If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. - Our business is subject to seasonal volatility, which may contribute to fluctuations in our results of operations and financial condition.**

As an agro-based company, our businesses are sensitive to weather conditions, including extremes such as drought and natural disasters. There is growing concern that carbon dioxide and other greenhouse gases in the atmosphere may have an adverse impact on global temperatures, weather patterns and the frequency and severity of extreme weather and natural disasters. Adverse weather conditions may also cause volatility in the prices of commodities, which may affect growers' decisions about the types and quantum of crops to plant and may consequently affect the sales of our products. Consequently, the occurrence of any such unfavorable weather patterns may adversely affect our business, results of operations and financial condition.

For instance, soya bean seed is one of the major raw material, which is used by us in manufacturing soya products. The period during which our business may experience higher revenues varies from season to season depending upon the availability and thereafter harvesting of the soya bean seeds. During the crop season, we are able to procure the soya bean seeds at a reasonable terms and in substantial quantities, whereas during the off-season the availability of the soya bean seeds is less and also there are price variations.

Due to dependency on seasonality of agro crops in which our business is based, results of one reporting period (quarter/half year/year) may not be necessarily comparable with preceding or succeeding reporting periods. We are impacted by seasonal variations in sales volumes, which may cause our revenues to vary significantly between different quarters in a Fiscal. Accordingly, our revenue in one quarter/half year may not accurately reflect the revenue trend for the whole Financial Year. The seasonality of soya bean seeds and its impacts may cause fluctuations in our result of operations and financial conditions.

3. We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

Our Company has made applications to regulatory authorities for grant of the following Government / statutory approvals and licenses but the same has not been issued to us till date:-

Sr. No.	Nature of Registration / License	Date of Application	Issuing Authority	Purpose/ Plants/ offices for which said licenses is applied for
1.	The Company has applied for the renewal of Solvent/ Raffinate/ Slop under the Solvent Solvent/ Raffinate/ Slop (Acquisition Sale, Purchase and Prevention of Use in Automobiles) Order, 2000 under the Essential Commodities Act, 1995	November 13, 2021	The Collector, Food Department, Eats Nemar, Khadwa (Madhya Pradesh)	Khandwa Oils Unit-I

3. December 22, 2021	The Collector, Food Department, Eats Nemar, Khadwa (Madhya Pradesh)	Kheda Unit

Sr. No.	Nature of Registration / License	Date of Application	Issuing Authority	Purpose/ Plants/ offices for which said licenses is applied for
4.	The Company has made an application for renewal of license to work a factory under the Factories Act, 1948.	November 13, 2021	Director, Industrial Health and Safety, Madhya Pradesh, Indore (Madhya Pradesh)	Khandwa Oils Unit-I

Further, our Company is yet to apply for change in installed capacity in the consent to operate issued by M.P. Pollution Control Board (“MPPCB”) in respect of the manufacturing processes carried in Itarsi unit and Khandwa Oils Unit-I, as the registered capacity in the consents are less than the actual installed capacity/actual production. Similarly, we are yet to apply for addition/changes in the FSSAI licences in respect of installed capacity of certain processes carried in Itarsi unit and Khandwa Oils Unit-I. If we fail to obtain renewed consents, licenses, approvals or permissions, our ability to carry on business may be affected and our Company and our officials may be subject to fines and penalties under the relevant laws. Consequently, our turnover and profitability may be adversely affected.

Also, our Company is in the process of making application for change in name in all the permits, licenses and approvals, which are under Company’s former name. For details regarding pending approvals, please refer to section titled “**Government and Other Approvals**” beginning on page 231 of the Draft Red Herring Prospectus.

4. Our business is primarily dependent on the availability/supply and cost of major raw material, which we source from domestic suppliers. Any significant increase in the prices of these raw materials or decrease in the availability of the raw materials, could adversely affect our results of operations.

The success of our operations depends on, inter-alia, our ability to source raw materials at competitive prices. For instance, the price and supply of soyabean seed depend on factors beyond our control, including economic conditions, crop season, competition, consumer demand, production levels and transportation costs. In the event that any of our suppliers of raw materials curtail, discontinue or delay their delivery of raw materials to us, we will be required to replace such suppliers. Our top ten suppliers accounted for approx. 23% of the total purchase for the F.Y. 2020-21. There can be no assurance that we will be able to replace such suppliers on commercially acceptable terms, or at all, which could adversely affect our production schedule, volumes and results of our operations. Further, if we are unable to pass such increased costs to our customers, this could have a material adverse effect on our financials, business and results of operations.

Also, we have not entered into any firm arrangement with any of the supplier in respect of purchase of raw material. While we have long term relationships with many of them, but we have not entered into any supply contracts with such parties to ensure regular and timely supplies of raw materials. Such disruption in the supply chain would delay our production process and consequently, our results of operations. Historically, we have not encountered any problems in sourcing our raw materials. However, we cannot assure you about the same in future and that we may be unable to procure raw material in time or in the required quantities or may have to procure it at a higher price, which may adversely affect our results of operations and financial performance.

5. We derive a significant portion of our revenue from trading in agri-commodities, procurement of which is heavily dependent on third party suppliers.

We derive a significant portion of our revenue from trading in agri-commodities. For the F.Y. 2020-21, our revenue from trading activities were ₹ 316.78 crore or 24.4% of our revenue from operations. For the procurement of agri commodities, we are heavily dependent on external suppliers with which we do not have any formal long-term arrangements. Further, the availability and prices of such agri commodities can fluctuate due to factors beyond our control, including, amongst others, world supply and demand, weather, crop yields, trade disputes between governments of key producing and consuming countries and governmental regulation. Global demand for agricultural commodities may be adversely affected in periods of sustained economic downturn, while supply may increase due to good weather patterns or long-term technological developments, all of which are factors beyond our control. While we forecast the demand for the agri-commodities and accordingly plan our procurement volumes for our operations accordingly, any error in our forecast could result in surplus stock, which may not be sold in a timely manner. Further, any decline in the quality of such commodities or delay in delivery of commodities by such parties, may adversely affect our operations.

In addition, each of the agricultural commodities has a specific shelf life and if not sold prior to expiry, may lead to losses or if consumed after expiry, may lead to health hazards. We cannot assure that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations, future cash flows and financial condition.

6. *Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.*

The manufacturing operations of the Company are carried in the state of Madhya Pradesh through two units in Khandwa and one unit in Itarsi. Due to the geographical concentration of our manufacturing operations primarily in Madhya Pradesh, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations.

In addition, we generate major domestic sales through our customers situated in Madhya Pradesh, Gujarat, West Bengal and Maharashtra region. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations. However, our Company also has export sales in countries such as Netherlands, Singapore, Bangladesh and Nepal.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

7. *Our Products are edible items and any actual or alleged contamination or deterioration in the quality of our products could result in legal liability, damage our reputation and adversely affect our business prospects and consequently our financial performance.*

We are an agro-based Company, involved primarily in the business of (a) solvent extraction & oil refining and (b) trading of various agro-commodities. We may be subject to risks affecting the agro-based industry, including risks posed by the following:

- contamination/ spoilage of raw materials;
- product tampering;
- product labelling errors;
- consumer product liability claims and expense, and possible unavailability of product liability insurance; and
- the potential cost and disruption of product recalls.

Any actual or alleged contamination or deterioration of our products, even if accidental, could result in legal liability, damage to our reputation and may adversely affect our business prospects and consequently our results of operation and financial performance. The risk of contamination or deterioration in quality exists at each stage from procurement of raw materials from the farmers and third party suppliers, transportation of the raw materials to our manufacturing facility and processing of raw materials into final products, storage and delivery to our consumers and distribution of our products to customers. While we follow stringent quality control processes and quality standards at each stage, there can be no assurance that our products will not be contaminated or suffer deterioration. Further, there can be no assurance that contamination of our raw materials or products will not occur during the transportation, production, distribution and sales processes due to reasons unknown to us or beyond our control. If our products or raw materials are found to be spoilt, contaminated, tampered with, incorrectly labelled or reported to be associated with any such incidents, we may be forced to recall our products from the market and we could be subject to product liability claims, adverse government scrutiny, investigation or intervention, product returns, resulting in increased costs and incur criminal or civil liability including for any adverse medical conditions suffered by our consumers resulting from consumption of such products.

8. Substantial portion of our revenues has been dependent upon few customers. The loss of any one or more of our major customer would have a material adverse effect on our business, cash flows, results of operations and financial condition.

The substantial portion of our revenues has been dependent upon few customers. For instance, our top ten customers accounted for 38% (aprox.) of our revenue from operations for the F.Y. ended March 31, 2021. We have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

9. We derive a significant portion of our revenue from soya products, particularly Soya De-oiled Cake and Soya refined oil, any reduction in demand or in the production of such products could have an adverse effect on our business, results of operations and financial condition.

We derive a significant portion of our revenue from soya products particularly soya meal and soya refined oil. For the F.Y. 2021 and half year ended September 30, 2021, our cumulative revenue from soya meal and soya refined oil (from manufacturing and trading) was ₹ 983.1 crore and ₹252.85 crore or 75.7% and 46% of our revenue from operations, respectively. Consequently, any reduction in demand or a temporary or permanent discontinuation of manufacturing or trading of such products could have an adverse effect on our business, results of operations and financial condition.

10. We have entered into certain transactions with related parties and are likely to continue to do so in the future.

We have entered into certain transactions with related parties and are likely to continue to do so in the future. For the Financial Years 2019, 2020 and 2021 and the six months ended September 30, 2021, our sale of products to related parties was ₹ 9,677.31 lakhs, ₹ 4,161.04 lakhs, ₹ 9,610.52 lakhs and ₹ 212.36 lakhs respectively, respectively, constituting 7.49%, 4.88%, 7.39% and 0.36% of our total income, respectively. For the Financial Years 2019, 2020 and 2021 and the six months ended September 30, 2021, the aggregate total of purchases and expenses from related parties were ₹ 14,486.58 lakhs, ₹ 857.05 lakhs, ₹ -2689.15 lakhs and ₹1064.14 lakhs respectively, constituting 11.21%, 1.00%, 2.07% and 1.79% of our total expenses, respectively. For details on our related-party transactions, see "Related Party Transactions" on page 197.

All related party transactions entered into by us in the last three financial years and the six months ended September 30, 2021 have been at arms' length and in the interests of our Company. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favorable terms if such transactions are not entered into with related parties. Such related party transactions in the future or any other future transactions may potentially involve conflicts of interest which may be detrimental to the interest of our Company and we cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, financial condition and results of operations.

11. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be

harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

12. We are subject to competition from both organized and unorganized players in the market, which may significantly affect the fixation and realisation of the price for our product, which may adversely affect our business operation and financial condition.

The market for our products is competitive on account of existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, distribution network, pricing and timely delivery. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

We operate in a rapidly consolidating industry. The strength of combined companies could affect our competitive position in all of our business areas. Furthermore, if one of our competitors or their customers acquires any of our customers or suppliers, we may lose business from the customer or lose a supplier, which may adversely affect our business, results of operations and financial condition.

13. We do not own the trademark, which we are using for our business. Further, one of the trademarks applied by us for registration is under objection.

The trademark , which we are using for our business, is registered under the name of our Corporate Promoter, K.N. Resources Private Limited (“KNRPL”). We have been permitted to use the aforementioned trademark, without any consideration till August 31, 2027 through NOC dated September 01, 2012. While we believe that the NOC shall continue to remain in place and will be renewed from time to time basis, we cannot assure that the same will not be revoked in future. In the event of non renewal/revocation of NOC, we may be forbidden from using this trademark and this may affect our brand image adversely.

Further, one of the trademark, “KHAN PAN” applied for registration under class 29 under the provisions of the Trademarks Act, 1999 is under objection. As such, we do not enjoy the statutory protections accorded to a registered trademark as on date. There can be no assurance that we will be able to register the trademark and the logo in future or that, third parties who have filed objection will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

For further details on above and other trademarks, please refer to chapter titled “Our Business” beginning on page 111 of this Draft Red Herring Prospectus.

Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. We also require substantial electricity for our manufacturing facilities which is sourced from state electricity boards. In case, the supply is not available for any reason, we rely on alternative sources i.e. the DG sets, which may not be able to consistently meet our requirements. Our customer relationships, business and financial results may be materially adversely affected by any disruption of operations of our products, including as a result of any of the factors mentioned above.

16. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Promoters and Key managerial personnel, particularly Mr. Vijay Shrishrimal, Mr. Dharendra Shrishrimal and Mr. Sanjay Shrishrimal. We also depend significantly on our Key Managerial Persons for executing our day to day activities. The loss of any of our Promoter and Key Management Personnel, or failure to recruit

suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section **“Our Management”** on page 136 of this Draft Red Herring Prospectus.

17. Our Corporate Promoters and a Group Company is engaged in the similar line of business as of our Company. There are no non - compete agreements between our Company and Corporate Promoters/ Promoter Group Entities. We cannot assure that our Promoter will not favour the interests of such entities over our interest or that the said entities will not expand which may increase our competition and may adversely affect business operations and financial condition of our Company.

Our Corporate Promoters, namely K.N. Resources Private Limited, Anant Trafina Private Limited and Group Company, namely Palak Exim Pvt. Ltd., are engaged inter-alia in the trading of agri-commodities, which is partly similar line of business as of our Company. Further, we have not entered into any non-compete agreement with any of our said entities. We cannot assure that our Promoter who has common interest in said entities will not favour the interest of the said entities. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and aforesaid entities in circumstances where our respective interests diverge. In cases of conflict, our Promoter may favour other entities in which our Promoter has interests. There can be no assurance that our Promoters or our Promoter Group entities will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

18. There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956/2013. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate or any other law could impact the financial position of the Company to that extent.

There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which inter-alia includes clerical errors in the Annual Returns filed by our Company with the ROC in past years, for instance, list of share transfers was not attached in the Annual Return filed by our Company for F.Y. 2007-08. Similarly, in the Annual Return filed by our Company for F.Y. 2019-20, list of shareholders was not attached. Also, there are certain cases where some of forms has been filed belatedly in Registrar of Companies for which requisite delayed fees was paid by the Company. Further, our Company has not filed E Form CHG-1 for creation of charge for certain vehicle loan, which is a non-compliance of Section 77 of Companies Act, 2013. Also, there has been instances in the past where our Company has given certain amount as advance to the related parties, which is a non-compliance of Section 185 of the Companies Act, 2013, however, as on date of Draft Red Herring Prospectus, all such amounts has been cleared. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business, financial conditions and result of operations.

Further, our company has not complied with certain Accounting Standards/Indian Accounting Standards in the past such as AS -15 (Accounting for Employee Benefits)/ Ind AS 19 (Employee Benefits) in respect of actuarial valuation of gratuity, Ind AS 17 (Leases) etc., however the same have been duly complied by us in the restated financial statements. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

19. Certain of our corporate records relating to forms filed with the Registrar of Companies prior to the year 2006 are not traceable.

We do not possess some of the prescribed forms filed with the Registrar of Companies, Chhattisgarh, particularly relating to forms filed prior to the year 2006 including, inter alia, in respect of allotments of Equity Shares, Increase in authorised capital, appointment & cessation of directors, Annual Returns, filing of financial statements, appointment of Statutory Auditor etc. and certain other statutory records such as Minutes Book and Statutory Registers pertaining to the period prior to 2011. Thus, the history of our company with regard to certain share allotments and authorised capital presented in this Draft Red Herring Prospectus is based on the limited information available with the Company. For more details, please refer to chapter titled “Capital Structure” beginning on page 64 of this Draft Red Herring Prospectus. While our Company believes that these ROC forms were duly filed on a timely basis, we cannot assure you that all the aforementioned forms filed with ROC will be available in the future. Further, due to the non-availability of the requisite statutory records, we may not be able to present the requisite documentary evidence to validate our point which may lead to any penal actions being taken against the Company and its operations may get adversely affected.

20. The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled “Objects of the Issue”. The fund requirement and deployment, as mentioned in the “Objects of the Issue” on page 86 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “Objects of the Issue” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

21. The viability and level of wind energy generation is dependent on wind patterns, which are not constant and vary over time.

The viability of wind energy project is primarily dependent on the wind patterns conforming to the patterns that had previously been recorded to determine the suitability of the site for wind energy project. There can be no assurance that wind patterns at our wind farm sites will remain constant. Changes in wind patterns at our site could reduce the quantum of electricity units generated which can have a material adverse effect on our business, financial condition and results of operations. For details, relating to our wind farm sites, please refer to section titled “Immovable Properties” in the Chapter titled “Our Business” beginning on page 120 of this Draft Red Herring Prospectus.

22. We do not own the Registered Office, Corporate Office, Marketing Offices and Warehouses from which we carry out our business activities. In case of non renewal of rent agreements or dispute in relation to use of the premises, our business and results of operations can be adversely affected.

We are using our Registered Office and Corporate Office pursuant to the no-objection certificates issued by our Promoter Group entity, K.N. Solvent and Vanaspati Pvt Ltd and Corporate Promoter, Anant Trafina Pvt Ltd respectively. Both the NOC’s are valid till revoked but not earlier than March 31, 2022. Further, our marketing offices located at Raipur, Bhopal, Khandwa and Indore has been obtained by us on rental basis. In the event of revocation of NOC or termination/non renewal of rent agreements, we may be required to vacate the said premises which may cause disruption in our corporate affairs and business and impede our effective operations and thus can adversely affect our business, financial condition and result of operations.

There can be no assurance that we will, in the future, be able to retain or/and renew the NOC’s/agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the existing offices and operating locations on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, or to close facilities in desirable locations, affecting our financial condition and operations. In the event that the existing NOC’s or rent agreements are terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our operations which could materially and adversely affect our business, financial condition and results of operations.

In respect of the marketing offices, our Company has not entered into valid rent agreements with the respective property owners. In addition, we also obtain warehouses from third parties on rental basis from time to time for which we do not enter into any rent agreement. The absence of rent agreement in relation to the said marketing offices and warehouses can cause us to vacate such premises as and when solicited by the property owners. It may also lead to unavailability of legal remedies in case of any dispute with the owners. Further, it may result in levy of penal charges, in case cognizance being taken by concerned Authorities. All of these can lead us to suffer disruption in our operations, which could adversely affect our business, financial condition and results of operations.

Further, we also share the registered office of our company with our Corporate Promoters, Group Companies & Promoter Group entities, namely K.N.Resources Private Limited, Anant Counter Trade Private Limited, AnantTrafina Private Limited, K.N. InfraTech Private Limited, K.N.Solvent And Vanaspati Private Limited, Palak Exim Private Limited and Anant Infrastructure Private

Limited, but there is no sharing agreement between our Company and above mentioned companies nor there is any demarcation of the premises and facilities installed therein for use. Any multiple or overlapping use of the said facilities may create some disruption which may affect our business operation. If alternative premises are not available at the same or similar costs, size or locations, our business, financial condition and results of operations may be adversely affected.

23. Changes in technology may render our current technologies obsolete or require us to make substantial investments.

Modernization and technology up gradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed updated technology, we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology in the solvent extraction and refining business, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

24. Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors and inventories. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

25. We have experienced negative cash flows in the past.

We had negative net cash flow from operating activities of Rs. 334.44 lakhs for the F.Y. 2020-21, due to increase in Current Assets. Any negative cash flows in the future could adversely affect our Company's results of operations and financial condition. For further details on our cash flows, see Annexure IV - Restated Ind-As Consolidated Summary Statement of Cash Flow on page 52 of this Draft Red Herring Prospectus.

26. The average cost of acquisition of Equity Shares by our Promoters, is lower than the face value of Equity Share.

The average cost of acquisition of Equity Shares of our Promoters are lower than the face value of Equity Shares i.e. ₹ 10/-. For further details regarding the average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares of our Promoters in our Company, please see Chapter titled "Capital Structure" beginning on page 64 of this Draft Red Herring Prospectus.

27. We are exposed to risks associated with foreign exchange rate fluctuations.

Our revenue from exports for F.Y. 2020-21 and six months period ended September 30, 2021 has been Rs. 6577.95 lacs and Rs. 4169.30 lakhs respectively which constituted 5.06% and 7.02% of our revenue from operations for the respective period. Our global export footprint exposes us to foreign exchange rate risks, arising primarily from our receivables and export of goods. There can be no guarantee that such fluctuations will not affect our financial performance in the future as we continue to expand our operations globally, particularly in emerging markets where the risk of currency volatility is higher.

28. Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third party transport service providers and engage them on a needs basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

29. Delays or defaults in client payments could affect our operations.

We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. In addition, any delay or failure on our part to supply the required quantity or quality of products, within the time stipulated by our agreements, to our customers may in turn cause delay in payment or refusal of payment by the customer. Such defaults/delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

30. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.

We have obtained insurance coverage in respect of certain risks. Our significant insurance policies consist of, among others, burglary, standard fire and special perils, workmen's compensation, cash in transit, goods in transit and vehicle insurance in respect of certain of our premises and vehicles. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as product defect/liability risk, loss of profits, machinery breakdown, Directors & Officers Liability and losses due to terrorism. Our policy of covering these risks through insurance may not always be effective or adequate. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

31. Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.

Our business activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any labour problem in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock-outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

32. The Promoters (including Promoter Group) and Directors hold almost 100% of the Equity Shares of Our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.

Our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company or their relatives, dividend entitlement, or loans advanced by them to the Company, and benefits deriving from the directorship in our Company. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. For further information, please refer to the chapters/section titled "**Our Business**", "**Our Promoter and Promoter Group**" and "**Note 47 - Related Party Transactions**", beginning on pages 111, 151 and 200 respectively of this Draft Red Herring Prospectus.

33. We have incurred indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on September 30, 2021, our total outstanding indebtedness was ₹ 126.59 lakhs.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse affect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “Statement of Financial Indebtedness” on page 205 of this Draft Red Herring Prospectus.

34. Our Group Companies have incurred losses in past and some of them have negative networth, any operating losses in the future could adversely affect the results of operations and financial conditions of our group company.

The details of profit and loss of our Group Companies in the past years are as follows:-

Group Company	For the year ended on		
	March 31, 2020	March 31, 2019	March 31, 2018
K.N. Infratech Private Limited	(0.21)	(0.36)	(0.15)
Anant Infrastructure Private Limited	(0.21)	(0.19)	(0.16)

Group Company	March 31, 2021	March 31, 2020	March 31, 2019
Salahkar Distributors Private Limited	(0.13)	(0.26)	(0.33)

Further, Anant Infrastructure Private Limited and K.N.Solvent Vanaspati Private Limited have negative networth as per their latest audited financial statements. Any operating losses/negative networth could adversely affect the overall operations of the group and financial conditions and also divert the attention of the management and promoter towards the group company which could have an adverse affect on our operations and financials. For more information, regarding the Company, please refer chapter titled “Our Group Companies” beginning on page 237 of this Draft Red Herring Prospectus.

35. Loans availed by Our Company has been secured on personal guarantees of our Director. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees provided by our Directors.

Our Promoters & Directors, Mr. Vijay Shrishrimal, Sanjay Shrishrimal & Dharendra Shrishrimal has provided personal guarantee to secure a significant portion of our existing borrowings taken from the banks and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal/corporate guarantees provided by the aforesaid may be invoked which could negatively impact their reputation and net worth. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse affect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “Statement of Financial Indebtedness” on page 205 of this Draft Red Herring Prospectus.

36. Relevant copies of educational qualifications of some of our Directors are not traceable.

Relevant copies of the educational qualifications of some of our Directors namely Mr. Vijay Shrishrimal, Mr. Sanjay Shrishrimal, and Mr. Pradeep Totla are not traceable. In accordance with the disclosure requirements in respect of brief biographies of the Directors, we have relied on affidavits provided by such Directors for the purpose of disclosure in the section entitles “Our Management” on page 136 of this Draft Red Herring Prospectus.

37. Obsolescence, destruction, theft, breakdowns of our major plants or machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations

Obsolescence, destruction, theft or breakdowns of our major plants or machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all, particularly where our plants or machineries are not readily available from the market or require services from original machinery manufacturers. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be covered by the insurance policies availed by our Company and may have an affect our business, cash flows, financial condition and results of operations For further details of our Plant and Machineries, please refer to chapter titled “*Our Business*” beginning on page 111 of the Draft Red Herring Prospectus.

38. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be affective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

39. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement for funding working capital requirements, as detailed in the section titled “*Objects of the Issue*” is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 86 of this Draft Red Herring Prospectus.

40. We may not be able to sustain effective implementation of our business and growth strategy.

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse affect on our business, financial condition and results of operations.

41. We are subject to the restrictive covenants of banks in respect of the Loans/ Credit Limits and other banking facilities availed from them.

Our financing arrangements contain restrictive covenants whereby we are required to obtain approval from our lender, regarding, among other things such as major changes in share capital, management, changes in fixed assets, creation of any other charge, undertake any guarantee obligation etc. There can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see “Statement of Financial Indebtedness” on page 205 of the Draft Red Herring Prospectus.

42. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

Our Company is engaged in business of (a) solvent extraction & oil refining and (b) trading of various agro-commodities, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund and Employee State Insurance. Any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

43. Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.

Information relating to our production capacities and the historical capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our production capacity or historical estimated capacity utilization information for our existing facilities included in this Draft Red Herring Prospectus. For further information, see the section titled “**Our Business**” on page 111 of this Draft Red Herring Prospectus.

44. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “**Dividend Policy**” on page 160 of the Draft Red Herring Prospectus.

45. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above Rs. 10,000.00 Lacs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

46. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

Our promoters along with the promoter group will continue to hold collectively 73.66% of the Equity share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the affect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

47. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to

create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

48. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The issue price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "***Basis for Issue Price***" beginning on page 91 of the Draft Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

49. Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the issue within six Working Days from the issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS

50. The extent to which the Coronavirus disease (COVID-19) may affect our business and operations in the future is uncertain and cannot be predicted.

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing "stay-at-home" orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a "notified disaster" and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future. We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

51. Significant differences exist between Ind AS and other accounting principles, such as Indian GAAP, U.S. GAAP and IFRS, which investors may be more familiar with and may consider material to their assessment of our financial condition.

Our Restated Consolidated Financial Information for Fiscal 2019, 2020 and 2021, and six months period ended September 30, 2021 have been prepared and presented in conformity with Ind AS. Ind AS differs in certain significant respects from Indian GAAP, IFRS, U.S. GAAP and other accounting principles with which prospective investors may be familiar in other countries. If our Restated Consolidated Financial Information were to be prepared in accordance with such other accounting principles, our results of operations, cash flows and financial position may be different. Prospective investors should review the accounting policies applied in the preparation of our Restated Consolidated Financial Information, and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting standards on the financial disclosures presented in this Draft Red Herring Prospectus should be limited accordingly.

52. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse affect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse affects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

53. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "**Government and Other Approvals**" on page 231 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse affect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax ("**GST**") regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

54. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy.

Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

55. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

56. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupee proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

57. *If certain labour laws become applicable to us, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

58. *Our performance is linked to the stability of policies and the political situation in India.*

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

SECTION V – ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

Global Scenario:

Global economic growth is now expected to be 5.8% this year, a sharp upwards revision from the December 2020 Economic Outlook projection of 4.2% for 2021. The vaccines rollout in many of the advanced economies has been driving the improvement, as has the massive fiscal stimulus by the United States. World GDP growth is expected to be 4.4% next year but global income will still be some USD 3 trillion less by end 2022 than was expected before the crisis hit. USD 3 trillion is about the size of the entire French economy.

Differences in the strength of economic recovery across countries are being driven by the extent of government support to vulnerable workers and businesses, by a country's dependency on particular sectors such as tourism (Rebuilding tourism for the future), as well as by public health and vaccination policies. Trade is also playing a role. Consumers have been spending less on services and more on goods since the pandemic began. The pick-up in merchandise trade has benefitted countries heavily involved in supply chains, particularly pharmaceuticals, medical supplies and IT material.

Figure 1 World GDP

(Source: <https://www.oecd.org/economic-outlook/>)

Prospects for the world economy have brightened but this is no ordinary recovery. It is likely to remain uneven and dependent on the effectiveness of vaccination programmes and public health policies. Some countries are recovering much faster than others. Korea and the United States are reaching pre-pandemic per capita income levels after about 18 months. Much of Europe is expected to take nearly 3 years to recover. In Mexico and South Africa, it could take between 3 and 5 years.

(Source: <https://www.oecd.org/economic-outlook/>)

The global economy continues to rebound from the pandemic-induced recession in 2021, led by an increasing number of large economies. So far, consumer spending for goods has fueled much of the recovery in global economic growth.

Importantly, considerable monetary and fiscal policy supports enabled select economies to capitalize on the goods consumption-exports revival more than others.

Looking ahead a more balanced recovery that includes consumption of in-person services, capital investment, and greater exports from the rest-of-world instead of domination by high-tech and manufacturing hubs in Asia will replace the consumer demand driven rebound we have seen so far. This rotation is expected to produce global real GDP growth north of 5 percent year-on-year in 2021, and above-trend growth just below 4 percent year on year in 2022.

Real GDP growth for the US, Japan and the UK were revised down for 2021 whereas growth for the Euro Area was revised up, resulting in 5.1 percent growth for the mature economies in 2021. Growth performance among the emerging market economies in 2021 is somewhat more uneven with offsetting revisions including for China, Latin America, Russia and Southeast Europe (upward) and India, other developing Asian economies, and Middle East and North Africa (downward).

Global financial conditions have remained accommodative on the back of continued policy support via unprecedented swift interventions by Central banks. Despite subdued activity and a highly uncertain outlook, global equity markets have rebounded at a faster pace from the March lows, though with notable differentiation across countries, depending on the spread of the virus, the scope of policy support, and sectoral composition. Behind the broad rebound of risky assets, there are clear signs of differentiation across sectors. Some sectors (such as airlines, hotels, energy, and financials) have been more affected by the lockdown and social distancing, whereas those that are less contact-intensive (information technology, communications) have fared better. US dollar index has weakened by 7.4 per cent on year-to-date basis in comparison to most G-10 currencies with countries adopting various policies to alleviate downward pressure on their exchange rates.

The pandemic has exacerbated the risks associated with a decade-long wave of global debt accumulation. Sizeable discretionary support, along with a sharp contraction in output and an ensuing fall in revenues has led to a surge in government debt and deficits. Debt burdens have increased as corporates faced a period of sharply reduced sales and sovereigns have financed large stimulus packages. Debt levels have reached historic highs, making the global economy particularly vulnerable to financial market stress. General government debt in major economies rose during Q2 2020. Debt is likely to rise further as governments finance the recovery by facilitating the transition of capital, labor, skills, and innovation to a post-pandemic economic environment.

Global Scenarios 2035

Exploring Implications for the Future of Global Collaboration and the OECD

In the face of rapid change and high uncertainty, organizations must prepare for the unexpected. This report explores three scenarios – Multitrack World, Virtual Worlds, and Vulnerable World – and their possible implications for the future of global collaboration and for organizations such as the OECD. It includes emerging changes and trends that could affect the world in unpredictable ways over the next fifteen years, and offers potential strategic considerations and action areas aimed at ensuring the OECD’s agility, resilience and future-readiness. Prepared by the OECD’s Strategic Foresight Unit to commemorate the Organization’s 60th anniversary, the report is intended to stimulate dialogue among all those sharing an interest in preparing the OECD to meet the evolving needs of the global community in the face of a highly dynamic and uncertain future.

Monetary authorities across the world have eased monetary conditions with broad-based cuts in short-term policy rates and reserve requirements to support activity and provided emergency liquidity support to stabilize financial markets. Several central banks around the world engaged in unconventional monetary policy interventions in the form of long-term asset purchase programs (for the first time in many EMDEs), relending facilities, relaxation in asset provisioning requirements and supporting credit provision to a wide range of borrowers. The corresponding injections of reserve money into the banking system have been effective in stabilizing bond markets, reducing bond yields, boost equity prices without putting pressure on exchange rates.

The deep economic contractions across many countries and heightened uncertainties about the post pandemic global economic landscape, however, may set back long-term growth prospects

Indian Economy Overview

The Indian economy was negatively impacted by an unprecedented health crisis in 2020-21 with the highly contagious corona virus (Covid-19) spreading across the country. In response to the pandemic, Government has taken several proactive preventive and mitigating measures starting with progressive tightening of international travel, issue of advisories for the members of the public, setting up quarantine facilities, contact tracing of persons infected by the virus and various social distancing measures. Government imposed a strict 21 days nationwide lockdown from 25th March, 2020, under the Disaster Management Act, 2005, with subsequent extensions and relaxations, to contain the spread of Covid-19 while ramping up the health infrastructure in the country. The lockdown measures, imposed to contain the spread of Covid-19 pandemic in India, ubiquitously affected employment, business, trade, manufacturing, and services activities. The real Gross Domestic Product (GDP) growth is projected to contract by 7.7 percent in 2020-21 as compared to a growth of 4.2 percent in 2019-20. GDP growth, however, is expected to rebound strongly in 2021-22 owing to the reform measures undertaken by the Government.

The Government announced a special economic and comprehensive package under Atmanirbhar Bharat of ₹ 20 lakh crore - equivalent to 10 percent of India's GDP – to fight the Covid-19 pandemic in India. Several structural reforms announced as part of the package, inter alia, include deregulation of the agricultural sector, change in definition of MSMEs, new PSU policy, commercialization of coal mining, higher FDI limits in defence and space sector, development of Industrial Land/ Land Bank and Industrial Information System, Production Linked Incentive Schemes, revamp of Viability Gap Funding scheme for social infrastructure, new power tariff policy and incentivizing States to undertake sector reforms. Apart from this, various steps were taken to boost consumption which, inter alia, includes cash payment in lieu of the Leave Travel Concessions (LTC) scheme, One-time special Festival advance of ₹ 10,000 (interest-free) for central Government employees. Other steps such as Interest-free 50- year loan to states, additional capital expenditure budget for the central Government, launch of Emergency Credit Line Guarantee Scheme (ECLGS) 2.0, ₹ 1.46 lakh crore boost for manufacturing through Production-linked incentives for ten Champion Sectors, ₹ 18,000 crores additional outlay for PM Awaas Yojana (PMAY) – Urban, Equity infusion in National Investment and Infrastructure Fund (NIIF) Debt Platform, Demand booster for Residential Real Estate Income Tax relief for Developers & Home Buyers, Boost for Project Exports, Capital and Industrial Stimulus has been initiated to support economic growth

Economic Outlook

As per the first Advance Estimates of annual national income released by the National Statistical Office (NSO), Real GDP is estimated to contract by 7.7 percent in 2020-21, as compared to a growth of 4.2 percent in 2019-20. This contraction in GDP growth is mainly attributed to the contraction in industry and services sector. The growth of Gross Value Added (GVA) at constant (2011-12) basic prices is estimated to contract by 7.2 percent in 2020-21, as compared to a growth of 3.9 percent achieved in 2019-20. Positive growth in real GVA in agriculture & allied sectors at 3.4 percent in 2020-21 against 4.0 percent in PE of 2019-20 indicates resilience of rural economic activity to the Covid-19 pandemic. From the demand side, private consumption expenditure is estimated to contract at 9.5 percent in 2020-21 as against a growth of 5.3 percent in 2019-20 and fixed investment is estimated to decline by 14.5 percent in 2020-21 as against 2.8 percent in 2019-20. Government consumption final expenditure is estimated to grow at 5.8 percent in 2020-21 as against 11.8 percent in 2019-20. Exports and imports of goods and services are estimated to contract at 8.3 percent and 20.5 percent (at constant prices) respectively in 2020-21.

Against the backdrop of the collapse in world trade, India's merchandise exports and imports contracted by 7.3 per cent and 18.0 per cent, respectively, during 2020-21. A fall in prices, combined with a decline in volume by 3.5 per cent, pulled down exports. The stringent measures, which were imposed domestically to curb the spread of the pandemic disrupted export supply chains, especially in Q1:2020-21. Only pharmaceuticals, agricultural products and iron ore could withstand the onslaught of the pandemic. A revival gained strength in Q3, on the back of growth in non-oil exports (3.1 per cent).

Food Processing Sector in India: Overview

India's food processing sector is one of the largest in the world and its output is expected to reach \$535 bn by 2025-26. The Food Processing sector in India has a quintessential role in linking Indian farmers to consumers in the domestic and international markets. The Ministry of Food Processing Industries (MoFPI) is making all efforts to encourage investments across the value chain. The food processing industry engages approximately 1.93 mn people in around 39,748 registered units with fixed capital of \$32.75 bn and aggregate output of around \$158.69 bn. Major sectors constituting the food processing industry in India are grains, sugar, edible oils, beverages, and dairy products.

Under PMKSY, 41 Mega Food Parks, 353 Cold Chain projects, 63 Agro-Processing Clusters, 292 Food Processing Units, 63 Creation of Backward & Forward Linkages Projects & 6 Operation Green projects across the country have been approved. (Source: <https://www.investindia.gov.in/sector/food-processing>)

Food processing sector is one of the largest sectors in India in terms of production, growth, consumption, and export. India's food processing sector covers fruit and vegetables; spices; meat and poultry; milk and milk products, alcoholic beverages, fisheries, plantation, grain processing and other consumer product groups like confectionery, chocolates and cocoa products soya-based products, mineral water, high protein foods etc. Since liberalization in Aug'91 proposals for projects o, f have been proposed in various segments of the food and agro-processing industry. Besides this, Govt. has also approved proposals for joint ventures; foreign collaboration, industrial licenses and 100% export oriented units envisaging an investment. Out of this, foreign investment is over Rs. 10,000 crores.

The Indian food processing industry is primarily export orient. India's geographical situation gives it the unique advantage of connectivity to Europe, the Middle East, Japan, Singapore, Thailand, Malaysia and Korea. One such example indicating India's location advantage is the value of trade in agriculture and processed food between India and Gulf region.

Retail, one of the largest sectors in the global economy (USD 7 Trillion), is going through a transition phase in India. One of the prime factors for non-competitiveness of the food processing industry is because of the cost and quality of marketing channels. Globally more than 72% of food sales occur through super stores. India presents a huge opportunity and is all set for a big retail revolution. India is the least saturated of global markets with a small organized retail and also the least competitive of all global markets.

India offers the largest diversified production base and has a growing food industry. India is

- World's largest milk-producing nation
- World's largest producer, consumer and exporter of spices
- World's second-largest producer of food grains, fruits and vegetables.
- India is a Second-largest producers of Wheat

The total geographical area of India is 328.7 mn ha and the Gross Cropped Area is 198.4 mn ha with a cropping intensity of 142%. The export of essential commodities has registered substantial growth, with the export of non-basmati rice increasing by 105.20%, sugar by 60.75%, wheat by 356.86%, vegetable oils by 216.11%, pulses by 27.33% and other cereals by

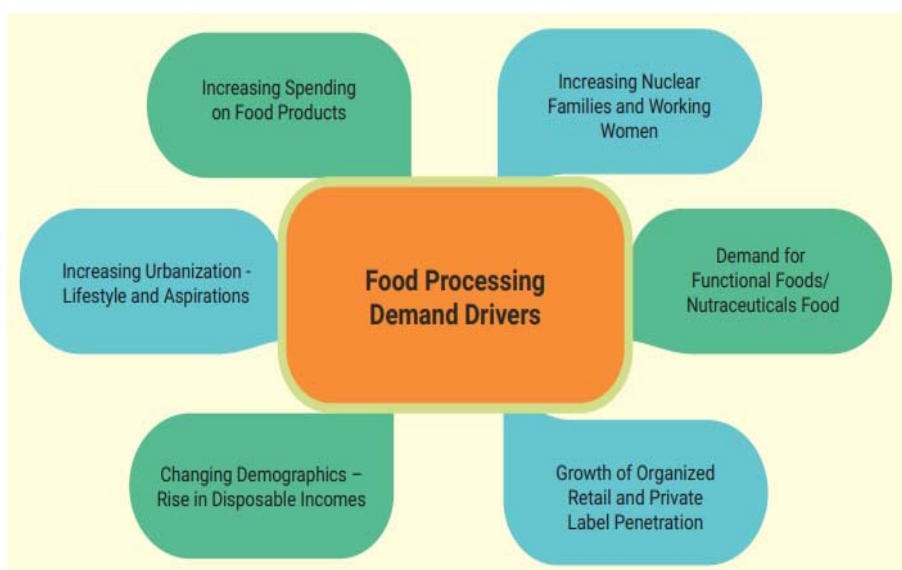

154.68% during the period from April to November 2020 as compared to the corresponding period of the previous year. The Ministry of Food Processing Industries, Government of India has notified 253 designated food parks in different states for the purpose of availing affordable credit from a special fund with NABARD. A well-developed food processing sector with higher level of processing helps in the reduction of wastage, improves value addition, promotes crop diversification, ensures better return to the farmers, promotes employment as well as increases export earnings. This sector is also capable of addressing critical issues of food security, food inflation and providing wholesome, nutritious food to the masses.

Over the years agricultural production in India has consistently recorded higher output. India ranks third in the world in the production of Milk, Ghee, Pulses, Ginger, Banana, Guava, Papaya and Mango. Further, India ranks second in the world in the production of Rice, Wheat and many other fruits & vegetables. An abundant supply of raw materials, increase in demand for food products and incentives offered by the Government has impacted food processing sector positively. During the last 5 years ending 2018-19, Food Processing sector has been growing at an Average Annual Growth Rate (AAGR) of around 10.00% as compared to around 3.11% in Agriculture at 2011-12 Prices. Food Processing Sector has also emerged as an important segment of the Indian economy in terms of its contribution to GDP, employment and investment. The sector constituted as much as 8.98% GVA in Manufacturing 2018-19 at 2011-12 prices.

It is seen that food products industry, compared to other industries, has the largest number of factories and engages largest number of persons as well. Since the food products industry does not figure in top five with respect to fixed capital, it shows that this sector is highly labour intensive per unit of capital deployed. Despite low capital intensity, the output of food products is not compromised as it is the largest among all industries. Thus, every unit of capital invested in food products industry employs largest number of persons as compared to other industries while generating the highest output level as in other industries. Food Processing Industry is one of the major employment intensive segments constituting 12.38% (at 3-digit of NIC classification) of employment generated in all Registered Factory sector in 2017-18. According to the latest Annual Survey of Industries (ASI) for 2017-18, the total number of persons engaged in registered Food Processing Sector was 19.33 lakhs. Unregistered Food Processing Sector supports employment to 51.11 lakh worker as per the NSSO 73 Round, 2015-16 and constitutes 14.18% of employment in the unregistered manufacturing sector.

Food Processing Sector–Growth Potential:

(i) The above illustration indicates the various factors which are likely to increase the demand for processed food in coming years. Programmes to increase the output of Indian agriculture without corresponding investments in processing facilities are likely to lead to a mismatch resulting in rural distress and decline in farmers' income. The most important step for improving

the bargaining capacity of the farmer is to add value to his produce. This will come about if farmers are able to produce according to the requirements and standards demanded by the market. Food processors and retailers can provide the necessary demand for the agricultural produce and facilitate the flow of market information, technology and inputs to the farmer so that they can tailor their output to the needs of the market. In the process the farmers will be able to raise their own level of income and employment. The consumer is also likely to benefit as there will be an increase in the supply of food products with a longer shelf life.

(ii) It is essential to build sustainable supply chains, which will link the farmer to the processing and marketing enters seamlessly. In the absence of on-farm cooling and grading arrangements and slow development of cold chain infrastructure, the farmer is compelled to sell his produce to the 'Adathiya (Broker)' without waiting for a better price. If the farmer is enabled to grade and store his produce closet of farm, the farmer will be empowered to demand and obtain a better price from the processors and also add value to his produce.

Considerable investments are required in rural infrastructure and components of the supply chain by way of grading and packing centers, controlled atmosphere storage facilities, reefer vans, testing laboratories, etc., which may not come from private sources at this stage of the development of the food processing industry. It is therefore essential that public investment is significantly increased to fund these components of rural infrastructure to enable private enterprise to take up the remaining, commercially viable components of the supply chain. This is borne out by the experience of developed countries where the state has stepped into build rural infrastructure in a big way. Carefully calibrated subsidies, innovative strategies, empowering rural producers & consumers through better awareness and support to entrepreneurs in terms of technology and training are some of the ways in which this Ministry has catalyzed growth in this sector.

GOVERNMENT INITIATIVES:

Infrastructure: To address small size of enterprises involved in food processing, the Government promotes a cluster approach which brings together farmers and entrepreneurs through well-equipped supply chains and aims at development of modern infrastructure and common facilities to set up food processing units. Under the scheme, each agro-processing cluster will have two basic components, i.e., Basic Enabling Infrastructure (roads, water supply, power supply, drainage, effluent treatment plan, etc.), and Core Infrastructure/ Common facilities (warehouses, cold storages, individual quick freezing, tetra pack, sorting, grading, etc.) and at least 5 food processing units with a minimum investment of `25 crore (Government of India, 2017). Implementation of Mega Food Parks (MFP) scheme in 2008, Modern Terminal Markets (MTM) and bulk storage facilities as well as modernisation of markets, quality control laboratories are some of the efforts in this regard.

Further, financial support and fiscal incentives are given for creation of common supply chain infrastructure, like cold chain, dry storage, packaging, logistics, back and front-end infrastructure, expansion of processing capacities, etc. to reduce cost of investment, enhance viability and ensure higher conformity to regulatory standards. Under project imports, all goods relating to food processing are charged a uniform customs duty of 5 per cent irrespective of their tariff classification.

Standardisation of Food Safety Norms: Due to legacy issues and infrastructural challenges, the Indian states have different levels of implementation of food quality standards and procedures. Over time, awareness about food quality and safety standards have increased due to the growing middle-class population, globalisation and health awareness, etc. For uniform implementation of food quality standards, Food Safety and Standards Authority of India (FSSAI) launched “One Nation, One Food Law” initiative.

Availability of credit: To boost credit disbursement at affordable rates to the food processing sector, a special fund of Rs. 2000 crore has been set up in National Bank for Agriculture and Rural Development (NABARD). Under this, loans are extended up to 95 per cent of the project cost for setting up, modernisation and expansion of food processing units and development of infrastructure in designated food parks.

Human Resource and Skill Development: The Government has taken up the initiative to develop sector specific skills of the workers with support from the National Institute of Food Technology, Entrepreneurship and Management (NIFTEM) and the Indian Institute of Food Processing Technology (IIFPT). In 2017, merging seven major schemes under one umbrella

scheme, i.e., the Pradhan Mantri Kisaan Sampada Yojana, has been implemented. This is expected to boost efficiency of infrastructure investment as well as of farmers.

“Make In India” Programme:

(i) Food processing sector has been identified as one of the priority sectors under “MAKE IN INDIA”, an initiative of Hon'ble Prime Minister of India. With a view to attract investment to this sector, Ministry of Food Processing Industry has been implementing schemes for development of infrastructure for promoting food processing industries. Mega Food Parks with common utility/ facility like roads, electricity, water supply, sewage facility and common processing facility like pulping, packaging, cold storage, dry storage and logistics are being promoted in areas with strong agricultural resource base. These parks provide fully developed plots and factory sheds to entrepreneurs on long term lease basis where they can set up food processing units in “plug and play model”.

(ii) Government has also declared investment in Food Parks covered under the Harmonized List of Infrastructure Sub-sectors(HLIS) vide Government of India Notification dated th 13 October, 2014. Following this notification, it is expected that Mega Food Parks assisted by the Ministry will be able to access to infrastructure lending on easier terms.

Intiatives under Aatm Nirbhar Bharat Abhiyan:

In pursuance to Hon'ble Finance Minister's announcement as a part of Aatm Nirbhar Bharat Abhiyan, MoFPI has extended the short term price stabilization measures of Operation Greens from “TOP to TOTAL” for providing 50% subsidy for transportation and storage from surplus production area to consumption centres, which was approved on 10.06.2020. The objective of interventions is to protect the growers of fruits and vegetables from making distress sale and reduce the post-harvest losses. The following steps have been taken under the scheme:

(i) Scheme guidelines were notified and uploaded in the Ministry's website on 11.06.2020 further amended on 24.07.2020, 12.10.2020, 02.11.2020, 17.12.2020 & 22.12.2020, which includes 41 nos. of fruits and vegetables from 2,252 no. of identified clusters based on the input received from Ministry of Agriculture and concerned State Govt. Based on the recommendations of SFC held on 08.12.2020, the timeline of scheme has been further extended upto 31.03.2021.

(ii) The list of eligible crops, surplus production clusters & trigger price is available on Ministry's website.

(iii) The Ministry has developed an online portal for settlement of claims under the scheme. Applicants have to register on the portal before carrying out transportation/ storage of fruits and vegetables. Around 3,375 applicants have registered from 30 States/UT on the portal till 12th Jan 2021.

(iv) Transportation subsidy under the scheme was extended to Kisan Rail Scheme w.e.f. 12.10.2020. Indian Railway is providing the transport subsidy directly to applicants by way of charging 50% of their freight charges from them for transportation of any quantity of notified F&V through Kisan Rail Scheme and will adjust remaining 50% of freight from deposit made by MoFPI with them. Total amount of ₹10 crore was sanctioned so far to Indian Railway (South Central Railway) on 23.10.2020 as advance towards freight subsidy to be provided. Recently, Ministry allowed transport subsidy on any F&V through any rail service provided by Indian Railways.

(v) Scheme guidelines amended to provide the transportation subsidy to all the notified F&V being transported by air from the NER and Himalayan Region States. Airlines would charge 50% freight for all the fruits and vegetables booked from these airports on the same lines as Kisan Rail.

(vi) Scheme Guidelines further amended to provide 50% subsidy to eligible entities through NAFED for transportation and/or storage of apple from Jammu and Kashmir. Total Amount of Rs. 10 Cr was sanctioned so far as advance to NAFED for this.

(vii) Total 53 online subsidy claims have been received for Onion, Carrot, and banana. Out of these, 12 claims have been sanctioned for ₹94.14 Lakh for transportation of 5,268 MT of Onion and 545 MT of Banana and storage of 1,225 MT of Carrot as on 31.12.2020

VEGETABLE OILS:

India's vegetable oil economy is the 4th-largest after the US, China and Brazil. India consumes 25.9 MMT of Oil, of which ~60% comes from imports. Vegetable Oil is the top agricultural import item for India accounting for USD 10 bn. Of this basket, 55% is accounted for by Palm Oil. With increasing population and per capita consumption of vegetable oils in the country, the import bill is expected to reach USD 22 bn by 2030 if it continues to grow at the current rate of 7-8%.

India produces 10.5 MMT of vegetable oils – primarily from 9 oilseed crops (7 MMT). These oilseeds are largely grown under rain-fed condition (>85%) over an area of about 24.5 mn. ha. Amongst these, rapeseed & mustard (42%), soybean (32%), groundnut (22%) contribute to more than 90% of the total oil production. In addition, 3.5 MMT of oil comes from perennial crops like oil palm, coconut and secondary sources such as rice bran and cottonseed. Oil palm is the highest oil yielding crop (3-4 MT/ha) and has a potential area of 1.93 mn. ha in India of which only ~0.35 mn. ha has been covered (mostly in Andhra Pradesh).

India's per annum vegetable oil consumption in 2018- 19 is 25.9 Mn MT. Domestic production is 10.5 Mn MT and imports are 15.4 Mn MT. ~80% of Indian oil production is from primary sources (oilseeds (70%), and Tree Borne Oils - TBOs (10%)) and ~20% from secondary sources (Cottonseed and Rice Bran).

In India, oilseeds are cultivated over 26.67 million Ha producing 30.06 million tonnes of oilseeds translating to 7 Mn MT of oil annually. 95% of Indian oilseeds production is from 3 crops – Soyabean, Mustard & Groundnut and 10 states only India is among the top 5 largest oilseed crop producing countries in the world, and is also one of the largest importers of vegetable oils today. Bulk of India's imports in 2018-19 included- palm oil (~10 Mn MT) Soybean Oil (~2.9 Mn MT) and Sunflower oil (~2.4 Mn MT). Due to lower production, India imports almost 60 per cent of its requirement (2016-17: imports costed Rs. 73,048 crore but also earned about Rs. 29,000 crores foreign exchange through export of oilseed and allied products like De-Oiled cakes, oil meals, etc).

India is one of the major growers of oilseeds. Its vegetable oil economy is the fourth-largest after the US, China and Brazil. Yet, India relies on imports to meet over 70 per cent of its vegetable oil requirements; almost 60 per cent of the requirement is met through palm oil. India imports 5.5 \$B of the total 29.1 \$B Oil Palm exported globally. The Oil Palm scenario thus presents an opportunity to boost trade surplus for India.

India’s Vegetable Oil Portfolio

- Mustard oil is the largest produced in India followed by Soybean, & Groundnut among primary oils
- The above 3 oils accounted for 60% of total oil production on over 80% of the cultivated land for vegetable oils
- India also produces oil from secondary sources like rice bran and cottonseed – which account for another 20% of total oil production in the country

INDIA’S SOYBEAN CULTIVATION:

Soybean is the largest oilseed in India by Area under cultivation and production, and 5th most in the world. India’s soybean cultivation is concentrated in 3 states – namely MP, MH & RJ covering ~92% of the total soy bean area. The area under soybean cultivation is on a decreasing trend (from 147 lakh MT to 86 lakh MT) between 2012-16 – owing to erratic rainfall, higher biotic stresses, lower price realization and shift to competing crops. Indian Soy bean productivity is decreasing over the years and comparatively lower wrt world average. India is the largest importer for Soybean oil and the imports increased during 2013-16 to compensate for lower production. Indian De-oiled Soy cake has very high demand abroad, and fetches better value realization.

EDIBLE OIL SCENARIO:

Oilseeds and edible oils are two of the most sensitive essential commodities. India is one of the largest producer of oilseeds in the world and this sector occupies an important position in the agricultural economy, accounting for the estimated production of 36.56 million tons of nine cultivated oilseeds during the year 2020-21(November-October) as per 3rd Advance Estimates released by the Ministry of Agriculture on 25.05.2021.

Types of Oils commonly in use in India:

India is fortunate in having a wide range of oilseeds crops grown in its different agro climatic zones. Groundnut, mustard, rapeseed, sesame, safflower, linseed, nigerseed, castor are the major traditionally cultivated oilseeds. Soyabean and sunflower have also assumed importance in recent years. Coconut is most important amongst the plantation crops. Efforts are being made to grow oil palm in Andhra Pradesh, Karnataka, Tamil Nadu and North- Eastern parts of the country in addition to Kerala and Andaman & Nicobar Islands. Among the non-conventional oils, rice bran oil and cottonseed oil are the most important. In addition, oilseeds of tree and forest origin, which grow mostly in tribal inhabited areas, are also a significant source of oils. Figures pertaining to estimated production of major cultivated oilseeds, availability of edible oils from all domestic sources (from Domestic and Import Sources) during the last ten years and current year are as under:

(Quantity in lakh Tons)

Oil Year (Nov.- Oct.)	Production of Oilseeds*	Net availability of edible oils from all domestic sources	Imports**	Total Availability of Edible Oils

Consumption Pattern of Edible Oils in India:

Modern technological means such as physical refining, bleaching and de-odorization, all oils have been rendered practically colorless, odorless and tasteless and therefore, have become easily interchangeable in the kitchen. Oils such as soyabean oil, cottonseed oil, sunflower oil, rice bran oil, palm oil and its liquid fraction- palmolein which were earlier not known have now entered the kitchen. The share of raw oil, refined oil and vanaspati in the total edible oil market is estimated roughly at 35%, 60% and 5% respectively. About 56 % of domestic demand of edible oils is met through imports out of which palm oil/palmolein constitutes about 54%. The consumption of refined palmolein (RBD palmolein) as well as its blending with other oils has increased substantially over the years and is used extensively in hotels, restaurants and in preparation of wide varieties of food products.

Export Import Policy on Edible Oils:

The country has to rely on imports to meet the gap between demand and supply. Import of edible oils is under Open General License (OGL). In order to harmonize the interests of farmers, processors and consumers, Government reviews the duty structure of edible oils from time to time. With effect from 14.06.2018, the import duty on all crude and refined edible oils, except Palm oil and Olive oil was raised to 35% and 45% respectively while the import duty on Olive oil was increased to 40%. With effect from 01.01.2020, the import duty on Crude and Refined Palm Oil was revised to 37.5% and 45% respectively. With effect from 08.01.2020, import policy of Refined Palm Oil is amended from 'free' to 'Restricted' category. With effect from 27.11.2020, the import duty on crude palm oil was revised from 37.5% to 27.5%.

As per Union Budget 2021-22, the basic custom duty on Crude Palm Oil has been reduced from 27.5% to 15% and that on Crude Soyabean Oil and Crude Sunflower Oil from 35 % to 15 %. An agri-cess of 17.5 % has been imposed on Crude Palm Oil and 20 % on both Crude Soyabean and Crude Sunflower Oil. With this, the effective rate of duty on Crude Palm Oil has increased from 30.25% to 35.75%. In case of Crude Soyabean and Crude Sunflower Oil, the effective rate of duty remains the same i.e. 38.5%.

In order to ensure availability of edible oil in the country, export of edible oil has been banned w.e.f. 17.03.2008, which was extended from time to time. With effect from 06.02.2015, export of ricebran oil in bulk has been permitted. With effect from 27.03.2017, export of groundnut oil, sesame oil, soyabean oil and maize (corn) oil has been permitted. With effect from 06.04.2018, export of all edible oils except mustard oil was made free without quantitative ceiling; pack size etc, till further orders. Export of mustard oil is permitted in packs of up to 5 Kg with a Minimum Export Price (MEP) of USD 900 per MT.

MANUFACTURING PROCESS:

A description of the manufacturing process followed by the Company is discussed hereunder:

SEED PROCESSING AND SOLVENT EXTRACTION:

- i. Receiving and Storage of Soyabean seeds** - Soyabean seeds are received at the factory in bulk quantities. They are weighed, unloaded, cleaned and sent to the main storage silos. As Soyabean seeds are purchased by grade, we draw representative samples for quality evaluation from each lot at the point of reception. The samples are analyzed for moisture, foreign materials, colour, broken beans etc. in order to determine the compliance of the lot with the specified quality and grade criteria. It is important to maintain good sanitary conditions on and around the receiving areas especially to protect the seeds from contact with moisture.
- ii. Preparation of raw material for extraction** - This stage comprises of cleaning of seeds to remove impurities like stones, broken seeds, foreign material, husks etc. through cleaning machines i.e. vibrator screen, grader, de-stoner, blower and magnetic separators. After cleaning of seeds, dehulling takes place in dehuller machine. After dehulling, seeds are cracked into smaller particles (approx 3 mm size) and are then converted into flakes after treating them in open steam.
- iii. Extraction of Oil** – The extraction of oil from soyabean flakes/seeds is done by solid-liquid extraction process. The solvent extractor consists of a slow moving conveyor in a closed chamber. After expanded materials/flakes are received from preparatory section, they are moved slowly in conveyor forming a bed, which is continuously washed with miscella (oil solvent solution) and then finally washed with fresh solvent. The miscella passes through the meal bed and collects in various hopper kept below the bed. Flash Desolventisation System (FDS) is also used for removing solvent from solvent de oiled flakes with inflicting minimum damage to the material. The de oiled solvent containing flake, going into existing desolventiser toaster are diverted to the FDS system via a special plug conveyer.
- iv. Desolventisation of extracted material (meal)** – The extracted meal is fed further to Desolventiser Toaster to evaporate hexane which is condensed in condensers. Output of the Toaster section at bottom is De Oil Cake. The recovered hexane is reused in the process. The desolventized extracted material (De oiled cake meal) is then cooled and collected into the bags.
- v. Solvent Recovery** – Condensers, which are of floating head type, condense the vapour received from the distillation chamber. The condensed liquid, which is a mixture of hexane and water is fed to a solvent water separator where Solvent (Hexane) is separated from water. The uncondensed gases from the condensers are contacted with coolers and are fed to absorbers where residual solvent vapour is absorbed in absorbing oil and non-condensable gases are released into the atmosphere.
- vi. Meal finish and Bagging** – The deoiledmeal (DOC) from the extraction plant is cooled to temperature of 45°C and is then sent for bagging.

REFINING PROCESS:-

Refining is a process where impurities from the oil are removed. Oil has two types of impurities (a) oil soluble as colouring matter, odiferous compound, free fatty acid, gummy materials etc. (b) other type of impurities are oil insoluble such as sand, seed fragment, dust, straw etc.

Following method is used for refining of raw oil:-

Degumming - De-gumming is the process of removal of phosphatides and other limy or mucilaginous material. The process consists of hydrating the gums by subsequent removal by centrifugal separation. The oil so obtained is then sent for neutralization.

Alkali Neutralization – Preheated/treated oil is sent to a continuous neutralizing mixer where caustic treatment is given to remove free fatty acids. The caustic forms soap by reacting with free fatty acids. The mixture is sent to a centrifugal separator where the gums and soap stock are separated from oil. The oil is mixed with water to dilute the traces of soap left in the oil, and is sent for further separation, to remove the soapy water. Finally the oil is passed through a vacuum drier

Bleaching -The oil, after initial purification, is bleached by contact with activated earth and charcoal to improve the colour of the oil to acceptable levels. The process also removes any soap traces left in the oil after water washing any other metallic compounds present in the oil. The process consists of mixing the oil with adequate quantities of bleaching earth, heating it for a specified time temperature cycle followed by removal of bleaching earth from the oil by a filtration process.

Deodorizing: The bleached oil still needs deodorizing to remove impurities, which impart objectionable odours or flavors to the oil. The oil is subjected to high temperature (aprox. 250°) and high vacuum conditions (about 2mm). The oil is cooled, mixed with antioxidants and then filtered. The filtered refined oil, so produced, is then sent for storage and packaging.

WHEAT FLOUR MILLING PROCESS

Wheat is first cleaned by automated chaffs for removing dust, sand, husks, plant materials etc. Once the wheat is cleaned the next stage of the process is conditioning, wherein a fixed amount of water is added to the wheat in water tank and then dried, which allows the subsequent milling process to take place more effectively. Once the conditioned wheat is ready for milling, it is then transformed into flour through a series of grinding and sieving operations. The wheat itself is fed progressively into the mill and there are a series of rolls which grind the wheat down to smaller particle sizes, resulting in production of flour, semolina and refined wheat flour. The products so produced are then sent for storage and packaging.

The Associate Company, Raipur Mega Food Park Private Limited, has not reported any profit/loss during the restatement period, so accordingly, no share of profit/loss has been considered in the consolidated financials.

2.1.3 Summary of significant accounting policies

- i. The restated financial statements are prepared on the accrual basis of accounting under the historical cost convention, on a going concern basis, in accordance with provisions of the Companies Act, 2013 and Indian Accounting Standards ("Ind AS") notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act, to the extent applicable. These Accounting Policies have been consistently applied by the Company and are consistent with those used in the previous year. The

preparation of financial statements requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) as on the date of the financial statements and the reported income and expenses during the reporting period. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ from these estimates.

ii. Accounting for investment in associates:

As the company holds 45% stake in Raipur Mega Food Park Private Limited, due to associate relationship, the company prepares its Consolidated Financial Statements in accordance with IND AS-28 with its associate by taking the impact of annual profit or loss of its associate.

iii. Impairment of assets:

Impairment loss is provided to the extent the carrying amount of assets exceeds their recoverable amounts. Recoverable amount is the higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of the asset and from its disposal at the end of its useful life. Net selling price is the amount obtainable from sale of the asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, then such loss is reversed and the asset is restated to the extent of the carrying value of the asset that would have been determined (net of amortization/depreciation), had no impairment loss been recognized.

iv. Going Concern Concept - The financial statements of the company have been prepared on the premise that its business will continue indefinitely.

v. Use of estimates- The preparation of the financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of income and expense for the periods presented. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and future periods are affected.

vi. Inventory valuation:

- a. **Raw Material:** - Raw Material is stated at cost. In determining the cost of Raw Materials the FIFO Method is used.
- b. **Finished Goods:** - Finished goods are stated at the lower of cost and realizable value. Cost of manufactured finished goods includes material cost Labour & factory overheads on the basis full absorption costing.
- c. **Stores, Spares And Others:** - Stores & Spares and others have been valued at cost.

vii. Revenue Recognition - Revenue is recognised to the extent that it is probable that economic benefit will flow to the Company and that the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated rebates and other similar allowances.

viii. Interest Income - Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

ix. Employee Benefits- Employee benefits include salaries, wages, contribution to provident fund, gratuity, leave encashment towards un-availed leave, compensated absences, post-retirement medical benefits and other terminal benefits.

x. Foreign currency transaction:

1. Transactions made during the year in Foreign Currency are recorded at the exchange rate prevailing at the date of transaction on settlement of transaction. The realized gains and losses on foreign exchange transactions are recognized in the Profit and Loss Account.
2. Monetary assets and liabilities related to foreign currency transactions remaining unsettled at the end of year are translated at the year-end rate. The resultant exchange rate differences are recognized in the profit and loss account.
3. In case of forward contracts, the difference between the forward rate and the exchange rate at the date of transaction is recognized as income or expense over the contract period. The premium or discount arising at inception of the forward contracts on the Foreign Exchange Currency not intended for trading or speculation purpose is amortized as expense or income over the life of contract.

xi. Borrowing Costs

Borrowing costs attributable to the Tangible Assets during their construction/ renovation and modernization are capitalized. Such borrowing costs are apportioned on the average balance of capital work-in-progress for the year. All other borrowing costs are recognized as an expense in the period in which they are incurred.

xii. Taxation - Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax:

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the Statement of Profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible.

Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income- tax Act, 1961 enacted in India.

Deferred tax:

- Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Financial Statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.
- The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.
- Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.
- Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognized in correlation to the underlying transaction either in Other Comprehensive Income or directly in equity.
- Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax asset and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

xiii. Property plant and equipment

- Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes purchase price and any directly attributable cost of bringing the asset to its working condition for its intended use and for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy. Depreciation commences when the assets are ready for their intended use.
- Freehold land and Assets held for sale are not depreciated.

- Depreciation is recognised so as to write off the cost of assets (other than freehold land) less their residual values over their useful lives, using the written down value (WDV) method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. Depreciation on assets are provided on written down value (WDV) method on the gross block at the rates specified in the Schedule II to the Companies Act, 2013. Depreciation on additions/deductions to fixed assets is being provided on pro-rata basis from/to the month of acquisition/disposal. Full cost of all small and low value items each costing Rs.5000/- or less under all class of assets is fully charged to revenue in the year in which the assets are put to use. No part of the cost of such items is included in the cost of fixed assets and accordingly no depreciation is charged thereon.
- An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Type of Assets	Useful Life (in Years)
Land – Freehold	-
Buildings	30
Electrical Installations and Equipments	40
Plant and Machinery	15/22
Furniture & Fixtures	10
Office Equipments	5
Motor Vehicles	8
Computers and Data Processing Units	3

xiv. Intangible Assets

Intangible assets with finite useful lives that are acquired separately are carried at cost less Accumulated amortisation and accumulated impairment losses. Amortisation is recognized on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation methods are reviewed at the end of each reporting year, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with Indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

xv. Pre - paid expenses:

Expenses pertaining to the subsequent period are accounted as “Pre Paid Expenses”.

xvi. Financial Instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in statement of profit and loss.

xvii. Financial Assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

xviii. Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

xix. Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition, the Company makes an irrevocable election on an instrument-by-instrument basis to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments, other than equity investment which are held for trading. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments.

xx. Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Other financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in profit or loss.

xxi. Cash and cash equivalents

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and shorttermdeposits with an original maturity of three months or less, which are subject to insignificantrisk of changes in value.

xxii. Cash Flow Statement

xxiii. Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by a Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a Company entity are recognised at the proceeds received, net of direct issue costs. Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in statement of profit and loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

xxiv. Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method.

xxv. Earnings per equity share

Basic earnings per equity share are computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity

share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods.

xxvi. Critical accounting estimates and judgments

In the application of the Company's accounting policies, the directors of the Company are required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods. Detailed information about each of these estimates and judgments is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

The areas involving critical estimates are:

- Estimation of current tax and deferred tax expense
- Estimation of values of contingent liabilities

Estimates and judgment are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

Note 37. First time adoption of Ind AS

Transition to Ind AS

The accounting policies set out in Annexure V have been applied in preparing the Restated Financial statements for the period ended 30th September, 2021 and years ended March 31, 2021, 2020 and 2019. The Group has followed the same accounting policy choices (both mandatory exceptions and optional exemptions availed as per Ind AS 101) as initially adopted on transition date i.e. April 1, 2018 while preparing Restated Financial Information for the year ended March 31, 2019. Accordingly, suitable restatement adjustments are made in the financial statements as of and for the period ended 30th September, 2021 and years ended March 31, 2021, March 31, 2020 and March 31, 2019. An explanation of how the transition from Indian GAAP to Ind AS has affected the Group's Restated Financial Information is set out in the following tables and notes.

A. Ind AS optional exemptions availed

1. Property, plant and equipment & Intangible assets

- i. Measure an item of property, plant and equipment at the date of transition at its fair value and use that fair value as its deemed cost at that date.
- ii. Use a previous GAAP revaluation of an item of property, plant and equipment at or before the date of transition as deemed cost at the date of the revaluation, provided there valuation was, at the date of there valuation, broadly comparable to: – fair value; – or cost or depreciated cost under Ind AS adjusted to reflect, for example, changes in a general or specific price index.
The elections under (i) and (ii) above are also available for intangible assets that meets the recognition criteria in Ind AS 38, Intangible Assets, (including reliable measurement of original cost); and criteria in Ind AS 38 for revaluation (including the existence of an active market).
- iii. use carrying values of property, plant and equipment, intangible assets and investment properties as on the date of transition to Ind AS (which are measured in accordance with previous GAAP and after making adjustments relating to decommissioning liabilities prescribed under Ind AS 101) if there has been no change in its functional currency on the date of transition.

As permitted by Ind AS 101, the Group has elected to continue with the carrying values under previous GAAP for all the items of property, plant and equipment and intangible assets. Hence there is no change on account of adoption of Ind AS.

B. Ind AS mandatory exception

Estimates

As per Ind AS 101, an entity's estimates in accordance with Ind AS at the date of transition to Ind AS and at the end of the comparative period presented in the entity's first Ind AS financial statements, as the case may be, should be consistent with estimates made for the same date in accordance with the previous GAAP unless there is objective evidence that those estimates were in error. However, the estimates should be adjusted to reflect any differences in accounting policies.

As per Ind AS 101, where application of Ind AS requires an entity to make certain estimates that were not required under previous GAAP, those estimates should be made to reflect conditions that existed at the date of transition (for preparing Restated Statement of Assets and Liabilities) or at the end of the comparative period (for presenting comparative information as per Ind AS).

As permitted by Ind AS 101, The Group continued with the estimates which were made as per the previous GAAP. Hence there is no change on account of adoption of Ind AS.

Classification and measurement of financial assets

The Group has classified the financial assets in accordance with Ind AS 109 on the basis of facts and circumstances that exist at the date of transition to Ind AS.

Reconciliation of equity as per previous GAAP and IND AS

Ind AS 101 requires an entity to reconcile equity and total comprehensive income for prior periods. The following tables represent the reconciliations from previous GAAP to Ind AS.

- The capital structure of the Group is based on management's judgment of the appropriate balance of key elements in order to meet its strategic and day-to-day needs. The Group consider the amount of capital in proportion to risk and manage the capital structure in light of changes in economic conditions and the risk characteristics of the underlying assets.
- The Group's policy is to maintain a stable and strong capital structure with a focus on total equity so as to maintain investor, creditors and market confidence and to sustain future development and growth of its business. Note 41. Financial risk management objectives and policies

The Group's principal financial liabilities comprises loan from bank, working capital loan, trade and other payables. The main purpose of these financial liabilities is to finance the Group's operations. The Group's principal financial assets include trade and other receivables, and cash and cash equivalents that derive directly from its operations.

The Group is exposed to market risk, credit risk and liquidity risk. The Group's senior management oversees the management of these risks. The Board of Directors review and agree policies for managing each of these risks, which are summarised below.

- i. **Market risk:** Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk mainly comprises currency risk, product price risk and interest rate risk.
- ii. **Foreign currency risk:** Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's operating activities denominated in foreign currency and thus the risk of changes in foreign exchange rates relates primarily to trade payables.
- iii. **Foreign currency sensitivity:** Since the business of the Group doesn't involve material foreign currency transactions, its exposure to foreign currency changes is not material.
- iv. **Product price risk:** In a potentially inflationary economy, the Group expects periodical price increases across its product lines.
- v. **Interest rate risk:** The Group is exposed to interest rate risk primarily due to borrowings having floating interest rates. The Group uses available working capital limits for availing short-term working capital demand loans with interest rates negotiated from time to time so that the Group has an effective mix of fixed and variable rate borrowings.
- vi. **Credit risk:** Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily trade receivables).
- vii. **Liquidity risk:** Liquidity risk is a risk that the Group may not be able to meet its financial obligations on a timely basis through its cash and cash equivalents, and funds available by way of committed credit facilities from banks. Management manages the liquidity risk by monitoring rolling cash flow forecasts and maturity profiles of financial assets and liabilities. This monitoring includes financial ratios and takes into account the accessibility of cash and cash equivalents and additional undrawn financing facilities.

Writ Petition No. 4235/2016 filed by the Company against (i) State of Madhya Pradesh (ii) Commissioner, Commercial Tax Department (iii) Divisional Deputy Commissioner (“Respondents”) before the Hon’ble High Court of Madhya Pradesh.

The Company has filed a Writ Petition dated February 26, 2016 before the Hon'ble High Court of Madhya Pradesh challenging the Re-assessment Order dated December 31, 2015 for the period 2010-11 passed by the Divisional Deputy Commissioner, Commercial Tax, Bhopal Div-1, Madhya Pradesh ("Assessing Authority") where a penalty of Rs.1,90,24,873/- under Section 21(1) of the M.P. VAT Act, 2002 read with Section 9(2) of Central Sales Tax Act, 1956 was imposed and a tax liability of Rs.54,35,678/- was determined amounting to a total demand of Rs.2,44,60,551/-. The Company was originally assessed for the period of 2010-11 vide Order dated September 30, 2013 by the Assessing Authority after due verification of facts and examination of documents and books of accounts. The Company's case was reopened by the Assessing Authority under Section 21(1) of the Madhya Pradesh VAT Act, 2002 read with Section 9(2) of Central Sales Tax Act, 1956 by issuing notices dated August 25, 2014, October 10, 2014 and June 26, 2015. The Company filed two objections to the re-assessment notices. The Re-assessment Order dated December 31, 2015 was passed by the Assessing Authority which stated that although the C-Forms furnished by the Company are genuine, M/s P.K Enterprises ("Purchasing Dealer") had not shown proper turnover in his books of accounts. The Assessing Authorities further held that the Company had not produced evidence to demonstrate that the Purchase Dealer has received the goods, which was contrary to the documents furnished by the Company in the shape of Form 49, bills, transport permit among others. The Company then applied for the entire record of re-assessment and received it on February 11, 2016. The Company found that in the correspondence between Divisional Deputy Commissioner and the VAT Officer (Ward-41), the Divisional Deputy Commissioner admitted that the transactions shown by the Company are correct and observed that all evidence was examined and found that the C-Forms used for claiming exemption are factually correct and there is no error on the part of the Company. The Company in the Writ Petition submitted that as per the departments record, the transactions effected by it are genuine and it cannot be made liable for (1) non-payment of tax and (2) for the actions of the Purchasing Dealer if he did not show the purchases in his books of accounts. The Company *inter-alia* prayed to quash the Re-Assessment Order dated December 31, 2015. The Respondents filed their reply on February 4, 2017 submitting that the Hon'ble High Court of Madhya Pradesh on May 2, 2016 on appreciating the statement of the Company that the appeal against the order under Section 31(1) confines only to imposition of tax liability, relegated the Company to avail the remedy of appeal only in respect of imposition of tax liability and penalty proceedings were stayed. The Writ Petition is confined only to the imposition of penalty of Rs.1,90,24,873/-. The Respondents submitted that Section 21 of the M.P. VAT Act, 2002 is a complete code in itself prescribing special provisions for assessment/reassessment of tax which authorises the Assessing Authority not only to assess the liability of tax, but also impose penalty. Once the Company filed a composite appeal against the entire demand and the appeal was taken into consideration, it is estopped to choose another forum. The Respondent further submitted that there was a mismatch in the quantity sold by the Company to the Purchasing Dealer and the quantity purchased by the Purchasing Dealer and although ultimately the C-Forms furnished by the Company were not false there still was a mismatch in the C-Forms. The Respondent prayed for dismissal of the Writ Petition. The Hon'ble High Court of Madhya Pradesh via order dated May 2, 2016, stayed the recovery of Rs.1,90,24,873/- as it was imposed without any notice or hearing. The matter is currently pending.

Complaint filed by the Company against United India Insurance Company Limited ("Opposite Party") before Hon'ble District Consumer Disputes Redressal Commission, Raipur.

The Company filed a complaint against Opposite Party before the Honourable District Consumer Disputes Redressal Commission, Raipur under Section 35 of the Consumer Protection Act, 2019. The Company had purchased a Standard Fire and Special Perils Insurance Policy (Floater Basis) from the Opposite Party on November 17, 2017 which was effective till November 16, 2018. The Company had availed a basic cover as well as additional cover which included spontaneous combustion. The premium amount payable by the Company was Rs.6,20,326/-. On February 26, 2018, a fire broke out in the soya husk kept at the godown and subsequently the Company suffered a loss. The surveyor for the Opposite Party visited the site. The Company among other documents, submitted a duly filled in fire claim stating the loss to 217.310 MTs of soya husk to be Rs.31,50,995/-. The Surveyor in his final survey report dated August 16, 2019 assessed the net loss to be Rs.16,51,556/- and further opined that the claim was not payable as the loss was not under the purview of spontaneous combustion as no fire had emerged. The Opposite Party vide its letter dated February 4, 2020 addressed to the Company stated that the loss did not come under the purview of spontaneous combustion as the loss occurred due to heat, as no fire had emerged and no surrounding building or machinery was affected. Aggrieved by the same, the Company filed the above complaint before Hon'ble Commission *inter-alia* submitting that heat is an intrinsic part of spontaneous combustion and it is not necessary that the loss occurs due to flames or a fire. The Company *inter-alia* prayed that the Opposite Party be directed to pay amount of net loss which amounted to Rs.31,50,995/-, along with interest at 18% per annum from February 26, 2018 on account of unfair trade practice and deficiency in service under the Consumer Protection Act, 2019. A reply was filed by the Opposite Party on December 2, 2020 *inter-alia* submitting that (1) the Company had taken insurance for soya crude oil and soya refined oil, but not for soya husk, (2) the loss arrived at by the Company relying upon the calculation by a Chartered Accountant was exaggerated and did not disclose the true value of the husk and that the submission by the Company regarding it trying to

extinguish the fire and (3) that the damage was caused by the flames is not true as the surveyor on inspection of the site, did not find any damage caused by fire or flames. The Opposite Party sought dismissal of the complaint alleging that the insurance claim is inadmissible and made with the only aim of obtaining public money. The matter is currently pending.

Special Civil Suit No. 7/2015 filed by Shivratna Udyog Ltd (“Plaintiff”) against Shri Vijay Shrishrimal as a Director of K.N. Resources (“Defendant 1”) and Shri T. Aruna Murtiya (“Defendant 2”) before the Civil Judge SR. DIV., Malshiras.

The Plaintiff owns Vijay Sugar Limited, which is involved in the production and sale of sugar. The Defendant 1 is engaged in the business of purchasing raw sugar and exporting it abroad. The Plaintiff and the Defendant 1 entered into an Agreement dated March 8, 2014 at Malshiras under which the Defendant 1 was to purchase 4000 metric tonnes of raw sugar from the Plaintiff and after completing the customs and excise formalities, export the raw sugar within a period of 180 days and submit proof of such export to the Plaintiff. The Agreement also provided that once Defendant 1 pays Rs.24,000/- per ton for the 4000 metric tonnes of sugar and the sugar is delivered out of the factory, the responsibility of the sugar will be on Defendant 1, thus Defendant 1 should satisfy himself as to the quality, packaging and weight of the sugar. The Plaintiff is also entitled to a subsidy from the Central Government, if issued by the Central Government, for the sale of raw sugar to Defendant 1 and to get that subsidy released, the Plaintiff required certain documents from Defendant 1 related to the sale of raw sugar. The Agreement provided that in case the Defendant 1 failed to provide the Plaintiff with the requisite documents for obtaining subsidy, then Defendant 1 will be responsible for any loss incurred by the Plaintiff. As per the Agreement, on

February 24, 2014, Defendant 2 requested the Plaintiff to deliver 1404 tonnes of sugar, which was sent to Defendant 2 on February 28, 2014. Defendant 2 was liable to follow the terms under the Agreement, however it did not present C.T.9 Bond and other documents required by the excise department. Moreover, the Defendant 2 did not submit Bank Realization Certificate, Bill of Lading, and the documents related to DGFT/FIEO/APEDA to the Plaintiff and violated the terms of the Agreement. On August 2, 2014 Advocate Gauri Venkatraman sent a notice to the Plaintiff in which it was mentioned that as per the Agreement, the bags containing raw sugar weighing 50 kg should have been double marked and should not have been hooked. As a result of the bags being hooked, 600 of them were damaged. The Plaintiff denied the accusations and submitted that the terms and conditions of the Agreement were not violated, as after loading the delivery of the sugar and while the sugar is in transit as per contract laws, the complete ownership of the raw sugar is with the buyer. The Plaintiff further submitted that the subsidy to which it was entitled from the Central Government amounting to Rs.44,00,000/- could not be obtained by it and therefore it incurred a loss. Therefore the Plaintiff sought for recovery of the loss incurred by it from the Defendants as per the Agreement which amounts to Rs.30,58,922/- calculated at Rs.227.70/- paise per quintal. The matter is currently pending.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the "FDI Policy"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.
