2. *If we are not able to obtain, renew or maintain the statutory and regulatory permits, Approvals, Licenses and Registrations required to operate our business it may have a material effect on our business.*

We require certain statutory and regulatory approvals, licenses, registrations and permissions, for our business to operate. We also need to make compliance and applications at appropriate stages of our business to continue our operations. There can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. Further any default by our Company in complying with the same may result in the cancellation of such licenses, approvals or registrations which may adversely affect our operations and financial strength.

We have taken registration under Bombay Shops & Establishment Act, 1958 for our registered and corporate office located at 14, Aaryans Corporate Park, Thaltej, Ahmedabad and we are yet to make addition/registration of our site offices located in Jaipur, Pune and Ahmedabad under the said Act. Some of our registration certificates bear the address of our old office. Therefore, we have to apply for change in address in all registrations. Additionally we have to apply for change in name in all registrations and approvals which are on previous name of our Company i.e. Dev Information Technology Private Limited. We believe that we have complied considerably with such laws and regulations, as are applicable to us however, statutory/regulatory authorities may allege non-compliance and we cannot assure you that we will not be subjected to any such regulatory action in the future, including penalties, and other civil or criminal proceedings. For further information on various approvals or licenses required in connection with our operations, please see the section entitled “*Government and other Approvals*” on page 271 of this Prospectus.

3. *There are certain discrepancies noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956/2013. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.*

There are certain discrepancies noticed in some of our corporate records relating to forms filed with the Registrar of Companies. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent. Our Company has made some clerical mistakes in documents and form filed in registrar of Companies, for instance, in Annual Returns filed by our Company in past years, has some errors inadvertently made by Company in disclosure in respect of share transfers. Further, our Company has not complied with the provisions of Section 129(3) of the Companies Act, 2013 in relation to preparing Consolidated Financial Statements. Also there are some cases where forms have been filed belatedly in Registrar of Companies for which requisite delayed fees was paid by the Company.

Additionally, our Company has not filed charge related forms for hypothecation of movable property with ROC, Ahmedabad and has not complied with some Accounting Standards in the past such as AS-18 and AS-21. However, now the Company has made necessary compliance in accordance with the AS-18 and AS-21 in the re-stated financial statements of the Company. Further, Our Company has paid dividends in past years and the same was not deposited in a separate bank Account, as per compliance of Section 205 (1A) of Companies Act, 1956.

Although no show cause notice have been issued against the Company till date in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, penal actions may be taken against the Company and its directors, in which event the financials of the Company and its directors may be adversely affected.

4. *Some of our corporate records including minutes, share transfer deeds and forms filed with the Registrar of Companies are not traceable.*

Our Company is unable to trace certain corporate and other documents in relation to our company including minutes and forms filed with Registrar of Companies prior to the year 2006. Due to Change in methods of records keeping on account of technological advancement and computerization, over the years, certain forms file with ROC prior to the year 2006 like Return of Allotment, Registration of charges and modification of charges, annual return etc. could not be traced by our company. Further online filing of Roc Documents was initiated in the year 2006 and all forms prior to the said year were physically filed, hence certain of these forms could not be retrieved from Ministry of Corporate Affairs (MCA) portal and are therefore not available with us. Our Company had carried limited purpose search for the physical copies of the untraceable forms at the RoC, Ahmedabad but the forms are not available at the office of Registrar of Companies as well. Also, we are unable to trace share transfer deeds in records of the Company prior to the year 2011. As such under the circumstances elaborated above, our Company cannot assure you that the filings were made in a timely manner or the information gathered through other available documents of the company are correct. Also our Company may not be in the position to attend to and / or respond appropriately to any legal matter due to lack of lost/ destroyed records and to that extend the same could affect our business operation.

5. *Our revenues are dependent upon our meeting specific customer requirements largely on a case-to-case basis. Any failure or limitation on our ability to provide customised software services may detrimentally affect our future growth.*

Our assignments for providing services largely involve us providing business and software solutions on a case to-case basis, depending upon the needs of each customer. Our inability to provide customised software solutions could lead to erosion of our market image and brand value, which could lead to customers discontinuing their work with us and stagnation of our customer base, which in turn could harm our business and profitability. Our future growth will depend on our continued evolution of specific sets of customised services to deal with the rapidly evolving and diverse needs of our customers in a cost competitive and effective manner.

For further details for business of our Company, Kindly refer section titled “***Our Business***” beginning on Page 107 of this Prospectus.

6. *Significant security breaches in our computer systems and network infrastructure and fraud could impact our business.*

We seek to protect our computer systems and network infrastructure from physical break-ins as well as security breaches and other disruptive problems. Computers break –in and power disruptions could affect the security of information stored in and transmitted through these computers systems and networks. To address these issues and to minimize the risk of security breaches we employ security systems such as conduct periodic penetration testing for identification and assessment of potential vulnerabilities and storing critical passwords. However, these systems may not guarantee prevention of frauds, break-ins, damage and failure. A significant failure in security measures could have an effect on our business.

For further details for business of our Company, Kindly refer section titled “***Our Business***” beginning on Page 107 of this Prospectus.

7. *Our Company enters into several agreements that have several contractual obligations with some of our clients which may impact our business if non fulfilled as per terms of agreements.*

Our Company enters into several agreements with our clients and has several contractual obligations thereof including confidentiality, non- compete service agreements etc. The services that we provide to our clients are often critical to our client’s

business. If our client's proprietary rights are infringed by our employees in violation of any applicable confidentiality agreements and /or our customers perceive any deficiency and delay in service, our customers may consider us liable for that act and seek damages from us.

8. Our revenues could be significantly affected if the governments in countries in which our customers or business partners are based, restrict companies from outsourcing work to non-domestic corporations.

Any downturn or reversal of existing industry trends toward offshore outsourcing might be a deterrent to compete effectively. Measures aimed at limiting or restricting offshore outsourcing have been enacted in a few countries and there is currently legislation pending in several countries. The measures that have been enacted to date generally have restricted the ability of government entities to outsource work to offshore business process service providers.

Though, we have not been significantly adversely affected by aforementioned restrictions, however, pending or future legislation in other countries could significantly affect our business. For further details for business of our Company, Kindly refer section titled "Our Business" beginning on Page 107 of this Prospectus.

9. Our Company's success depends largely upon its skilled professionals and its ability to attract and retain these personnel. The Industry where our Company operates is a highly employee intensive industry.

Our Company's ability to execute projects and to obtain new clients depends largely on their ability to attract, train, motivate and retain highly skilled software professionals, particularly project managers and other mid-level professionals. The attrition rates in the industry in which we operate have been high due to a highly competitive skilled labour market in India. We invest in training professionals that we hire to perform the services we provide. These professionals are often targeted by the lateral recruitment efforts of our competitors. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulations, 2015 which will require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

44. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

45. *The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.*

The Issue Price of the Equity Shares will be determined by our Company in consultation with the Lead Manager. This price will be based on numerous factors, as described in the section entitled “*Basis for Issue Price*” on page 92 of this Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Issue Price.

46. *Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.*

Our Company has consistently paid dividends in last five financial years. Although our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future. For details of dividend paid by our Company in the past, see “*Dividend Policy*” on page 164 of this Prospectus.

47. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Capital gains arising from the sale of our Equity Shares are generally taxable in India. Any gain realised on the sale of our Equity Shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the STT has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which our Equity Shares are sold. Any gain realised on the sale of our Equity Shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to a long-term capital gains tax in India. Further, any gain realised on the sale of our Equity Shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

48. *Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.*

Pursuant to the SEBI ICDR Regulations, Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the Issue within six Working Days from the Issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such

events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

49. *Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions*

The articles of association, resolutions of the board of directors, and Indian law govern the corporate affairs of companies operating in India. Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company incorporated in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as our Company's shareholders than as shareholders of corporations in another jurisdiction.

EXTERNAL RISK FACTORS

50. *Economic, political and social conditions, some of which are beyond our control, may negatively affect the fortunes of the industry and harm our ability to do business and increase our cost.*

Economic and political factors that are beyond our control, influence forecasts and affect level of consumer spending. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude.

51. *If communal disturbances or riots erupt in India, or if regional hostilities increase, this would adversely affect the Indian economy and our business.*

Some parts of India have experienced communal disturbances, terrorist attacks and riots during recent years. If such events recur, our operational and marketing activities may be adversely affected, resulting in a decline in our income. The Asian region has, from time to time, experienced instances of civil unrest and hostilities among neighboring countries. Since May 1999, military confrontations between countries have occurred in Kashmir. The hostilities between India and its neighboring countries are particularly threatening because India and certain of its neighbors possess nuclear weapons. Hostilities and tensions may occur in the future and on a wider scale. Also, since 2003, there have been military hostilities and continuing civil unrest and instability in Afghanistan. There has also recently been hostility in the Korean Peninsula. In July 2006 and November 2008, terrorist attacks in Mumbai in November 2008 and in July 2011 resulted in numerous casualties. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares.

52. *We may be affected by competition law in India and any adverse application or interpretation of the Competition Act, 2002 could adversely affect our business and activities.*

The Competition Act, 2002, as amended ("**Competition Act**"), regulates practices having or likely to have an appreciable adverse effect on competition in the relevant market in India. Under the Competition Act, any formal or informal arrangement, understanding or action in concert, which causes or is likely to cause an appreciable adverse effect on competition is considered void and results in the imposition of substantial monetary penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment or provision of services, shares the market or source of production or provision of services by way of allocation of geographical area, type of goods or services or number of customers in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an appreciable adverse effect on competition. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the government issued and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to and pre-approved by the Competition Commission of India ("**CCI**"). Additionally, on May 11, 2011, the CCI issued Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an appreciable adverse effect on competition in India. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination has an appreciable adverse effect on competition in India. The applicability or interpretation of any provision of the Competition Act to any merger, amalgamation or acquisition proposed or undertaken by us, or any enforcement proceedings initiated by the CCI for any alleged violation of provisions of the Competition Act, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, may adversely affect our business, results of operations and prospects.

53. *If the rate of Indian price inflation increases, our results of operations and financial condition may be affected.*

In recent years, India's wholesale price inflation index has indicated an increasing inflation trend compared to prior periods. An increase in inflation in India could cause a rise in the price of transportation, wages, raw materials or any other expenses. In particular, increase in prices is due to a variety of factors beyond our control, including global commodities prices and economic conditions. If this trend continues, we may be unable to reduce our costs or pass our increased costs on to our customers and our results of operations and financial condition may be materially and adversely affected.

54. *Natural calamities could have a negative effect on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their effect on the Indian economy. The erratic progress of a monsoon would also adversely affect sowing operations for certain crops. Further prolonged spells of below normal rainfall or other natural calamities in the future could have a negative effect on the Indian economy, adversely affecting our business and the price of the Equity Shares.

55. *Public companies in India, including us, are required to compute Income Tax under the Income Computation and Disclosure Standards (the "ICDS"). The transition to ICDS in India is very recent and we may be negatively affected by such transition.*

The Ministry of Finance has issued a notification dated March 31, 2015 notifying ICDS which creates a new framework for the computation of taxable income. Subsequently, the Ministry of Finance, through a press release dated July 6, 2016, deferred the applicability of ICDS from April 1, 2015 to April 1, 2016 and is applicable from FY 2017 onwards and will have impact on computation of taxable income for FY 2017 onwards. ICDS deviates in several respects from concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

56. *The nationalized goods and service tax (GST) regimes proposed by the Government of India may have material impact on our operations.*

The Government of India has proposed a comprehensive national goods and service tax (GST) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure. GST is hoped to remove the cascading effect of various taxes and simplify the existing tax system. GST has special significance for the IT sector which is currently allowed a number of tax concessions/exemptions both at input and output levels. The impact on IT industry will depend on how these elements are treated under the proposed GST regime. Further amendments and developments shall have material effect on our operations.

57. *Our business is dependent on the Indian economy.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by center or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. The Indian financial market and the Indian economy are influenced by Accord Synergy Limited 30 economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has

affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

58. *Our performance is linked to the stability of policies and the political situation in India.*

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive Indian governments have pursued policies of economic liberalization and financial sector reforms. The current Government has announced its general intention to continue India's current economic and financial sector liberalization and deregulation policies. However there can be no assurance that such policies will be continued and a significant change in the government's policies in the future could affect business and economic conditions in India and could also affect our business, prospects, financial condition and results of operations.

Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

59. *Any changes in regulations or applicable government incentives would materially affect our operations and growth prospects.*

We are subject to various regulations and policies. For details see section titled "**Key Industry Regulations and Policies**" beginning on page 120 of the Prospectus. Our business could be materially affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that we will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which would have a material adverse effect on our business, financial condition and results of operations.

60. *The occurrence of natural or man-made disasters could adversely affect our results of operations and financial condition.*

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations or financial condition, including in the following respects:

Catastrophic loss of life due to natural or man-made disasters could cause us to pay benefits at higher levels and/or materially earlier than anticipated and could lead to unexpected changes in persistency rates. A natural or man-made disaster, could result in losses in our projects, or the failure of our counterparties to perform, or cause significant volatility in global financial markets.

Pandemic disease, caused by a virus such as the "Ebola" virus, H5N1, the "avian flu" virus, or H1N1, the "swine flu" virus "zika virus", could have a severe adverse effect on our business. The potential impact of a pandemic on our results of operations and financial position is highly speculative, and would depend on numerous factors, including: the probability of the virus mutating to a form that can be passed from human to human; the rate of contagion if and when that occurs; the regions of the world most affected; the effectiveness of treatment of the infected population; the rates of mortality and morbidity among various segments of the insured versus the uninsured population; our insurance coverage and related exclusions; and many other variables.

61. Financial instability in Indian financial markets could materially and adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Any financial development in the countries in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Any adverse condition happening in the financial systems of other emerging markets may also affect the investors' confidence in Indian Market which can cause increased volatility, in the Indian economy in general. Any worldwide financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy.

62. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, the RBI must approve the sale of the Equity Shares from a non-resident of India to a resident of India if the sale does not meet the requirements of the RBI Circular dated October 4, 2004, as amended by circulars dated April 22, 2009 and May 4, 2010. Additionally, any person who seeks to convert Indian Rupee proceeds from such sale into foreign currency and repatriate that foreign currency from India is required to obtain a no-objection or tax clearance certificate from the Indian income tax authorities. The RBI is required to approve the price at which the Equity Shares are transferred based on a specified formula and a higher price per share may not be permitted. The approval from the RBI or any other government agency may not be obtained on terms favorable to a non-resident investor in a timely manner or at all. Because of possible delays in obtaining requisite approvals, investors in the Equity Shares may be prevented from realizing gains during periods of price increases or limiting losses during periods of price declines.

63. Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.

India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"). These "IFRS based/synchronized Accounting Standards" are referred to in India as Ind AS. The Ministry of Corporate Affairs, Government of India, has through a notification dated February 16, 2015, set out the Ind AS and the timeliness for their implementation. Accordingly our Company is required to prepare their financial statements in accordance with Ind AS from April 1, 2016. Given that Ind AS is different in many respects from Indian GAAP under which our financial statements are currently prepared, our financial statements for the period commencing from April 1, 2016 may not be comparable to our historical financial statements. Further, we have made no attempt to quantify or identify the impact of the differences between Ind AS and Indian GAAP as applied to our financial statements and there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. In addition, our management may also have to divert its time and other resources for the successful and timely implementation of Ind AS. Any failure to successfully adopt Ind AS may have an adverse effect on the trading price of the Equity Shares and/or may lead to regulatory action and other legal consequences. Moreover, our transition to Ind AS reporting may be hampered by increasing competition and increased costs for the relatively small number of Ind AS-experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

64. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

65. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and Pakistan might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares

SECTION III: INTRODUCTION

SUMMARY OF OUR INDUSTRY

Global Scenario

Global economic activity and trade remain subdued in 2016 so far. While advanced economies (AEs) confront persisting slack and low inflation, several key emerging market economies (EMEs) have had to contend with slower economic activity and sluggish investment.

Since the Monetary Policy Report of April 2016, global growth and trade have weakened and new risks to the outlook have slanted the balance further to the downside. Industrial activity, in particular, has slumped, going into contraction in some AEs. Rising protectionism is threatening to accentuate the compression of trade volumes. While commodity prices have firmed up, the outlook remains subdued. Crude oil prices rose to a recent peak in Q2 of 2016 but mostly on supply disruptions across geographies. In Q3, this upturn has been curbed by higher inventories. Prices of precious metals have been buoyed by safe haven demand, a telling insight into the state of the global economy. Food prices remain elevated on harvest failures in several parts of the world. Inflation remains subdued in AEs and has started to edge down in EMEs. Equity prices regained lost ground and currencies recovered, but uncertainty surrounding the monetary policy stances of systemic central banks will likely continue to impart volatility to currency and equity markets. Capital flows are returning to EMEs, though foreign direct investment has not sustained the pace it achieved a year ago.

IMF views on growth in Advanced Economies:

Growth in advanced economies is projected to remain modest, in line with 2015 outcomes. Unfavourable demographic trends, low productivity growth, and legacies from the global financial crisis continue to hamper a more robust pickup in activity. While very accommodative monetary policy and lower oil prices will support domestic demand, still-weak external demand, further exchange rate appreciation—especially in the United States—and somewhat tighter financial conditions will weigh on the recovery. In the euro area, the risk of a de-anchoring of inflation expectations is a concern amid large debt overhangs in several countries.

IMF views on growth in Developing Countries:

While growth in emerging market and developing economies still accounts for the lion's share of projected world growth in 2016, prospects across countries remain uneven and generally weaker than over the past two decades. In particular, a number of large emerging markets—including Brazil and Russia—are still mired in deep recessions. Others, including several oil-exporting countries, also face a difficult macroeconomic environment with sharply weaker terms of trade and tighter external financial conditions. Growth in China and India has been broadly in line with projections, but trade growth has slowed down noticeably. The trade slowdown is related to the decline in investment growth across emerging market economies, which reflects rebalancing in China but also the sharp scaling down of investment in commodity exporters, particularly those facing difficult macroeconomic conditions.

IMF views on India:

In India, growth is projected to notch up to 7.5 percent in 2016–17, as forecast in October. Growth will continue to be driven by private consumption, which has benefited from lower energy prices and higher real incomes. With the revival of sentiment and pickup in industrial activity, a recovery of private investment is expected to further strengthen growth.

Indian economy Overview

The Indian economy has emerged as a bright spot in the world economy, becoming one of the fastest growing large economies in the world. The 7.6 per cent growth in the GDP at constant market prices in 2015-16, according to the advanced estimates of the Central Statistics Office, compares favourably with growth in the previous three years; 7.2 per cent in 2014-15, 6.6 per cent in

2013-14 and 5.6 per cent in 2012-13. It is noteworthy that this growth is estimated to be achieved despite subdued global demand that dampened India's exports significantly, and two consecutive below-normal monsoons that impacted farm output and productivity.

The macroeconomic stability has improved substantially with the continuance of fiscal prudence, lower inflation, lower current account deficit, and robust foreign exchange reserves. The year 2015-16 witnessed the government doing a fine balancing act, i.e. meeting the requirements of higher untied devolution to states and Union Territories as per the recommendations of the Fourteenth Finance Commission, and, keeping fiscal prudence while also stepping up capital expenditure. The current year also experienced moderation in general price level, with significant decline in the price of Indian basket of crude oil and commodity prices, coupled with astute food supply management policy of the Government. Low levels of current account deficit coupled with moderate rise in capital inflows resulted in accretion in foreign exchange reserves by US\$ 10.6 billion in the first half of 2015-16. India's foreign exchange reserves were at US\$ 351.5 billion as on February 5, 2016. All this shows that the Indian economy has effectively weathered the global challenges, and the near term growth prospects appear bright.

This year witnessed the continuation of the reform momentum built in 2014-15, aiming at aiding growth and macroeconomic stability. The reforms that were initiated last year for debottlenecking the economy, removing structural constraints, promoting industry and enterprise via Make-in-India initiative and the attendant measures to improve the ease of doing business, improving programme delivery through direct benefit transfer and other measures, encouraging saving and financial linkages through deepening of banking services and liberalising foreign direct investment policy in various sectors have been taken forward this year. The new initiatives like Public Sector Banks' Revamp Plan, UDAY (Ujwal DISCOM Assurance Yojana) for ensuring financial turnaround of the ailing power distribution companies, Start-up India for tapping budding entrepreneurial potential, add to the ongoing reform measures. The implementation of these reforms has improved the business environment and enhanced investors' confidence, which has been acknowledged by multi-lateral institutions and got reflected in faster economic growth and greater investment inflows to the country. GDP growth As per the Advanced Estimates released by the Central Statistics Office, the economy is estimated to grow at 7.6 per cent in 2015-16, higher than growth of 7.2 per cent achieved in 2014-15.

The growth in agriculture, industry and services is estimated at 1.1 per cent, 7.3 per cent and 9.2 per cent in 2015-16 as opposed to (-) 0.2 per cent, 5.9 per cent and 10.3 per cent respectively in 2014-15. This shows a pick-up in industrial growth, driven by manufacturing which is estimated to grow at 9.5 per cent (in 2015-16), as compared to 5.5 per cent registered in 2014-15. The growth in agriculture remained low on account of second consecutive year of subdued monsoon. GDP growth during April-December 2015 (first 3 quarters) was 7.5 per cent, compared to 7.4 per cent in the same time period in 2014-15. From the demand angle, the growth in private final consumption expenditure at 7.6 per cent in 2015- 16 has been the major driver of growth. The growth of fixed investment improved from 4.9 per cent in 2014- 15 to 5.3 per cent in 2015-16. The exports and imports are both estimated to decline by 6.3 per cent in 2015- 16, the former mainly on account of subdued global demand and the latter largely reflecting the decline in international petroleum prices.

India's increasing importance to Global growth

India has made striking progress in its contribution to the global growth of Gross Domestic Product (GDP) in Purchasing Power Parity (PPP) terms. PPP represents the number of units of a country's currency required to purchase the same amount of goods and services in the domestic market as the US dollar would purchase in the United States, thus adjusting for purchasing power differentials between currencies in relevant markets. India's contribution to global growth in PPP terms increased from an average of 8.3 per cent during the period 2001 to 2007 to 14.4 per cent in 2014. During the 1990s, the US's contribution to the global GDP growth in PPP terms was, on an average, around 16 percentage points higher than India's. The picture changed dramatically in 2013 and 2014 when India's contribution was higher than that of the US by 2.2 and 2.7 percentage points respectively. During 1991-2014, low growth in Japan (0.9 per cent annually) resulted in its low contribution (1.5 per cent) to global growth. India and China constitute 42.5 per cent and 53.2 per cent respectively of the total PPP measure of the lower-middle income countries and upper-middle income countries; and hence those country groups largely reflect India's and China's patterns.

The global economy—in particular the global growth powerhouse, China—is rebalancing, leading to an increasing role for India. After the onset of the multiple crises in different parts of the world, India's contribution has become much more valuable to the global economy.

India's share in world GDP has increased from an average of 4.8 per cent during 2001-07 to 6.1 per cent during 2008- 13 and further to an average of 7.0 per cent during 2014 to 2015 in current PPP terms (IMF). India's resilience and current levels of reasonably strong growth should, thus, be appreciated in the light of its increasing contribution to global growth.

Major developments in Indian Economy

1. Growth of Economy accelerated to 7.6% in 2015-16.
2. India hailed as a 'bright spot' amidst a slowing global economy by IMF.
3. Robust growth achieved despite very unfavourable global conditions and two consecutive years shortfall in monsoon by 13%
4. Foreign exchange reserves touched highest ever level of about 350 billion US dollars.
5. Despite increased devolution to States by 55% as a result of the 14th Finance Commission award, plan expenditure increased at RE stage in 2015-16 – in contrast to earlier years.

In light of the encouraging performance of the economy in the first three quarters of 2015-16, marked by pickup in economic growth, lower inflation, manageable current account deficit, high foreign exchange reserves, buoyant tax revenues, increasing foreign direct investment flows along with the government's push to reforms in crucial areas including banking, infrastructure, power, taxation, etc., the near term prospects for the economy look bright. A strengthening of growth in India has been projected by multi-lateral institutions. However, the risk that still remains is the subdued global growth; slowdown and rebalancing in China's economy; increased volatility in financial markets; and, gradual tightening in the monetary policy in the United States. Keeping these conditions in view, the rate of nominal growth of the economy is expected to be around 11 per cent in 2016-17.

Indian Information Technology Industry

India is the world's largest sourcing destination for the information technology (IT) industry, accounting for approximately 67 per cent of the US\$ 124-130 billion market. The industry employs about 10 million workforces. More importantly, the industry has led the economic transformation of the country and altered the perception of India in the global economy. India's cost competitiveness in providing IT services, which is approximately 3-4 times cheaper than the US, continues to be the mainstay of its Unique Selling Proposition (USP) in the global sourcing market. However, India is also gaining prominence in terms of intellectual capital with several global IT firms setting up their innovation centres in India.

The IT industry has also created significant demand in the Indian education sector, especially for engineering and computer science. The Indian IT and ITeS industry is divided into four major segments – IT services, Business Process Management (BPM), software products and engineering services, and hardware.

The IT-Business Process Management sector which is currently valued at US\$ 143 billion is expected to grow at a Compound Annual Growth Rate (CAGR) of 8.3 per cent year-on-year to US\$ 143 billion for 2015-16. The sector is expected to contribute 9.5 per cent of India's Gross Domestic Product (GDP) and more than 45 per cent in total services export in 2015-16.

Market Size

The Indian IT sector is expected to grow at a rate of 12-14 per cent for FY2016-17 in constant currency terms. The sector is also expected triple its current annual revenue to reach US\$ 350 billion by FY 2025. India ranks third among global start-up ecosystems with more than 4,200 start-ups

India's internet economy is expected to touch Rs 10 trillion (US\$ 146.72 billion) by 2018, accounting for 5 per cent of the country's GDP. India's internet user base reached over 400 million by May 2016, the third largest in the world, while the number of social media users grew to 143 million by April 2015 and smartphones grew to 160 million.

Public cloud services revenue in India is expected to reach US\$ 1.26 billion in 2016, growing by 30.4 per cent year-on-year (y-o-y). The public cloud market alone in the country was estimated to treble to US\$ 1.9 billion by 2018 from US\$ 638 million in 2014. Increased penetration of internet (including in rural areas) and rapid emergence of e-commerce are the main drivers for continued growth of data centre co-location and hosting market in India. The Indian Healthcare Information Technology (IT) market is valued at US\$ 1 billion currently and is expected to grow 1.5 times by 2020. India's business to business (B2B) e-commerce market is expected to reach US\$ 700 billion by 2020 whereas the business to consumer (B2C) e-commerce market is expected to reach US\$ 102 billion by 2020.

Global Scenario

Global economic activity and trade remain subdued in 2016 so far. While advanced economies (AEs) confront persisting slack and low inflation, several key emerging market economies (EMEs) have had to contend with slower economic activity and sluggish investment.

Since the Monetary Policy Report of April 2016, global growth and trade have weakened and new risks to the outlook have slanted the balance further to the downside. Industrial activity, in particular, has slumped, going into contraction in some AEs. Rising protectionism is threatening to accentuate the compression of trade volumes. While commodity prices have firmed up, the outlook remains subdued. Crude oil prices rose to a recent peak in Q2 of 2016 but mostly on supply disruptions across geographies. In Q3, this upturn has been curbed by higher inventories. Prices of precious metals have been buoyed by safe haven demand, a telling insight into the state of the global economy. Food prices remain elevated on harvest failures in several parts of the world. Inflation remains subdued in AEs and has started to edge down in EMEs. Equity prices regained lost ground and currencies recovered, but uncertainty surrounding the monetary policy stances of systemic central banks will likely continue to impart volatility to currency and equity markets. Capital flows are returning to EMEs, though foreign direct investment has not sustained the pace it achieved a year ago.

The US economy slowed in the first half of 2016, despite the higher than expected upturn in Q2. The impetus from private consumption, non-residential fixed investment and exports was offset by drops in inventory accumulation, residential fixed investment and government spending. Investment in Q2 declined for three consecutive quarters as companies cut back spending on oil wells, equipment and inventories. In Q3, factory activity contracted for the first time in six months in August amidst slumping

orders and production. Labor market conditions, on the other hand, rebounded to positive territory in July from a six-month slump and continued to improve in the rest of Q3 with low levels of layoffs in August and a drop in jobless claims to a two-month low in September.

In the Euro area, growth decelerated from Q1 to Q2, both sequentially and y-o-y. Net exports and consumer spending supported growth, but fixed investment and inventories operated as drags. Industrial production contracted in July. The re-emergence of stress in some parts of the banking sector in Q3 tightened financial conditions. However, economic sentiment improved in September in its major economies. The Japanese economy decelerated in Q2 after a modest improvement in Q1, as weak domestic consumption and sluggish external demand prompted companies to cut capital spending. In the UK, economic growth was stronger in Q2 than Q1, even as industrial growth was partly offset by a fall in construction activity.

The inflation outlook for 2016-17 has improved, but beyond, close vigilance is required to achieve the prospects of reaching 4 per cent i.e., the centre of the target band. Robust consumption brightens the outlook for real gross value added (GVA) in 2016-17, but muted private investment and weak global demand may restrain the pace of growth in 2017-18.

IMF views on Global growth:

The global recovery has weakened further amid increasing financial turbulence. Activity softened toward the end of 2015 in advanced economies, and stresses in several large emerging market economies showed no signs of abating. Adding to these headwinds are a) concerns about the global impact of the unwinding of prior excesses in China's economy, as it transitions to a

more balanced growth path after a decade of strong credit and investment growth, and b) signs of distress in other large emerging markets, including from falling commodity prices. With heightened risk aversion and increasing concerns about the lack of policy space, the valuation of risky assets as well as oil prices dropped sharply in early 2016. However, market sentiment began to improve in mid-February, and by the end of March 2016 market valuations had recovered most of or all the ground lost earlier in the year.

IMF views on growth in Advanced Economies:

Growth in advanced economies is projected to remain modest, in line with 2015 outcomes. Unfavourable demographic trends, low productivity growth, and legacies from the global financial crisis continue to hamper a more robust pickup in activity. While very accommodative monetary policy and lower oil prices will support domestic demand, still-weak external demand, further exchange rate appreciation—especially in the United States—and somewhat tighter financial conditions will weigh on the recovery. In the euro area, the risk of a de-anchoring of inflation expectations is a concern amid large debt overhangs in several countries.

IMF views on growth in Developing Countries:

While growth in emerging market and developing economies still accounts for the lion's share of projected world growth in 2016, prospects across countries remain uneven and generally weaker than over the past two decades. In particular, a number of large emerging markets—including Brazil and Russia—are still mired in deep recessions. Others, including several oil-exporting countries, also face a difficult macroeconomic environment with sharply weaker terms of trade and tighter external financial conditions. Growth in China and India has been broadly in line with projections, but trade growth has slowed down noticeably. The trade slowdown is related to the decline in investment growth across emerging market economies, which reflects rebalancing in China but also the sharp scaling down of investment in commodity exporters, particularly those facing difficult macroeconomic conditions.

IMF views on India:

In India, growth is projected to notch up to 7.5 percent in 2016–17, as forecast in October. Growth will continue to be driven by private consumption, which has benefited from lower energy prices and higher real incomes. With the revival of sentiment and pickup in industrial activity, a recovery of private investment is expected to further strengthen growth.

Indian economy Overview

The Indian economy has emerged as a bright spot in the world economy, becoming one of the fastest growing large economies in the world. The 7.6 per cent growth in the GDP at constant market prices in 2015-16, according to the advanced estimates of the Central Statistics Office, compares favourably with growth in the previous three years; 7.2 per cent in 2014-15, 6.6 per cent in 2013-14 and 5.6 per cent in 2012-13. It is noteworthy that this growth is estimated to be achieved despite subdued global demand that dampened India's exports significantly, and two consecutive below-normal monsoons that impacted farm output and productivity.

The macroeconomic stability has improved substantially with the continuance of fiscal prudence, lower inflation, lower current account deficit, and robust foreign exchange reserves. The year 2015-16 witnessed the government doing a fine balancing act, i.e. meeting the requirements of higher untied devolution to states and Union Territories as per the recommendations of the Fourteenth Finance Commission, and, keeping fiscal prudence while also stepping up capital expenditure. The current year also experienced moderation in general price level, with significant decline in the price of Indian basket of crude oil and commodity prices, coupled with astute food supply management policy of the Government. Low levels of current account deficit coupled with moderate rise in capital inflows resulted in accretion in foreign exchange reserves by US\$ 10.6 billion in the first half of 2015-16. India's foreign exchange reserves were at US\$ 351.5 billion as on February 5, 2016. All this shows that the Indian economy has effectively weathered the global challenges, and the near term growth prospects appear bright.

This year witnessed the continuation of the reform momentum built in 2014-15, aiming at aiding growth and macroeconomic stability. The reforms that were initiated last year for debottlenecking the economy, removing structural constraints, promoting industry and enterprise via Make-in-India initiative and the attendant measures to improve the ease of doing business, improving programme delivery through direct benefit transfer and other measures, encouraging saving and financial linkages through deepening of banking services and liberalising foreign direct investment policy in various sectors have been taken forward this year. The new initiatives like Public Sector Banks' Revamp Plan, UDAY (Ujwal DISCOM Assurance Yojana) for ensuring financial turnaround of the ailing power distribution companies, Start-up India for tapping budding entrepreneurial potential, add to the ongoing reform measures. The implementation of these reforms has improved the business environment and enhanced investors' confidence, which has been acknowledged by multi-lateral institutions and got reflected in faster economic growth and greater investment inflows to the country. GDP growth As per the Advanced Estimates released by the Central Statistics Office, the economy is estimated to grow at 7.6 per cent in 2015-16, higher than growth of 7.2 per cent achieved in 2014-15.

The growth in agriculture, industry and services is estimated at 1.1 per cent, 7.3 per cent and 9.2 per cent in 2015-16 as opposed to (-) 0.2 per cent, 5.9 per cent and 10.3 per cent respectively in 2014-15. This shows a pick-up in industrial growth, driven by manufacturing which is estimated to grow at 9.5 per cent (in 2015-16), as compared to 5.5 per cent registered in 2014-15. The growth in agriculture remained low on account of second consecutive year of subdued monsoon. GDP growth during April-December 2015 (first 3 quarters) was 7.5 per cent, compared to 7.4 per cent in the same time period in 2014-15. From the demand angle, the growth in private final consumption expenditure at 7.6 per cent in 2015- 16 has been the major driver of growth. The growth of fixed investment improved from 4.9 per cent in 2014- 15 to 5.3 per cent in 2015-16. The exports and imports are both estimated to decline by 6.3 per cent in 2015- 16, the former mainly on account of subdued global demand and the latter largely reflecting the decline in international petroleum prices.

India's increasing importance to Global growth

India has made striking progress in its contribution to the global growth of Gross Domestic Product (GDP) in Purchasing Power Parity (PPP) terms. PPP represents the number of units of a country's currency required to purchase the same amount of goods and services in the domestic market as the US dollar would purchase in the United States, thus adjusting for purchasing power differentials between currencies in relevant markets. India's contribution to global growth in PPP terms increased from an average of 8.3 per cent during the period 2001 to 2007 to 14.4 per cent in 2014. During the 1990s, the US's contribution to the global GDP growth in PPP terms was, on an average, around 16 percentage points higher than India's. The picture changed dramatically in 2013 and 2014 when India's contribution was higher than that of the US by 2.2 and 2.7 percentage points respectively. During 1991-2014, low growth in Japan (0.9 per cent annually) resulted in its low contribution (1.5 per cent) to global growth. India and China constitute 42.5 per cent and 53.2 per cent respectively of the total PPP measure of the lower-middle income countries and upper-middle income countries; and hence those country groups largely reflect India's and China's patterns.

The global economy—in particular the global growth powerhouse, China—is rebalancing, leading to an increasing role for India. After the onset of the multiple crises in different parts of the world, India's contribution has become much more valuable to the global economy.

India's share in world GDP has increased from an average of 4.8 per cent during 2001-07 to 6.1 per cent during 2008- 13 and further to an average of 7.0 per cent during 2014 to 2015 in current PPP terms (IMF). India's resilience and current levels of reasonably strong growth should, thus, be appreciated in the light of its increasing contribution to global growth.

Major developments in Indian Economy

6. Growth of Economy accelerated to 7.6% in 2015-16.
7. India hailed as a 'bright spot' amidst a slowing global economy by IMF.
8. Robust growth achieved despite very unfavourable global conditions and two consecutive years shortfall in monsoon by 13%
9. Foreign exchange reserves touched highest ever level of about 350 billion US dollars.
10. Despite increased devolution to States by 55% as a result of the 14th Finance Commission award, plan expenditure increased at RE stage in 2015-16 – in contrast to earlier years.

In light of the encouraging performance of the economy in the first three quarters of 2015-16, marked by pickup in economic growth, lower inflation, manageable current account deficit, high foreign exchange reserves, buoyant tax revenues, increasing foreign direct investment flows along with the government's push to reforms in crucial areas including banking, infrastructure, power, taxation, etc., the near term prospects for the economy look bright. A strengthening of growth in India has been projected by multi-lateral institutions. However, the risk that still remains is the subdued global growth; slowdown and rebalancing in China's economy; increased volatility in financial markets; and, gradual tightening in the monetary policy in the United States. Keeping these conditions in view, the rate of nominal growth of the economy is expected to be around 11 per cent in 2016-17.

Introduction

Indian Information Technology Industry

India is the world's largest sourcing destination for the information technology (IT) industry, accounting for approximately 67 per cent of the US\$ 124-130 billion market. The industry employs about 10 million workforces. More importantly, the industry has led the economic transformation of the country and altered the perception of India in the global economy. India's cost competitiveness in providing IT services, which is approximately 3-4 times cheaper than the US, continues to be the mainstay of its Unique Selling Proposition (USP) in the global sourcing market. However, India is also gaining prominence in terms of intellectual capital with several global IT firms setting up their innovation centres in India.

The IT industry has also created significant demand in the Indian education sector, especially for engineering and computer science. The Indian IT and ITeS industry is divided into four major segments – IT services, Business Process Management (BPM), software products and engineering services, and hardware.

The IT-Business Process Management sector which is currently valued at US\$ 143 billion is expected to grow at a Compound Annual Growth Rate (CAGR) of 8.3 per cent year-on-year to US\$ 143 billion for 2015-16. The sector is expected to contribute 9.5 per cent of India's Gross Domestic Product (GDP) and more than 45 per cent in total services export in 2015-16.

Market Size

The Indian IT sector is expected to grow at a rate of 12-14 per cent for FY2016-17 in constant currency terms. The sector is also expected triple its current annual revenue to reach US\$ 350 billion by FY 2025. India ranks third among global start-up ecosystems with more than 4,200 start-ups

India's internet economy is expected to touch Rs 10 trillion (US\$ 146.72 billion) by 2018, accounting for 5 per cent of the country's GDP. India's internet user base reached over 400 million by May 2016, the third largest in the world, while the number of social media users grew to 143 million by April 2015 and smartphones grew to 160 million.

Public cloud services revenue in India is expected to reach US\$ 1.26 billion in 2016, growing by 30.4 per cent year-on-year (y-o-y). The public cloud market alone in the country was estimated to treble to US\$ 1.9 billion by 2018 from US\$ 638 million in 2014. Increased penetration of internet (including in rural areas) and rapid emergence of e-commerce are the main drivers for continued growth of data centre co-location and hosting market in India. The Indian Healthcare Information Technology (IT) market is valued at US\$ 1 billion currently and is expected to grow 1.5 times by 2020. India's business to business (B2B) e-commerce market is expected to reach US\$ 700 billion by 2020 whereas the business to consumer (B2C) e-commerce market is expected to reach US\$ 102 billion by 2020.

Investments

Indian IT's core competencies and strengths have attracted significant investments from major countries. The computer software and hardware sector in India attracted cumulative Foreign Direct Investment (FDI) inflows worth US\$ 21.02 billion between April 2000 and March 2016, according to data released by the Department of Industrial Policy and Promotion (DIPP).

Indian start-ups are estimated to have raised US\$ 1.4 billion across 307 deals in quarter ending March 2016.

Most large technology companies looking to expand have so far focused primarily on bigger enterprises, but a report from market research firm Zinnov highlighted that the small and medium businesses will present a lucrative opportunity worth US\$ 11.6 billion in 2015, which is expected to grow to US\$ 25.8 billion in 2020. In India, the laws governing monetary instruments such as cheques are contained in the NI Act, which is largely a codification of the English Law on the subject. To ensure prompt remedy against defaulters and to ensure credibility of the holders of the negotiable instrument a criminal remedy of penalty was inserted in Negotiable Instruments Act, 1881 in form of the Banking, Public Financial Institutions and Negotiable Instruments Laws (Amendment), 1988 which were further modified by the Negotiable Instruments (Amendment and Miscellaneous Provisions) Act, 2002. The Act provides effective legal provision to restrain people from issuing cheques without having sufficient funds in their account or any stringent provision to punish them in the event of such cheque not being honoured by their bankers and returned unpaid.

The financial statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the Companies Act, 1956 (up to March 31, 2014), and notified sections, schedules and rules of the Companies Act 2013 (with effect from April 01, 2014), including the Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2006 as per section 211(3C) of the Companies Act, 1956 (which are deemed to be applicable as Section 133 of the Companies Act, 2013 (“the Act”) read with Rule 7 of Companies (Accounts) Rules, 2014).

2. USE OF ESTIMATES

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities, if any, as at the date of the financial statements and reported amounts of income and expenses during the year. Examples of such estimates include provisions for doubtful debts, employee retirement benefit plans, provision for income tax and the useful lives of fixed assets. The difference between the actual results and estimates are recognized in the period in which results are known or materialized.

3. FIXED ASSETS

Fixed assets are stated at historical cost less accumulated depreciation and impairment losses, if any. Cost includes purchase price and all other attributable cost to bring the assets to its working condition for the intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Projects under which assets are not ready for their intended use are shown as Capital Work-in-Progress. Cost includes cost of land, materials, construction, services, borrowing costs and other overheads relating to projects.

Intangible assets are stated at acquisition cost, Net of accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortized on a straight line basis over their estimated useful lives.

Gains or losses arising from the retirement or disposal proceeds and the carrying amount of the asset and recognized as income or expense in the Statement of Profit & Loss.

4. DEPRECIATION

In accordance with AS-6 “Depreciation”, depreciation on tangible fixed assets is computed on considering useful life provided in the Schedule - II of the Act. During the preceding years, the Company was providing depreciation on written down value basis at the rate prescribed in Schedule XIV of the Companies Act, 1956.

Pursuant to Companies Act, 2013 (‘the Act’) being effective from April 1, 2014, the Company has revised depreciation rates on tangible fixed assets as per useful life specified in Part ‘C’ of Schedule II of the Act. And due to the same there has been a change in the estimated useful life of depreciable tangible assets which affects the depreciation in the current period and in each period during the remaining useful life of the assets. As the change is only in regard to accounting estimate requiring an adjustment of the carrying amount of tangible assets. The same do not require adjustment in the financial information for the years ended on March 31, 2014, 2013, and 2012. The Company has consistently calculated depreciation based on WDV method.

5. BORROWING COSTS

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

6. IMPAIRMENT OF ASSETS

(i) The company assesses, at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset’s recoverable amount. An asset’s (including goodwill) recoverable amount is the higher of an assets net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

(ii) After impairment, depreciation/ amortization is provided on the revised carrying amount of the asset over its remaining useful life.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

8. INVENTORIES

Inventories are valued at lower of cost or net realizable value. Cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is determined by FIFO method. Further, project in progress is valued at cost.

B. STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

1. BASIS OF PREPARATION OF FINANCIAL STATEMENTS

These Restated Consolidated financial statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the Companies Act, 1956 (up to March 31, 2014), and notified sections, schedules and rules of the Companies Act 2013 (with effect from April 01, 2014), including the Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2006 as per section 211(3C) of the Companies Act, 1956 (which are deemed to be applicable as Section 133 of the Companies Act, 2013 ("the Act") read with Rule 7 of Companies (Accounts) Rules, 2014).

2. USE OF ESTIMATES

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities, if any, as at the date of the financial statements and reported amounts of income and expenses during the year. Examples of such estimates include provisions for doubtful debts, employee retirement benefit plans, provision for income tax and the useful lives of fixed assets. The difference between the actual results and estimates are recognized in the period in which results are known or materialized.

3. FIXED ASSETS

Fixed assets are stated at historical cost less accumulated depreciation and impairment losses, if any. Cost includes purchase price and all other attributable cost to bring the assets to its working condition for the intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Projects under which assets are not ready for their intended use are shown as Capital Work-in-Progress. Cost includes cost of land, materials, construction, services, borrowing costs and other overheads relating to projects.

Intangible assets are stated at acquisition cost, Net of accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortized on a straight line basis over their estimated useful lives.

Gains or losses arising from the retirement or disposal proceeds and the carrying amount of the asset and recognized as income or expense in the Statement of Profit & Loss.

4. DEPRECIATION

In accordance with AS-6 “Depreciation”, depreciation on tangible fixed assets is computed on considering useful life provided in the Schedule - II of the Act. During the preceding years, the Company was providing depreciation on written down value basis at the rate prescribed in Schedule XIV of the Companies Act, 1956.

Pursuant to Companies Act, 2013 (‘the Act’) being effective from April 1, 2014, the Company has revised depreciation rates on tangible fixed assets as per useful life specified in Part ‘C’ of Schedule II of the Act. And due to the same there has been a change in the estimated useful life of depreciable tangible assets which affects the depreciation in the current period and in each period during the remaining useful life of the assets. As the change is only in regard to accounting estimate requiring an adjustment of the carrying amount of tangible assets. The same do not require adjustment in the financial information for the years ended on March 31, 2014, 2013, and 2012. The Company has consistently calculated depreciation based on WDV method.

5. BORROWING COSTS

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

6. IMPAIRMENT OF ASSETS

(iii) The company assesses, at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset’s recoverable amount. An asset’s (including goodwill) recoverable amount is the higher of an assets net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

(iv) After impairment, depreciation/ amortization is provided on the revised carrying amount of the asset over its remaining useful life.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

8. INVENTORIES

Inventories are valued at lower of cost or net realizable value. Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government, the FDI Policy (as defined below) and FEMA. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP"), issued consolidated FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 7, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

Subscription by foreign investors (NRIs/FPIs)

FPIs are permitted to subscribe to Equity Shares of an Indian Company in a public offer without the prior approval of the RBI, so long as the price of the Equity Shares to be issued is not less than the price at which the Equity Shares are issued to residents. SEBI registered FPIs have been permitted to purchase shares of an Indian company through offer, subject to total FPI investment being within the individual FPI/sub account investment limit of 10 per cent subject to the total sectoral cap of all FPIs/sub-accounts put together being 24 per cent of the paid-up capital of the Indian company.

The transfer of shares between an Indian resident and a Non-resident does not require prior approval of FIPB or RBI, subject to fulfillment of certain conditions as specified by DIPP / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the foreign direct investment ("FDI") Policy and the non-resident shareholding is within the sectoral limits under the FDI policy; and (ii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.
