Indian equity benchmarks closed higher on Tuesday, driven by gains in information technology and banking stocks. Markets made a positive start and remained higher throughout the day, amid optimism over a potential interest rate cut by the U.S. Federal Reserve next week. Some support came in as Israel's Minister of Finance Bezalel Smotrich said that the bilateral investment agreement signed with India would provide a strong push for private companies to invest in each other's economies. Some support came as India and Israel have signed a Bilateral Investment Agreement (Agreement). The agreement is expected to boost investments, provide greater certainty and protection for investors, facilitating the growth of trade and mutual investments by ensuring a minimum standard of treatment, and an independent dispute resolution mechanism through arbitration. Sentiments remained upbeat as Union Minister Piyush Goyal asked the industry to pass on the full benefit of GST rate cuts to consumers, thereby increasing the demand of domestic products and strengthen the foundation of India's economy.

On Global front, European markets were trading mostly in green as investors shrugged off data that showed French industrial production declined by 1.1 percent in July compared to June, mainly on lower aircraft production.
