SECTION III: RISK FACTORS

An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Red Herring Prospectus, particularly the “Financial Information of the Company” and the related notes, “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on page 143, 104 and 175 respectively of this Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some events may not be material individually but may be found material collectively.*
- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “Risk Factors” on page 26 and “Management Discussion and Analysis of Financial Condition and Results of Operations” on page 175 of this Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “Restated Financial Statements”.

- 1. Our distribution network is vital to our business and our inability to expand or effectively manage our distribution network would lead to an adverse impact on our business, financial condition and results of operations.**

We rely on third-party dealers and international agents for our sales in India and countries outside India. We also utilize online marketplaces and e-commerce systems to increase our products market penetration and reach. As on March 31, 2021, our distribution network consists of 53 dealers spread over 16 states and 2 Union Territories in India and 91 overseas agents spread over 75 countries in the regions of Europe, Asia, South America, Middle East and Africa. We typically do not have firm commitments in the form of long-term supply agreements with our dealers and overseas agents, consequently, there is

no commitment on the part of our dealers and overseas agents to continue to place new purchase orders with us and as a result, our cash flow and consequent revenue may fluctuate significantly from time to time. However, we secure intent letters from our key dealers and international agents which contain an estimated amount of purchase that such dealer/international agent intends to do during the year.

Further, our dealers and overseas agents have significant discretion in determining the efforts and resources they apply to the sale of our products. Our dealers and overseas agents may not commit the necessary resources to market and sell our products to the level of our expectations, and, regardless of the resources they commit, they may not be successful. Additionally, we may not be able to replace any terminating dealer/agent in a timely manner or on terms agreeable to us, if at all. If we are not able to maintain our distribution network, or if our distribution network is not successful in marketing and selling our products, or if we experience a significant reduction in, cancellation, or change in the size and timing of orders from our dealers and agents or we face significant pricing or margin pressure from our dealers and overseas agents or in case, the dealers and agents starts preferring competitors' products over our products, then our revenues could decline significantly and can lead to an inability to meet operating cash flow requirements, which would have a material adverse effect on our business, financial condition, and results of operations.

We may also face disruptions in the delivery of our products for various reasons beyond our control, including poor handling by our dealers/agents of our products, transportation bottlenecks, natural disasters and labour issues, which could lead to delayed or lost deliveries. In addition, any failure to provide distribution partners with sufficient inventories of our products may lead to a reduction in the sales of our products. We seek to increase the penetration of our products by expanding our sales network but there can be no assurance that we will be able to successfully identify or appoint new dealers/agents. If we are unable to effectively manage our sales network, our business, financial condition and results of operations may be adversely affected.

2. *We may not be able to sustain effective implementation of our business and growth strategy, which may adversely affect our business, cash flows and results of operations.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, expand our product portfolio to drive revenue growth; continue to invest in R&D capabilities to meet future demand and increase current market presence and enter new markets.

For instance, we seek to capitalize on the growth opportunities in the hygiene, oral care, oral hygiene and bio-materials segment based on our well positioned operations, network of dealers & overseas agents and being led by an experienced management team. As part of our diversification plan, we are currently expanding our existing manufacturing unit by setting up another manufacturing facility in over 16,000 sq. ft. area adjacent to our existing unit for manufacturing new line of products that will include hygiene products (sanitizers and disinfectants), oral hygiene products (mouth washes and mouth rinses), oral care products (medicated ointments, gels and creams for dental treatment) and bio-materials (bone grafting materials and membranes). In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations. As our product portfolio and product pipeline grow, we may require additional personnel on our project management, in-house quality assurance and R&D teams to work on quality assurance, regulatory affairs and product development. As a result, our operating expenses and capital requirements may increase significantly. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. We may also be exposed to certain other risks, including the risk of failure to (i) efficiently and optimally allocate management, technology and other resources across our organization, (ii) compete effectively with competitors and (iii) increase our production capacity; the inability to control our costs; and unforeseen legal, regulatory, property, labour or other issues.

The expansion of manufacturing facility is capital intensive, which requires significant time and is subject to certain risks that could result in delays or cost overruns, which could require us to expend additional capital and adversely affect our business and operating results. Such potential events include shortages and late delivery of building materials and facility equipment; delays in the delivery, installation, commissioning and qualification of our manufacturing equipment; seasonal factors, labour disputes; design or construction changes with respect to buildings spaces or equipment layout; delays or failure in securing the necessary governmental approvals and technological capacity and other changes to our plans for new manufacturing facilities necessitated by changes in market conditions. Delays in the construction of our manufacturing facility could result in a loss or

delayed receipt of earnings and an increase in financing costs which would adversely affect our business, cash flows and results of operations.

There can be no assurance that our growth strategy will be successfully implemented or completed or that if completed, they will result in the anticipated growth in our revenues or improvement in our results of operations. We also cannot assure you that we will be able to continue to expand further, or at the same rate. Our ability to invest in overseas or Indian companies may be constrained by Indian and foreign laws. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. We cannot assure you that our existing or future management, operational and financial systems, procedures and controls will be adequate to support future operations or establish or develop business relationships beneficial to future operations. Failure to manage growth effectively may have an adverse effect on our business, cash flows, results of operations and prospects.

3. *The success of our new products may depend on a number of factors and there can be no assurance that we will be able to successfully develop and introduce new products.*

The success of our new products i.e. hygiene products (sanitizers and disinfectants), oral hygiene products (mouth washes and mouth rinses), oral care products (medicated ointments, gels and creams for dental treatment) and bio-materials (bone grafting materials and membranes), which we propose to develop, may depend on a number of factors including anticipating and effectively addressing consumer preferences and demand, the success of our sales and marketing efforts, innovation and timely and successful research and development, obtaining necessary regulatory clearances, anticipating and responding to competing products and technological innovations, adequately protecting our intellectual property rights, effective forecasting and management of product demand, effective management of manufacturing and supply costs, the quality of our products and timely launch of products in the market. There can be no assurance that we will be able to successfully develop and introduce new products. Even if new products are successfully introduced, they may not rapidly gain market share and acceptance. Any failure in our ability to successfully develop, introduce, or achieve market acceptance of new or enhanced products and services, or any problems in the design or quality of any products or services we develop, could have a material adverse effect on our business, results of operations, and financial condition.

4. *Our international operations subject us to additional costs and risks, and our strategy to increase our international presence will subject us to additional costs and risks that may adversely impact our business, results of operations, and financial condition.*

In F.Y. 2020-21 and F.Y. 2019-20, we generated total sales of Rs. 2743.94 lakhs and Rs. 2276.93 lakhs respectively, of which approximately 60.24% and 57.3% sales in the respective year were from markets outside India. We are currently present in the markets of Europe, Asia, South America, Middle East and Africa, and plan to enter into additional international markets, particularly USA and Canada in the future. In this direction, we have already obtained clearance under Section 510(k) of Federal Food, Drug, and Cosmetic Act from USFDA for five of our dental cement products, namely, Micron Bioactive, Micron Superior, Micron Superior Capsules, Micron Luting and Micron Dentin Conditioner. We've also applied for ISO 13485 (MDSAP Certification). Our future success will depend on our ability to obtain regulatory approvals for our products in a timely manner. However, we may not receive the necessary authorizations to market our products, and any failure to timely do so may adversely affect our ability to grow our business.

Further, there are significant costs and risks inherent in conducting business in international markets. If we expand, or attempt to expand, into additional foreign markets, we will be subject to new business risks, in addition to regulatory risks. In addition, expansion into foreign markets imposes additional burdens on our executive and administrative personnel, finance and legal teams, research and marketing teams, and general managerial resources. For instance, complying with regulations enforced by FDA and other regulatory authorities is expensive and time-consuming, and failure to comply could result in substantial penalties, withdrawal of pre-approvals, recall of products etc.

We have limited experience with regulatory environments internationally, and we may not be able to penetrate or successfully operate in new markets. We may also encounter difficulty expanding into new international markets because of limited brand recognition in certain parts of the world, leading to delayed acceptance of our products and services by consumers in these new international markets. If we are unable to continue to expand internationally and manage the complexity of international operations successfully, our business, results of operations, and financial condition could be adversely affected. If our efforts to introduce our products and services into foreign markets are not successful, we may have

expended significant resources without realizing the expected benefit. Ultimately, the investment required for expansion into foreign markets could exceed the results of operations generated from this expansion.

5. ***We operate in a regulated industry and our business activities require several statutory and regulatory permits, licenses and approvals. Our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business may have an adverse effect on our business & operations.***

We require various statutory and regulatory licenses, permits and approvals to operate our business. We need to make compliance and applications at appropriate stages of our business to continue our operations. There can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. Further any default by our Company in complying with the same may result in the cancellation of such licenses, approvals or registrations which may adversely affect our operations and financial strength.

The dental materials which we manufacture and sale are governed by specific laws in India which inter-alia includes Medical Devices Rules, 2017, Medical Devices (Amendment) Rules, 2020, Drugs (Prices Control) Order, 2013 and Drugs and Cosmetics Act, 1940. The Company has applied for registration of some of its dental products through online system of Central Drugs Standard Control Organisation (CDSCO) on July 30, 2020, as required under Medical Devices (Amendment) Rules, 2020, which are pending for approval. These applications for registration have been made by us voluntarily as prescribed under the Medical Devices (Amendment) Rules, 2020. There can be no assurance that the relevant authorities will makeregistrations in time or at all. Failure to renew, maintain or obtain the required permits or approvals or registrations in time may result in the interruption of our operations and may have a material adverse effect on our business and financial conditions.

Further, we will require requisite approvals for expansion of our existing manufacturing unit at Samba (J&K) for production of hygiene products (sanitizers and disinfectants), oral hygiene products (mouth washes and mouth rinses), oral care products (medicated ointments, gels and creams for dental treatment) and bio-materials (i.e. bone augmentation materials) which inter-alia would include approval to construct, extend or take into use any building as a factory and approval of drawings for Proposed Facility under Factories Act, 1948, consent to operate from State Pollution Control Board etc. We have made an application for Fire Safety NOC to Fire & Emergency Services, Jammu which is pending for approval. Also, our Company has applied for ISO 13485 (MDSAP Certification) which is pending for approval. Further, we are yet to apply for renewal of consent to operate for the warehouse unit, under Water (Prevention and Control of Pollution) Act, 1974 & Air (Prevention and Control of Pollution) Act, 1981 from J&K State Pollution Control Board, Jammu/ Srinagar, which has expired in June, 2021. There is no assurance that we will be able to obtain the necessary approvals from the concerned authorities in respect of the proposed expansion in a timely manner or at all.

Further, there can be no assurance that the relevant authorities will issue or renew any of such permits or approvals or registrations in time or at all. Failure to renew, maintain or obtain the required permits or approvals or registrations in time may result in the interruption of our operations and may have a material adverse effect on our business.

For further details, please refer to section titled ***“Government and Other Approvals”*** beginning on page 184 of the Red Herring Prospectus.

6. ***We are subject to strict quality requirements and are consequently required to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.***

We develop, manufacture and market a comprehensive portfolio of dental materials for diagnosing, treating and preventing dental conditions as well as improving the aesthetics of the human smile. Our product portfolio covers a wide spectrum of materials for endodontics, prosthodontics, orthodontics, periodontics, restorative dentistry, aesthetic dentistry and laboratory consumables. The breadth and depth of our product offerings address a majority of the dentists' clinical needs for consumable dental materials. Given the nature of our products and the sector in which we operate, our customers have high and exacting standards for product quality as well as delivery schedules. Adherence to quality standards is a critical factor in our manufacturing process as any defects in the products manufactured by our Company or failure to comply with the technical specifications may lead to cancellation of the orders placed by our dealers & agents.

Further, any failure to make timely deliveries of products in the desired quantity as per our dealers and agents requirements could also result in the cancellation of orders placed by them and may adversely affect our business and financial position. Thus, we have to maintain stringent quality control mechanism at each stage of the manufacturing process and are required to maintain the quality and precision level for each product. As a result, we are required to incur expenses to maintain our quality assurance systems such as periodic checking by the operators to ensure there is no defect in the manufacturing facilities and machineries, and in the manufacturing processes. We will continue to spend a portion of our future revenues to manage our product quality and to maintain our quality control a failure of which may negatively impact our profitability.

For further details of our Business, Please refer chapter titled “*Our Business*” beginning on page 104 of this Red Herring Prospectus.

7. ***There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956/2013. Any penalty or action taken by any regulatory authority in future, for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.***

There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which inter-alia includes clerical errors in the Annual Returns filed by our Company with the ROC in past years, for instance, list of transfers shows incorrect details of transfers in the Annual Return filed by Company for F.Y. 2018-19 and F.Y. 2019-20, however, revised Annual Returns for F.Y. 2018-19 and F.Y. 2019-20 has been filed by Company.

Our company has not complied with certain statutory provisions in the past including but not limited to the details as mentioned in this risk factor. The Company has not filed certain ROC forms such as Form 23/Form MGT-14 and Form 25C/Form MR-1 for re-appointment of Managing Director in the F.Y. 2009-10, 2014-15 & 2018-19, Form 23B for re-appointment of Statutory Auditors for the period from F.Y. 2006-07 to F.Y. 2013-14, Form MGT-14 for approval of Financial Statements & Board Report for F.Y. 2014-15 & F.Y. 2018-19 and Form CHG-1 for creation of charge for certain vehicle loan in the F.Y. 2017-18 and F.Y. 2019-20, which is a non-compliance of certain provisions of Companies Act, 2013 which inter-alia includes Section 196, 117, 139, 179(3) and 77 of the Companies Act, 2013 and is subject to penalty under section 117(2), 197(15), 147(1), 86 and/or other relevant provision(s) of Companies Act, 2013, as maybe applicable. Further, the Cash Flow Statements has not been attached in the Form AOC-4 filed by the Company for F.Y. 2014-15 to F.Y. 2018-19. Also, there has been inadequate/incorrect disclosure on letterheads of the Company as per Section 12 of the Companies Act, 2013, in the past, which has now been rectified. Although, no show cause notice in respect of the non-compliance has been received by the Company till date, any penalty imposed for such non-compliance in future by the any regulatory authority could affect our financial conditions to that extent. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business and reputation.

Our company has not complied with certain Accounting Standards such as AS-6, AS-10, AS-11, AS-15 and AS-22 and Section 129(1) of the Companies Act, 2013 while preparing the annual account in the past; however the same have been duly complied by the company in the restated financial statements. Further, there are certain forms which are filed with delayed fees with RoC. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

8. ***Certain of our corporate records relating to forms filed with the Registrar of Companies prior to the year 2006 in respect of allotment of Equity Shares, appointment of Statutory Auditor, appointment & resignation of directors (if any), filing of financial statements etc. and other certain records are not traceable.***

We do not possess some of the prescribed e-forms filed with the Registrar of Companies, Jammu, particularly relating to forms filed prior to the year 2006 including, inter alia, in respect of allotments of Equity Shares, re-appointment of Managing Director, appointment of Statutory Auditor, appointment & resignation of directors, filing of financial statements etc. Although we have obtained a search report dated April 16, 2021 from a Practicing Company Secretary in relation to records maintained by ROC in the physical form, but still, information relating to share allotments during the period between 1999 to 2006 could not be traced. Thus, the history of our company with regards to share allotments presented in this Red Herring Prospectus is based on the limited information available with the Company. While our Company believes that these ROC

forms were duly filed on a timely basis, we cannot assure you that all the aforementioned forms filed with ROC will be available in the future.

Further, certain other statutory records such as Minutes Book and Statutory Registers pertaining to the years prior to 2006 are not traceable by us. Due to the non-availability of the requisite statutory records, we may not be able to present the requisite documentary evidence to validate our point which may lead to any penal actions being taken against the Company and its operations may get adversely affected.

9. *Our business is dependent on the sale of our products to our key customers. The loss of such customers or a significant reduction in purchases by such customers could materially adversely affect our business, cash flows, results of operations and financial condition.*

Our top ten customers (dealers and international agents) accounted for 40.12% and 42.4% of our revenue from operations in F.Y. 2020-21 and F.Y. 2019-20 respectively. As we are dependent on our key customers for a significant portion of our sales, the loss of such customers may materially affect our business, cash flows and results of operations. Further, the volume of sales to our customers may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences, change in customer perception towards cosmetic dentistry, among others, which may result in a decrease in demand or lack of commercial success of products of which we are a major supplier, which could reduce our sales and materially adversely affect our business, cash flows, results of operations and financial condition.

10. *A significant portion of our income is dependent on sales of products in the category of endodontics, cements & liners and composites. If the sales volume or pricing of such products declines in the future, or if we can no longer sell any of the product in such key category for any reason, our business, financial condition, cash flows and results of operations could be materially adversely affected.*

A significant portion of our income is dependent on sales of our products in the segment of endodontics, cements & liners and composites. In F.Y. 2020-21, approximately 79% of our revenue from operations (gross) came from endodontics (27.8%), cements & liners (29.1%) and composites (21.6%). As a result of increased competition, pricing pressures or fluctuation in the demand or supply, our sales and margins from these categories may decline in the future due to which our business, financial condition, cash flows and results of operations could be materially adversely affected.

11. *Any shortfall in the supply of our raw materials or an increase in our raw material costs, or other input costs, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.*

Raw materials including packaging materials, are subject to supply disruptions and price volatility caused by various factors such as commodity market fluctuations, the quality and availability of raw materials, currency fluctuations, consumer demand, changes in government policies and regulatory sanctions. Our top ten suppliers constituted approx. 56.9% and 56.2% of our total purchases for F.Y. 2020-21 and F.Y. 2019-20 respectively.

We do not have any long term supply contracts with our suppliers. Thus, our suppliers may be unable to provide us with a sufficient quantity of raw materials, at prices acceptable to us, for us to meet the demand for our products. We are also subject to the risk that one or more of our existing suppliers may discontinue their operations, which may adversely affect our ability to source raw materials at a competitive price. Any increase in raw material prices may result in corresponding increases in our product costs. A failure to maintain our required supply of raw materials, and any inability on our part to find alternate sources for the procurement of such raw materials, on acceptable terms, could adversely affect our ability to deliver our products to customers in an efficient, reliable and timely manner, and adversely affect our business, results of operations and financial condition.

Further, we rely on some third party suppliers in Germany, USA, Korea and China who supply certain of the raw materials used in our manufacturing processes. Our reliance on international operations exposes us to risks and uncertainties, including: controlling quality of supplies; political, social, and economic instability; interruptions and limitations in telecommunication services; product or material delays or disruption; trade restrictions and changes in tariffs; import and export license requirements and restrictions; fluctuations in currency exchange rates; and potential adverse tax consequences. If any of these risks were to materialize, our operating results may be harmed.

12. *The geographical concentration of our manufacturing facility in Samba (J&K) may restrict our operations and adversely affect our business, results of operations and financial conditions.*

We presently operate our entire business through our manufacturing facility located in Samba, Jammu & Kashmir. Due to the geographical concentration of our manufacturing operations primarily in Samba (J&K), our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations.

13. *We may be subject to financial and reputational risks due to product quality and liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.*

The sale of dental materials involves the risk of product liability claims against us. Our products may contain quality issues or undetected errors or defects, especially when first introduced, resulting from the design or manufacture of the product or raw materials used in the product. While we test for quality on a sample basis, we cannot assure you that all products would meet the quality standards. Such quality issues can expose us to product liability claims or require us to replace such products, in the event that our products fail to meet the required quality standards, or are alleged to cause harm to customers. Further, if any of the products sold by us fail to comply with quality standards, it may result in customer dissatisfaction, which may have an adverse effect on our business, sales and results of operations.

Further, we currently do not maintain any product liability insurance, thus, any product liability claim brought against us may result in harm to our reputation, decreased demand for our products, costs related to litigation, product recalls, loss of revenue, or the inability to secure product liability insurance coverage and could have a material adverse effect on our business by reducing cash collections from customers and limiting our ability to meet our operating cash flow requirements.

Additionally, we face the risk of legal proceedings and product liability claims being brought against us by our Customers for various reasons including for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims, regardless of whether we are responsible for any alleged defects.

14. *We face competition from other companies, many of which have substantially greater resources than we do. If we do not successfully develop and commercialize enhanced or new products that remain competitive with products or alternative technologies developed by others, we could lose revenue opportunities and customers and our ability to grow our business would be impaired.*

A number of competitors have substantially greater capital resources, larger customer bases, larger technical, sales and marketing forces and stronger reputations with target customers than ours. We compete with a number of foreign and domestic companies that market dental materials. The marketplace is highly fragmented and very competitive. We expect that the rapid technological changes occurring in the dental care industry could lead to the entry of new competitors. Our long-term success depends upon our ability to (i) distinguish our products through improving our product performance and pricing, protecting our intellectual property, improving our customer support, accurately timing the introduction of new products, and developing sustainable distribution channels worldwide; and (ii) develop and successfully commercialize new products. If we do not compete successfully, our revenue and market share could decline, which would impact our ability to meet our operating cash flow requirements and our business, financial condition, and results of operations could be adversely affected.

15. *Our Company has during the preceding one year from the date of the Prospectus have allotted Equity Shares at a price which is lower than the Issue Price.*

In the last 12 months, we have made allotments of Equity Shares through bonus issue of shares to our promoters and promoter group, which is lower than the Issue Price. For details relating to number of shares issued, date of allotment etc. please refer to section titled "**Capital Structure**" on page 60 of this Prospectus. The Issue Price is not indicative of the price that will prevail in the open market following listing of the Equity Shares.

16. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

17. We propose to introduce new line of products by expanding our existing manufacturing unit in Samba (J&K). Due to limited experience of existing promoters in the new line of products, we may face new business and financial challenges which may adversely affect our profitability and results of operations.

We are currently expanding our existing manufacturing unit by setting up another manufacturing facility in over 16,000 sq. ft. area adjacent to our existing unit, for manufacturing new line of products that will include hygiene products (sanitizers and disinfectants), oral hygiene products (mouth washes and mouth rinses), oral care products (medicated ointments, gels and creams for dental treatment) and bio-materials (bone grafting materials and membranes). Although, the Promoters of our Company have vast experience of around 20 years each in the dental materials industry, but they have no prior experience in the aforesaid new line of products, due to which, we may face new business and financial challenges including sales issues, marketing, production, cost optimization etc. which may adversely affect our profitability and results of operations.

18. Our Company has not yet placed orders for machineries, equipments and utilities required by us for the manufacturing of new line of products. Any delay in placing the orders or supply of plant and machinery may result in time and cost overruns, and may affect our profitability.

Our Company proposes to acquire machineries, equipments and utilities for manufacturing of proposed additional line of products, R&D unit and existing manufacturing operations. The new line of products will include hygiene products (sanitizers and disinfectants), oral hygiene products (mouth washes and mouth rinses), oral care products (medicated ointments, gels and creams for dental treatment) and bio-materials (bone grafting materials and membranes). Our Company has identified the machineries to be acquired and has received the quotations from the suppliers, but we have not placed final orders for the machineries, equipments and utilities aggregating to Rs.1801.80 lakhs which are proposed to be acquired for our expansion plan by utilization of Issue Proceeds. Our Company is further subject to risks on account of inflation in the price of plant and machinery.

Since the part funding for the plant and machinery is from the IPO proceeds, any delay in access to IPO proceeds would eventually delay the process of placing the orders. The purchase of machineries and equipments would require us to consider factors including but not limited to pricing, delivery schedule and after-sales maintenance. There may be a possibility of delay at the supplier's end in providing timely delivery of these machineries, equipments and utilities, which in turn may delay the implementation of our diversification plan.

Further, the quotations relied upon by us in arriving at the total cost of machineries, equipments and utilities are valid for a specific period of time and may lapse after the expiry of the specific period. Consequent upon which, there could be a possible escalation in the cost of machineries and equipments proposed to be acquired by us at the actual time of purchase, resulting in increase in the project cost, which may result in cost overruns, and may affect our profitability. For further details read section "*Objects of the Issue*" beginning on page 78 of the Red Herring Prospectus.

19. We are exposed to risks associated with foreign exchange rate fluctuations.

Our revenue from exports for F.Y. 2020-21 and F.Y. 2019-20 has been Rs. 1653.05 lakhs and Rs. 1304.75 lakhs respectively which constituted 60.2% and 57.3% of sales of the respective financial year. Our global export footprint exposes us to foreign exchange rate risks, arising primarily from our receivables, import of raw materials and capital goods for our operations and export of goods. Our exposure to exchange rate fluctuations is in part naturally hedged by the fact that we export formulations and import raw materials and equipment. However, there can be no guarantee that such fluctuations will not affect our financial performance in the future as we continue to expand our operations globally, particularly in emerging markets where the risk of currency volatility is higher.

20. Our inability to protect or use our intellectual property rights may adversely affect our business, results of operation and financial condition.

We have 51 trademarks registered under various classes for certain of our products for which we have obtained valid registration certificates under the Trademarks Act, 1999 from Registrar of Trademarks, Government of India. Our brand names and trademarks are significant to our business and operations. The use of our brand names or logos by third parties could adversely affect our reputation, which could in turn adversely affect our business and results of operations. Further, we have made trademark applications for six products under the Trademarks Act, 1999 which are currently pending before the Registrar of Trademarks, Government of India. There can be no assurance that our trademark applications will be approved. Third parties may also oppose our trademark applications, or otherwise challenge our use of the trademarks. In the event that our trademarks are successfully challenged, we could be forced to rebrand our products and services, which could result in loss of brand recognition, and could require us to devote resources advertising and marketing new brands. Further, if we inadvertently infringe on the intellectual property rights of others, our business and results of operations may be adversely affected.

Obtaining, protecting and defending intellectual property rights can be time consuming and expensive, and may require us to incur substantial costs, including the diversion of the time and resources of management and technical personnel. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition.

21. There are certain outstanding legal matters involving Our Company, Directors and Promoters. Any failure to defend these matters successfully may have an adverse effect on our financial conditions, business and result of ongoing operations.

Our Company, Directors and Promoters are involved in certain tax matters, which if determined, against us/them could adversely affect our business, financial condition and results of operations. 22. Our continued operations are critical to our business and are subject to operating risks such as breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our manufacturing facilities, in the event of which, our business, results of operations, financial condition and cash flows can be adversely affected.

Our manufacturing facilities are subject to operating risks, such as the breakdown or failure of machinery, power supply or processes, performance below expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. We also require substantial electricity for our manufacturing facilities which is sourced from state electricity boards. If supply is not available for any reason, we will need to rely on alternative sources, which may not be able to consistently meet our requirements. Our customer relationships, business and financial results may

be materially adversely affected by any disruption of operations of our products, including as a result of any of the factors mentioned above.

23. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Promoters and Key managerial personnel, particularly Mr. Atul Modi and Mrs. Namrata Modi. We also depend significantly on our Key Managerial Persons for executing our day to day activities. The loss of any of our Promoter and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section **“Our Management”** on page 124 of this Red Herring Prospectus.

24. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company’s financial condition and results of operations.

Our Company has entered into various transactions with our Directors, Promoters and Promoter Group members/entities. These transactions, inter-alia includes, issue of shares, remuneration, loans and advances, purchase, sales reimbursement of expenses etc. For details, please refer to **“Annexure XXVIII - Related Party Transactions”** under Section titled **“Financial Information of the Company”** and Chapter titled **“Capital Structure”** beginning on page 170 and 60 respectively of this Red Herring Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution. While we believe that all such transactions have been conducted on an arm’s length basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

25. Our Company has taken unsecured loans that may be recalled by the lenders at any time and our Company may not have adequate working capital to make timely payments or at all.

Our Company has availed unsecured loans which may be recalled by its lenders at any time. As on March 31, 2021, such loans amounted to Rs. 139.39 lacs. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially affect our business, cash flows, financial condition and results of operations. For further details, please see the section entitled **“Statement of Financial Indebtedness”** on page 174 of this Red Herring Prospectus.

26. Changes in technology may render our current technologies obsolete or require us to make substantial investments.

Modernization and technology up gradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed updated technology, we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology in the dental products business, we may be required to implement new technology or upgrade the machineries and other equipment’s employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

27. Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our

finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third party transport service providers and engage them on a needs basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

28. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

Our business involves many risks and hazards which may affect our profitability, including breakdowns, failure or substandard performance of equipment, third party liability claims, labour disturbances and infrastructure failure. We have standard fire and special perils insurance policy for our manufacturing facility in Samba (J&K) in relation to building, furniture, plant & machinery and stocks along with burglary and machinery breakdown insurance policy. We have also taken standard fire and special perils insurance policy for our under construction manufacturing facility building in Kartholi Bari Brahmana, Samba (J&K) and for our Warehouse at Digiana, Jammu in relation to building and stock. We have also taken insurance policies of our Directors namely Mr. Atul Modi, Mrs. Namrata Modi and Dr. SaiKalyanSurapaneni and Directors and Officers Liability insurance. Further, we maintain insurance policies for domestic and export shipments covering comprehensive risks, Marine Insurance, Workman Compensation and Vehicle Insurance. However, we are not insured against risk related to burglary (Warehouse), product's liability (domestic and abroad), cash in transit and goods in transit. If any uncertainty arises including losses arising on account of third party claims or if claim made by us in respect of an insurance, is not accepted or any loss occurred by us is in excess of the insurance coverage, the same may adversely affect our operation, results and financials. If our arrangements for insurance or indemnification are not adequate to cover claims, we may be required to make substantial payments and our results of operations and financial condition may be affected. For further information, see the section titled "**Our Business**" on page 104 of this Red Herring Prospectus.

29. *Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.*

Our business activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any labour problem in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock-outs or increased wage demands. Such issues could have adverse affect on our business, and results of operations.

30. *The Promoters (including Promoter Group) and Directors holds almost 100% of the Equity Shares of Our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

Our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company or their relatives, dividend entitlement, or loans advanced by them to the Company, and benefits deriving from the directorship in our Company. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For further information, please refer to the chapters/section titled "**Our Business**", "**Our Promoter and Promoter Group**" and "**Annexure XXVIII - Related Party Transactions**", beginning on pages 104, 138 and 170 respectively of this Red Herring Prospectus.

31. *Obsolescence, destruction, theft, breakdowns of our major plants or machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations*

Obsolescence, destruction, theft or breakdowns of our major plants or machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all, particularly where our plants or machineries are not readily available from

the market or require services from original machinery manufacturers. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be covered by the insurance policies availed by our Company and may have an affect our business, cash flows, financial condition and results of operations For further details of our Plant and Machineries, please refer to chapter titled “**Our Business**” beginning on page 104 of the Red Herring Prospectus.

32. The Company has not made any provision for decline or revalued in value of Investment of the Company.

Our Company has made investment in mutual funds, the total value of which stands at Rs. 43.80 lakhs as on March 31, 2021. We have not made any provision for any decrease in the value of investments, if provision is made in future on account of permanent decrease in value of these investments, our profits would reduce to the extent of such provision. This may have an adverse impact on our results of operations and financial conditions.

33. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be affective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

34. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement for purchase of machineries, as detailed in the section titled “**Objects of the Issue**” is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “**Objects of the Issue**” beginning on page 78 of this Red Herring Prospectus.

35. We appoint contract labour for carrying out certain operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an effect on our results of operations and financial condition.

In order to retain flexibility and control costs, our Company appoints independent contractors who in turn engage contract labour for performance of certain of our operations at our manufacturing facility. Although our Company does not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an impact on our results of operations and financial condition. Additionally, we have recently obtained registration under the Contract Labour (Regulation and Abolition) Act, 1970 and any non adherence of the regulatory compliance under the said act may have an adverse effect on our business, results of operations and financial condition.

36. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

Our Company is engaged in business of manufacturing of dental products, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund and Employee State Insurance. Any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

37. The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titles “**Objects of the Issue**”. The fund requirement and deployment, as mentioned in the “**Objects of the Issue**” on page 78 of this

Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

38. Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Red Herring Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Red Herring Prospectus. For further information, see the section titled “*Our Business*” on page 104 of this Red Herring Prospectus.

39. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “*Dividend Policy*” on page 142 of the Red Herring Prospectus.

40. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹10,000.00 Lacs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

41. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

Our promoters along with the promoter group will continue to hold collectively 73.61% of the post issue paid up share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the affect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

- 42. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.**

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

- 43. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.**

The issue price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "**Basis for Issue Price**" beginning on page 87 of the Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

- 44. Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.**

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the issue within six Working Days from the issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

- 45. We have relied on a third party industry report which has been used for industry related data in this Red Herring Prospectus and such data have not been independently verified by us.**

EXTERNAL RISK FACTORS

46. The extent to which the Coronavirus disease (COVID-19) may affect our business and operations in the future is uncertain and cannot be predicted.

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing “stay-at-home” orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future. We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

47. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India’s economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors’ reactions to developments in one country can have adverse affects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

48. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to

the chapter “**Government and Other Approvals**” on page 184 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse affect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax (“**GST**”) regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

49. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse affects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE’s benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse affect on our business, operations, financial condition, profitability and price of our Equity Shares.

50. Natural calamities could have a negative impact on the Indian economy and cause Our Company’s business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

51. Government regulation of foreign ownership of Indian securities may have an adverse affect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non residents and residents are freely permitted(subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

52. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

53. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of

the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive Indian governments have pursued policies of economic liberalization and financial sector reforms. The current Government has announced its general intention to continue India's current economic and financial sector liberalization and deregulation policies. However there can be no assurance that such policies will be continued and a significant change in the government's policies in the future could affect business and economic conditions in India and could also adversely affect our business, prospects, financial condition and results of operations.

Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse affect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

GLOBAL DENTAL MATERIAL MARKET

The Global Dental Material market was valued at USD 19.3 Billion in 2020. The market is expected to reach the valuation of USD 33.1 Billion by 2028, registering a CAGR of 8.0%. Factors driving the growth of the market include rising popularity and demand for cosmetic dentistry, rising incidence of dental diseases, increasing disposable income in developing countries and high prevalence of dental diseases. The materials used to restore and rehabilitate tooth structures are persistently evolving worldwide. Newer material processing methods and innovations have increased the dependability and predictability of dental material for dental care professionals dramatically over the last decade. Furthermore, the use of dental CAD/CAM technology in routine dentistry has advanced in recent years, as has the production of subsequent materials for fabricating an all-ceramic restoration.

A major benefit of using CAD/CAM technology in dentistry is the acquisition of data, which aids in saving information on restorations and impressions that can be stored on a computing device, thus reducing the time it takes to fabricate an all-ceramic restoration. Advances in CAD/CAM technology are expected to boost the market growth over the forecast period.

According to the World Health Organization (WHO) estimates, 2.3 billion people suffer from caries of permanent teeth globally. Moreover, approximately 530 million children suffer from caries of primary teeth, worldwide. With increasing urbanization and rapid changes in living conditions in most of the low- and middle-income countries, the prevalence of oral diseases is expected to increase. Rising incidences of dental diseases is anticipated to propel the growth scenario of the global dental materials market over the forecast period.

Based on the product type, the market is segmented as indirect restorative materials, direct restorative materials, and other direct restorative materials (dental biomaterials, dental bone grafts, tissue regeneration materials, membranes, impression materials, and bonding agents). Based on application, the market is segmented into endodontics, prosthodontics, orthodontics, periodontics, restorative dentistry, and aesthetic dentistry. Lastly, based on the end-user, the market is divided into dental laboratories, dental clinics & hospitals, and academic institutes.

North America is expected to dominate the dental material market in 2020, with a revenue of USD 8,240.3 Million. Dominant position of North America in the global market is attributed to presence of key market players, high disposable income and rising prevalence of dental disorders. Consequently, Asia Pacific is expected to grow at a significant CAGR of 9.1% over the forecast period. The growth of the Asia Pacific region is extensively owed to rising demand for minimally invasive dental procedures, rising geriatric population, growing dental tourism in countries such as China and India, increasing health care expenditure and rising focus of emerging market players on developing countries with growth potential in the Asia Pacific region. Key players are focusing on expanding their portfolio to gain competitive edge over their competitors. Some of the dominant market players in the dental material market include Straumann AG, Dentsply Sirona Inc., Zimmer Biomet Holdings Inc., Danaher Corporation, 3M Company, Ultradent Products Inc., Danville Materials LLC, Keystone Industries, BISCO Inc., and VOCO GmbH. These companies collectively account for a substantial market share owing to their extensive product offerings.

FORECAST OF GLOBAL DENTAL MATERIAL MARKET: 2021-2028

DENTAL MATERIALS MARKET: REGIONAL DYNAMICS (USD MILLION) (2013 & 2019)

Dental materials area used for the treatment of the cavities and are also used to enhance the aesthetics. The demand for the dental materials has increased in the past few years, owing to the rise in the prevalence of the dental diseases, and rise in the disposable income.

The demand for the dental procedures, has increased in the past few years, owing to the rise in the demand for the customized medical materials, and dental treatments. Moreover, the rise in the awareness among the consumers, has also led to the rise in the demand for dental treatments, thereby boosting the demand for the dental materials market.

The rise in the elderly population, has also led to the rise in the demand for the dental treatment, owing to the rise in the prevalence of the cavities. This has led to the rise in the adoption of the dental materials. Europe, Asia, and the North America, constitutes for the large share of the elderly population. These factors contribute for the demand for the dental materials.

Additionally, computer-aided design/computer-aided manufacturing technology is slowly gathering pace. It seems to be an exciting way to promote both business and safety, being more comfortable for patients and more accurate than traditional technology. A further advantage is more natural infection prevention since, for the most part, mainly digital impression and casts are not a source of cross-infection, and the transport of contaminated items is reduced and limited to try-in stages. However, the limited awareness of infection prevention guidelines and insufficient compliance with infection prevention by most dental laboratories (DLs) during the manufacture of dental prostheses and orthodontic appliances. Contaminated products often come and go from the clinic to the dental laboratory and vice versa, and this increases the hazard, the possibility of microbial reservoirs, and the chance of infection transmission for patient and personnel safety in dentistry.

The application of the latest trend in interior design and intelligent technology in a dental clinic setting serves multiple purposes. It reduces the possibility of transmission of infection, thereby, increases the productivity of healthcare providers and staff in dental clinics and hospitals. For instance, the smart dental autoclaves have the ability to reach the set temperature quickly and keeping it steadily at the desired levels for just the right intervals of time. It functions with shorter cycle time, which means a dental practitioner can handle a higher number of patients in a day.

Increasingly, the management of dental procedures requires more skilled dentists. Effective sterilization and decontamination processes are crucial in preventing cross infections and reduce the microbiological degree of contamination in the operative environment. Dental autoclaves are among the most used equipment in a dental practice. Steam sterilization is a reliable and efficient tool to sterilize heat-sensitive instruments. Depending on what is being sterilized, an autoclave cycle can range from 6 to 30 minutes. While steam is a common method for dental instrument sterilization, some dental sterilizers use dry heat and eliminate moisture from the process. The easiest way is to use a B type autoclave where the instruments can be sterilized effectively and enhance the quality of the dental practice and increase productivity.

Increasing incidence of dental disorders such as cavities, fractured, malocclusion pulpitis, loosened & knocked out teeth, and growing patient awareness regarding sterilization are primary factors propelling the growth of global automated dental autoclaves market. However, there is also a need to increase awareness of the importance of routine autoclave servicing and calibration, along with validation and monitoring.

Rising Healthcare Expenditure

According to the World Bank estimates, global healthcare expenditure has witnessed remarkable growth. This high growth rate along with huge size of healthcare spending is expected to drive the global market growth. Healthcare expenditure and its effect on economic growth are crucial factors to consider in any economy. Healthcare serves an important role in determining the quality of human resources. Increased healthcare spending is boosting the human resource efficiency, resulting in a positive contribution to economic development. The health sector continues to expand faster and global spending on health continues to rise.

Health expenditure reflects the final consumption of healthcare products and services excluding spending on investments. Healthcare is financed through various financing bodies that includes government spending, health insurance, and out-of-pocket payments. There is a constant increase of government expenditures on public welfare arrangements across the globe. Along with rising nominal healthcare expenditures, healthcare accounts for increasing share of GDP and government.

Middle income countries are speedily converging towards higher levels of spending. Healthcare spending in the middle income countries were reported to be rose by 6.3% a year between 2000 and 2017 while the economy rose by 5.9%. On the other hand, healthcare spending in the low income countries grew by 7.8%. According to the World Health Organization (WHO) estimates, the average health spending in low income countries was USD 41/person compared with USD 2,937/person in high income countries in 2017.

Dental Care: Developed & Developing Countries

In the emerging economies, such as India, the interest in developing models to illustrate how people use dental services has grown, with a focus on issues such as dental anxiety, price, income, travel distance to get treatment, and a preference for tooth protection being treated as barriers to routine dental care. According to the Journal of Natural Science, Biology and Medicine, India comprises of roughly 289 dental colleges with more than 25,000 graduates each year. Despite having such a large workforce, the majority of Indians lack access to basic oral health care. In urban areas, the dentist-to-population ratio is 1:10,000, while in rural areas, it declines to 1:150,000.

Moreover, in several developing and under-developed countries, notwithstanding the fact that dental treatment is included in primary health care, it is only available in a few parts of the economy at the primary health care level. Patients are not compensated by any form of insurance and therefore they are compelled to pay for care by both public and private dentists out of their own pockets.

Economies with availability of adequate dental manpower and lack of dental care facilities are comprehensively widening the dental health care differences across the social economic classes in the developing countries. People's decisions to forego dental care or pursue medical assistance in developing nations are influenced by a variety of factors such as demographic, psychological, socio-economic, and epidemiological factors, among others.

Shift towards newer Materials and Products

With the advent of new technology, the demand for the new products, and the technology has increased in the past few years, owing to the rise in the prevalence of the diseases. The dental practitioners are using a composite material for the filling of the cavities. The composite materials provide a smoothness, and blends with the aesthetics, which has led to the rise in the adoption of the dental composites.

The filling materials are also designed to be small and smoother, to fill in the cavity. The filling material consisting of the abrasives removes the chunks of non-spherical fillers, which leaves the non-polishable surface. Due to the shape of the abrasives, spherical fillers rotate and move during polymerization. Therefore, there is less polymerization shrinkage and less marginal leakage between the restoration and cavity walls.

The adoption of new materials has led to the rise in the quality of the filling, which contributes for less infection, which is one of the factors, contributing for the growth of the market.

Growth Opportunities in Emerging Countries

Emerging countries, including India, Brazil, and China, require help from several other global manufacturers globally. These countries, create significant growth opportunities, owing to the large pool of patient population, which has led to the rise in the demand for the dental materials. The rise in prevalence of the periodontal diseases, has led to the adoption of the dental materials. According to the study on Dental Health in India, around 85% to 90% of adults have dental cavities, and around 60 to 80% of children are suffering from dental caries, and dental diseases. This has led to the rise in the demand for the dental materials.

Several manufacturing companies are focusing on increasing their presence in developing regions and have set up the manufacturing plants. The relaxation in the regulations, has led to the rise in the investments in developing countries, including India, and China. The manufacturing costs are reduced in these regions, and the costs of the distribution also decreases. These are some of the factors, which contributes for the growth of the dental materials market in the emerging countries

COVID-19 IMPACT ANALYSIS: DENTAL MATERIAL MARKET

The COVID-19 pandemic has been spreading rapidly across countries and regions, causing huge impact on people's lives and communities. The pandemic which started as a health crisis, has now given rise to serious threats to the global economy, trade, and finance. According to estimates by the Asian Development Bank (ADB), the estimated economic impacts are likely to range between USD 2-3.1 trillion globally. Moreover, given the current situation, it is of utmost importance that the supply chain disruptions are brought under control. The widespread disruption caused by the COVID-19 is expected to vastly affect the companies functioning in the dental materials market over the forecast period. Every market industry is expected to witness the tremendous effects of the global pandemic.

COVID-19 has had a devastating effect on the dental care industry, and with the pandemic still on the rise, determining the magnitude and severity of its long-term impact is challenging at this point of time. Moreover, due to the outbreak of COVID-19 pandemic, more than 198,000 active dentists and dental specialists across the U.S. were effectively shut down.

Over the course of pandemic, several dental professionals have set up tele-health services to provide virtual care and training to the patients, students and several manufacturers. In the short term, the pandemic would have a major adverse impact on the entire dental industry including dental material market. Product volumes and unit sales of the dental material products are expected to be affected on a significant scale. Dental procedures that are not completely required will be delayed or cancelled while a number of countries issue orders to their residents to shelter in place in order to reduce possible exposure to infection. The American Dental Association, is urging dentists and other dental professionals to only perform emergency dental procedures during the pandemic. The ongoing economic uncertainty across the world and widespread job losses is anticipated to cause many people to avoid out-of-pocket health care costs, such as those associated with dental treatments.

DENTAL MATERIAL MARKET IN INDIA

The dental material market in India was valued at USD 736.8 Million in the year 2020 and is projected to reach value of USD 1372.4 Million by 2028, registering a CAGR of 9.3% over the forecast period. Indian Dental Association (IDA) drafted the National Oral Health Program to address the burden of dental disease in an effective manner for bringing about 'optimal oral health' for all by 2020. Oral health services exist at district, subdivision, and tehsil level. 60-90% of school children and nearly 85-90% of adults have dental cavities, often leading to pain and discomfort. There is no parodontal infrastructure at village level and the primary health care center level. At community health care center level only 25% community health centers are having posting of dental surgeons but have inadequate instruments, equipment, and dental materials.

The most common oral diseases are dental cavities, periodontal (gum) disease, oral cancer, oral infectious diseases, trauma from injuries, and hereditary lesions. Gum disease could also be a sign of diabetes. As per IDA 2020 Diabetics are prone to have periodontal disease, if their condition is not under control Periodontal diseases, dental caries, malocclusion, and oral cancer are the major dental problems effecting people in India. The overall prevalence of periodontal diseases was high in India. As India is one of the countries consuming maximum tobacco, a leading cause of oral cancer, the problem has only aggravated in recent past also India occupies the third position in the world with an annual production of about 800 million kgs of the different types grown, flue-cured tobacco, country tobacco, burley, bidi. 34.6% of adults in India are consuming tobacco in any form; 47.9% of males and 20.3% of females. For instance, a dental implant in the US costs around US\$3,000 to US\$4,000 which is Rs. 2,15,581 to Rs. 2,87,442. The same dental implant in India on an average cost US\$ 556 or Rs. 40,000.

RISING POPULARITY & DEMAND FOR DENTAL COSMETIC SURGERY IN INDIA

Increasing demand for teeth whitening, malocclusion and changes in dental appearance are flourishing the demand for cosmetic dental surgery in India. Cosmetic dentistry is gradually gaining popularity in the Indian market owing to rising demand for dental aesthetics, growing consumer awareness, increasing prevalence of oral health disorders, and rising dental tourism. Moreover, increasing existence of dental laboratories investing in CAD/CAM technologies and development of technologically progressive solutions and techniques for cosmetic dentistry are expected to fuel the growth potential of the dental materials market in India over the forecast period.

Furthermore, increasing demand for aesthetic procedures and tooth-whitening techniques is anticipated to substantially rise the demand for non-metallic inlays, veneers dental crowns, and bonding agents to name a few. These products are most preferred products required to conduct a successful dental cosmetic surgery. Additionally, smile restoration and improvements in appearance

is gaining significant traction in the Indian market. Several clinics across India are offering cosmetic dentistry options which is further propelling the growth potential of the market.

INTRODUCTION OF INSURANCE SCHEMES FOR DENTAL TREATMENTS

Dental insurance is likely to be one of the most lucrative developments in Indian dentistry. Ayushman Bharat, Indian Government's initiative that covers dental insurance, is a positive step toward formalizing dental insurance, thus, stabilizing the dynamics of the Indian Dental Material market. Dental insurance is gradually becoming successful to ensure dentistry is more accessible to patients and more rewarding for dentists in terms of revenues, in various developed countries. It's no surprise that dentistry is one of the most lucrative occupations in countries such as the U.S., Canada and U.K. among others.

Dental insurance in India is still in its infancy, with just a few insurance plans covering out-of-hospital dental services. Nevertheless, with fierce competition among insurance providers in India, the Indian dental market is anticipated to witness several major insurance companies releasing products which cover dental treatments. Moreover, introduction of dental insurance policies and schemes is likely to motivate patients to adopt a preventive attitude towards dental care and overall dental hygiene. Rising adoption of dental care treatments with the support of insurance policies are projected to fuel the demand for dental materials in India over the forecast period.

INCREASE IN PRESENCE OF MULTINATIONAL COMPANIES IN THE INDIAN MARKET

Foreign companies are investing in the Indian dental material market by developing manufacturing centers in India, and India is quickly becoming a manufacturing hub of dental equipment and material to Pakistan, Africa, Sri Lanka, and parts of the Middle East. Various major multinational players, including Apollo Group, Wockhardt, and Fortis Healthcare, are establishing a dental clinic chain in India to capitalize on the increasingly rising dental industry across the country. Most of the dental market in India functions privately and practices solo with multi-operations. Presence of established dental clinics is largely witnessed in developed/metropolitan cities of India. Since employment opportunities in the public and private sectors are limited, most dentists operate their own practice. Each year, between 12,000 and 15,000 new practices open across India. Impressive growth of Indian dental industry is attracting several multinational companies to set up offices in India.

DENTAL MATERIAL MARKET IN NORTH AMERICA

The market size of dental materials market in North America accounted for USD 8240.3 million in 2020 and is projected to reach USD 14181.1 million by 2028 at the compound annual growth rate (CAGR) at 8.1%. The North America market accounts for the largest revenue share in the global dental materials market and the trend is projected to continue over the forecast period. Despite the negative impact of the COVID-19 pandemic, the North American dental materials market is expected to expand strongly over the forecast period. The market growth is supported by the rising patient awareness with respect to dental implant treatments. The dental implant treatments are mainly stemming from increased marketing efforts by dental implant vendors and DSOs (Dental Support Organizations) as well as from growing number of GDs (General Dental Service) offering dental implant placements. Additionally, increasing availability of low-cost products is enabling increasing preference for dental implant procedures among the patients resulting further in supporting unit sales and market growth through 2028.

DENTAL MATERIAL MARKET IN U.S.A

The U.S. market is anticipated to dominate the North America dental materials market over the forecast period. This is mainly attributed due to the advancements in technology and a growing number of bone grafting processes. The number of dental implant procedures is increasing, due to rise in the prevalence of various dental diseases and injuries. For instance, a large number of individuals aged 65 years or above in the U.S. and Germany are edentulous. This is likely to boost the demand for dental materials in these countries during the forecast period. According to the American Academy of Implant Dentistry (2015), three million people in the U.S. have dental implants, and the number is likely to increase by 500,000 every year in the next few years.

Furthermore, various key players in the market are involved in launching new products in order to cure dental problems. For instance, in January 2021, Nobel Biocare a world leader in the field of innovative implant-based dental restorations launched Nobel Biocare Xeal and TiUltra surfaces in the United States. These new surfaces are applied to implants and abutments, which optimizes tissue integration at every level. This launch takes implant dentistry to a new era.

DENTAL MATERIAL MARKET IN CANADA

Canada is projected to have a considerable growth rate over the forecast period. Increasing implant's usage, common dental concerns, and a surge in dental extraction procedure and accessibility of advanced healthcare infrastructure in the region are influencing the dental materials market in Canada. Prominent players in the Canadian market are involved in launching dental products in order to expand their market presence. Below mentioned are some of the key developments within the Canada dental materials market.

- ❖ In May 2019, Dentsply Sirona, Inc., the largest manufacturer of professional dental products and market leader in the dental industry, announced the launch of Azento in Canada. Azento single tooth replacement solution, is transforming the digital implant workflow by streamlining implant planning, purchasing and delivery.
- ❖ In September 2018, Panthera Dental a world leader in CAD/CAM implant solutions and dental sleep appliances entered into a new era by launching its newest division: PANTHERA IMPLANT. DENTAL MATERIAL MARKET IN EUROPE

The dental materials market in Europe accounted for USD 5,428.9 Million in the year 2020 and is projected to reach value of USD 8,924.5 Million by 2028, registering a compounded annual growth rate of 7.4% over the forecast period. The European market for dental materials is dynamic and rapidly expanding. The increased growth is attributed to rising public awareness and industry acceptance of dental implants. In addition, the baby boomer generation has just begun to enter the age group where dental restorations and edentulism become more frequent. Another major influence on this market is the trend toward better oral hygiene and overall health.

Nobel Biocare, is the leading player in the European market, has recently entered this area with its new Immediate Provisional Implant under the Steri-Oss brand and the new Brånemark Novum. Today, many manufacturers have developed unique, patented implant surfaces including Straumann's SLA surface, Implant Innovations' Osseotite surface, and Astra Tech's TiOblast surface. Another progressive trend in the market is toward new implant connections and abutments. Companies such as Straumann with its Morse Taper design and Paragon with its Friction Fit abutments are a few of the market players who have moved in this direction.

DENTAL MATERIAL MARKET IN ASIA PACIFIC

The dental material market in Asia Pacific accounted for USD 3877.8 Million in the year 2020 and is projected to reach value of USD 7128.5 Million by 2028, registering a CAGR of 9.1% over the forecast period. Asia- Pacific is home to about half the world's population. It is a diverse region comprising 38 countries, including the World Health Organization's Western Pacific and South-East Asian regions. Six countries (Australia, Brunei, Japan, New Zealand, South Korea and Singapore) are high-income; two are low-income (Nepal and North Korea), and rest are classified as middle-income. China, India, Malaysia, Thailand, Indonesia, and the Philippines are among the fastest growing economies in the world. Increased consumer demand for special oral care products meeting targeted solution among Asians has fueled the market demand. Rising disposable income and growing concern for dental care has triggered the demand for expensive oral care products. Toothpaste remains the leading segment in the oral care market which is mainly driven by the essential need for a dental cleaning. Moreover, the dense population of countries such as China and India are another factor supplementing the consumption of oral care products in the region.

The Asia Pacific region has continued to demonstrate rapid economic growth, among developed countries in the region, such as Japan, Australia, and South Korea and also in developing economies such as India and China. Rise in disposable income, increase in population, and rapid urbanization have led to the continuation of this pace of economic growth that in turn will lead to the acceleration in demand for dental materials. Many Asian countries, including China, the Philippines and Malaysia, the annual growth in terms of GDP is more than 10%. This rate is likely to accelerate further because of the progressive aging and increase in numbers of people with diabetes and hypertension. Growing geriatric population in Asia Pacific is the major factor driving the Dental material catheter market growth in the region. Rising geriatric population will give a rise to more dental problems enhancing the future demand of Dental Materials in the region.

DENTAL MATERIAL MARKET: APPLICATION INSIGHTS & TRENDS

Based on Application, the market is segmented into Endodontics, Prosthodontics, Orthodontics, Periodontics, Restorative Dentistry, Aesthetic Dentistry, and other applications.

DENTAL MATERIAL MARKET: APPLICATION DYNAMICS (USD MILLION)

DENTAL MATERIAL MARKET: APPLICATION DYNAMICS (USD MILLION) (2020 & 2028)

ENDODONTICS

The segment is expected to grow with a significant CAGR of 8.1% over the forecast period. Endodontics has seen an unprecedented advancement in technology and materials in the recent years. There are a variety of Endodontic Materials available in the market across the globe. Moreover, in the recent years bioactive bio ceramics, commonly known as mineral trioxide aggregate (MTA) have been significantly used in endodontics. The growing demand by clinicians for dental processes is most likely to propel the market.

during the forecast period. Selecting the right materials will help ensure a pleasant experience for the patient while treating endodontic cases. Furthermore, a wide range of materials are needed for each phase of the treatment process, from cleaning a canal to obturating a canal to sealing a canal until the procedure is completed. The bioactive materials are based on tricalcium silicate powder with a radiopaque additive. Depending on the process, different type of material is required for pulp capping, pulpotomy, apex genesis, apexification, perforation repair, root canal filling, or root canal sealing. The market is expected to witness rapid evolution in dental material owing to developments of endodontic technologies.

PROSTHODONTICS

The market is expected to witness remarkable growth during the forecast period and register a CAGR of 7.2%. The market would further propel owing to rapid advancements in dentistry. The rate of progress in prosthodontics has accelerated, and new products have emerged that demonstrate superior strength and aesthetics. As the range of zirconia products has grown, there appears to be a preference for metal-free restorations. Furthermore, creative scanning technologies offer professionals more versatility and efficiency. A dental prosthesis is an essential part of enhancing the quality of oral health care in prosthodontics. Modern manufacturing techniques enable the development of new polymer materials that provide novel pre-treatment solutions for complex prosthetic rehabilitations. Furthermore, computer-aided design and manufacturing (CAD/CAM) allows for the development of new ceramic forms, broadening the indications for metal-free restorative choices helping the market gain traction over the forecast period. Significant improvements in treatment concepts in fixed prosthodontics have led to the emergence of these innovations, affecting the procedure in prosthetic dentistry positively during the forecast period.

ORTHODONTICS

The segment is expected to have lucrative growth owing to latest orthodontic technology. Orthodontic practices and the materials have evolved considerably over the recent years. Orthodontic professionals /are adopting the latest technology to deliver an enhanced level of treatment that can contribute significantly to a thriving market growth. Furthermore, the materials, and techniques for modern orthodontic treatment are constantly evolving which would further propel the market during the forecast period. Additionally, these innovative advances enable professionals to deliver efficient outcomes while improving practice efficiency and growth. By growing awareness about latest technologies and advances in the field of materials to choose from would help the market to spur during the forecast period.

PERIODONTICS

The market is expected to register substantial CAGR of 7.6% in the forecast period. Technology has slowly and steadily paved its way into dentistry driving the market extensively over the forecast period. The latest invention in dentistry is 3D printing. It is considered as a disruptive technology which has the power to change the way products are manufactured. The materials used include bone grafts and membranes, but also growth factors and cells-based therapies. Several developments have been observed in the dental material that have enabled the segment to go to the next level in the near future. In dentistry, material is a significant aspect in periodontal reconstruction. Varying biomaterials were already successfully tested clinically for improved periodontal tissue regeneration and osseointegration, especially in periodontology and dental implantology. In addition, recently, the biomimetic approach has been the subject of intense study which is expected to impact the market positively in the years to come.

RESTORATIVE DENTISTRY

The segment is expected to register a CAGR of 9.1% during the forecast period. The growth can be attributed to increased usage of composites in restorative dentistry. The application of composites have been significantly gaining popularity owing to its escalating demand. Some of the direct restorative dental materials include resin- based composite, amalgam, glass ionomer, resin modified glass ionomer and acrylic. However, dental amalgam been the gold standard of restorative care from decades. Amalgam is extensively used for restoring posterior teeth. It is a mixture of mercury and silver alloy that is good for large, load-bearing restorations. Composite may seem like the obvious replacement for dental amalgam however more research needs to be conducted to study its efficacy and durability. Many regulatory bodies including European Union (EU) has released guidelines for the application of amalgam restorations in children. Esthetically pleasing composites, resin ionomers, glass ionomers, ceramic inlays are more likely to replace amalgams in the coming years.

AESTHETIC DENTISTRY

The segment is expected to register a CAGR of 8.2% over the forecast period. Aesthetic dentistry mainly focuses on beautifying teeth and helping towards improvement of the function of the teeth in terms of its bite form and force. Moreover, the primary objective of aesthetic dentistry is to improve the color, form, size, positioning, and alignment of your teeth, as well as the overall

appearance of your smile. Owing to the rising demand for dental material in various procedures of aesthetic dentistry, the market is expected to witness high growth in the coming years. The conventional materials are being replaced by composite resin which is a huge breakthrough in the market. Aesthetic dentistry is primarily concerned with the placement of dental material on the gums or teeth. Modern dentistry has progressed far enough to encourage the use of composite materials that blend seamlessly with the natural appearance of the tooth structure. Regardless of the fact that it is still FDA-approved, amalgam has gone by the wayside attributed to the use of toxic mercury.

OTHER APPLICATIONS

The segment is expected to have a CAGR of 6.9% during the forecast period. The innovations in dental material is revolutionizing its overall demand. Growing awareness about dental tourism in emerging nations is expected to provide traction to the market. Dental tourism has become a major and burgeoning trend that is gaining popularity among patients due to the potential for lower costs, greater convenience, and faster care. Ceramic restorations have been the material of choice in fixed prosthetics in dentistry due to their low cost and wide range of aesthetic potential.

We also internally assess our employees to periodically identify competency gaps and use development inputs (such as training and job rotation) to address these gaps. We intend to continuously enhance our employees’ skills and productivity and will continue to help our employees develop understanding of our customer-oriented corporate culture and service quality standards to enable them to continue to meet our customers’ changing needs and preferences. We will continue to regularly review and update our employee compensation plans and bonuses based on their individual performance so that our employees are suitably incentivised.

Continue to strive for cost efficiency

We aim to continue to maintain our cost management focus, including in-house integrated manufacturing capabilities, across our business to deliver growth as well as to achieve economies of scale. We will continue to seek to manage our supply chain costs through optimal inventory levels, economic orders and other measures. Economies of scale will also enable us to continuously improve our operational efficiencies.

I. SIGNIFICANT ACCOUNTING POLICIES

A) BASIS OF PREPARATION OF FINANCIAL STATEMENT

The Restated Statement of Assets and Liabilities (Annexure I) of the company as at as at March 31, 2021, 2020, and 2019 , the Restated Statements of Profit and Loss (Annexure II), the Restated Cash Flow Statement (Annexure III) for the for the years ended March 31, 2021, 2020, and 2019 (hereinafter collectively referred to as “Restated Financial Information”) have been extracted by the management from audited financial statements for the March 31, 2021, 2020, and 2019, approved by the respective Board of Directors of the companies.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘the Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act. The accounting policies adopted in the preparation of financial statements have been consistently applied. All assets and liabilities have been classified as current or non-current as per the company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

B) USE OF ESTIMATES

The preparation of financial statements is in conformity with Indian GAAP requires judgments, estimates and assumptions to be made that affect the reported amount of assets and liabilities, disclosure of contingent liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known / materialized.

C) ACCOUNTING CONVENTION

The group follows the mercantile system of accounting, recognizing income and expenditure on accrual basis. The accounts are prepared on historical cost basis and as a going concern. Accounting policies not referred to specifically otherwise, are consistent with the generally accepted accounting principles.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Sale of goods

Revenue is recognised when the significant risks and rewards of ownership of the goods have been passed to the buyer. Sales are disclosed net of GST, trade discounts and returns, as applicable.

Income from services

Revenue from services is recognised when services have been rendered and there should be no uncertainty regarding consideration and its ultimate collection.

Interest Income

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable."

Dividend Income

Dividend Income is recognised on receipt basis.

2. Fixed Assets

- a) Fixed are stated as per Cost Model i.e., at cost less accumulated depreciation and impairment, if any;
- b) Costs directly attributable to acquisition are capitalized until the Fixed Assets are ready for use, as intended by the management;
- c) Subsequent expenditures relating to fixed assets are capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs & maintenance costs are recognized in the Statement of profit & Loss when incurred;
- d) The cost and related accumulated depreciated are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit or Loss. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;
- e) Depreciation on Tangible Assets in case of company is provided in such a manner so that the cost of asset (Net of realizable value) will be amortized over their estimated remaining useful life on SLM basis as per the useful life prescribed under Schedule II to the Companies Act 2013.
- f) Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end;

3. IMPAIRMENT

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. INVENTORIES

Inventories are valued after providing for obsolescence, as follows:

- a) Raw Materials, Stores & Spare parts and Packing Material-Lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on Weighted Average Cost basis.
- b) Work-in-Progress is valued at raw material cost plus proportionate conversion cost.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale, however due to the nature of the company the own manufactured goods are valued at a Retail Method basis on a consistent basis, however the Trading Goods are valued at the lower of Cost or Net Realisable Value.

5. RETIREMENT BENEFITS & OTHER EMPLOYEE BENEFITS

Defined-contribution plans:

All short term employee benefits are accounted on undiscounted basis during the accounting period based on services rendered by employees.

The Company's contribution to Provident Fund and Employees State Insurance Scheme is determined based on a fixed percentage of the eligible employees' salary and charged to the Statement of Profit and Loss on accrual basis.

The Group has made provision for payment of Gratuity to its employees. This Provision is made as per the method prescribed under the Payment of Gratuity Act. The cost of providing gratuity under this plan is determined on the basis of actuarial valuation at year end. Under the Gratuity Fund Plan, the holding company contributes to a LIC administered Group Gratuity Fund on behalf of employees.

6. FOREIGN EXCHANGE TRANSACTIONS

Foreign-currency denominated monetary assets and liabilities if any are translated at exchange rates in effect at the Balance Sheet date. The gains or losses resulting from the transactions relating to purchase of current assets like Raw Material etc. are included in the Statement of Profit and Loss. Revenue, expense and cash-flow items denominated in foreign currencies are translated using the exchange rate in effect on the date of the transaction.

7. CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

8. BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

9. INCOME TAX

The accounting treatment for the Income Tax in respect of the Company's income is based on the Accounting Standard on 'Accounting for Taxes on Income' (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognised for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

10. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

11. PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

12. CASH & CASH EQUIVALENTS

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

13. SEGMENT REPORTING

Company is operating under a single segment

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Bidder had the option to submit the Bid Cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Bidders into the UPI mechanism.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2017 ("FDI Policy 2017"), with effect from August 28, 2017, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include:

- (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that:
 - (a) the requisite approval of the Government has been obtained; and
 - (b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time.;
- (ii) where the transfer of shares attracts SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by Reserve Bank of India from time to time;
- (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that:
 - (a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionality's (such as minimum capitalization, etc.), reporting requirements, documentation etc.;
 - (b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank; and
- (iv) where the investee company is in the financial sector provided that:
 - (a) Any fit and proper/due diligence requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and
 - (b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with.
