Option Chain- An option for Investment

Nifty-

As per the weekly option chain for 22nd October ,a tough fight between writers on both sides continues with PC Ratio of 0.95. Looking at the last trading session, we saw high volatile swing movement throughout the day and after a quick correction the market recovered and a positive closing was witnessed. On the other hand, heavy OI additions was seen at 11900 levels movement below 11800 might trigger panic in put writers. We are expecting nifty to close above 11900 but investor should remain cautious if the market sustains below 11800 levels.

Bank Nifty-

The bank nifty now stands above a major the resistance zone and positive momentum above 24500 would take the indices to 24700-24900. Heavy OI addition now stands at 25000 and 24000.Overall volatility would play its role in the current session but we expect the Indices to close near 24500-24750 levels.
