Failure to adhere to the said covenants or non-compliance of some or any of them or delay by the Bank in granting such approval may hinder us from taking advantage of a dynamic market environment or may even result in revocation of the said financial facility which in turn may adversely affect our business operations and financial condition.*

Presently, we have entered into agreement for availing financial facility in the nature of Cash Credit from State Bank of India, which is currently outstanding as at December 31, 2013 at ₹ 55.51 Lakhs. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents from the financial institutions in a timely manner or at all. Further, one of the restrictive covenants requires us to take prior written approval of Bank before coming up with any new issue of securities. In relation to the current IPO, our Company, with requisite documents, has requested State Bank of India to provide their written approval enabling us to come up with the IPO. The time required to secure consents may hinder us from taking advantage of a dynamic market environment. Failure by the bank to grant such consents may even compel the Company to repay such loans on a short notice. However, as on date of this Draft Prospectus, from the above lender, we have not received such NOC/consent for the said proposed initial public issue. However, there is no assurance in future that the landlords of such premises may be willing to renew such agreements on similar terms or renew such agreements at all. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Our Company requires certain statutory and regulatory registrations, licenses, permits and approvals for our business. The brief details are mentioned here under:

Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. - 15. Our Company had entered into various transactions with our Promoters, Promoter Group, Directors and their Relatives and Group Companies. Our Company, had entered into various transactions with our Promoters, Promoter Group, Directors and their Relatives and Group Companies. These transactions, inter-alia includes sale/purchase of goods, payment for services received/rendered, remuneration, etc. Our Company entered into such transactions due to easy proximity and quick execution. - 16. Our insurance coverage may not adequately protect us against certain operating risks and this may have as adverse effect on the results of our business.**

We are insured for a number of the risks associated with our manufacturing business, through policies such as Standard Fire and Allied Perils Insurance, Workman Compensation Insurance, Burglary (House Breaking) Insurance, Marine Cargo Open Policy-Inland. We believe we have got our assets adequately insured; however there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, to cover all material losses. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business and results of operations could be adversely affected. We may also be subject to claims resulting from defects in the engineering design and commissioning of our products. Our policy of covering these risks through insurance may not always be effective or adequate. Failure to effectively cover ourselves against the associated risks for any of these reasons including other unforeseen circumstances could expose us to substantial costs and potentially lead to material losses. Faults in designing and installation might also require repair work, which may not be foreseen or covered by our insurance. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us. For details on insurance policies taken by our Company please page no. 81 in chapter titled "**Our Business**".

- 17. We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse affect on our operations, profitability and growth prospects.***

We operate in a capital intensified industry therefore our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favorable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

- 18. The success of our business operations depends largely upon our Promoter Directors and Key Managerial Personnel, the loss of any of them may negatively impact our business operations and financial conditions.***

Our success is highly dependent on the expertise and services of our Promoter Directors, Mr. Kaushalkumar S. Gupta, Mrs. Sangeeta K. Gupta and key managerial personnel. Our ability to successfully function and meet future business challenges partly depends on our ability to attract and retain these key managerial personnel. We cannot assure you that we will be able to retain any or all of the key members of our management. The loss of the services of any key member of our management team could have an adverse effect on our ability to implement new projects and expand our business. For further details of our Promoter Directors and key managerial personnel, please refer to the section “***Our Management***” on page 93 of the Draft Prospectus.

- 19. We have not entered into any long term supply agreement for the major raw materials required for manufacturing of our products. Also volatility in the prices and non availability of these raw materials may have an adverse impact in our business.***

We depend highly on colour coated steel rolls and aluminium, which are the prime raw materials for our products. We generally procure these raw materials from indigenous suppliers as and when required. Any fluctuation in the international prices of these metals affects the price and supply of these raw materials. Therefore, any significant increase in the prices of these raw materials due to any reason, and our inability to pass on increased costs of raw material to our customers or reduction in demand from our customers, may adversely affect our sales and profitability. In the absence of any long-term arrangement with suppliers and event of any disruption in the supply of raw materials supply in terms of requisite quantities and qualities, our production schedule may also be adversely affected.

- 20. The Company is promoted by first generation entrepreneurs.***

Our Promoters and directors are interested in the certain transactions entered into between our Company and themselves as well as between our Company and our Group Entities. For further details, please refer to the chapters titled “***Our Business***” and “***Our Promoters***”, beginning on page 72 and 105 respectively and the ***Annexure N titled “Related Party Transactions”*** under chapter titled “***Restated Financial statements***” beginning on page 134 of this Draft Prospectus.

- 22. Delay in raising funds from the IPO could adversely impact our Cash flows and results of operations.***

The objects of our proposed Initial Public Issue, as detailed in the section titled “***Objects of the Issue***” is to get long term working capital. Any failure or delay on our part to mobilize the required funds from the Issue Proceeds may adversely affect our cash flows and results of operations.

23. Any change in interest rates and banking policies may have an adverse impact on our Company's operations and profitability.

Our Company has taken Cash Credit facility from State Bank of India ₹ 200.00 Lakhs and is dependent on the same for arranging the long term financing for its business operations. Accordingly, any change in the existing banking policies or increase in interest rates may have an adverse impact on the Company's operations and profitability.

24. Our manufacturing activities are dependent upon availability of skilled and unskilled labour.

Except for the agreement our Company has entered with Carewell Services, Vadodara for supply of manpower at our manufacturing facility, we do not have any permanent arrangement of labour and recruitments are made on as per requirements. Our manufacturing activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations.

25. Our business is subject to various operating risks at our factory, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.

Our business operations are subject to operating risks, such as breakdown or failure of equipments used at our factory, interruption in power supply, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes, industrial accidents, our inability to respond to technological advancements and emerging realty industry standards and practices along with the need to comply with the directives of relevant government authorities. The occurrence of these risks, if any, could significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse affect on our business operations and financial conditions.

26. Our results of operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or other disputes with our employees or our contractors' employees.

Our operations are dependent on labour force. None of our employees are affiliated with any labour unions. However, there can be no assurance that our employees will not form a union, join any existing union or otherwise organize themselves. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Although, we currently have harmonious relations with our employees and they are not unionized at present, there can be no assurance that we will continue to have such relations. If our relations with our employees are strained, it may become difficult for us to maintain our existing labour policies, and our business may be adversely affected.

27. We have derived industry report from India Brand Equity Foundation "IBEF" and other government ministry reports.

We have referred the data , figures, charts, tables, graphs etc. from third party agencies and other ministry reports. Information which have been included on the Steel Industry in the Draft Prospectus is taken from the website of IBEF. While deriving information on Indian economy we have relied on various reports from Indian Government Ministry. The information provided on/in the website of IBEF and reports from Indian Government Ministry is subject to various limitations and based upon certain assumptions that are subjective in nature. There can be no assurance that the assumptions adopted for such information by IBEF and government industries for preparing their reports will prove to be accurate. If any of these assumptions are incorrect, the understanding of the industry in India could be materially different from that set forth in the reports.

B. Risks Related To Our Equity Shares and Equity Share Holders

28. Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.

After the completion of our Initial Public Issue, our Promoters, along with our Promoter Group members, will hold, approximately 67% of post issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine

matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company's or your best interests. For further details, please refer to the chapters titled "***Capital Structure***" and "***Our Promoter Group and Promoter Group Entities***" beginning on page 39 and 108 respectively, of this Draft Prospectus.

29. Our Company has not paid dividends in the past. There is no guarantee that we will be able to pay dividends in the future.

Our Company has not paid any dividend (including any interim dividend) on its shares since its inception. Further, our ability to pay dividends in the future will depend upon a variety of factors, including our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements, if any. As a result, we cannot assure you that we will make dividends of any particular amount, with any particular frequency or at all.

30. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

31. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of Equity Shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. For more details, please refer to "***Statement of Tax Benefits***" on page 57 of this Draft Prospectus.

32. We cannot assure you that our Equity Shares will be listed on the SME Platform of BSE in a timely manner or at all, which may restrict your ability to dispose of the Equity Shares.

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of our Equity Shares issued. We have only applied to BSE Limited to use its name as the Stock Exchange in this Offer Document for listing our Equity Shares on the SME Platform of BSE Limited. Permission for listing of the Equity Shares will be granted only after the Equity Shares offered in this Issue have been allotted. Approval from BSE Limited will require all relevant documents authorizing the issuing of the Equity Shares to be submitted to it. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Further, certain procedural and regulatory requirements of SEBI and the Stock Exchanges are required to be completed before the Equity Shares are listed and trading commences. Trading in the Equity Shares is expected to commence within 12 Working Days from the Issue Closing Date. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining the approvals would restrict your ability to dispose off your Equity Shares.

33. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Hem Securities Limited is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the section titled "**General Information – Details of the Market Making Arrangement for this Issue**" on page 37 of this Draft Prospectus.

34. *There may be restrictions on daily movements in the price of our Equity Shares, which can adversely affect shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point of time.*

Subsequent to listing, our Company may be subject to a daily circuit breaker imposed on listed companies by the BSE, which does not allow transactions having crossed certain volatility limit in the price of its Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our Company's circuit breaker is set by the BSE based on certain factors such as the historical volatility in the price and trading volume of the Equity Shares. The BSE is not required to inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker, if imposed, would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, we cannot assure that the shareholders will be able to sell the Equity Shares at desired prices.

C. External Risk Factors

35. *A slowdown in economic growth in India could cause our business to suffer.*

Our results of operations and financial condition are dependent on, and have been adversely affected by, conditions in financial markets in the global economy and, particularly in India. The Indian economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, business corruption, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, inflation, commodity and energy prices and various other factor Any slowdown in the Indian economy may adversely affect our business, financial condition, results of operations and the price of our Equity Shares.

36. *Regulatory changes with regard to Direct/Indirect taxes may adversely affect our performance or financial conditions.*

Regulatory changes relating to business segments in which we operate in India can have a bearing on our business. Each State in India has different local taxes and levies which may include value added tax, sales tax and octroi. Changes in these local taxes and levies may impact our profits and profitability. Any negative changes in the regulatory conditions in India or our other geographic markets could adversely affect our business operations or financial conditions.

37. *Instability of economic policies and the political situation in India or elsewhere could adversely affect the fortunes of the industry.*

There is no assurance that the liberalization policies of the government will continue in the future. Protests against privatization could slow down the pace of liberalization and deregulation. The Government of India plays an important role by regulating the policies governing the private sector over the past several years.

Bansal Roofing Products Limited

Unstable internal and international political environment could impact the economic performance in both the short term and the long term. The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Our Company's business, and the market price and liquidity of the Equity Shares, may be affected by changes in interest rates, changes in the Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

38. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighbouring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, such as the attacks in Mumbai in November 2008 and in July 2011, may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

39. The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factors. The extent and severity of these natural disasters determines their effect on the Indian economy. Although the long term effect of diseases such as the H5N1 "avian flu" virus, or H1N1, the swine flu virus, cannot currently be predicted, previous occurrences of avian flu and swine flu had an adverse effect on the economies of those countries in which they were most prevalent. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

40. Any downgrading of India's debt rating by a domestic or international rating agency could negatively impact our business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our financial results and business prospects, ability to obtain financing for capital expenditures and the price of our Equity Shares.

41. Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.

Our Company may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, the IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 ("IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 32 Indian Accounting Standards are to be converged with IFR. The date of implementation of such converged Indian accounting standards has not yet been determined and will be notified by the Ministry of Corporate Affairs after various tax related issues are resolved. We have not yet determined with certainty what impact the adoption of IFRS will have on our financial reporting. Our financial condition, results of operations, cash flows or changes in the shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of IFRS may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period.

43. *Disruption in services of third party transport providers may affect our business operations*

Our Company is dependent on third-party transport providers for the supply of raw materials to our factory and delivery of our products to our customers. Any increase in oil prices, may lead to increase in transportation costs will result in an impact on profitability. Steel Industry

Introduction

Steel is one of the most widely used metals in the world. It forms a key constituent of all major economies. Accordingly, the growth in steel consumption is a function of the growth pattern of its various end-use sectors viz. manufacturing, infrastructure, automobile, housing etc. which ultimately guide the country's economy.

India has become the second best in terms of growth amongst the top ten steel producing countries in the world and a net exporter of steel during 2013–14. Steel production in India recorded a growth rate of 4.8 per cent in February 2014 over February 2013. The cumulative growth during April–February, 2013–14 stood at 4.2 per cent over the corresponding period of the previous year. Steel contributes to nearly two per cent of the gross domestic product (GDP) and employs over 500,000 people. The total market value of the Indian steel sector stood at US\$ 57.8 billion in 2011 and is expected to touch US\$ 95.3 billion by 2016. The infrastructure sector is India's largest steel consumer, thereby attracting investments from several global players. Owing to this connection with core infrastructure segments of the economy, the steel industry is of high priority right now. Also, steel demand is derived from other sectors like automobiles, consumer durables and infrastructure; therefore, its fortune is dependent on the growth of these user industries.

The liberalisation of the industrial policy and other government initiatives have given a definite impetus for entry, participation and growth of the private sector in the steel industry. Allowing foreign direct investment (FDI) has been a positive step since India is heavily dependent on foreign technologies. These foreign technologies generally add life to the plant and production units, which ultimately lead to the country's economic growth.

Types of Steel

Steel is an iron based mixture containing two or more metallic and/or non metallic elements usually dissolving into each other when molten. Since it is an iron based alloy—as per its end use requirements—other than iron it may contain one or more other elements such as carbon, manganese, silicon, nickel, lead, copper, chromium, etc. For example, stainless steel (a type of steel) mainly contains chromium that is normally more than 10.5 percent with/without nickel or other alloying elements. Steel is produced using Steel Melting Shop that includes converter, open hearth furnace, electric arc furnace and electric induction furnace. There are broadly two types of steel according to its composition: alloy steel and non-alloy steel. Alloying steel is produced using alloying elements like manganese, silicon, nickel, chromium, etc. Non-alloy steel has no alloying component in it except that are normally present such as carbon. Non-alloy steel is mainly of three types viz. mild steel (contains upto 0.3% carbon), medium steel (contains between 0.3-0.6% carbon) and high steel (contains more than 0.6% carbon). All types of steel other than mild steel are called special steel. It is mainly because a special care is taken in order to maintain particular level of chemical composition in such steel. This process gives different properties to the steel according to its composition. In India, non-alloying steel constitutes about 95 percent of total finished steel production, and mild steel has large share in it.

According to shape/size/form steel is categorized into different types such as liquid steel, ingots, semis (semi-finished steel) and finished steel. Liquid steel is a first product that comes out from Steel Melting Shop. Liquid steel further goes into ingots, and then ingots advance to semis. Semis are called semi-finished steel products because they are further subject to forging/rolling in order to produce finish steel products such as flat steel products and long steel products. Crude steel

generally includes ingots and semis. According to end use, steel is categorized into structural steels, construction steel, deep drawing Steel, forging quality, rail steel, etc. The following chart depicts various types of steel products according to different categories.

India’s real consumption of total finished steel grew by 0.6 per cent year-on-year in April–March 2013-14 to 73.93 million tonnes (MT), according to Joint Plant Committee (JPC), Ministry of Steel. Construction sector accounts for around 60 per cent of the country's total steel demand while the automobile industry consumes 15 per cent.

India became net steel exporter in 2013–14 and is likely to maintain the momentum in 2014-15 as producers are looking to dock more overseas shipment to tide over subdued domestic consumption. Total steel exports by India during 2013–14 stood at 5.59 MT, as against imports of 5.44 MT. During the period, Steel Authority of India (SAIL) clocked a 30 per cent growth in exports and aims to more than double the shipments to 1 MT in 2014–15. Rashtriya Ispat Nigam Ltd (RINL), which exported 1 lakh tonne steel last fiscal, aims to treble that in the current fiscal.

Iron ore export from India has showed a 253 per cent increase during the period October–December 2013, at 3.75 MT as against 1.06 MT in the corresponding period of the previous year, on the back of the opening of new mines in Chhattisgarh, Madhya Pradesh and Rajasthan, as per the Federation of Indian Mineral Industries (FIMI).

India with a GDP of US\$ 1.758 trillion (2013 estimated), is, according to the CIA Factbook, the world's 4th largest economy in Purchasing Power Parity (PPP) terms (the GDP for 2013 in PPP terms is estimated at approximately US\$4.962trillion). Per-capita GDP, in turn, is estimated at US\$4,000 in 2013 in PPP terms. India is now one of the fastest growing economies in the world. According to the CIA Factbook, India's real GDP growth rate was 4.70% in 2013(est.) (Source: Central Intelligence Agency, World Factbook - India, updated on May 9, 2014)

Overview of Indian Economy

Economic Growth

- 1.1 The Indian economy recovered in the second quarter (Q2) of 2013-14 recording a growth of 4.8 per cent. This follows a growth rate of 4.4 per cent in the first quarter (Q1) of the current financial year— the lowest in 16 quarters. Particularly encouraging is the fact that the recovery in Q2 is noticed on the face of significant fiscal consolidation by the Government and tighter liquidity conditions to moderate aggregate demand. The economy went through challenging times since the crisis in the Euro area in 2011-12 with a cyclical down turn with growth slowdown, elevated current account deficit, persistent inflation, and the need to restore fiscal policy to a sustainable path. While the Government delivered on the announced fiscal targets in 2012-13, current account deficit (CAD) continued to remain elevated in Q1 of 2013-14 and in tandem with market misperception of an imminence of the rollback of quantitative easing in US, assumed a serious dimension with the sharp depreciation of the rupee. The Government put in place a series of measures and there has been a significant let-up in the challenges on the trade and balance of payments front, particularly in the Q2 2013-14. Domestic impediments like elevated levels of food and retail inflation, high input costs and pressure on profit margins and infrastructural bottlenecks continued, with the Government addressing them through appropriate calibration of fiscal policy, administrative measures and institutional mechanisms like Cabinet Committee on Investment to fast track projects.
- 1.2 The recovery in growth, although weak, is expected to gather pace in the coming quarters. Broadly summarised, the indications to this effect are a sharp moderation in CAD composed of both a moderation in imports and pickup in exports; a moderation on year-on-year WPI inflation in the first half over that in the previous year; fiscal consolidation that is broadly on track; and accelerated growth in agriculture and a mild recovery in manufacturing. While there are some concerns about renewed price pressure in October 2013 and the services sector, the driver of growth, is still to pick up, there are indications to the effect that these could be reversed going forward. The analyses in various sections of this chapter would provide the analytical basis for the above assessment. With recent improvements in growth of some sectors, better performance of exports and measures taken by the Government, the year 2013-14 can be expected to end with a growth of 5 per cent.
- 1.3 The Indian economy weathered the global financial crisis rather well and quickly recovered from the decline in growth rate in 2008-09 to a healthy growth that averaged around 9 per cent annually in 2009-10 and 2010-11. However, this recovery was short-lived and growth rate declined to 6.2 per cent in 2011-12 and 5.0 per cent in 2012-13, on account of both domestic and external factors. Despite some recovery in the growth of agriculture and industry sector, particularly in Q2 of the current financial year, the overall growth of the economy has been a modest 4.6 per cent in the first half of the year. The growth rate of the economy improved from 4.4 per cent in Q1 2013- 14 to 4.8 per cent in Q2. Compared to Q1 2013-14, Q2 has evidenced a robust pick-up in the growth of the agricultural sector and a gradual recovery in the industrial sector. The growth in economic services also got strengthened, while the community, social and personal services- a sector with substantial public sector presence - exhibited a significant fall in growth, pointing towards efforts at fiscal consolidation. The demand side impetus to growth is gradually gaining momentum with the strengthening of private consumption and investment and with exports making an impressive turnaround in Q2 2013-14. The confluence of these factors has resulted in a growth of 4.6 per cent during the first half (H1) of 2013-14, roughly the same level of 4.7 per cent achieved during the second half (H2) of 2012-13.

Bansal Roofing Products Limited

- 1.4 On the external front, the crisis of 2008, the subsequent sovereign debt crisis and the recession in the Euro-area had moderated the average growth rate of the global economy to less than 3 per cent over the period 2008-2012 as compared to 5 per cent during 2004-2007. Data from IMF indicate that several emerging market economies including China and India quickly rebounded to high growth in the aftermath of the crisis. In fact, in terms of market price GDP, India's growth exceeded that of China in 2010. Apart from emerging economies, advanced economies also experienced significant recovery in 2010 with both the US and the Euro-area registered distinctly higher growth rates. A series of subsequent events, including the uncertainty surrounding Euro-area sovereign debt crisis, hampered sustained economic recovery in advanced economies with adverse consequences for growth and challenges for macroeconomic management in emerging market economies. With the intensification of the sovereign debt crisis, the decline in real GDP growth rates starting 2011 has been witnessed across advanced and emerging market economies. Economic growth has again started looking up in advanced economies, especially in the US, alleviating the external constraint on India's recovery to some extent.
- 1.5 The slowdown in real GDP growth in India during 2011-12 and 2012-13 is in sync with trends in similar emerging economies. The downturn has been more pronounced in the Indian case, owing to domestic and structural factors. The growth of real GDP has generally shown a declining trend since the first quarter of 2011-12. An upward movement in some of the quarters in between raised the hope for a turnaround that was belied (Figure 1.1, Panel I). Corresponding to this, the industrial sector witnessed a long, steep decline. The service sector also witnessed growth moderation, which has been gradual and less steep than the industrial sector, and its growth remained more or less constant during Q3 2012-13 to Q1 2013-14. As panel I of Figure 1.1 shows, the declining trend in GDP growth has reversed in Q2 2013-14, on the back of higher growth in agriculture and industry vis-à-vis Q1 2013-14.

Steel Industry

Introduction

Steel is one of the most widely used metals in the world. It forms a key constituent of all major economies. Accordingly, the growth in steel consumption is a function of the growth pattern of its various end-use sectors viz. manufacturing, infrastructure, automobile, housing etc. which ultimately guide the country's economy.

India has become the second best in terms of growth amongst the top ten steel producing countries in the world and a net exporter of steel during 2013-14. Steel production in India recorded a growth rate of 4.8 per cent in February 2014 over February 2013. The cumulative growth during April-February, 2013-14 stood at 4.2 per cent over the corresponding period of the previous year. Steel contributes to nearly two per cent of the gross domestic product (GDP) and employs over

500,000 people. The total market value of the Indian steel sector stood at US\$ 57.8 billion in 2011 and is expected to touch US\$ 95.3 billion by 2016. The infrastructure sector is India’s largest steel consumer, thereby attracting investments from several global players. Owing to this connection with core infrastructure segments of the economy, the steel industry is of high priority right now. Also, steel demand is derived from other sectors like automobiles, consumer durables and infrastructure; therefore, its fortune is dependent on the growth of these user industries.

The liberalisation of the industrial policy and other government initiatives have given a definite impetus for entry, participation and growth of the private sector in the steel industry. Allowing foreign direct investment (FDI) has been a positive step since India is heavily dependent on foreign technologies. These foreign technologies generally add life to the plant and production units, which ultimately lead to the country’s economic growth.

Types of Steel

Steel is an iron based mixture containing two or more metallic and/or non metallic elements usually dissolving into each other when molten. Since it is an iron based alloy—as per its end use requirements—other than iron it may contain one or more other elements such as carbon, manganese, silicon, nickel, lead, copper, chromium, etc. For example, stainless steel (a type of steel) mainly contains chromium that is normally more than 10.5 percent with/without nickel or other alloying elements. Steel is produced using Steel Melting Shop that includes converter, open hearth furnace, electric arc furnace and electric induction furnace. There are broadly two types of steel according to its composition: alloy steel and non-alloy steel. Alloying steel is produced using alloying elements like manganese, silicon, nickel, chromium, etc. Non-alloy steel has no alloying component in it except that are normally present such as carbon. Non-alloy steel is mainly of three types viz. mild steel (contains upto 0.3% carbon), medium steel (contains between 0.3-0.6% carbon) and high steel (contains more than 0.6% carbon). All types of steel other than mild steel are called special steel. It is mainly because a special care is taken in order to maintain particular level of chemical composition in such steel. This process gives different properties to the steel according to its composition. In India, non-alloying steel constitutes about 95 percent of total finished steel production, and mild steel has large share in it.

According to shape/size/form steel is categorized into different types such as liquid steel, ingots, semis (semi-finished steel) and finished steel. Liquid steel is a first product that comes out from Steel Melting Shop. Liquid steel further goes into ingots, and then ingots advance to semis. Semis are called semi-finished steel products because they are further subject to forging/rolling in order to produce finish steel products such as flat steel products and long steel products. Crude steel generally includes ingots and semis. According to end use, steel is categorized into structural steels, construction steel, deep drawing Steel, forging quality, rail steel, etc. The following chart depicts various types of steel products according to different categories.

Bansal Roofing Products Limited

Market Size

India's real consumption of total finished steel grew by 0.6 per cent year-on-year in April–March 2013-14 to 73.93 million tonnes (MT), according to Joint Plant Committee (JPC), Ministry of Steel. Construction sector accounts for around 60 per cent of the country's total steel demand while the automobile industry consumes 15 per cent.

India became net steel exporter in 2013–14 and is likely to maintain the momentum in 2014-15 as producers are looking to dock more overseas shipment to tide over subdued domestic consumption. Total steel exports by India during 2013–14 stood at 5.59 MT, as against imports of 5.44 MT. During the period, Steel Authority of India (SAIL) clocked a 30 per cent growth in exports and aims to more than double the shipments to 1 MT in 2014–15. Rashtriya Ispat Nigam Ltd (RINL), which exported 1 lakh tonne steel last fiscal, aims to treble that in the current fiscal.

Iron ore export from India has showed a 253 per cent increase during the period October–December 2013, at 3.75 MT as against 1.06 MT in the corresponding period of the previous year, on the back of the opening of new mines in Chhattisgarh, Madhya Pradesh and Rajasthan, as per the Federation of Indian Mineral Industries (FIMI).

Investments

India needs investment of US\$ 210 billion over the next decade to achieve the steel production capacity of 300 million tonnes per annum (MTPA) by 2025 from the current 90 MT, according to Mr C S Varma, Chairman and Managing Director, SAIL. Some of the major investments in the sector are as follows:

Bansal Roofing Products Limited

- India's third-largest steel maker, JSW Steel, plans to purchase Welspun Maxsteel for about ₹ 1,000 crore (US\$ 165.32 million). The acquisition will help JSW secure continuous supply of cheaper raw material as it plans to expand its capacity at Dolvi, Maharashtra, to 5 MT to supply in the western and northern markets.
- Prize Petroleum, a wholly-owned subsidiary of Hindustan Petroleum Corporation Ltd (HPCL), has acquired stakes in two Australian hydrocarbon fields for A\$ 85 million (US\$ 79.27 million). The company has entered into an agreement with Sydney-based AWE Ltd to acquire 11.25 per cent stake in T/L1 area and 9.75 per cent interest in T/18P area.
- McNally Bharat Engineering Co Ltd has entered Russia for the first time through a subsidiary, MBE Coal & Minerals Technologies GMBH. It received an order worth €5.95 million (US\$ 8.21 million) from Eurochem Group of Russia for an iron ore mining project.
- Canada has invited Coal India Ltd (CIL) to explore mining opportunities in British Columbia, Canada. Mr Stewart Beck, Canadian High Commissioner met with Mr N Kumar, Director (Technical) of Coal India Ltd, to seek investments for coal assets in the Canadian province. CIL currently holds interests in two assets in Mozambique acquired through a concession agreement between the African and Indian governments.

Government Initiatives

The Government of India has allowed 100 per cent FDI through the automatic route in the Indian steel sector. It has significantly reduced the duty payable on finished steel products and has streamlined the associated approval process.

The government is taking steps to increase industrial activity in Uttar Pradesh (UP). Addressing a Conference on 'Demand for Steel in India: The End User Perspective,' the Union Minister of Steel, Mr Beni Prasad Verma said, in order to increase supply of steel to rural consumers, companies like SAIL and RINL have set up 521 and more than 100 rural dealers respectively in remote parts of UP.

In order to provide thrust on research and development (R&D), the Ministry of Steel is encouraging R&D activities both in public and private steel sectors, by providing financial assistance from Steel Development Fund (SDF) and Plan Scheme of the Central Government. Under the SDF scheme, 82 R&D projects have been approved with total project cost of ₹ 677 crore (US\$ 111.92 million) wherein SDF assistance is ₹ 370 crore (US\$ 61.17 million). Under the Plan Scheme, eight projects were approved with a total cost of ₹ 123.27 crore (US\$ 20.38 million) wherein Government assistance is ₹ 87.28 crore (US\$ 14.43 million).

To encourage beneficiation and pelletisation of iron ore fines in the country, basic customs duty on the plants and equipment required for initial setting up or substantial expansion of iron ore pellets plants and iron ore beneficiation plants has been reduced from 7.5 per cent to 2.5 per cent. Import of critical raw materials for steel industry, such as coking coal, non-coking coal and scrap are subject to zero or very low levels of custom duty.

Road Ahead

The future of the Indian steel industry is bright. The government plans to increase infrastructure spending from the current 5 per cent GDP to 10 per cent by 2017, and the country is committed to investing US\$ 1 trillion in infrastructure during the 12th Five-Year plan. "Taking 15 per cent as steel component in the total investment, then it can generate additional demand worth US\$ 75 billion of steel in the next few years or US\$ 15 billion worth of additional demand a year or in terms of quantity, an additional demand of 18.75 MT per annum," as per Mr C S Verma, Chairman, SAIL.

With urban population increasing globally, there is a greater need for steel to build public-transport infrastructure. Emerging economies will also continue to be a major driver of demand as these necessitate a huge amount of steel for urbanisation and industrialisation. The sector is expected to see an investment to the tune of about ₹ 2 trillion (US\$ 33.06 billion) in the coming years, as per domestic giant, Tata Steel.

2. FRP/Polycarbonate Sheets

These are light weights, strong flat sheets in different thicknesses. Transparency is like glass. It is very strong and available from 1.5 mm. to 20 mm. thickness.

Production Process

3. Eco Ventilators

Eco Ventilator is a self driven equipment installed on industrial roofs to extract inside air. Turbo ventilators are driven by wind hence no electricity or other power sources are required. As the ventilator is rotated by wind, the stale inside air is exhausted through it natural inward flow of fresh air is boosted. It's Low cost equipment which saves energy while minimal maintenance cost and has been recommended by various energy audits.

Production Process

- Cutting of Aluminium Blade and curve it in press***
- Making aluminium holding ring***
- Assembly of numbers of blades with aluminium holding ring and upper aluminium V***
- Tie aluminium ring with tie rod and holding fish***
- Making stainless steel holding ring***
- Fixing of shaft with stainless steel holding rings***
- Fixing of top assembly of fins, aluminium rings, tie rod, holding fish together with sleeve and insert the same in shaft with stainless steel holding rings***
- Fixing of Top Cover, Balancing Test & packing***

How does it works

The turbo ventilator operates by utilizing the velocity of the wind to induce air flow by centrifugal action. The centrifugal force caused by the spinning vanes creates a region of low pressure area which draws air out through the vanes. Air drawn out by the vanes is continuously replaced by fresh air from the outside. The slightest breeze will cause the turbine to spin and even after the breeze has stopped, the flywheel effect of the rotor cage will use its stored energy to continuously remove air giving rise to ventilation, suction is maintained even at low wind velocities.

Benefits

If the interior of the building gets hot and stale, there are always doors or windows that can be opened to provide for the ventilation. However, stale and hot air does not disperse by itself and opening doors or windows is simply not sufficient to provide adequate ventilation in most areas. The turbo ventilator also helps to prevent condensation by extracting moisture condensate forming air, and in the case of fire will extract smoke and fumes thus preventing the building from becoming smoke filled.

4. Colour Coated Roof Accessories

We offer wide range of roofing accessories which includes Ridges, corners, capping, Gable, Gutter, Louvers, Z and C Purlins, PVC Cap For SDT Screw, foam Filler (For Ends): Silicon Sealant For Gap/Screws, Butyl Tape, Roofing Fasteners : (Self Drilling Cum Tapping Screws (SDT), which are required in pre engineering buildings with metal sheets.

The parties to a contract must either perform or offer to perform their respective promises unless such performance is dispensed with or excused under the provisions of the Act or of any other law. When a contract has been broken the party who suffers by such breach is entitled to receive from the party who has broken the contract, compensation for any loss or damage caused to him thereby, which naturally arose in the usual course of things from such breach or which the parties knew, when they made the contract, to be likely to result from the breach of it.
