Our BIS license for application of ‘Hallmark’ on our jewellery products for specifications as per IS 1417: 1999 has been cancelled w.e.f. September 29, 2016 by the Bureau of Indian Standards on the grounds that we have violated section 11 of the Bureau of Indian Standards Act, 1986. Any such penalty/fines could adversely affect the overall operations of the group and financial conditions and also divert the attention of the management and promoter towards the group company which could have an adverse affect on our operations and financials. For more information, please refer chapter titled "***Our Group Companies***" beginning on page 140 of this Prospectus.

For further details on pending approvals, please refer to section titled "***Government and Other Approvals***" beginning on page 229 of the Prospectus.

Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

Though our company will take all the possible endeavor to comply with the provisions of the Companies Act but in case of our inability to do so or in case of any delay, we may be subject to penal action from the appropriate authorities which may have an adverse affect on our financial position and reputation. For details of unsecured loans taken by us from related parties and others, please refer to Chapter titled "***Statement of Financial Indebtedness***" beginning on page 203 of

Additionally, we are yet to file forms for registration of charge on secured loans obtained by us with ROC. Further, we have not complied with some Accounting Standards in the past such as AS-2(Valuation of Inventories), AS-6 (Depreciation Accounting) and AS-15 (Employee Benefits). However, now we have made necessary compliance in the re-stated financial statements of the Company. In the event of any cognizance being taken against the Company, suitable actions may be taken.

8. Our income and sales are subject to seasonal fluctuations and lower income in a peak season may have a disproportionate effect on our results of operations.

Our industry has seasonal increases and decreases in revenues and profitability, corresponding with weddings and festivals. Our sales have historically exhibited certain seasonal fluctuations, reflecting higher sales volumes on festivals and other occasions such as Durga Puja, Akshay Tritiya, Dhanteras, Diwali and Christmas which occur in the third and fourth quarter of the fiscal year. This period also coincides with the wedding season in India. While we stock certain inventory to account for this seasonality, our fixed costs such as lease rentals, employee salaries, showroom operating costs and logistics-related expenses, which form a significant portion of operating costs, are relatively constant throughout the year. Consequently, lower than expected net sales during the third or fourth quarters of the fiscal year or more pronounced seasonal variations in sales in the future could have a disproportionate impact on our operating results for the fiscal year, or could strain our resources and impair our cash flows. Any slowdown in demand for our jewellery during peak seasons or failure by us to accurately anticipate and prepare for such seasonal fluctuations could have a material adverse effect on our business, financial condition and results of operations.

9. The non-availability or high cost of quality gold bullion and diamonds and fluctuations in their prices may have an adverse effect on our business, results of operations and financial condition.

The jewellery industry is generally affected by fluctuations in the price and supply of gold, diamonds and, also to some extent, other precious and semi-precious metals and stones. Timely procurement of materials such as gold bullion, diamonds and precious and semi-precious stones, as well as the quality and the price at which it is procured, play an important role in the successful operation of our business. Accordingly, our business is affected by the availability, cost and quality of raw materials. The prices and supply of these and other materials depend on factors beyond our control, including general economic conditions, competition, production levels and regulatory factors such as custom duties. Further, fluctuations in gold prices may affect our results of operations in various ways. An increase in the price of gold may result in an increase in our income from sales assuming such increases do not adversely affect sales volumes. However, a significant increase in the price of gold or a negative outlook on future gold prices could, in the short term, adversely affect our sales volumes. We cannot assure you that we will be able to procure quality raw materials at competitive prices or at all.

10. Our Jewellery business is dependent on factors affecting consumer spending habit that are out of our control

Jewellery purchases are discretionary and are often considered as luxury purchase. Consequently, our business is sensitive to a number of factors that influence consumer spending habit which includes general economic conditions, consumer confidence in future economic conditions, recession and fears of recession, consumer debt, unstable consumer income, conditions in the housing market, interest rates, inflation. Any fall in demand or a decline in the consumer spending habit on jewellery could adversely affect our business, financial condition and results of operations.

11. Our entire revenue from Windmill Business is derived from M. P. Power Management Co. Ltd.(MPPMCL). An inability or failure by us to meet the contractual commitments could have a material adverse effect on our business, financial position and results of operations.

We have entered into a long term contract with M.P. Power Management Co. Ltd., an entity wholly owned by Madhya Pradesh Government, for sale of electricity generated by us through wind turbine generators, for a period of 25 years beginning from September 29, 2012. As per the terms of agreement, we are fully responsible for operation and maintenance of the Wind Power Plant in accordance with Standard Utility Practices, relevant technical standards and specifications. An inability or failure by us to meet the contractual commitments could result in loss of our exclusive Customer, which can have an adverse effect on our business, financial

D.P. Abhushan Limited

position and results of operations. Further, we will not be able to increase the tariff rate per unit, as the same has been fixed for 25 years as per the agreement.

12. Due to limited operating history of our Company and limited experience of existing promoters in the line of Wind Power business, we may face new business and financial challenges which may affect our profitability and results of operations.

Our Company has entered in Wind Power Business in 2012 by installing 5 wind turbine generators of 750 KW each in Village Bagia & Naveli, Ratlam, Madhya Pradesh. Due to limited operating history and limited experience of our existing promoters in the wind power business, we may not succeed in addressing certain risks pertaining to wind power business, including our ability to retain existing customer or maintain adequate control of our costs and expenses. If we are unsuccessful in addressing business risks in time or at all, our business and financial conditions can be materially affected. Although, we have entered into an agreement in 2012 with a third party, namely, Global Wind Infrastructure and Services Private Limited (GWISPL), for providing operation and maintenance services relating to Wind Turbine Generators but there can be no assurance that the work performed by GWISPL will be of satisfactory quality, completed in a timely manner, or at all. If the work is not completed and/or is not of acceptable quality, we may incur substantial additional costs to remedy any defects which can adversely impact our results of operations and cash flows.

13. The viability and level of wind energy generation is dependent on wind patterns, which are not constant and vary over time.

The viability of wind energy project is primarily dependent on the wind patterns conforming to the patterns that had previously been recorded to determine the suitability of the site for wind energy project. There can be no assurance that wind patterns at our wind farm site will remain constant. Changes in wind patterns at our site could reduce the quantum of electricity units generated which can have a material adverse effect on our business, financial condition and results of operations.

We have filed an application for registration of trademark  in the year 2007 under the Trademarks Act, 1999 but the same has been opposed from registration by a third party in the year 2008. Further, the current status of our two trademark applications dated June 06, 2017 for registration of Wordmarks “D.P. Jewellers” and “Kataria D.P. Jewellers” is under “Objection” by the Registrar of

Trademarks. Also, our trademark  has not been registered under the Trade Marks Act, 1999 as on date of Prospectus, hence, we do not enjoy the statutory protections accorded to a registered trademark. Also, we do not possess any documentary evidence that “we are operating since 1940”, which is being depicted in our trademark.

Our Company is in use of the aforesaid trademark in its regular business operations. In the event if any injunctive or other adverse order is issued against us in respect of the said trademark, we may not be able to avail the legal protection and may be subject to claims alleging breach of third party intellectual property rights, which may adversely affect our goodwill, business and results of operations. For further details on the trademarks, please refer to Chapter titled “***Government and Other Approvals***” beginning on page 229 of this Prospectus.

17. Our Company does not have a clear title on certain parcels of land area as mutation of such land area has not been made, which may affect our ownership of and ability to optimally utilise, such land and lead to legal proceedings.

Our Company possess certain parcels of land area admeasuring to 4.54 hectares in Village Bagiya, Tehsil Piploda, Ratlam, whose title are not mutated in our favour in the revenue records. Failure of our Company to mutate these land parcels in our favour may adversely impact our right of possession, whether entirely or partially and can lead to payment of taxes to the local municipal bodies. Consequently, it may impact our future plans for optimum utilisation of such area and may lead to legal proceedings. Any challenges to our Company having a clear title to such parcels of land, or initiation of legal proceedings in relation to such land parcels, may have an adverse impact on our business and operations. For details of non-mutated lands, please refer to Section “Immovable Properties” under Chapter titled “***Our Business***” beginning from page 88 of this Prospectus.

18. The lands purchased by our company for setting up wind mills are agricultural lands and we have not got the land use converted to industrial which may subject us to penalties from the appropriate authorities adversely affecting our operations and financials.

Our company purchased certain lands in Village Bagiya, Tehsil Piploda, Ratlam for the purpose of setting up wind turbine generators. The said lands are ‘agricultural lands’ and we did not got their land use converted to ‘industrial’ before setting up wind turbine generators on these lands. Though no legal action has been initiated against the company by the appropriate authorities so far, in the event of any cognizance being taken by the concerned authorities in respect of above, penal actions may be taken against the Company, in which event the operations and financials of the Company may be adversely affected. As we expand our retail network, we will be exposed to various challenges, including those relating to competition, regulatory regimes, business practices and customs. We may require significant financial resources in connection with the operation of our new showroom, financing inventory and hiring of additional employees for our expanded operations. We will also be required to obtain certain approvals to carry on business in new locations and there can be no assurance that we will be successful in obtaining such approvals.

Further, we expect our expansion plans to place significant demands on our managerial, operational and financial resources, and our expanded operations will require further training and management of our employees and the training and induction of new employees. An inability to effectively manage our expanded operations or pursue our growth strategy may lead to operational and financial inefficiencies, which could have a material adverse effect on our business prospects, financial condition and results of operations.

20. Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.

As on May 01, 2017, we had total inventory consisting of finished goods to the value of ` 113.98 crores. Our business operations requires us to maintain large amounts of inventory at all our showrooms at all times. Our operations may be subject to incidents of theft or damage to inventory in transit, prior to or during showroom stocking and display. Although we have set up various security

measures, including tagging our products, CCTV in showrooms, armed security guards and follow stringent operational processes such as daily stock taking, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition. Additionally, in case of losses due to theft, fire, breakage or damage caused by other casualties, there can be no assurance that we will be able to recover from our insurer the full amount of any such loss in a timely manner, or at all. If we incur a significant inventory loss due to third-party or employee theft and if such loss exceeds the limits of, or is subject to an exclusion from, coverage under our insurance policies, it could have a material adverse effect on our business, results of operations and financial condition.

21. If we fail to anticipate, identify or react appropriately or in a timely manner to trends in the jewellery industry, we could experience reduced consumer acceptance of our products, a diminished brand image, higher markdowns and costs to recast overstocked jewellery.

The finished jewellery products purchased from independent jewellers and the jewellery manufactured through job-work arrangements are mostly based on available designs. We cannot assure you that we can consistently keep up with industry trends. If we fail to anticipate, identify or react appropriately or in a timely manner to customer buying decisions, we could experience reduced consumer acceptance of our products, a diminished brand image, higher markdowns and costs to recast overstocked jewellery. These factors could result in lower selling prices and sales volumes for our products, which could adversely affect our financial condition and results of operations. Also, we conduct sales operations in regions which vary significantly in taste. Hence, all our designs may not have comparable demand across all our regions. We are required to constantly create designs that conform to the significantly different taste that is exhibited by our customers across different regions. Any failure to do so could adversely affect our business.

25. We do not register our jewellery designs under the Designs Act, 2000 and we may lose income if our designs are duplicated by competitors.

D.P. Abhushan Limited

or the designs given to job workers, we may suffer a loss of revenue, which could adversely affect our results of operations and financial condition. Further, designs developed by us may inadvertently infringe on the intellectual property rights of third parties, which may expose us to legal proceedings. Thus we are susceptible to litigation for infringement of intellectual property rights in relation to such designs. Any such litigation, proceedings or allegations could materially and adversely affect our reputation, results of operations and financial condition.

29. The Indian jewellery retail industry is extremely competitive.

We operate in highly competitive and fragmented markets, and competition in these markets is based primarily on market trends and customer preferences. The Indian jewellery retail industry is highly fragmented and dominated by the unorganized sector, from which the organized retail jewellery sector faces intense competition. The players in the jewellery sector in India often offer their products at highly competitive prices and many of them are well established in their local markets. We also compete against other organized national, regional and local players. Aggressive discounting by competitors, particularly those facing financial pressures or holding “going out of business” sales, may force us to reduce our prices in order to remain competitive and may thereby adversely impact our results of operations. This is particularly the case for easily comparable pieces of jewellery, of similar quality, sold through showrooms that are situated in our vicinity. The pricing of gold jewellery in particular is extremely competitive due to its objectively verifiable value. This results in us having limited control over our pricing of gold jewellery. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our

D.P. Abhushan Limited

business, financial condition and results of operations. For more information regarding our competitors, see “*Our Business - Competition*” on page 88 of this Prospectus.

31. Our Company in the past has entered into Related Party Transactions and may continue to do so in future also, which may affect our competitive edge and better bargaining power if entered with non-related parties resulting into relatively more favourable terms and conditions and better margins.

Our Company has entered into various transactions with our Directors, Promoter, Promoter Group and Subsidiary Companies. These transactions, inter-alia includes issue of shares, remuneration, rent payments, loans and advances, etc. Our Company has entered into such transactions due to easy proximity and quick execution. However, there is no assurance that we could not have obtained better and more favourable terms than from transaction with related parties. Additionally, while it is our belief that all our related party transactions have been conducted on an arm’s length basis, we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. Our Company may enter into such transactions in future also and we cannot assure that in such events there would be no adverse affect on results of our operations, although going forward, all related party transactions that we may enter will be subject to board or shareholder approval, as under the Companies Act, 2013 and the Listing Regulations . 33. We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on August 31, 2017 our total outstanding indebtedness was ₹ 8430.97 Lakhs.

Our significant indebtedness results in substantial amount of debt service obligations which could lead to:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future; and
- increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence

of these events may have an adverse effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “*Statement of Financial Indebtedness*” on page 203 of this Prospectus.

34. Change in technology may affect our business and financial condition.

Our Promoter and Promoter Group Member has provided personal guarantees to secure a significant portion of our existing borrowings taken from HDFC Bank Limited, and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal guarantees provided by our Promoter and Promoter Group Member may be invoked which could negatively impact the reputation and net worth of our Promoter. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. In addition, our Promoter and Promoter Group Member may be required to liquidate his shareholding in our Company to settle the claims of the lenders, thereby diluting his shareholding in our Company. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “*Statement of Financial Indebtedness*” on page 203 of this Prospectus.

We also depend significantly on our Key Managerial Persons for executing our day to day activities. The loss of any of our Promoter and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section “*Our Management*” on page 114 of this Prospectus.

The proposed fund requirement for our Working Capital requirements, as detailed in the section titled “Objects of the Issue” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 69 of this Prospectus.

38. We are subject to the restrictive covenants of banks in respect of the Loans/ Credit Limits and other banking facilities availed from them.

Our financing arrangements contain restrictive covenants whereby we are required to obtain approval from our lender, regarding, among other things such as, all future borrowings, undertake any guarantee obligation etc. There can be no assurance that such consents

D.P. Abhushan Limited

will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. We believe that the insurance coverage maintained by us is adequate and consistent with the size of our business. However, there is no assurance that the insurance policy taken by us will be adequate for us to cover the losses. If we suffer any uninsured loss or if claim made by us in respect of an insurance is not accepted or any loss occurred by us is in excess of the insurance coverage may adversely affect our operation, results and financials. For further information, see the section titled **“Our Business”** on page 88 of this Prospectus.

40. Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards operating expenses, inventories and cash and cash equivalents. As on May 01, 2017, we have been sanctioned working capital of ` 3300 lakhs from HDFC Bank Limited. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. In case of any such defaults from our debtors, may affect our business operations and financials. For further details regarding working capital requirement, please refer to the section **“Objects of the Issue”** on page 69 of this Prospectus.

41. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

42. We may not be able to sustain effective implementation of our business and growth strategy.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

43. We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers, delivery of raw materials to our job workers and delivery of our products to our Showrooms. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.

Our success depends on the smooth supply and transportation of the raw materials required for our business, delivery of the raw materials to the job worker and transportation of our products to our Showrooms, all of which are subject to various uncertainties and risks. In addition, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials and products which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of raw materials or to deliver the products to our Showrooms in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Our promoters along with the promoter group will continue to hold collectively 73.35 % of the equity share capital of the company. As a result of the same they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

49. Certain data mentioned in this Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. EXTERNAL RISK FACTORS

50. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

51. The recent currency demonetization measures imposed by the Government of India may affect the India Economy and our business.

Through notifications dated November 8, 2016 issued by the Ministry of Finance, GoI and the RBI ` 500 and ` 1,000 denominations of bank notes of then existing series issued by the RBI have ceased to be legal tender. Pursuant to this currency demonetisation, these high denomination notes have no value and cannot be used for transactions or exchange purposes with effect from November 9, 2016. These notes are currently being replaced with a new series of bank notes. In an effort to monitor replacement of demonetised notes, the GoI has specified restrictive limits for exchange and withdrawal of currency all over India. The process of demonetisation and replacement of these high denomination notes is likely to reduce the liquidity in the Indian economy which has significant reliance on cash. These factors may result in reduction of purchasing power, and alteration in consumption patterns of the economy in general. While the comprehensive and long-term impact of this currency demonetisation measure cannot be ascertained at the moment, it is possible that there will be a slowdown in the economic activities in India as expressed by various experts, at least in the short term, given the demonetization impacts a majority quantity of the cash currency in circulation. Such a slowdown can affect the Indian economy, impacting the consumer sector, in turn affecting the operations of our company, which can affect their financials and profitability.

52. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

53. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

54. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in

D.P. Abhushan Limited

India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

55. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

Global Economic Overview:

Global growth is firming, contributing to an improvement in confidence. A recovery in industrial activity has coincided with a pickup in global trade, after two years of marked weakness. In emerging market and developing economies (EMDEs), obstacles to growth among commodity exporters are gradually diminishing, while activity in commodity importers remains generally robust. As a result, and despite substantial policy uncertainty, global growth is projected to accelerate to 2.7 percent in 2017, up from a post-crisis low of 2.4 percent in 2016, before strengthening further to 2.9 percent in 2018-19, broadly in line with January projections.

Activity in advanced economies is expected to gain momentum in 2017, supported by an upturn in the United States, as previously anticipated. In the Euro Area and Japan, growth forecasts have been upgraded, reflecting strengthening domestic demand and exports. Investment across advanced economies has firmed, while private consumption growth has moderated. As actual growth continues to exceed potential growth, increasing inflation and narrowing output gaps have raised the prospects of less accommodative monetary policy. Advanced economy growth is expected to accelerate to 1.9 percent in 2017, before moderating gradually in 2018-19. As usual, the outlook is predicated only on legislated fiscal and trade policies. The recovery in global trade coincides with strengthening investment, which is more import intensive than other components of aggregate demand. Nevertheless, structural headwinds, including slower trade liberalization and value chain integration, as well as elevated policy uncertainty, continue to weigh on the outlook for trade.

Global financing conditions have been benign and benefited from improving market expectations about growth prospects. Financial market volatility has been low despite elevated policy uncertainty, reflecting investor risk appetite and, perhaps, some level of market complacency. Renewed risk appetite has supported EMDE financial markets and led to a narrowing of corporate bond spreads globally. Capital inflows to EMDEs were robust in the first half of 2017, partly in a rebound from late-2016 weakness. Over time, however, a gradual tightening of international financing conditions may weigh on capital flows to EMDEs. Commodity prices have continued to rise moderately, although prospects for increased U.S. shale oil production are weighing on the outlook for oil prices.

Indian Economic Overview:

A favorable monsoon generated tailwinds to India's domestically-driven expansion. The Gross Domestic Product (GDP) expanded by 7.9 percent in FY16, the fastest pace in 5 years, supported by investment and urban consumption. The normal monsoon in FY17 boosted agriculture and rural consumption, while urban consumption remained robust. Despite renewed weakness in private investment and limited lift from external demand, India was poised to continue growing robustly in FY17 until "demonetization" dented growth, albeit moderately, causing immediate cash crunch, and affecting activity in cash reliant sectors. The cash crunch affected activity in cash reliant sectors and GDP growth slowed to 7.0 percent y/y during Q3 FY17, from 7.3 percent during H1 FY17. Such a modest slowdown can be explained by: (i) coping mechanisms (e.g. informal credit); (ii) higher rural wages and public consumption; and (iii) higher reported sales to legitimize holdings of old currency and use of formal-sector indicators to measure informal activity, which exacerbated measured growth. The central government met its commitment to fiscal consolidation, but states increased spending and borrowing. The central government expects to meet its fiscal deficit target of 3.5 percent of GDP in FY17 as tax collection remained robust. The fiscal stance of the general government (center and states) is less clear as fiscal reporting by states, which have been undertaking a growing share of expenditure, is less reliable. There are indications, however, that state-level deficits have been on an

increasing trend. External accounts remain robust. Exports contracted for five consecutive quarters, but turned positive in the second half of FY17, supported largely by higher prices and improvements in global trade, contributing to containing the current account deficit. Capital inflows accelerated, reflecting in part reforms in foreign direct investment (FDI) policies and in part global appetite for Indian equities. Consequently, foreign reserves rose to \$360bn, worth nearly nine months of imports.

INDIAN GEMS AND JEWELLERY INDUSTRY:

The Indian Gems and Jewellery industry is one of the fastest growing segments in the Indian economy with an annual growth rate of approximately 16 per cent. The domestic market is estimated to be around US\$ 16.1 billion and CII expects it to grow to US\$ 30 billion in the next 4 years. The country is also the largest consumer of gold in the world. It consumes in excess of 800 tons of gold that accounts for 21 per cent of world gold consumption, of which nearly 620 tones go into making jewellery. India is also emerging as the world's largest trading centre for gold targeting US\$ 17 billion by 2011. The industry has the best skilled manpower for designing and producing high volumes of exquisite jewellery at low labor costs. India is the largest diamond cutting and polishing centre in the world—the industry enjoys 60 per cent value share, 82 per cent carat share and 95 per cent share of the world market in terms of number of pieces. In other words, nearly 9 out of 10 diamonds sold worldwide are cut and polished in India. India exported cut and polished diamonds worth US\$ 14.18 billion in 2007-08. The Indian Gems and Jewellery market continues to be dominated by the unorganized sector. However, with the Indian consumer becoming more aware and quality conscious, branded jewellery is becoming very popular and the market for branded jewellery is likely to be worth US\$ 2.2 billion by 2010, according to a McKinsey report. Moreover, the government allows 51 per cent FDI in single brand retail outlets, attracting both global and domestic players to this sector. The World Gold Council recently estimated the size of India's gold coin market at about US\$ 2.11 billion dollar, gold prices go down. Due to further strengthening in the US and Euro zone GDP growth rates in FY 2014-15, US dollar is expected to strengthen against other currencies thereby leading to decline in the prices of gold.

Excise duty on precious metals like platinum, silver and gold was 12% in FY 2013-14. Customs duty on precious metals like gold, silver and platinum was 10% in FY 2013-14. There was no change in the rate as compared to last year. Excise duty on pearls, precious stones, semi-precious stones and jewellery including imitation jewellery was 12%. There was no excise duty applicable on diamonds in FY 2013-14. Customs duty on pearls, diamonds, precious stones, semi-precious stones, and jewellery including imitation jewellery was 10%.

INDIAN WINDMILL INDUSTRY

India's well-developed wind power industry has the capability and experience to help meet the country's climate and energy security goals. Today India is the 4th largest wind market globally, with total installations having crossed the 31GW mark at the end of March 2017. The industry is firmly on track to meet the short-term national target of 60GW by 2022. India has made great strides in improving access to modern energy in recent years. Since 2000, India has more than halved the number of people without access to electricity and doubled rural electrification rates. Nonetheless, around 240 million people, or 20% of the population, remain without access to electricity¹. Wind power can play an important role in the coming decade to bring a clean and indigenous source of power to the people. To date, the growth of the Indian wind sector has largely been led by private sector investment. The policy and fiscal support from the government has helped the industry to take the necessary business risks to advance the sector and galvanize investment in more and more states. In 2015, when the 60GW target was announced, the wind industry took on the challenge to meet this goal in a timely fashion. In 2016, the industry installed over 3.6 GW of new capacity, breaking all previous records in terms of annual installations. Following the Indian fiscal year 2016-17 reporting timeline, annual installations crossed 5.4 GW at the end of March 2017, bringing total installed capacity to over 31 GW².

INDUSTRY OVERVIEW

The information may not be consistent with other information compiled by third parties within or outside India. Industry sources and publications generally state that the information contained therein has been obtained from sources it believes to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured. Industry and government sources and publications may also base their information on estimates, forecasts and assumptions which may prove to be incorrect. Accordingly, investment decisions should not be based on such information.

Global Economic Overview:

Global growth is firming, contributing to an improvement in confidence. A recovery in industrial activity has coincided with a pickup in global trade, after two years of marked weakness. In emerging market and developing economies (EMDEs), obstacles to growth among commodity exporters are gradually diminishing, while activity in commodity importers remains generally robust. As a result, and despite substantial policy uncertainty, global growth is projected to accelerate to 2.7 percent in 2017, up from a post-crisis low of 2.4 percent in 2016, before strengthening further to 2.9 percent in 2018-19, broadly in line with January projections.

Activity in advanced economies is expected to gain momentum in 2017, supported by an upturn in the United States, as previously anticipated. In the Euro Area and Japan, growth forecasts have been upgraded, reflecting strengthening domestic demand and exports. Investment across advanced economies has firmed, while private consumption growth has moderated. As actual growth continues to exceed potential growth, increasing inflation and narrowing output gaps have raised the prospects of less accommodative monetary policy. Advanced economy growth is expected to accelerate to 1.9 percent in 2017, before moderating gradually in 2018-19. As usual, the outlook is predicated only on legislated fiscal and trade policies. The recovery in global trade coincides with strengthening investment, which is more import intensive than other components of aggregate demand. Nevertheless, structural headwinds, including slower trade liberalization and value chain integration, as well as elevated policy uncertainty, continue to weigh on the outlook for trade.

Global financing conditions have been benign and benefited from improving market expectations about growth prospects. Financial market volatility has been low despite elevated policy uncertainty, reflecting investor risk appetite and, perhaps, some level of market complacency. Renewed risk appetite has supported EMDE financial markets and led to a narrowing of corporate bond spreads globally. Capital inflows to EMDEs were robust in the first half of 2017, partly in a rebound from late-2016 weakness. Over time, however, a gradual tightening of international financing conditions may weigh on capital flows to EMDEs. Commodity prices have continued to rise moderately, although prospects for increased U.S. shale oil production are weighing on the outlook for oil prices.

Against an improving international backdrop, growth in EMDEs has strengthened from a post crisis low of 3.5 percent in 2016. It is projected to reach 4.1 percent in 2017 and 4.5 percent in 2018. In commodity exporters, firming commodity prices, recovering industrial activity, stabilizing investment, and improving confidence are supporting a gradual recovery, following near stagnation in the past couple of years. This recovery will be broad-based, impacting nearly 70 percent of commodity exporters in 2017. However, lingering fiscal and external adjustment needs dampen growth prospects in a number of countries. As a result, growth in commodity exporters is projected to rise from 0.4 percent in 2016 to 1.8 percent in 2017 and 2.7 percent in 2018—somewhat below January forecasts, reflecting longer-than-expected adjustment to low commodity prices in some countries and, to a lesser degree, slightly lower oil price projections.

Indian Economic Overview:

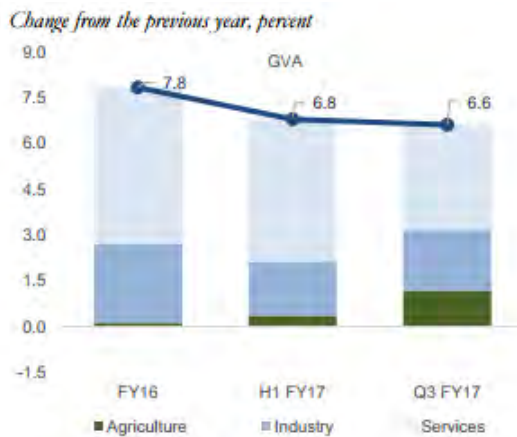

A favorable monsoon generated tailwinds to India's domestically-driven expansion. The Gross Domestic Product (GDP) expanded by 7.9 percent in FY16, the fastest pace in 5 years, supported by investment and urban consumption. The normal monsoon in FY17 boosted agriculture and rural consumption, while urban consumption remained robust. Despite renewed weakness in private investment and limited lift from external demand, India was poised to continue growing robustly in FY17 until "demonetization" dented growth, albeit moderately, causing immediate cash crunch, and affecting activity in cash reliant sectors. The cash crunch affected activity in cash reliant sectors and GDP growth slowed to 7.0 percent y/y during Q3 FY17, from 7.3 percent during H1 FY17. Such a modest slowdown can be explained by: (i) coping mechanisms (e.g. informal credit); (ii) higher rural wages and public consumption; and (iii) higher reported sales to legitimize holdings of old currency and use of formal-sector indicators to measure informal activity, which exacerbated measured growth. The central government met its commitment to fiscal consolidation, but states increased spending and borrowing. The central government expects to meet its fiscal deficit target of 3.5 percent of GDP in FY17 as tax collection remained robust. The fiscal stance of the general government (center and states) is less clear as fiscal reporting by states, which have been undertaking a growing share of expenditure, is less reliable. There are indications, however, that state-level deficits have been on an increasing trend. External accounts remain robust. Exports contracted for five consecutive quarters, but turned positive in the second half of FY17, supported largely by higher prices and improvements in global trade, contributing to containing the current account deficit. Capital inflows accelerated, reflecting in part reforms in foreign direct

D.P. Abhushan Limited

investment (FDI) policies and in part global appetite for Indian equities. Consequently, foreign reserves rose to \$360bn, worth nearly nine months of imports.

Demonetization affected poor and vulnerable households, in all likelihood having an impact on construction and informal retail, where many poor and vulnerable individuals work. While limited data is available, there has been an increase in demand for guaranteed employment (up to February 2017 demand exceeded the full year FY16 level), and indicators of rural consumption (in particular, sales of two-wheelers) contracted sharply in November, before recovering. Economic activity ought to accelerate in FY18. GDP is projected to grow at 7.2 percent from 6.8 percent in FY17. The revision in forecasts reflects a combination of the impact of demonetization and an investment recovery that has proven more protracted than expected. Growth increases gradually to 7.7 percent by FY20, underpinned by recovery in private investments, which are “crowded-in” by the recent increase in public capital expenditure and improvement in investment climate. India’s fiscal, inflation and external conditions are expected to remain stable. The center will continue to consolidate modestly in FY18, while retaining the push towards infrastructure spending. Inflation will stabilize, supported by stable weather and structural reforms. A normal monsoon has offset increases in petroleum prices, the government amended the RBI Act to reflect a (central) inflation target of 4 percent and established a Monetary Policy Committee (MPC), boosting the credibility of the central bank. The exchange rate has appreciated, partly reflecting expectations of a narrowing inflation gap between India and the USA and limited external vulnerability as the current account deficit is expected to remain below 2 percent of GDP and fully financed by FDI inflows.

There are significant risks to India’s favorable growth outlook. First, continued uncertainties in the global environment, including rising global protectionism and a renewed slowdown in the Chinese economy, could further delay a meaningful recovery of external demand. Second, private investment continues to face several impediments in the form of corporate debt overhang, stress in the financial sector, where NPAs continue to increase, excess capacity and regulatory and policy challenges. Subdued private investment would put downside pressures on India’s potential growth. Finally, further rapid increases in oil and other commodity prices could lead to a negative terms-of-trade shock. On the other hand, smooth implementation of the Goods and Services Tax (GST) and faster resolution of banking sector stress could prove to be an upside risk to economic activity.

INDIAN GEMS AND JEWELLERY INDUSTRY:

The Indian Gems and Jewellery industry is one of the fastest growing segments in the Indian economy with an annual growth rate of approximately 16 per cent. The domestic market is estimated to be around US\$ 16.1 billion and CII expects it to grow to US\$ 30 billion in the next 4 years. The country is also the largest consumer of gold in the world. It consumes in excess of 800 tons of gold that accounts for 21 per cent of world gold consumption, of which nearly 620 tones go into making jewellery. India is also emerging as the world's largest trading centre for gold targeting US\$ 17 billion by 2011. The industry has the best skilled manpower for designing and producing high volumes of exquisite jewellery at low labor costs. India is the largest diamond cutting and polishing centre in the world—the industry enjoys 60 per cent value share, 82 per cent carat share and 95 per cent share of the world market in terms of number of pieces. In other words, nearly 9 out of 10 diamonds sold worldwide are cut and polished in India. India exported cut and polished diamonds worth US\$ 14.18 billion in 2007-08. The Indian Gems and Jewellery market continues to be dominated by the unorganized sector. However, with the Indian consumer becoming more aware and quality conscious, branded jewellery is becoming very popular and the market for branded jewellery is likely to be worth US\$ 2.2 billion by 2010, according to a McKinsey report. Moreover, the government allows 51 per cent FDI in single brand retail outlets, attracting both global and domestic players to this sector. The World Gold Council recently estimated the size of India's gold coin market at about US\$ 2.11 billion dollar, gold prices go down. Due to further strengthening in the US and Euro zone GDP growth rates in FY 2014-15, US dollar is expected to strengthen against other currencies thereby leading to decline in the prices of gold.

Excise duty on precious metals like platinum, silver and gold was 12% in FY 2013-14. Customs duty on precious metals like gold, silver and platinum was 10% in FY 2013-14. There was no change in the rate as compared to last year. Excise duty on pearls,

precious stones, semi-precious stones and jewellery including imitation jewellery was 12%. There was no excise duty applicable on diamonds in FY 2013-14. Customs duty on pearls, diamonds, precious stones, semi-precious stones, and jewellery including imitation jewellery was 10%.

India occupies top position in importing, processing and exporting diamonds. With its cut and polished diamonds, colored gemstones, gold jewellery, pearls, non-gold jewellery and fashion jewellery, India holds nearly 50% of the international market. Gems and jewellery sector contributes nearly 18% in India's aggregate exports. It accounts for nearly 55% of the world's net exports of cut and polished diamonds in value terms, 90% in terms of pieces and 80% in terms of carats. India now processes 85% of the world's polished diamonds, far ahead of other competitors. Every 11 of 12 diamonds sold around the globe are processed in India regardless of where these are mined.

India has shifted its trade focus from domestic economy to global markets through liberalized trade policies & lower tariffs. These measures have dramatically improved India's export market over the past 15 years, particularly for diamonds and jewellery.

INDIAN WINDMILL INDUSTRY

India’s well-developed wind power industry has the capability and experience to help meet the country’s climate and energy security goals. Today India is the 4th largest wind market globally, with total installations having crossed the 31GW mark at the end of March 2017. The industry is firmly on track to meet the short-term national target of 60GW by 2022. India has made great strides in improving access to modern energy in recent years. Since 2000, India has more than halved the number of people without access to electricity and doubled rural electrification rates. Nonetheless, around 240 million people, or 20% of the population, remain without access to electricity¹. Wind power can play an important role in the coming decade to bring a clean and indigenous source of power to the people. To date, the growth of the Indian wind sector has largely been led by private sector investment. The policy and fiscal support from the government has helped the industry to take the necessary business risks to advance the sector and galvanize investment in more and more states. In 2015, when the 60GW target was announced, the wind industry took on the challenge to meet this goal in a timely fashion. In 2016, the industry installed over 3.6 GW of new capacity, breaking all previous records in terms of annual installations. Following the Indian fiscal year 2016-17 reporting timeline, annual installations crossed 5.4 GW at the end of March 2017, bringing total installed capacity to over 31 GW².

India had a record year and was the fourth largest market globally both in terms of cumulative capacity and annual additions last year. 3,612 MW of new wind power was added to reach a total of 28,700 MW at the end of December 2016. This total has risen to 31,177 MW at the end of March 2017. The total renewable energy capacity installed in the country crossed the 50 GW mark at the end of 2016. Among renewable, wind power accounted for over 57 percent of the installed capacity. India’s wind power installations accounted for a 6.6 percent share of the global market in 2016. Wind power capacity accounted for over 9.1 percent of total domestic installed capacity⁴. In February 2015, India committed to installing 60 GW of wind and 100 GW of solar by 2022. Further, India made a commitment at COP21 to raise the share of non-fossil-fuel power capacity in the country’s power mix to 40% by 2030.

The National Institute for Wind Energy's (NIWE) latest estimate for India's wind power potential is 302 GW at 100 meters. The major wind power states are Tamil Nadu, Gujarat, Karnataka, Maharashtra and Rajasthan. To exploit the vast 7,600 km coastline for offshore wind energy in the Indian Exclusive Economic Zone, the National Offshore Wind Energy policy has been released. India’s Integrated Energy Policy projects 800 GW installed capacity in 2031-32. Around 40 per cent of this, or 320 GW, will come from renewable energy as per currently announced plans of the government. Considering the renewable energy potential in India, a rapid push is needed to meet this goal.

2016 was a record breaking year for wind power in India. During 2016 wind power development grew at an unprecedented pace and the majority of wind farms have come up in the States of Andhra Pradesh, Gujarat, Karnataka, Madhya Pradesh and Rajasthan. These projects were built by large IPPs such as Renew Power, Hero Future, Continuum, Mytrah, Oriental Green Power, CLP and others.

Wind power producers opted for the tax-based Accelerated Depreciation (AD) incentive (originally 80 percent depreciation in the first year of installation) or the Generation Based Incentive (GBI) of INR 0.5/kWh for at least four years and up to ten years with a cap of INR 10 million. The AD will be available at a reduced rate of 40 percent from April 2017 and the GBI could be discontinued. The new regime of GST may pose a challenge in the escalation of capital costs if it is not 'zero' rated.

The top-five OEMs in terms of cumulative installed capacity in India are Suzlon (35.4%), WindWorld (18%), Gamesa (10.1%), Vestas (7.6%), Regen (7.3%) and Inox (5.68%). LM Wind Power set up its second blade factory in Vadodra, Gujarat. Senvion, an established European player, started up its operations in India and acquired the Kenersys manufacturing facility. Gamesa set up new factory at Nellore in Andhra Pradesh; Acciona entered the market last year, and Envision and Sany Global are expected to enter the market soon. Vestas opened their blade manufacturing unit in Gujarat. The current manufacturing capacity in the country is around 10 GW.

FUTURE OF WINDMILL INDUSTRY

India continues to be the second largest wind market in Asia, with wind energy installations crossing 28.7 GW in 2016. India has committed to a target of 175 GW of renewables by 2022. This target includes achieving 60 GW of cumulative wind power capacity by 2022. Under the NPS, India's wind power market would reach 50 GW by 2020 and 102 GW by 2030. Wind power would then produce close to 105 TWh every year by 2020 and 294 TWh by 2030, and help save 63 million tons of CO₂ in 2020 and 177 million tons in 2030. Under the 450 Scenario, the Indian wind power market would reach 67 GW by 2020 and 155.7 GW by 2030.

Under the MS, the total installed capacity would reach 44.7 GW by 2020 and 116.2 GW by 2030. The wind industry will see investments of €5 billion per year by 2020 and €10.4 billion per year by 2030. Employment in the sector would grow to over 74,000 jobs by 2020 and over 128,000 jobs ten years later. The AS shows that the wind development in India could go much further: by 2020 India could have almost 56 GW of wind power in operation. By 2030 wind power would generate over 400 TWh per year and avoid the emission of 258 million tons of CO₂ each year. Investment would have reached a level of €11.4 billion per year.

The higher-end scenarios will depend on increasingly sophisticated grid integration of renewable in general, strictly enforced state RPOs, and the development of an effect intrastate and interstate power market, open to all, with low or no transmission fees. It will require the wind industry to step up its game on scheduling and forecasting, as well as allowing renewable to participate in balancing and ancillary services markets. India's current installations are on a path towards meeting GWEC's Advanced Scenario projections for 2020. If the current pace of installations were sustained over the medium term, Indian wind power installations would be on a path to crossing the 300GW mark around 2040. Wind power can provide the much-needed cheap power for meeting India's development and environment agenda.

Casting technology is known for creating identical pieces in bulk but with precision. Advanced machines, materials and techniques are used in the initial stages of manufacturing to convert a single prototype into thousands of replicas made of wax. Through casting process, these waxes are converted into metal. The balance manufacturing processes is carried out by the human intervention with minimal machinery involvement.

Quality - The finished product as received from the job worker is subjected to statistical quality control tools to achieve expected quality products, customer satisfaction, reliability and to avoid rework in manufacturing process. The said quality is checked at our Corporate Office.

The Goods and Services Tax Act, 2017

Goods and Services Tax (GST) is considered to be the biggest tax reform in India since independence. It will help realise the goal of “One Nation-One Tax-One Market.” GST is expected to benefit all the stakeholders – industry, government and consumer.

Goods and Services Tax (GST) is an indirect tax throughout India and was introduced as The Constitution (One Hundred and Twenty Second Amendment) Act 2017, following the passage of Constitution 122nd Amendment Bill. The GST is governed by GST Council and its Chairman is Union Finance Minister of India - Arun Jaitley. This Act has been made applicable with effect from 1st July 2017.

With the introduction of GST all central, state level taxes and levies on all goods and services have been subsumed within an integrated tax having two components – central GST and a state GST. Thus there will be a comprehensive and continuous mechanism of tax credits.

The Central government passed four sets of GST Acts in the Budget session this year. These were Central GST Act, 2017; Integrated GST Act, 2017; Union Territory GST Act, 2017 and GST (Compensation to States) Act, 2017. The Acts were approved by the Parliament after they were introduced as the part of the Money Bill. Following the passage of GST Acts, the GST council has decided 4 tax rate slabs viz., 5%, 12%, 18% and 28% on supply of various goods and services.

India has adopted a dual GST model, meaning that taxation is administered by both the Union and State Governments. Transactions made within a single State will be levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that State. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax, therefore, taxes are paid to the State where the goods or services are consumed and not the State in which they were produced.

Following laws which have been subsumed in GST Acts were applicable to the Company till 30th June 2017 and shall remain applicable here after as stated in the GST ACTS:

Examples of such estimates include provisions for doubtful debts, employee retirement benefit plans, provision for income tax and the useful lives of fixed assets. The difference between the actual results and estimates are recognized in the period in which results are known or materialized.

All other borrowing costs are expensed in the period they occur.

6. IMPAIRMENT OF ASSETS

The company(erstwhile Firm) assesses, at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount. An asset's (including goodwill) recoverable amount is the higher of an assets net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

D.P. Abhushan Limited

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

8. INVENTORIES

In restated financials, the Company has valued its inventory on respective balance sheet date at Cost and Market Value, whichever is lower. However, in respect of non-availability of market value of some items on respective balance sheet date they are valued at their Cost only. The Cost of inventories are determined on Average Cost Method basis. The market value of the inventories are determined, verified and certified by the management of the Company only.

An Appeal No. 1532/16 was filed by our Company on 14.07.2016 before the Rajasthan Tax Board, Ajmer under Section 83 of Rajasthan VAT Act, 2003 against Order of the Office of Additional Commissioner, Appeals, Commercial Tax Department, Udaipur dated 24.05.2016, wherein the penalty of Rs. 76,40,776/- imposed on our Company by the Order of the Assistant Commissioner dated 29.9.2015 was removed and the additional liability on our Company to pay Rs. 51,95,728/- as tax and interest was confirmed. While we have already paid the said tax and interest, our contention is that the Department has erred in levying Purchase Tax liability on the Company as it has taken a valid exemption certificate for lump sum payment u/s 5 of the RVAT Act. For the period under review, our Company used to buy old jewellery from unregistered dealers and send it to their Madhya Pradesh based headquarters, where new jewellery was made from the said old jewellery and was sold, after due payment of VAT on lump sum basis. Hence, in this situation, there is no liability of payment of tax under Section 4(2) of the Rajasthan Value Added Tax, 2003. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government, the FDI Policy (as defined below) and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 7, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

Subscription by foreign investors (NRIs/FPIs)

FPIs are permitted to subscribe to Equity Shares of an Indian Company in a public Issue without the prior approval of the RBI, so long as the price of the Equity Shares to be issued is not less than the price at which the Equity Shares are issued to residents. SEBI registered FPIs have been permitted to purchase shares of an Indian company through Issue, subject to total FPI investment being within the individual FPI/sub account investment limit of 10 per cent subject to the total sectoral cap of all FPIs/sub-accounts put together being 24 per cent of the paid-up capital of the Indian company.

The transfer of shares between an Indian resident and a Non-resident does not require prior approval of FIPB or RBI, subject to fulfillment of certain conditions as specified by DIPP / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the foreign direct investment (“FDI”) Policy and the non-resident shareholding is within the sectoral limits under the FDI policy; and (ii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.
