that decreases demand could adversely affect our business, financial condition, results of operations and prospects.

33. *We are highly dependent on smooth supply and transportation and timely delivery of our products from our manufacturing facilities to our customers. Various uncertainties and delays or non delivery of our products will affect our sales.*

We depend on transportation services to deliver our products from our manufacturing facilities to our customers. We rely on third parties to provide such services. Disruptions of transportation services because of weather related problems, strikes, lock-outs, inadequacies in road infrastructure or other events could impair our procurement of raw materials and our ability to supply our products to our customers which in turn may adversely affect our business operations and our financial condition.

External Risk Factors

1. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, financial condition, results of operations and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements, conditions, costs and expenditures on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations.

Please see the section “Key Industry Regulations and Policies” on page 121 of the Draft Prospectus for details of certain laws currently applicable to us. Any changes to such laws, including the instances briefly mentioned below, may adversely affect our business, financial condition, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with such changes in applicable law and policy

2. Any government regulation or notification related to our industry and any restriction on PVC and uPVC may adversely impact our business and our financial condition.

We are into the business of PVC and uPVC Products, any change in government regulation viz ban on plastic may hinder our manufacturing and related process which may adversely affect our business and financial condition of the Company.

3. Decrease in price of aluminium in India due to change in government regulation can decrease our sales and adversely affect our financial position of the Company.

Larger part of our product range is used as a substitute of aluminium products and rising price of aluminium counts as one of the reason for increasing popularity of our product. However in the event the prices of aluminium falls due to any change in government policy in India or due to global market trend, it may stand to compete with our product in which event the business of our company may be affected adversely.

4. A slowdown in economic growth in India could cause our business to suffer.

Our results of operations and financial condition are dependent on, and have been adversely affected by, conditions in financial markets in the global economy and, particularly in India. The Indian economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, business corruption, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, inflation, commodity and energy prices and various other factor Any slowdown in the Indian economy may adversely affect our business, financial condition, results of operations and the price of our Equity Shares.

5. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude.

6. Regulatory changes with regard to Direct/Indirect taxes may adversely affect our performance or financial conditions.

Regulatory changes relating to business segments in which we operate in India can have a bearing on our business. Each State in India has different local taxes and levies which may include value added tax, sales tax and Octroi. Changes in these local taxes and levies may impact our profits and profitability. Any negative changes in the regulatory conditions in India or our other geographic markets could adversely affect our business operations or financial conditions.

7. The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factors. The extent and severity of these natural disasters determines their effect on the Indian economy. Although the long term effect of diseases such as the H5N1 —avian flu virus, or H1N1, the swine flu virus, cannot currently be predicted, previous occurrences of avian flu and swine flu had an adverse effect on the economies of those countries in which they were most prevalent. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

8. *Our transition to the use of the IFRS-converged Indian Accounting Standards may adversely affect our financial condition and results of operations.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, IFRS announced by the Ministry of Corporate Affairs, Government of India (the “MCA”) in January 2010. The convergence of certain Indian Accounting Standards with IFRS was notified by the MCA on February 25, 2011. The date of implementing such converged Indian Accounting Standards has not yet been determined.

Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear significantly different under IFRS than under Indian GAAP. This may have an adverse effect on the amount of revenue recognized during a particular period as compared to the amount of revenue recognized during a corresponding period in the past. In addition, in our transition to IFRS reporting, we may encounter difficulties in the ongoing process of implementing and enhancing our management information systems.

Moreover, our transition may be hampered by increasing competition and increased costs for the relatively small number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements. Any of these factors relating to the use of IFRS-converged Indian Accounting Standards may adversely affect our financial condition and results of operations.

9. *We have not independently verified certain data in this Draft Prospectus.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

Our Company is dependent on third-party transport providers for the supply of raw materials to our factory and delivery of our products to our customers. Any increase in oil prices, may lead to increase in transportation costs will result in an impact on profitability. Further, transport strikes by member of various Transport unions have taken place in the past and could take place in future that will affect supplies of raw material and deliver our products to our customers, which may cause adverse impact on our business.

11. *A decline in India’s foreign exchange reserves or decrease in value of rupee in comparison to foreign currency may affect liquidity and interest rates in the Indian economy, which could adversely affect our financial condition.*

According to a 'Weekly Statistical Supplement' released by RBI on February 28, 2014, India's foreign exchange reserves totalled approximately USD 18,244.90 Billion as of February 21, 2014. India's foreign exchange reserves have declined recently and may have negatively affected the valuation of the Rupee. Further declines in foreign exchange reserves could adversely affect the valuation of the Rupee and could result in reduced liquidity and higher interest rates that could adversely affect our future financial condition and the market price of the Equity Shares.

- 12. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.***

Prior to the Issue, there has not been a public market for our Equity Shares. We cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling our Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of our Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors.

- 13. *Economic developments and volatility in securities markets in other countries may cause the price of our Equity Shares to decline.***

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

- 14. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our Company's ability to attract foreign investors, which may adversely impact the market price of our Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between nonresidents and residents are freely permitted (subject to certain exceptions) if they comply with the requirements specified by the Reserve Bank of India ("RBI"). If the transfer of shares, which are sought to be transferred, is not in compliance with such requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. Our Company cannot assure investors that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

- 15. *There can be no assurance that our Company's securities will continue to be listed on the Stock Exchanges.***

Pursuant to the listing of our Equity Shares on the Stock Exchanges, we will be required to comply with certain regulations and/or guidelines as prescribed by SEBI and the Stock Exchanges. However, in the event that we fail to comply with any of the aforesaid regulations and/or guidelines, there can be no assurance that our Equity Shares will continue to be listed on the Stock Exchanges.

- 16. *Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

UPVC Door & Windows

The Indian market size for windows and doors is approx. Rs 12000 crore (Source :Long, Kenneth 2005. World Windows and Doors. Study #1977. The Freedonia Group) with the predominant material of constructions being Timber (in rural and in upper end constructions), MS (in low cost housing) and Aluminium (in urban constructions). Out of approx Rs 6000 crore market for windows, approx Rs 300 crore exists for Upvc windows. Windows are no longer an object to fill the openings in the Building envelope. Today's windows are expected to perform various functions such as letting in light, keeping out heat/cold, noise attenuation, as well as being aesthetically attractive, needing lower maintenance and using energy saving/efficient materials/processes in place of scarce/energy efficient conventional materials. uPVC Windows/Door profiles are made from Poly Vinyl chloride resin, one of the most extensively used thermoplastics finding end uses in diverse sectors such as infrastructure, agriculture, healthcare etc. UPVC Windows/Doors are extensively used abroad, and are currently at a nascent stage in India. Much needs to be done in marketing of these products by showcasing the advantages of these products to the builders, architects and common man which includes the major advantage of energy saving i.e. reduction in air conditioning bills upto 20-30% as well as saving of wood (in turn-forests) and energy intensive materials like Aluminium.

The demand driver for Poly Vinyl Chloride Windows and Doors is Infrastructure catalysed by :

- Increasing population (India is 2nd most populous country after China)
- Increasing prosperity
- Nuclear families leading to increase in housing demand
- Migration from Rural to Urban area
- Poor wood availability
- Saves construction time as factory made windows & doors reduces the fitting & installation time
- Increase in high rise residential & commercial building
- Sound Insulation characteristics is big feature to increase uPVC Windows demand to curb the increasing noise pollution in urban areas
- Recyclability of uPVC window material makes them suitable for green building norms
- Heat Insulation character makes them energy saving
- Low maintenance cost
- Wide range of designs and various colour options

Plastics are finding increased application in the field of infrastructure in:

- PE Rotational Moulded Tanks
- PP Flexible Intermediate Bulk Container
- PP Woven Geotextiles
- PVC Window Profiles
- PVC SWR Pipes

- PVC wet area doors
- Damp resistant PVC false ceiling & wall panelling
-

Assuming Indian population of 100 crore and an average of 5 persons dwelling unit and an average weight of 44 kgs of PVC Doors and Windows per dwelling unit with a market penetration of 3%, the estimated potential of PVC Doors and Windows would be 3,00,000 tpa.

Potential of windows, doors in India- 3,00,000TPA
 Supply of uPVC windows, doors in India-40,000TPA

Upvc Window systems come with excellent hardware, various colours and finish thus enhancing the beauty of dwellings. These windows always look new and do not need any painting.. Further they provide noise attenuation and reduce energy bill of air-conditioned places by about 20-30%.

Versatility of PVC Door & Window Profiles Inherent advantages of PVC Door & Window Profiles :

- a) Energy Savings – Reduction in air-conditioning bills upto 20-30%
- b) Cost economics
- c) Conservation of Natural Resources
- d) Aesthetics
- e) Acoustics and so many other advantages

Major Demand Driver

The Indian construction industry

The Indian construction industry registered a compound annual growth rate (CAGR) of 13.52% in nominal terms during the review period (2009–2013), driven by private and public investments in infrastructure, as well as institutional and commercial construction projects. Industry growth is expected to remain strong over the forecast period (2014–2018), as a result of the government’s commitment to making infrastructural improvements and the implementation of the 12th Five-Year Plan (2012–2017), under which the government expressed plans to invest INR56.3 trillion (US\$1.0 trillion) in various long-term development plans. Consequently, industry output is expected to record a forecast-period nominal CAGR of 10.09%.

Key Highlights:

- According to the Ministry of Statistics and Programme Implementation, the construction industry's value add at constant prices rose by 3.0% in 2013 – up from 1.8% in 2012. The annual pace of growth has slowed, however, from an average of 8.5% in 2010–2011. The outlook for growth is positive, having been supported by government investment to improve the country's infrastructure, education and healthcare, as well as spending on affordable homes to meet the country's rising demand for housing. Large-scale investments in infrastructure development under the 12th Five-Year Plan will be an important driver of growth.
- Infrastructure investment remains a key strategy for supporting economic growth. In its 2014–2015 budget, the Indian government increased its expenditure on the infrastructure sector and allocated INR1.8 trillion (US\$27.3 billion); an increase of 8.6% over the 2013–2014 budget expenditure. This will contribute to the continued expansion of infrastructure construction over the forecast period.
- With an aim to increase foreign exchange earnings from the tourism industry to INR1.5 trillion (US\$26.0 billion) and attract eight million tourists by 2015, the government is focusing on the construction of new tourist destinations such as Tannirbhavi aquamarine park, the Bhaleydunga Skywalk in Gangtok and the construction of a film city at Hesaraghatta in Bangalore. This will help to support growth in the leisure and hospitality buildings category over the forecast period.
- As a robust and modern transportation infrastructure is vital for the growth and competitiveness of the economy, the government is focusing more on infrastructure development. Accordingly, a total of INR56.3 trillion (US\$1.0 trillion) is planned to be spent in the next planning period of 2012–2017; an increase in investment of 136.0% from the 11th Five-Year Plan. From this proposed investment, INR15.0 trillion (US\$279.4 billion) will be spent on electricity, INR9.7 trillion (US\$180.4 billion) on roads and bridges, and INR5.2 trillion (US\$97.1 billion) on railways. The government plans to achieve these objectives through the PPP model, and attract half of the funding amount from the private sector.
- The country's rising population and urbanization trends will continue to provide some support for residential construction. According to the World Population Statistics, the country's population grew by 17.7% from 2000 to 2011 – from 1.1 billion to 1.2 billion – and is expected to reach 1.4 billion and 1.6 billion by 2020 and 2040 respectively. As a proportion of the total, the country's urban population increased from 27.8% in 2001 to 31.2% in 2011, and is expected to reach 33.0% by 2026. The country's growing population and rapid urban development will create fresh demand for residential construction market over the forecast period.

Global Economy Outlook

The global economy got off to a bumpy start this year buffeted by poor weather in the United States, financial market turbulence and the conflict in the Ukraine. As a result, global growth projections for 2014 as a whole have been marked down from 3.2 percent in January to 2.8 percent now. Despite the early weakness, growth is expected to pick up speed as the year progresses and world GDP is projected to expand by 3.4 percent in 2015 and 3.5 percent in 2016 – broadly in line with earlier forecasts. When expressed in 2010 Purchasing Power Parity terms, global growth is projected to accelerate from 3.1 percent in 2013 to 3.4, 4.0, and 4.2 percent in each of 2014, 2015 and 2016.

High-income country recovery is underway

The bulk of the acceleration will come from high-income countries (notably the U.S. and the Euro Area). A reduced drag on growth from fiscal consolidation, improving labour market conditions and a steady release of pent-up demand in these countries are projected to overcome first quarter softness and lift high-income GDP growth to 1.9 percent in 2014, from 1.3 percent in 2013, and to 2.4 and 2.5 percent in 2015 and 2016.

Developing country growth to pickup slowly, as tail-winds from stronger high-income growth are countered by capacity constraints and an eventual tightening of financial conditions

The outlook for developing countries is for flat growth in 2014. This marks the third year in a row of sub-5 percent growth and reflects a more challenging post-crisis global economic environment. The flat yearly profile masks an expected firming of activity during the course of 2014, with developing country growth reaching 5.4 and 5.5 per-cent in 2015 and 2016 — broadly in line with potential. The outlook reflects countervailing forces. On the one hand, the high-income acceleration will supply an important tailwind, with their contribution to global growth expected to rise from less than 40 percent in 2013 to nearly 50 percent in 2015. As a result, high-income import demand is projected to accelerate from 1.9 percent growth last year to 4.2 percent in 2014 and as much as 5.0 percent in 2016, and developing country exports from 3.7 percent last year to 6.6 percent by 2016. Developing country growth will not be more robust in part because most developing economies are already fully recovered from the crisis and growing at close to potential. Moreover, in the medium-term, global financial conditions will tighten. However, given substantial further credit easing in the Euro Area, when that tightening will occur has become less certain. Other factors arguing against a more buoyant acceleration include restructuring in China, a gradual move towards a more neutral policy stance in developing countries and, for commodity ex-porters, stable or even declining commodity prices.

Regional prospects vary

Supply-side bottlenecks will preclude stronger growth, particularly in East Asia and the Pacific; Latin America and the Caribbean; and Sub-Saharan Africa. Most economies in these regions have already completely recovered from the financial crisis and are growing at close to potential. Growth in East Asia is projected to slow modestly to 7.0 percent by 2016. Most countries in Latin America are operating at full capacity, but strengthening output in Argentina, Brazil and Mexico is projected to lift regional growth from a weak 1.9 percent this year to around 3.5 percent in 2016. In Sub-Saharan Africa GDP growth is projected to gradually firm toward 5.1 percent in 2016 from a broadly flat 4.7 percent in 2014. In Europe and Central Asia outturns will be affected by the conflict in Ukraine. Growth for developing countries in the region is projected to drop from 3.6 percent in 2013 to 2.4 percent this year, before firming to 3.7 and 4.0 percent in 2015 and 2016. For the broader geographic

region (including high-income countries such as Russia, Poland and other Baltic economies) growth is projected to gradually firm from a low of 1.7 percent in 2014 to 3.2 percent in 2016. In the Middle-East and North Africa, and in South Asia growth is expected to pick up more brusquely. In South Asia the acceleration is expected to be focused in India, as reforms are undertaken to ease supply side constraints, particularly in energy and infrastructure. Regional growth is projected to firm from 4.7 percent in 2013, to 5.3, 5.9 and 6.3 percent in 2014, 2015, and 2016 respectively. In the Middle-East the projected rebound is more gradual, from stagnation last year, to growth of 1.9, 3.6 and 3.5 percent in each of 2014, 2015 and 2016 reflecting rising oil output in Iran and Iraq, and a partial recovery in Egypt and Jordan from the conflict-generated lows of recent years.

Global risks have declined but prospects remain sensitive to volatility in financial markets

High-income country based tail risks to the global economy have been largely eliminated, reflecting the substantial restructuring that has already occurred in both Europe and the US — although more needs to be done. High-income challenges and risks are increasingly of a medium term nature including those related to fiscal sustainability challenges and an orderly exit from unconventional monetary policy (Europe, US and Japan), deflation risks (in Europe) and the need for structural reforms to boost productivity growth. Short-term risks are less pressing and more balanced than before.

Conclusion

The global economic recovery remains on track, with the acceleration in growth underpinned by firming output and demand in high income countries. The economic cycle in most developing economies is also strengthening, in part due to support from stronger high income demand, although growth remains slower than during the pre-crisis boom period. Risks to the outlook are less acute and more evenly balanced than in recent years. Policy and economic adjustments in the wake of last summer's turmoil have narrowed current account deficits and reduced vulnerabilities in many middle-income economies. But adjustments are not yet complete and domestic vulnerabilities persist, while policy space to counter adverse shocks and support domestic activity in the face of adverse shocks is limited. Developing countries need to gradually strengthen buffers to increase their resilience to external shocks, and need to more aggressively pursue structural reforms to ensure stronger growth in the medium term. Indeed in most developing countries, a further acceleration of growth (or even sustaining growth at current levels which are broadly in line with potential) cannot be assured with-out efforts to expand capacity. In most developing regions, demographic dividends from rising entrants into the labour force are fading as age dependency ratios increase, weighing on potential growth. For most of these countries, structural reforms are needed if they are to raise productivity and alleviate supply side bottlenecks.

South Asia Forecast: Together with a projected firming of global growth, regional investment is expected to rise helping to gradually boost regional growth to 5.3 percent in 2014 and to about 6 percent in 2015 and 2016. A substantially weaker than average carry-over and a weak start to the year in India, the largest regional economy, means that even though its quarterly growth is expected to pick up during the course of the 2014 calendar year, the level of annual GDP growth for India, and in turn, for South Asia, would rise only modestly in 2014. Over the medium-term, regional GDP is forecast to strengthen to 5.9 percent

in 2015 and 6.3 percent in 2016 (with the acceleration focused mainly on India), supported by a gradual pickup of domestic investment and stronger demand in the U.S. and Euro Area. But a variety of domestic factors—including supply -side constraints in physical infrastructure and human capital, electricity and natural gas shortages, a weak business and regulatory environment, and high inflation—as well as tightening of international financial conditions are likely to act as headwinds. Reforms to alleviate these structural constraints and to improve productivity would help to raise the region’s underlying growth potential. Continued fiscal consolidation would create additional space for private investment, while maintaining monetary policy credibility (together with a gradual easing of supply-side constraints) would help to reduce entrenched inflationary pressures.

Investment growth is expected to pick up during the forecast horizon conditional on easing of structural constraints and continued reform momentum: A large number of projects, particularly in the infrastructure, steel, and energy sectors, have been stalled in recent years in India. These have contributed to a slowing of investment growth and a rise in stressed loans of banks. As these investment projects come on stream during the forecast period (2014-16), overall investment activity should pick up. In Pakistan, after declining for several years, the country's investment rate is projected to rise during the forecast period. The projected gradual revival of regional investment growth will depend to a large extent on credible efforts to reduce infrastructure and energy supply bottlenecks, create a predictable regulatory environment, implement labour market reforms, and continue fiscal consolidation.

A Projected strengthening of external demand will contribute to a pickup in regional exports: South Asia's exports led by India are expected to accelerate during the forecast period, in line with strengthening global import demand, particularly in the U.S and the Euro Area (the two largest markets for South Asian exports). In Pakistan, preferential market access by the EU (GSP Plus) could help export performance, but energy supply shortages may hamper exporters. In Bangladesh, exports are projected to improve after short-lived effects of political turmoil and transition to better compliance with factory safety standards and working conditions. But upward wage pressures in absence of productivity gains could erode its competitiveness in global markets.

Consumption growth is expected to rise during the forecast period, but the near term outlook is dependent on monsoon rains: A projected gradual increase in regional consumption growth reflects increased income growth as overall growth picks up, and a modest reduction in inflation helped by a projected decline in international non-oil commodity and crude oil prices. The fall in inflation will depend on whether monetary credibility is maintained, fiscal consolidation continues, and there are resolute efforts to address supply-side constraints. In the baseline forecasts for 2014, agricultural production growth is expected to be marginally lower than the longer-term average, with limited impact on consumption and GDP growth. However, if rains are well below average due to El Niño weather conditions, it could significantly moderate agricultural and overall GDP growth.

Capital flows are expected to remain below 2012 levels as a share of regional GDP, as international financial conditions tighten: After falling by more than a quarter in 2013, capital flows to South Asia are forecast to rebound by 27 percent in USD terms in 2014 to \$115 billion (4.5 percent of GDP). In the medium-term, flows would rise broadly in line with GDP to 4.5 percent of GDP in 2016—below the level of 5.6 percent of GDP in 2012, mainly reflecting tighter international financial conditions. Incentives of international investors to repatriate capital will maintain pressure on emerging market financial assets and exchange rates. A credible monetary policy stance and gradual reduction of fiscal deficits would help to reduce both external vulnerabilities and inflationary pressures.

Overall, GDP in most South Asian countries is expected to expand in line with underlying potential: GDP growth in the largest regional economy India (measured at factor cost) is projected to rise to 5.5 percent in the 2014-15 fiscal year, after remaining below 5 percent for two consecutive years, as investment and exports pick up during the course of 2014. India's growth is projected to accelerate to 6.3 percent in FY2015-16 and 6.6 percent in FY2016-17. This forecast assumes that reforms are undertaken to ease supply-side constraints (particularly in energy and infrastructure), improve productivity, and strengthen the business environment, and that fiscal consolidation continues and a credible monetary policy stance is maintained. Medium-term growth in Pakistan and Nepal is projected at about 4 percent, and in Bangladesh at about 6 percent, broadly in line with potential growth. In Sri Lanka, where output is currently above potential, annual growth is forecast to remain broadly stable at 7.2 percent in 2014, and over time, to moderate to about 6.7 percent by 2016, slightly higher than estimates of medium-term potential growth for the country.

Global Plastic Industry

The growing building & construction industry coupled with huge demand for plastics from the same has been driving the building & construction plastics market. Building & construction plastics are being increasingly used in cladding, roofing, water proofing, reinforcement, flooring and insulation. The development of the industry in India, China and Brazil is expected to be one of the vital factors driving demand over the next few years, as per Transparency Market Research. In addition, urbanization

and changing lifestyles in these countries is anticipated to spur growth along with rising demand for plastic based door, windows & their fittings accessories. Increasing application scope of building & construction plastics in green building market coupled with growing demand for bio-based plastics is expected to open opportunities for the growth of the market over the next few years. PVC components were the most widely consumed and accounted for around 35% of the global demand in 2012. The demand for PVC was more due to its characteristics such as durability, abrasion resistance and light weight. Pipes & ducts were the largest application segment for building & construction plastics in 2012. North America, dominated the market in 2012, followed by Europe, owing to the growth of building and construction industry especially with renovation of structures and designs. Asia Pacific is expected to witness the highest growth- CAGR of 7.5% between 2013 and 2019, on account of increasing usage of door fittings and pipes and ducts.

With a CAGR of 7%, global market value for plastics in building & construction application market is anticipated to be worth US\$45.6 bln by 2016, as per Research and Markets. On a global scale, Europe accounts for more than 30% of the market. While US accounts for the largest share of the global market value on a country basis, India and Japan surpasses the US in terms of growth rate anticipated in the near future and leads the world. Among the end-use segments in building & construction plastics, Insulation market is expected to reach US\$13.3 bln. Pipes & ducts occupy for 36% the entire market as the largest share, driving a CAGR of 6.6% during the analysis period, 2011-2016. Doors & fittings sees as the fastest growing end-user, with a CAGR of approximately 8.8% by 2016.

As per plastics.americanchemistry.com, the use of plastics in building and construction helps in energy savings. A one-year study (by *Franklin Associates*) found that the use of plastic building and construction materials saved 467.2 trillion Btu of energy over alternative construction materials. That amounts to enough energy saved over the course of a year to meet the average annual energy needs of 4.6 million U.S. households. Savings vary by material and products. (Source: Franklin Associates, Ltd., U.S. DOE and U.S. Census Bureau). Below are some examples of plastic building products that promote the efficient use of energy and other resources.

Roofing: Reflective light colored roofing membranes made of vinyl or thermoplastic olefin (TPO) blends are key energy saving applications. Studies have shown that the surface temperature of a light covered roof compared to a darker one could be much lower.

Insulation: Whether it is spray polyurethane foam (SPF) in the attic or rigid foam polyiso board on the roof, polyurethane based systems offer durability, energy savings and moisture control. When used for retrofit situations, they also help reduce the amount of building waste sent to landfills. In walls, behind walls and under floors, the use of polystyrene foams can provide

significant energy efficiency. For example, rigid extruded polystyrene (XPS) is a builder favorite because it can be installed easily and effectively. Structural insulated panels (SIPs) made with expanded polystyrene (EPS) can help homeowners save hundreds of dollars annually on heating and cooling bills. Savings vary by material and products.

Wall Coverings: Vinyl based wall coverings are commonly used for durable, easy-to-clean hospitality and health care facilities. Vinyl requires only half as much energy to manufacture as the same amount of paper wall coverings.

Windows: Plastics rival traditional materials for window glazing. For example, polycarbonate is used as panes. These clear, lightweight, shatter-resistant plastic products have low thermal conductivity, which can help to reduce heating and cooling costs. Vinyl window frames are inherently energy efficient and save the U.S. nearly 2 trillion thermal units of energy per year, helping reduce the greenhouse gas emissions associated with energy generation all the while cutting maintenance time, materials and costs

Piping: Plastic pipe and fittings are easy to install, durable and will not rust or corrode over time. Several types of plastics are used for piping depending on the properties and performance required. Whether they are polyethylene, polypropylene, polyvinyl chloride (PVC), or acrylonitrile butadiene styrene (ABS) they each offer excellent fusion integrity when joined properly helping to eliminate potential leak points where water could be wasted. In home building, flexible cross-linked polyethylene piping (PEX) is becoming a favourite.

Decks, Fences and Railings: “Lumber” planks and rails made from recycled plastics or plastic-wood composites are carefully engineered to same dimensions so warpage and knots are virtually eliminated. They can outlast traditional materials, often require less maintenance, and are resistant to peeling, cracking, splintering or fading.

Plastic House Wrap: The advent of plastic house wrap technology has reduced the infiltration of outside air into the average home by 10-50%, helping to drastically reduce the energy required to heat or cool the home. These plastic films have helped reduce greenhouse gas emissions in the U.S. by as much as 120 to 600 million tons of CO₂ since 1980 (assuming that all homes built since 1980 have some form of plastic barrier).

Wet Area Doors: PVC Doors for wet areas like kitchen & toilets are very popular in middle and low cost housing across the India. Their demand is growing at around 30-40% per year.

PVC Wall Panelling & False Ceiling: All the buildings in the costal belts of India from Gujarat till Bengal have problem of salt & dampness. The paints last only for 2-3 years & the best and time tested solution is PVC Wall Panelling & False Ceiling. The market growth of this segment is almost more than the 100% per annum in last 3-4 years. Kerala, Punjab, Haryana, Bengal are the biggest market for these products. The product is fast moving and have very goods future potentials.

PVC Picket Fencings: This is new product for Indian market but getting acceptance in horticulture industry and having a promising future.

UPVC Door & Windows: The Indian market size for windows and doors is approx. Rs 12000 crore (Source :Long, Kenneth 2005. World Windows and Doors. Study #1977. The Freedonia Group) with the predominant material of constructions being Timber (in rural and in upper end constructions), MS (in low cost housing) and Aluminium (in urban constructions). Out of approx Rs 6000 crore market for windows, approx Rs 300 crore exists for Upvc windows. Windows are no longer an object to fill the openings in the Building envelope. Today's windows are expected to perform various functions such as letting in light, keeping out heat/cold, noise attenuation, as well as being aesthetically attractive, needing lower maintenance and using energy saving/efficient materials/processes in place of scarce/energy efficient conventional materials. uPVC Windows/Door profiles are made from Poly Vinyl chloride resin, one of the most extensively used thermoplastics finding end uses in diverse sectors such as infrastructure, agriculture, healthcare etc. UPVC Windows/Doors are extensively used abroad, and are currently at a nascent stage in India. Much needs to be done in marketing of these products by showcasing the advantages of these products to the builders, architects and common man which includes the major advantage of energy saving i.e. reduction in air conditioning bills upto 20-30% as well as saving of wood (in turn-forests) and energy intensive materials like Aluminium.

The demand driver for Poly Vinyl Chloride Windows and Doors is Infrastructure catalysed by :

1. Increasing population (India is 2nd most populous country after China)
2. Increasing prosperity
3. Nuclear families leading to increase in housing demand
4. Migration from Rural to Urban area
5. Poor wood availability
6. Saves construction time as factory made windows & doors reduces the fitting & installation time
7. Increase in high rise residential & commercial building
8. Sound Insulation characteristics is big feature to increase uPVC Windows demand to curb the increasing noise pollution in urban areas
9. Recyclability of uPVC window material makes them suitable for green building norms
10. Heat Insulation character makes them energy saving
11. Low maintenance cost
12. Wide range of designs and various colour options

13. Plastics are finding increased application in the field of infrastructure in:
14. PE Rotational Moulded Tanks
15. PP Flexible Intermediate Bulk Container
16. PP Woven Geotextiles
17. PVC Window Profiles
18. PVC SWR Pipes
19. PVC wet area doors
20. Damp resistant PVC false ceiling & wall panelling

Assuming Indian population of 100 crore and an average of 5 persons dwelling unit and an average weight of 44 kgs of PVC Doors and Windows per dwelling unit with a market penetration of 3%, the estimated potential of PVC Doors and Windows would be 3,00,000 tpa.

Potential of windows, doors in India- 3,00,000TPA

Supply of uPVC windows, doors in India—40,000TPA

Upvc Window systems come with excellent hardware, various colours and finish thus enhancing the beauty of dwellings. These windows always look new and do not need any painting.. Further they provide noise attenuation and reduce energy bill of air-conditioned places by about 20-30%.

Versatility of PVC Door & Window Profiles

Inherent advantages of PVC Door & Window Profiles

- a) Energy Savings – Reduction in air-conditioning bills upto 20-30%
- b) Cost economics
- c) Conservation of Natural Resources
- d) Aesthetics
- e) Acoustics and so many other advantages

Major Demand Driver

The Indian construction industry

The Indian construction industry registered a compound annual growth rate (CAGR) of 13.52% in nominal terms during the review period (2009–2013), driven by private and public investments in infrastructure, as well as institutional and commercial construction projects. Industry growth is expected to remain strong over the forecast period (2014–2018), as a result of the government’s commitment to making infrastructural improvements and the implementation of the 12th Five-Year Plan (2012–

2017), under which the government expressed plans to invest INR56.3 trillion (US\$1.0 trillion) in various long-term development plans. Consequently, industry output is expected to record a forecast-period nominal CAGR of 10.09%.

(Source: <http://www.sabmagazine.com/blog/2008/12/18/water-cube/>)

Key Highlights:

- According to the Ministry of Statistics and Programme Implementation, the construction industry's value add at constant prices rose by 3.0% in 2013 – up from 1.8% in 2012. The annual pace of growth has slowed, however, from an average of 8.5% in 2010–2011. The outlook for growth is positive, having been supported by government investment to improve the country's infrastructure, education and healthcare, as well as spending on affordable homes to meet the country's rising demand for housing. Large-scale investments in infrastructure development under the 12th Five-Year Plan will be an important driver of growth.
- Infrastructure investment remains a key strategy for supporting economic growth. In its 2014–2015 budget, the Indian government increased its expenditure on the infrastructure sector and allocated INR1.8 trillion (US\$27.3 billion); an increase of 8.6% over the 2013–2014 budget expenditure. This will contribute to the continued expansion of infrastructure construction over the forecast period.
- With an aim to increase foreign exchange earnings from the tourism industry to INR1.5 trillion (US\$26.0 billion) and attract eight million tourists by 2015, the government is focusing on the construction of new tourist destinations such as Tannirbhavi aquamarine park, the Bhaleydungga Skywalk in Gangtok and the construction of a film city at Hesaraghatta in Bangalore. This will help to support growth in the leisure and hospitality buildings category over the forecast period.
- As a robust and modern transportation infrastructure is vital for the growth and competitiveness of the economy, the government is focusing more on infrastructure development. Accordingly, a total of INR56.3 trillion (US\$1.0 trillion) is planned to be spent in the next planning period of 2012–2017; an increase in investment of 136.0% from the 11th Five-Year Plan. From this proposed investment, INR15.0 trillion (US\$279.4 billion) will be spent on electricity, INR9.7 trillion (US\$180.4 billion) on roads and bridges, and INR5.2 trillion (US\$97.1 billion) on railways. The government plans to achieve these objectives through the PPP model, and attract half of the funding amount from the private sector.
- The country's rising population and urbanization trends will continue to provide some support for residential construction. According to the World Population Statistics, the country's population grew by 17.7% from 2000 to 2011 – from 1.1 billion to 1.2 billion – and is expected to reach 1.4 billion and 1.6 billion by 2020 and 2040 respectively. As a proportion of the total, the country's urban population increased from 27.8% in 2001 to 31.2% in 2011, and is expected to reach 33.0% by 2026. The country's growing population and rapid urban development will create fresh demand for residential construction market over the forecast period.

MANUFACTURING PROCESS FLOW CHART OF PVC PROFILE SECTION

MANUFACTURING PROCESS FLOW CHART OF PVC PROFILE SECTION

MANUFACTURING PROCESS OF PVC PROFILE SECTION:

PVC Profile manufacturing process starts with dry blending of PVC resin with fillers, stabilizers, pigments and additives in appropriate and accurate proportions so that quality of the final product can be maintained.

Mixing Department: The mixture of above components is then blended in a heating & cooling high speed dry blending machine at a high speed to make the mixture uniform.

Extrusion Department: The mixture then goes into Extrusion machines which are high quality imported/domestic machines of various sizes i.e. 90/80/75/65/50/45mm extruders. The mixture plastisizes in extrusion machine which then goes into different dies and moulds which are made to give profiles shape according to the designs and specifications. The profile then gets cooled off after it passes the cooling zone of the extruder which converts it into a hard profile.

Sawing and Cutting: Profiles are now sawed and cut into required sizes as per the customer requirement. The cutting unit is also attached to the extruders, which is automated cutting.

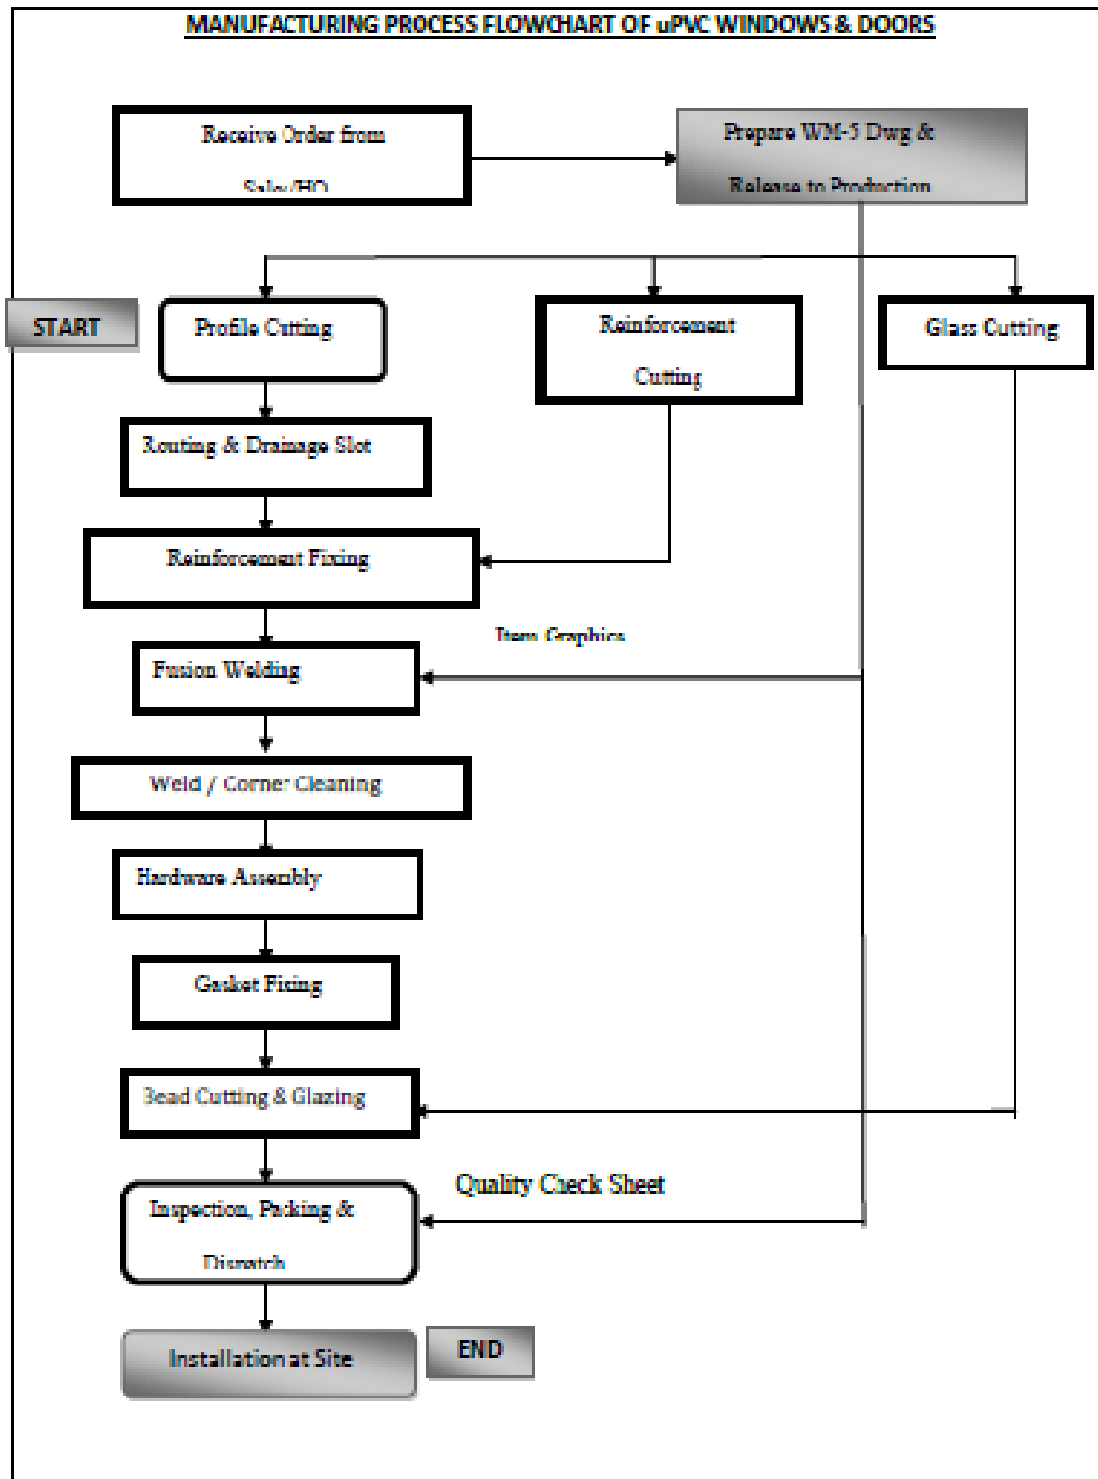

Quality Control: This is the first step of quality check where in the profiles are checked for any variations in dimensions, sizes & colours. If found satisfactory, they go to next level for printing and coating; if not, they go to rejected goods. which further goes into go for scrap cutting and recycling process through grinder and dry blending process.

Printing and Coating Process: The profiles which are approved by Quality Department go for printing department where it first gets printed with roller-print process and passes through the surface UV Coating & curing line to give the required high gloss / gloss / mat finish as per the orders & design specifications.

Quality Control: It is the second step quality check which is performed to check if the printing and coating process is done properly, although being done from machine sometimes can have dots, which is checked in this stage. If found satisfactory it goes into packaging, storage and dispatch; if not, the product again goes to rejected goods to get recycled.

Packaging, Storage and Dispatch Department: The final profiles are then packed taking care of scratches and are finally dispatched from the production facility to the customer sites or at our warehouses.

MANUFACTURING PROCESS FLOWCHART OF uPVC WINDOWS & DOORS

STEPS INVOLVED IN MANUFACTURING PROCESS OF uPVC WINDOWS & DOORS:

Manufacturing process starts from receiving the order from head office. At first, drawing of windows or doors which is approved from the customer's end is received at production facility. Process is fully controlled through window maker job process documentation system which provides all requisite inputs of all process stages.

Secondly, it goes into three departments, i.e., profile cutting department, reinforcement making and cutting department, glass cutting department.

Routing and Drainage Slot Cutting Department: After the profiles are cut according to the size, the routing and drainage portion is made through machines from where the water will get drained off when the window is exposed to water, i.e., rain, cleaning.

Reinforcement manufacturing and fixing: Reinforcements are made according to profile used in the window and then fixed into profiles with screws and according to the profile size of which window is made. Our company has its own reinforcement making, cutting, shaping, and fixing facility.

Fusion Welding Department: After reinforcement are made, the products then goes into fusion welding machine which welds the joints at 45 degrees both sides. The corners then get cleaned first from CNC machine and then manually checked for final finish.

Gasket Fixing Department: Gasket is then fixed into window for fixing glass into it.

Hardware Fixing & Assembly Department: In this department, all operating hardware are fitted as per the design and then frame gets assembled post beading, cutting and glazing .

Inspection, packaging & Dispatch: Post finishing hardware fixing and assembling, the final products are inspected for the dimensions, designs & fabrication quality comparing the same with job drawing based on which entire process of fabrication is being done.

If found satisfactory, packaging is initiated for the protection & safety of the product and then window gets dispatched from the manufacturing facility to the respective buyers/installation location.

Installation: At the end, installation is carried out by qualified and trained technicians at the installation site.

Central Sales Tax Act, 1956

The Central Sales Tax Act formulates principles for determining (a) when a sale or purchase takes place in the course of inter-state trade or commerce; (b) when a sale or purchase takes place outside a State and (c) when a sale or purchase takes place in the course of imports into or export from India. This Act provides for levy, collection and distribution of taxes on sales of goods in the course of inter-state trade or commerce and also declares certain goods to be of special importance in inter-State trade or commerce and specifies the restrictions and conditions to which State laws imposing taxes on sale or purchase of such goods of special importance (called as declared goods) shall be subject. Central Sales tax is levied on inter State sale of goods. Sale is considered to be inter-state when (a) sale occasions movement of goods from one State to another or (b) is effected by transfer of documents during their movement from one State to another.

A sale or purchase of goods shall be deemed to take place in the course of inter-state trade or commerce if the sale or purchase is affected by a transfer of documents of title to the goods during their movement from one state to another. When the goods are handed over to the carrier, he hands over a receipt to the seller. The seller sends the receipt to buyer. The buyer gets delivery of goods on submission of the receipt to the carrier at other end. The receipt of carrier is 'document of title of goods'. Such document is usually called Lorry Receipt (LR) in case of transport by Road or Air Way Bill (AWB) in case of transport by air. Though it is called Central Sales Tax Act, the tax collected under the Act in each State is kept by that State only. Central Sales Tax is payable in the State from which movement of goods commences (that is, from which goods are sold). The tax

collected is retained by the State in which it is collected. The Central Sales Tax Act is administered by sales tax authorities of each State. The liability to pay tax is on the dealer, who may or may not collect it from the buyer.

Value Added Tax

Value Added Tax (“VAT”) is a system of multi-point levy on each of the entities in the supply chain with the facility of set-off input tax whereby tax is paid at the stage of purchase of goods by a trader and on purchase of raw materials by a manufacturer. Only the value addition in the hands of each of the entities is subject to tax. VAT is based on the value addition of goods, and the related VAT liability of the dealer is calculated by deducting input tax credit for tax collected on the sales during a particular period. VAT is essentially a consumption tax applicable to all commercial activities involving the production and distribution of goods, and each State that has introduced VAT has its own VAT Act, under which, persons liable to pay VAT must register themselves and obtain a registration number.

Customs Act, 1962

Laws relating to Intellectual Property

Trademarks Act

The Trade Marks Act provides for the application and registration of trademarks in India. The purpose of the Trade Marks Act is to grant exclusive rights to marks such as a brand, label and heading and to obtain relief in case of infringement for commercial purposes as a trade description. The registration of a trademark is valid for a period of 10 years, and can be renewed in accordance with the specified procedure.

Application for trademark registry has to be made to Controller-General of Patents, Designs and Trade Marks who is the Registrar of Trademarks for the purposes of the Trade Marks Act. The Trade Marks Act prohibits any registration of deceptively similar trademarks or chemical compound among others. It also provides for penalties for infringement, falsifying and falsely applying trademarks.

Copyrights Act

The Copyrights Act governs copyright protection in India. Under the Copyright Act, copyright may subsist in original literary, dramatic, musical or artistic works, cinematograph films, and sound recordings. Following the issuance of the International Copyright Order, 1999, subject to certain exceptions, the provisions of the Copyright Act apply to nationals of all member states of the World Trade Organization.

While copyright registration is not a prerequisite for acquiring or enforcing a copyright, registration creates a presumption favoring ownership of the copyright by the registered owner. Copyright registration may expedite infringement proceedings and reduce delay caused due to evidentiary considerations. Once registered, the copyright protection of a work lasts for 60 years.

The remedies available in the event of infringement of a copyright under the Copyright Act include civil proceedings for damages, account of profits, injunction and the delivery of the infringing copies to the copyright owner. The Copyright Act also provides for criminal remedies, including imprisonment of the accused, imposition of fines and seizure of infringing copies.

An application for a patent can be made by (a) person claiming to be the true and first inventor of the invention; (b) person being the assignee of the person claiming to be the true and first inventor in respect of the right to make such an application; and (c) legal representative of any deceased person who immediately before his death was entitled to make such an application. Penalty for the contravention of the provisions of the Patents Act include imposition of fines or imprisonment or both.

Designs Act

The objective of design law is to promote and protect the design element of industrial production. It is also intended to promote innovative activity in the field of industries. The Controller General of Patents, Designs and Trade Marks appointed under the Trademarks Act shall be the Controller of Designs for the purposes of the Designs Act. In certain cases the State Pollution Control Board may cause the local Magistrates to restrain the activities of such person who is likely to cause pollution. Penalty for the contravention of the provisions of the Water Act include imposition of fines or imprisonment or both.

The Central Pollution Control Board has powers, inter alia, to specify and modify standards for streams and wells, while the State Pollution Control Boards have powers, inter alia, to inspect any sewage or trade effluents, and to review plans, specifications or other data relating to plants set up for treatment of water, to evolve efficient methods of disposal of sewage and trade effluents on land, to advise the State Government with respect to the suitability of any premises or location for carrying on any industry likely to pollute a stream or a well, to specify standards for treatment of sewage and trade effluents, to

Penalties for noncompliance with the obligation to furnish a return and evasion of cess include imprisonment of any person for a period up to six months or a fine of ` 1,000 or both and penalty for non-payment of cess within a specified time includes an amount not exceeding the amount of cess which is in arrears.

The Air (Prevention and Control of Pollution) Act, 1981, as amended (the “Air Act”)

The State Pollution Control Board is required to grant consent within a period of four months of receipt of an application, but may impose conditions relating to pollution control equipment to be installed at the facilities. No person operating any industrial plant in any air pollution control area is permitted to discharge the emission of any air pollutant in excess of the standards laid down by the State Pollution Control Board.

The penalties for the failure to comply with the provisions of the Air Act include imprisonment of up to six years and the payment of a fine as may be deemed appropriate.
