An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Red Herring Prospectus, particularly the “**Financial Information of the Company**” and the related notes, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on page 173, 117 and 240 respectively of this Draft Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. 1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

#### **Note:**

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “**Risk Factors**” on page 29 and “**Management Discussion and Analysis of Financial Condition and Results of Operations**” on page 240 of this Draft Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “**Restated Financial Statements**”.

1. **Our business of manufacturing and supply of Defence Application products for Indian Armed Forces is largely dependent on Transfer of Technology (TOT) contracts awarded to our company for each type of product by**

***Defence Research & Development Organisation (DRDO) and associated entities for its development. Such agreements are usually valid for a period of 5 to 10 years and if such agreements are terminated or not renewed at favourable terms, our operations may be adversely affected.***

We are largely dependent on Transfer of Technology contracts awarded to our company to develop, manufacture and sell specific defence application products to Indian Armed Forces. Our Company has entered into various licensing agreement for manufacturing products such as: bulb bars, food container, improved space heating device or bukhari, improvised explosive device (IED) containment vessel, man mounted cooling system, solar snow melter and mounting and support equipment for camouflage net. These agreements are usually awarded for a period of 5 years to 10 years of validity therefore if these agreements are not renewed on terms favourable to our company we may not be able to continue our defence business operations. Some of the products for which Transfer of Technology has been awarded to our company by DRDO are under the stage of development and if we are unable to successfully develop or deliver such products, it may affect our reputation and future business operations.

Moreover, these Agreements set out various terms and conditions which are required to be strictly adhered to by our Company. Any failure to comply with these obligations and covenants may have a material adverse effect on our business, prospects, cash flows and financial condition. These Agreements can be terminated or revoked by DRDO for breach of any of the said terms and conditions. Our business operations will be largely affected in case of revocation or termination of such agreements and our company will have no claim on the TOT Fees, Royalty Fees etc if any given to DRDO. Further these agreements may be terminated prematurely under various circumstances beyond our control. We have limited ability to negotiate on the terms of these agreements and may have to accept unusual or onerous provisions. Considering the nature of our business activities, our Company shall consistently make all efforts to procure new TOTs for diversified products to expand our business operations. Thus in the event of termination of the said agreements or in case of failure to procure new agreements or to renew the said agreements at favourable terms or failure to renew them at all, our business operations may be affected.

- 2. Our business segment of defence is largely dependent on contracts from the GoI and associated entities including defence public sector undertakings and government organizations involved in related line of procurements. Any reduction in business from them may adversely affect our business, financial condition, results of operations and future prospects.***

We are engaged in the business of developing and manufacturing of defence application products and dairy and kitchen equipment products. For the stub period ended on September 30, 2021 and FY 20-21 our revenue from defence sector business was Rs 1,258.32 lakhs, Rs 2,432.23 lakhs respectively which constituted 60.74% and 69.44% of total revenue of operations and that from dairy and kitchen equipment manufacturing business was Rs 813.23 lakhs, Rs 1,070.43 lakhs respectively which constituted 39.26% and 30.56% of total revenue of operations.

Our revenue from defence sector business is highly dependent on projects and programmes undertaken by GoI and associated entities, such as defence public sector undertakings and government organizations involved in defence and associated activities (collectively, the “GoI Owned Entities”). As our business is currently concentrated to orders received from GOI owned entities any adverse development with such customers, including as a result of a dispute with or disqualification by such customers, may result in us experiencing significant reduction in our business operations in defence sector. If our customers are able to fulfil their requirements through any of our existing or new competitors, providing products with better quality and / or cheaper cost, we may lose significant portion of our business. Additionally, consolidation of any of our customers may also adversely affect our existing relationships and arrangements with such customers, and any of our customers that are acquired may cease to continue the businesses that require products manufactured by us.

There can be no assurance that we will always win the applied tenders. Consequently, there is no commitment on the part of our customers to continue to place orders with us and as a result, our cash flow and consequent revenue may fluctuate significantly from time to time. Further, we do not have any other customers for the surplus or excess capacity, in which case we may be forced to incur a loss. There is no assurance that GoI Entities will continue to engage us and that we will continue to sustain the general level of revenue that we have secured in the past. Further,

any adverse change in the GoI policy may lead to cancellation or slowdown of our orders and could have a material adverse effect on our business, results of operations and financial conditions.

**3. *Any failure to comply with the provisions of the contracts entered with our customers, especially the GoI owned entities or cooperative milk unions/federations, could have an adverse effect on our business operations, financial condition and results of our operations.***

The contracts entered with our customers, especially GoI Entities or the milk cooperative unions or the dairy organisations, contain onerous obligations and are subject to laws which give them certain rights and remedies including without limitation to the following:

- terminate existing contracts for default, delays or force majeure conditions;
- demand encashment of warranty;
- reduce orders under, or otherwise modify, contracts or sub-contracts;
- imposition of liquidated damages, late delivery charges etc

In the event that our customers enforce any of the above provisions, it could have an adverse effect on our business operations, financial conditions and results of our operations. Apart from the above, most of the contracts with our customers require our Company to pay liquidated damages in the event of delay in delivery or defect in quality of products. The value of the liquidated damages typically ranges from 5% to 10% of the value of the contract value. For the six months period ended September 30, 2021 and the Fiscals ended 2021, 2020 and 2019 we have paid late delivery charges amounting to ₹ 0.34 lakhs, ₹ 10.31 lakhs, ₹ 24.24 lakhs and ₹ 6.28 lakhs, respectively, to our customers respectively. Further, the loss of anticipated funding or the termination of multiple or large programmes by the GoI owned entities could have an adverse effect on our future revenues and earnings. We cannot assure you that in future such contracts can be completed profitably or on terms that are not commercially acceptable to us. Any time and/or cost overruns on our contract or imposition of liquidated damages could have a material adverse effect on our business, results of operations and financial condition.

**4. *We are subject to strict quality requirements, customer inspections and audits, and any failure to comply with quality standards may lead to cancellation of existing and future orders and could negatively impact our reputation and our business and results of operations and future prospects.***

We develop and manufacture complex and specialised components in defence sector based on specific requirements stipulated by them. Given the nature of our products and solutions, and the sector in which we operate, we believe that our customers have high standards for product quality and delivery schedules. Adherence to quality standards is a critical factor as a defect in products and solutions manufactured by our Company or failure to comply with the specifications of our customers may, in turn, lead to the manufacture of faulty end-products. This may lead to cancellation of supply orders or non-renewal of agreements by our customers and at certain instances may impose additional costs in the form of product liability and/or product recall. Further our facilities, process and products are exposed to regular inspection and audits by our customers to ensure that their internal standards are appropriately met. Any non-compliance observed during inspection/audit may have an adverse impact on our business, financial condition, results of operations and future prospects.

We are also manufacturing dairy equipment products and kitchen equipments and strictly need to adhere to quality norms to ensure food safety. Any damage or defect in our product could lead to contamination or spoilage of milk or food intended for human consumption. Although we conduct various tests before procurement of raw materials, there can be no assurance that such testing and verification on quality of the raw material checks conducted by us will be accurate at all times. While we have put in place quality control procedures, we cannot assure you that our products will always be able to satisfy our customers' quality standards. Our quality control procedures may fail to test for some possible conditions of use. Any such failure to identify defects could require us to undertake service actions or component recalls. Any defect in our products could also result in customer claims for damages or us bearing product warranty costs or additional financial exposure. Any negative publicity regarding our Company or our products could adversely affect our reputation, our operations and our results from operations.

5. ***We depend on our technical expertise and R&D initiatives to develop new products and/or improve our existing products and if we are unable to keep our technical knowledge and process know-how confidential or if our R&D initiatives do not succeed, we may suffer loss of our competitive advantage. Moreover if we are unable to protect the rights under Patent acquired by our company pursuant to our R&D activities, it may adversely affect our competitive business position and profitability***

We possess extensive technical knowledge about our products. We have gained such technical knowledge through our own experiences, R&D initiatives undertaken to develop our dairy and defence equipment products. While we are subject to strict confidentiality, non-disclosure and non-compete obligations under the respective agreements, if such technical knowledge is not protected we may lose our competitive edge. Even if all reasonable precautions, whether contractual or otherwise, are taken to protect the confidential and technical knowledge of our products and business, there is a risk that certain proprietary knowledge may be leaked, either inadvertently or wilfully, at various stages of the manufacturing process. Some members of our team have access to confidential design and product information and there can be no assurance that this information will remain confidential.

Further the development and commercialization of improved and/or new products is complex, time-consuming and costly, and its outcome is inherently uncertain. Accordingly, we have committed substantial effort, funds and other resources towards R&D activities. We cannot guarantee that the improved and/or new products we will introduce in the future will be successful or will continue to be successful. Our ongoing investments in new product launches and research and development for future products could result in higher costs without a proportionate increase in revenues. There can be no assurance that our expenditure on research and development activities will yield proportionate results or that commercially viable products may be developed or launched as a result of such research and development activities. In the event that such products are unsuccessful, we may lose some or all of the investments that we have made in developing them, which could have an adverse effect on our financial position, business operations, results of operations and future prospects.

Moreover, our R&D activities led to successful development of Automated Milk Analysis and Collection Apparatus called Robotic Milk Collection Unit for which our company acquired Patent Registration, in accordance with the provisions of the Patents Act, 1970 for a term of 20 years. In the event of infringement of our patent by third parties we may not be able to protect our right that gives us an additional edge to exclusively manufacture one of our products, Robotic Milk Collection Unit. Obtaining, protecting and defending such patent rights can be time consuming and expensive, and may require us to incur substantial costs, including the diversion of the time and resources of management and technical personnel.

6. ***Our business is dependent on our manufacturing facilities and we are subject to certain risks in our manufacturing process. Obsolescence, destruction, theft, breakdowns of our major plants or machineries or failures to repair or maintain the same may affect our business, cash flows, financial condition and results of operations.***

We have two manufacturing facilities located at Kalol and Halol near Vadodara, Gujarat. Our business is dependent upon our ability to manage our manufacturing facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe climate conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair breakdown of machinery in a timely manner or at all, our operations may need to be suspended until we procure new machinery to replace the same. In addition, we may be required to carry out planned shutdowns of our facilities for maintenance, statutory inspections and testing, or may shut down certain facilities for capacity expansion and equipment upgrades.

Obsolescence, destruction, theft or breakdowns of our major plants or machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply

shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect on our business, cash flows, financial condition and results of operations

Although we have not experienced any significant disruptions at our manufacturing facilities in the past, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shut-down of our operations or under-utilization of our manufacturing facilities, which in turn may have an adverse effect on our business, results of operations and financial condition. Any slowdown or shutdown in our manufacturing operations or underutilization of our manufacturing facilities could have an adverse effect on our business, results of operations and financial condition.

**7. *We may not qualify for or win bids to secure potential order, which may have an adverse effect on our business, financial condition, results of operations and prospects.***

Our business and growth depends on our ability to qualify for and win bids undertaken by GoI Entities for awarding defence contracts and by the cooperative milk unions/federations or other dairy organisations for awarding dairy equipment orders. Our Company obtains a majority of its business through a competitive bidding process in which it competes for contracts based on, among other things, pricing, technical and technological expertise, reputation for quality, financing capabilities and track record. The bidding and selection process is affected by a number of factors, including factors which may be beyond our control, such as market conditions, project delays, external economic or political factors. Any increase in competition during the bidding process or reduction in our competitive capabilities could have a material adverse effect on our market share. There can be no assurance that our current or potential competitors will not offer products and solutions comparable or superior to those that we offer at the same or lower prices, adapt more quickly to industry challenges, or expand their operations at a faster pace than we do.

Increased competition may result in price reductions, reduced profit margins and loss of market share, thereby causing an adverse effect on our operations, prospects and financial condition. In addition to meeting bid capacity requirements, we may also be required to pre-qualify for the orders from public sector undertakings such as in relation to background checks and prior experience of the bidders. However, we cannot assure that we shall always maintain our bid capacity and our pre-qualification capabilities, and that we shall be able to continually secure projects so as to enhance our business operations, financial performance and results of operations. Further, such pre-qualification criteria may also change from time to time. Our inability to fulfil and maintain the bid and prequalification capabilities may materially impact our operating revenue and profitability.

**8. *An increase in raw material costs or other input costs or loss of any of our suppliers due to delayed payments or otherwise, resulting in shortfall in the supply of our raw material may adversely impact the pricing and supply of our products and have an adverse effect on our business.***

Our operations are impacted by the availability and cost of raw materials utilised in our manufacturing process. Any change in cost and availability of such raw materials for any reason, including change in the approved suppliers, change in law or applicable governmental policies, would adversely affect our business, financial condition, results of operations and prospects. The main raw materials required in manufacturing our defence, dairy and kitchen equipment are special steel & stainless steel and therefore any fluctuation in prices of steel could affect our profit margins. Our raw material suppliers may fail to deliver products of acceptable quality and within stipulated schedules or at all. We do not have any formal agreements with our vendors/suppliers as we operate on a purchase order system. Due to the absence of any formal contract with our vendors/suppliers, we are exposed to the risks of irregular supplies or no supplies at all or delayed supplies or volatility in the prices of raw materials that we normally procure. We may be required to replace a supplier if the products provided or supplied, do not meet our quality or performance standards. Further, increase in competition may lead to our competitors establishing exclusive arrangements with our suppliers due to which we may be unable to secure an adequate supply of raw materials or which may increase our overall cost of raw materials, which we may not be able to determine from our customers. While we are not significantly dependent on any single raw material supplier, raw material supply and

pricing can be volatile due to a number of factors beyond our control, including global demand and supply, economic and political conditions, transportation and labour costs, disruption during transportation, labour unrest, natural disasters etc. This volatility in commodity prices can significantly affect our raw material costs.

Further our Company has outstanding dues of trade payables for the Stub period ended on September 30, 2021 and Fiscal Years ended 20-21, 19-20 and 18-19 for Rs. 986.30 lakhs, Rs. 672.91 lakhs, Rs 1071.99 lakhs and Rs. 1699.49 lakhs respectively. Any delay in payment to our creditors may impact our long standing relations with our suppliers and may result in stoppage of timely or at all delivery of raw material. Any such disruption would impact the production and overall financial position of our Company.

9. ***Our business is substantially dependent on our ability to accurately carry out the pre-bidding studies for potential contracts. Any deviation during the execution of the contract as compared to our pre-bid estimates could have a material adverse effect on our cash flows, results of operations and financial condition.***

We carry out the pre-bidding analysis for the potential contracts considering various elements including financial and technical factors. However, such analysis may not enable us to assure the accuracy of such studies. The accuracy of the pre-bidding studies is dependent on the key elements like preparing requirement of raw materials, adherence to manufacturing processes, complying to quality standards, planning to meet delivery schedules etc. Any deterrence or deviation in the estimation and calculation of the key elements may hamper the quality of the pre-bid analysis relied upon before submitting any tenders. Any deviation during the implementation and operation of the contract as compared to our pre-bid estimates could have a material adverse effect on our cash flows, results of operations and financial condition.

10. ***Our Company and Promoter and Directors are involved in certain legal proceedings and potential litigations. Any adverse decision in such proceedings may render us/them liable to liabilities/penalties/prosecutions and may adversely affect our business and results of operations.***

Our Company and Directors are currently involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts, tribunals, and government departments. The summary of outstanding litigation in relation to taxation matters, statutory or regulatory laws filed by or against our Company and Directors have been set out below.

*Amount mentioned to the extent quantifiable. The amount may be subject to additional interest/other charges being levied by the concerned authorities which are unascertainable as on date of this Draft Red Herring Prospectus*

For further details, see “**Outstanding Litigation and Material Developments**” beginning on page 249 of this Draft Red Herring Prospectus. Any adverse decisions in the aforesaid proceedings may have a material effect on our business, future financial performance and results of operations. If the courts or tribunals rule against our Company or our Directors, we may face monetary and/or reputational losses and may have to make provisions in our financial statements, which could increase our expenses and our liabilities.

**11. *There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956/2013. Any penalty or action taken by any regulatory authorities in future, for non-compliance with provisions of corporate and other law could impact the reputation and financial position of the Company to that extent.***

Our company has missed to comply with certain statutory provisions in the past including but not limited to the details as mentioned in this risk factor. There are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, which inter-alia includes clerical errors in the Annual Returns filed by our Company with the ROC in past years. The Company has not filed certain ROC forms such as Form CHG-1 for creation of vehicle loans taken in the past which inter-alia includes non-compliance of Section 77 of the Companies Act, 2013 and is subject to penalty under section 86 and/or other relevant provision(s) of Companies Act, 2013, as maybe applicable, however as on date of the Draft Red Herring Prospectus all such car loans have been repaid by our company. Thereafter pursuant to meeting the threshold limit for preparing Cost Records, our Company failed to prepare the same from FY 2017-18 under section 148 of Companies Act 2013, however the same for FY 20-21 has been prepared. The Cash Flow Statements has not been attached in the Form AOC-4 filed by the Company for F.Y. 2014-15. The company had not filed the form AOC – 5 for maintaining its books of accounts at Kalol, however the same is now maintained at its regional office at Vadodara and the requisite form AOC – 5 for the same is filed. We have also observed some discrepancies in relation to appointment of Directors like improper resolutions due to clerical errors were attached in e-forms, appointing directors without onward approval of shareholders etc. Although, no show cause notice in respect of the non-compliance has been received by the Company till date, any penalty imposed for such non-compliance in future by the any regulatory authority could affect our financial conditions to that extent. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business and reputation. Our company has not complied with certain Accounting Standards such as AS-19, AS-17 and AS-15 however the same have been duly complied by the company in the restated financial statements. Further, there are certain forms which are filed with delayed fees with RoC. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

**12. *Our Company operates under several statutory and regulatory approvals in respect of our operations. Failure to obtain or maintain licenses, registrations, permits and approvals may affect our business and results of operations.***

We are governed by various laws and regulations for our business and operations. We are engaged in the business of manufacturing defence application products, dairy equipments and kitchen equipments. In this relation, our Company has obtained necessary approvals to successfully carry out its operations, but there is no assurance that there are no other statutory/regulatory requirements which we are required to be complied with. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Our Company had earlier not registered itself as principal employer under the Contract Labour (Regulation and Abolition) Act 1970, however the same has now been registered by the company. Moreover, we are yet to apply for registration under The Gujarat Shops and Establishments (Regulation of Employment and Conditions of Service) Act, 2019 for our Regional Office at Vadodara.

We cannot assure you that the approvals, licenses, registrations and permits required will be issued to us and those already issued will not be suspended or revoked in the event of non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any denial, suspension or revocation of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations. Also some of the registration certificate of our company does not carry the present address of the registered office of the

company or are in the old name of the company, prior to its conversion of partnership firm “M/s Krishna Industries” into company “Krishna Allied Industries Private Limited” or prior to the change of name of the company to “Krishna Defence and Allied Industries Limited”. The same needs to be updated in the records of concerned authorities. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see “**Government and Other Approvals**” on page 252 of this Draft Red Herring Prospectus.

**13. We have significant working capital requirements. If we experience insufficient cash flows from our operations or are unable to borrow to meet our working capital requirements, it may materially and adversely affect our business, cash flows and results of operations.**

Our business requires significant working capital including in connection with our manufacturing operations, financing our inventory, providing bank guarantees, purchase of raw materials and our development of new products which may be adversely affected by changes in terms of credit and payment. We are required to maintain a high level of working capital because our business activities are characterised by long product development periods and production cycles. Delays in payment under on-going contracts or reduction of advance payments due to lower order intake or inventory and work in progress increases and/or accelerated payments to suppliers, fixed deposits to facilitate bank guarantees to our customers, could adversely affect our working capital, lower our cash flows and materially increase the amount of working capital to be funded. We may also be unable to adequately finance our working capital requirements on account of various factors, including extraneous factors such as delay in disbursements under our financing arrangements, increased interest rates, insurance or other costs, or borrowing and lending restrictions or finance our working capital requirements on commercially acceptable terms or at all, each of which may have a material adverse effect on our business, financial condition, prospects and results of operations. Continued increase in our working capital requirements may have an adverse effect on our financial condition and results of operations. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations.

**14. Our manufacturing facilities are located on leased premises. If we are unable to renew these leases or relocate on commercially suitable terms, it may have a material adverse effect on our business, results of operation and financial condition**

Our manufacturing facility situated at Kalol is located on premises leased from the GIDC. Though we have entered into long-term lease agreements with respect to these lands, such lease agreements may be terminated early in the event of a default or upon the expiry of their tenure and may not be renewed. For details, see “**Our Business - Property**” on page 135. Additionally, the lease agreements require our Company to comply with certain conditions including prior consent of the lessor for certain actions such as making significant structural alterations, subletting, transferring or assigning the leased premises. If we fail to meet any such conditions, we may be required to incur additional liability. For instance, our Company has not sought the consent from GIDC in relation to subletting a portion of the premises leased from GIDC at Kalol to our Group Company, White Gold Technologies LLP. The licensee has been made liable for compliance of all terms and conditions of lease deed executed between company and GIDC and this sub-lease is subject to termination if the said terms are violated by the licensee.

In addition, our manufacturing facility situated at Halol has been obtained through leave and license agreement from our Group Company, Krish Industries Private Limited and our Regional Office situated at Vadodara is obtained on lease from third party. The said agreement is not registered. While we always seek to ensure through various means good title to property used by us, our rights in respect of these properties may be compromised by improperly executed, unregistered or insufficiently stamped agreements. If these agreements are terminated or revoked due to absence of prior consent from GIDC for sub-letting or any other reason or if we are unable to renew these agreements on commercially reasonable terms or at all, we may suffer significant disruptions to our operations and incur considerable costs to relocate and move our operations elsewhere. In the event we are required to vacate the

premises, we may need to do with short or no notice. Any inability on our part to timely identify a suitable location for a relocated premise could have an adverse impact on our business.

***15. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.***

While we maintain insurance coverage namely Business Guard - Bharat Laghu Udyam Suraksha to secure stock, consumables, plant and machinery against fire and burglary for both our manufacturing facilities at Kalol and Halol in amounts which we believe are commercially appropriate. The said insurance policies have insured the Building and/or Contents including plant and machinery, stocks or stocks in process against fire. However, we may not have sufficient insurance coverage to cover all possible economic losses, including when the loss suffered is not easily quantifiable. We have not insured our risks pertaining to Machinery Breakdown, Cash in transit, Keyman Insurance Policy and insurance cover for regional office. The absence of such policies may affect our production facilities to halt, and may hinder our operations. Even if we have made a claim under an existing insurance policy, we may not be able to successfully assert our claim for any liability or loss under such insurance policy.. Additionally, there may be various other risks and losses for which we are not insured either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an effect on our business, results of operations, financial condition and cash flows. For further details of our Insurance Policies, please refer section titled ***“Our Business”*** beginning on page 117 of this Draft Red Herring Prospectus.

***16. We are dependent on our Promoters, our senior management and other key personnel, and the loss of, or our inability to attract or retain, such persons could affect our business, results of operations, financial condition and cash flows.***

Our performance depends largely on the efforts and abilities of our senior management and other key personnel, including our Promoter and Managing Director Mr. Ankur Ashwin Shah and our Whole Time Directors, Mr. Suvendu Banerjee and Mr. Sandeep Ramrao Kadam. They have gained experience in this line of business and have over the years built relations with suppliers, third party service providers, customers, regulators and other persons who are connected with us and have been actively involved in the day to day operations and management, further we believe that the inputs and experience of our senior management, in particular, and other key personnel are valuable for Research and development activities, procurement of TOTs, tender bidding process, successful delivery of products and our overall business operations and the strategic directions taken by our Company. For details in relation to the experience of our key management personnel, see ***“Our Management”*** on page 153 of this Draft Red Herring Prospectus. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an effect on our business, results of operations, financial condition and cash flows.

***17. Our manufacturing activities require deployment of labour and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.***

Our manufacturing operations require deployment and our ability to retain labour. In case such labour workforce is unavailable, or we are unable to identify and retain such labour our business could be adversely affected. We cannot guarantee that we may be able to continue with the same on favourable terms or at all. Any such failure may impact the operations, business process and profitability. Additionally, there have been amendments in the labour and Employment related laws, which may have a direct impact on our employee costs and consequently, on our margins. Further, latest amendments in labour laws in India may be lead to increasing cost of compliance, wages, social security, Occupational Safety, Health and Working Conditions. We cannot assure you that we will continue to

comply with all these labour related laws and that as we continue to grow our business in the future, our labour and employee costs coupled with operating compliances and expenses will not significantly increase.

**18. *The Objects of the Issue for which funds are being raised, are based on our management estimates and have not been appraised by any bank or financial institution or any independent agency.***

The deployment of funds will be entirely at our discretion, based on the parameters as mentioned in the chapter titled “**Objects of the Issue**”. The fund requirement and deployment, as mentioned in the “**Objects of the Issue**” on page 90 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “**Objects of the Issue**” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “**Objects of the Issue**” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

**19. *We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company’s financial condition and results of operations.***

Our Company has entered into various transactions with our Directors, Promoter and Promoter Group members/entities. These transactions, inter-alia includes, issue of shares, remuneration, loans and advances, purchase, sales, rent expenses and rent income, reimbursement of expenses etc. For details, please refer to “**Note 29B - Related Party Transactions**” under Section titled “**Financial Information of the Company**” and Chapter titled “**Capital Structure**” beginning on page 213 and 71 respectively of this Draft Red Herring Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favorable terms if such transactions are not entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

**20. *We propose to introduce new line of products by venturing into the business of manufacturing Homeland and Security Products. Due to limited experience of our promoter in the new line of products, we may face new business and financial challenges which may adversely affect our profitability and results of operations.***

Recently our Company has also forayed in a new business vertical of manufacturing Homeland & Security products, wherein we plan to manufacture products like Modular Vehicle Barrier, Automatic tyre Killer, Multi-purpose Launcher and Long Range LED Searchlight used by the Indian Armed Forces, for which we have entered into agreements with foreign vendors for import of critical component required to manufacture/assemble these products in our factory. We propose to sell such product under MAKE IN INDIA Programme and have successfully developed the prototype of Modular Vehicle Barrier. Although, the Promoter of our Company have vast experience of around 22 years, but they have no prior experience in the aforesaid new line of products, due to which, we may

face new business and financial challenges including import of critical components, sales issues, marketing, production, cost optimization etc. which may adversely affect our profitability and results of operations.

**21. *Inventories and trade receivables form a major part of our current assets. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.***

Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets. The results of operations of our business are dependent on our ability to effectively manage our inventory (raw materials, work in progress and finished goods) and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand / potential orders and supply requirements and purchase new inventory accordingly. However, if we misjudge expected customer demand / potential orders, it could cause either a shortage of products or an accumulation of excess inventory. During the stub period ended on September 30, 2021 and FY 2020-21, 2019-20 and 2018-19 our inventories were Rs.1597.87 Lakhs, Rs.1528.02 lakhs, Rs.2058.82 lakhs and Rs.1113.08 lakhs. Further, if we fail to convert the inventory we purchase by manufacturing our products, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if we fail to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. During the stub period ended on September 30, 2021 and FY 2020-21, 2019-20 and 2018-19 our trade receivables were Rs.1219.62 lakhs, Rs.1320.79 lakhs, Rs.1217.66 lakhs and Rs.3161.11 lakhs. We also maintained Cash and Cash equivalents of Rs.994.11 lakhs, Rs.908.96 lakhs, Rs.1102.56 lakhs and Rs.901.63 lakhs during the stub period ended on September 30, 2021 and FY 2020-21, 2019-20 and 2018-19 respectively for providing Bank Guarantees to our customers. A liquidity crunch may also result in case of increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

**22. *The Logo used by our Company is currently under process of registration under Trade Marks Act, 1999. Failure to protect our intellectual property rights may adversely affect our competitive business position, financial condition and profitability.***

Presently, our Company is using logo  and we have applied for registration of the same under the Trade Marks Act, 1999. The trademark is not granted/approved as on date and we do not enjoy the statutory provisions that are accorded to a registered trademark. The use of our logo by third parties could adversely affect our reputation, which could in turn adversely affect our business and results of operations. There can be no assurance that our trademark application will be approved. Third parties may also oppose our trademark applications, or otherwise challenge our use of the logo. In the event that our logo is successfully challenged, we could be forced to rebrand our products, which could result in loss of brand recognition, and could require us to devote resources advertising and marketing new brand.

Moreover our existing Trademark application for our erstwhile logo  is objected and if we inadvertently infringe on the intellectual property rights of others, our business and results of operations may be adversely affected

We may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition.

**23. *Invocation of performance bank guarantees by our customers could impact our results of operations and we may face potential liabilities from claims by customers in the future.***

In some of our contracts, we are required to secure performance bank guarantee from nationalised / scheduled commercial banks to be furnished within a few days of the signing of a contract and remain valid up to execution of the contract. For the six months period ended September 30, 2021 and the Fiscals ended 2021, 2020 and 2019 we have outstanding bank guarantee for ₹ 1384.30 lakhs, ₹ 1219.54 lakhs, ₹ 1223.37 lakhs and ₹ 1302.12 lakhs, respectively. Our inability to arrange such guarantees or the invocation of such guarantees may adversely affect our cash flows and financial condition. We may not be able to continue obtaining new financial and performance bank guarantees required to match our business requirements. If we are unable to provide sufficient collateral to secure the financial bank guarantees, performance bank guarantees or letters of credit, our ability to enter into new contracts could be limited and could have a material adverse effect on our business, results of operations and financial condition. Providing security to obtain letters of credit, financial and performance bank guarantees also increases our working capital requirements. Also, there may be scenarios where we may be unable to fulfill our obligations under the contracts entered into by us due to unforeseen circumstances which may result in a default under our contracts resulting in invocation of the bank guarantees issued by us. The invocation of such performance bank guarantees in relation to our contracts could have an adverse effect on our business, results of operation, and financial condition.

**24. *Our Group Companies are engaged in the line of business similar to our Company.***

Our Group Companies Krish Industries Private Limited and White Gold Technologies LLP are engaged in the similar line of business of manufacturing Dairy Equipment as that of our Company. We cannot assure that our Promoter who has common interest in said entity will not favour the interest of the said entity. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and these Companies in circumstances where our respective interests' conflict. In cases of conflict, our Promoter may favour these companies in which our Promoter has interest. There can be no assurance that our Promoter or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

**25. *We have significant power and water requirements for continuous running of our factory. Any disruption to our operations on account of interruption in power or water supply or any irregular or significant hike in their tariffs may have an effect on our business, results of operations and financial condition.***

Our factory has significant electricity requirements and any interruption in power supply to our factory may disrupt our operations. Also availability of water is an essential utility in our manufacturing process. Our business and financial results may be affected by any disruption of operations due to lack of essential utilities. We depend on third parties for all of our power and water requirements. Since we have significant power consumption, any unexpected or significant increase in its tariff can increase the operating cost of our Company.

**26. *Fluctuation in foreign currency exchange rates could affect our financial condition and results of operations.***

Our business involves import and export transactions with foreign companies, which is paid or received in U.S. Dollars or other foreign currencies. A depreciation of Rupee against these foreign currencies would mean that our import of raw materials would become expensive and will impact our cost of production. During the stub period ended on September 30, 2021 and FY 2020-21, 2019-20 and 2018-19 the imports accounted for approximately Rs. 4.73 lakhs, Rs. 17.19 lakhs, Rs. 16.48 lakhs and Rs. 32.84 lakhs respectively. Similarly any appreciation of Rupee against these foreign currencies would adversely affect the export value of our products. During the stub period ended on September 30, 2021 and FY 2020-21, 2019-20 and 2018-19 the exports accounted for approximately Rs. 23.24 lakhs, Nil, Rs. 14.15 lakhs and Rs. 17.17 lakhs respectively. The exchange rate between the Rupee and these

foreign currencies has fluctuated substantially in recent years and may continue to fluctuate significantly in the future. We bear the complete risk of currency exchange rate fluctuations.

**27. We could incur losses under our fixed price contracts as a result of cost overruns, delays in delivery or failures to meet contract specifications which may have an adverse effect on our business, financial condition and results of operations.**

Most of our contracts are fixed-price contracts. All costs including labour and raw materials costs are forecasted by us when we enter such book building-price contracts. In case of cost variances from such estimates, we are permitted to retain all cost savings on completed contracts but are liable for the full amount of all cost overruns. The actual costs incurred on a book building-price contract may vary from our estimates due to factors such as:

- unanticipated variations in labour and equipment productivity over the term of a contract;
- unanticipated increases in labour, raw material, sub-contracting and overhead costs;
- delivery delays and corrective measures for poor workmanship;
- equipment failures;
- changes in the specifications provided by our customers;
- obsolescence of any components;

We cannot assure you that these contracts, if secured, can be completed profitably. Cost overruns on our book building price contracts could have a material adverse effect on our business, financial condition, results of operations and prospects.

Depending on the size of the project, variations from estimated contract performance could significantly reduce our earnings, and could result in losses, during any quarter of a fiscal or entire fiscal. All of our book building price contracts provide for liquidated damages for late delivery. In the past, we have been required to re-negotiate some of the terms, date of delivery, scope of work, due to a delay in delivery of the products owing to a combination of internal as well as external factors beyond our control. We have also had to pay liquidated damages for delay in delivery. There can be no assurance that our customers in future will not rescind their contracts with us if there is a delay in delivery beyond the time stipulated in the contract or we may need to renegotiate some of our contracts. This may have an impact on our reputation, which could have a material adverse effect on our financial condition, results of operations and prospects.

**28. Our contingent liabilities as stated in our Restated Financial Statements could affect our financial condition.**

Our Contingent liability as on September 30, 2021 was Rs. 1503.30 Lakhs. If this contingent liability materializes, fully or partly, the financial condition of our Company could be affected.

**29. *If we are unable to manage our growth effectively, our business, future financial performance and results of operations could be materially and adversely affected.***

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as and when opportunities exist including by expanding our product portfolio, strengthening our foothold in India’s expanding market, continue to focus on R&D, increasing our reach in the international markets.

This could place significant demands on our operational, credit, financial and other internal risk controls. In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations. Our operating expenses and capital requirements may increase significantly pursuant to our expansion and diversification plans. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expend funds to improve our operational, financial and management controls, reporting systems and procedures. An inability to implement our future business plan, manage our growth effectively or failure to secure the required funding on favourable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations

**30. *Changes in technology may render our current technologies obsolete or require us to make substantial investments.***

Modernization and technology up gradation is essential to reduce costs and increase the output. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions and we may lose our competitive edge. Although we believe that we have installed updated technology, we shall continue to strive to keep our technology, plant and machinery in line with the latest technological standards. In case of a new found technology in the industry in which we operate, we may be required to implement new technology or upgrade the machineries and other equipment employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

**31. *Our success depends on stable and reliable logistics and transportation infrastructure. Disruption of logistics and transportation services could impair the ability of our suppliers to deliver raw materials or our ability to deliver products to our customers and/ or increase our transportation costs, which may adversely affect our operations***

We utilize third party transportation services by road for transportation of raw materials and our products from/ to our suppliers and customers. Transportation by road, as the case may be, involves risks, including, collision, grounding, storm, fire, explosion, lightning, political instability and operating restrictions/ lockdown consequent to outbreak of infectious diseases, such as the COVID-19 pandemic. Any delay or disruption caused to the transportation of raw materials or our products could adversely impact our ability to procure the raw materials as well as to meet the delivery schedule of our products in an economical manner. To ensure timely delivery of our products, we may also be required to maintain relatively high level of inventory of raw materials and this may also resultantly increase our cost.

**32. *We operate in a competitive business environment. Failure to compete effectively against our competitors and new entrants to the industry in any of our business segments may adversely affect our business, financial condition and results of operations***

The manufacturing of our products for defence, dairy or kitchen equipment is competitive, and it experiences rapid technological developments and changes in customer requirements. For further details of our competitors, please see “**Our Business – Competition**” on page 133. We compete on the basis of our ability to fulfil our contractual

obligations including the quality of products and the timely delivery of the products. Additionally, while these are important considerations, price is a major factor in most tender / bid awards and our business is subject to price competition. Our competitors may have substantially greater financial, management, research and marketing resources than we have as a result of which they may be able to utilise their resources and economies of scale to develop improved products, divert sales away from us by winning broader contracts or hire our employees by offering more lucrative compensation packages. Further if import of dairy or defence equipment products manufactured by us are liberalised by the Government of India or if there is a change in FDI Policy of Government of India inviting bids from foreign investors with better specifications or reduced prices, it may adversely affect our competitive edge. Our competitors may be able to provide our customers, with different or greater capabilities or benefits than we can provide in areas such as technology, technical qualifications, post contract performance. Our failure to compete effectively with respect to any of these or other factors could have a material adverse effect on our business, prospects, financial condition or operating results. In such a scenario, we may find difficulties in maintaining our position in the market.

**33. *Contracts awarded to us may be subject to litigation by unsuccessful bidders.***

Contracts awarded to us may be subject to litigation by unsuccessful bidders. Legal proceedings may result in delay in the award of the contracts for the bids where we have been successful, which may result in us having to retain unallocated resources and as a result, it would adversely affect our results of operations and financial condition. Further, we may be required to incur substantial expenditure, time and resources in defending such litigation. Any unsuccessful outcome in any such proceedings may lead to termination of a contract awarded to us, which could have a material adverse effect on our future revenues and profits.

**34. *Technology failures or Cyber-attacks or other security breaches could have a material adverse effect on our business, results of operation or financial condition***

IT systems are critical to our ability to manage our operations. Our IT systems enable us to coordinate our operations, from planning, production scheduling, raw material ordering, invoicing, delivery, customer relationship, management and decision support. If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure, we could be subject to transaction errors, processing inefficiencies, customer service disruptions and, in some instances, loss of customers.

We face cyber threats, threats to the physical security of our facilities and employees, the potential for business disruptions associated with IT failures, natural disasters, or public health crises. We have installed anti-virus software to prevent our systems and infrastructure from being infected and crippled by computer viruses. All our internet facing servers installed at all our data centres as well as at all our offices are also secured with firewalls and intrusion preventions systems to prevent hacking. If we are unable to protect sensitive information, our customers or governmental authorities could question the adequacy of our threat mitigation and detection processes and procedures. Due to the evolving nature of these security threats, the impact of any future incident cannot be predicted.

**35. *Our Promoter has provided personal guarantees for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations and thereby, impact our business and operations.***

Our Promoter Mr. Ankur Ashwin Shah has provided personal guarantee towards loan facilities taken by our Company from Axis Bank Limited and Standard Chartered Bank and may continue to provide such guarantees and other securities post listing. Any default or failure by us to repay the loans in a timely manner, or at all could trigger repayment obligations of our guarantors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals or companies withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities,

or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details, please refer to chapter titled **“Statement of Financial Indebtedness”** beginning on page 230 of this Draft Red Herring Prospectus.

**36. Our Group Company has incurred losses in past, any operating losses in the future could adversely affect the results of operations and financial conditions of our group company.**

The details of profit and loss of our Group Companies in the past years are as follows:-

(Amt. in Lakhs)

Group Company	For The Year Ended		
	March 31, 2021	March 31, 2020	March 31, 2019
<b>Krish Commodities (India) Private Limited</b>	(0.30)	(0.59)	(0.70)

Any operating losses by our group companies could adversely affect the overall operations of the group and financial conditions and also divert the attention of the management and promoter towards the group company which could have an adverse affect on our operations and financials. For more information, regarding the Company, please refer chapter titled **“Our Group Companies”** beginning on page 259 of this Draft Red Herring Prospectus.

**37. We appoint contract labours for carrying out certain operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations and financial condition.**

In order to retain flexibility and control costs, our Company has entered into contract with independent contractors who in turn engage on-site contract labour for performance of certain operations of the company. Although our Company does not engage these contract labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition and we may also be subject to legal proceedings in this regard. In the event any regulatory body or court passes orders which require us to regularise any of the casual or contract labourers as regular employees, it may have an adverse effect on our business, results of operations and financial condition due to the various factors including increase in wages.

**38. Our Company has taken unsecured loans that may be recalled by the lenders at any time.**

Our Company have availed unsecured loans which may be called by their lenders at any time. As on September 30, 2021 the unsecured loan amounting Rs.1321.69 lakhs were due to lenders. In the event that lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. Also there is no formal agreement with any of our lenders. As a result, any such demand may affect our business, cash flows, financial condition and results of operations. For further details on financing arrangements entered into by our Company, please refer chapter titled **“Statement of Financial Indebtedness”** beginning on page 230 of Draft Red Herring Prospectus.

**39. Excessive dependence on Axis Bank Limited and Standard Chartered Bank in respect of Loan facilities obtained by our Company.**

Our company has been sanctioned credit facilities by Axis Bank Limited and Standard Chartered Bank. The Company is dependent on such facility for its Working Capital and other funding requirement and any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. At the same time this may result into difficulty in arranging for funds for repayment and may also adversely affect the financial position of the Company.

**40. *Failure to comply with environmental laws and regulations by us could lead to unforeseen environmental litigation which could impact our business and our future net earnings.***

We are subject to various regulations concerning environmental protection in India, including laws addressing the discharge of pollutants into the air and water, the management and disposal of any hazardous substances, and wastes and the clean-up of contaminated sites. Environmental laws and regulations in India are becoming more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to further invest in, among other things, environmental monitoring, pollution control equipment, and emissions management. Further, any violation of the environmental laws and regulations may result in fines, criminal sanctions, revocation of operating permits, or shutdown of our manufacturing plant.

**41. *Our Company has during the preceding one year from the date of the Draft Red Herring Prospectus have allotted Equity Shares at a price which is lower than the Issue Price.***

In the last 12 months, we have made allotments of Equity Shares through bonus issue of shares to our promoter and promoter group members, which is lower than the Issue Price. For details relating to number of shares issued, date of allotment etc. please refer to section titled “*Capital Structure*” on page 71 of this Draft Red Herring Prospectus. The Issue Price is not indicative of the price that will prevail in the open market following listing of the Equity Shares.

**42. *We are subject to certain restrictive covenants in debt facilities provided to us by our lenders.***

We have entered into agreements for availing debt facilities from lenders. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business.

For further details in this regard, please refer to chapter titled “*Statement of Financial Indebtedness*” beginning on page 230 of this Draft Red Herring Prospectus.

**43. *The average cost of acquisition of Equity Shares by our Promoter, is lower than the face value of Equity Share.***

The average cost of acquisition of Equity Shares of our Promoter is lower than the face value of Equity Shares i.e. ₹10/-. For further details regarding the average cost of acquisition of Equity Shares by our Promoter in our Company and build-up of Equity Shares of our Promoter in our Company, please see section titled “*Capital Structure*” beginning on page 71 of this Draft Red Herring Prospectus.

**44. *The Company has not made any provision for decline in value of Investment of the Company.***

Our Company has made investment in mutual funds for Rs. 1 lakh as on September 30, 2021. We have not made any provision for any decrease in the value of investments, if provision is made in future on account of permanent decrease in value of these investments, our profits would reduce to the extent of such provision. This may have an adverse impact on our results of operations and financial conditions.

**45. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as

regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

**46. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.***

The proposed fund requirement as detailed in the section titled "*Objects of the Issue*" is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled "*Objects of the Issue*" beginning on page 90 of this Draft Red Herring Prospectus.

**47. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.***

Our Company is engaged in the manufacturing business, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance and Professional Tax. Any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

**48. *Information relating to capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on certain assumptions and has been subjected to rounding off, and future production and capacity utilization may vary.***

Information relating to capacity utilization of our production facilities included in this Draft Red Herring Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Actual production levels and utilization rates may differ significantly from the estimated production capacities or historical estimated capacity utilization of our facilities. Undue reliance should therefore not be placed on our capacity utilization information for our existing facilities included in this Draft Red Herring Prospectus. For further information, see the section titled "*Our Business*" on page 117 of this Draft Red Herring Prospectus.

**49. *Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section "*Dividend Policy*" on page 172 of the Draft Red Herring Prospectus.

**50. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.***

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above Rs.10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

**51. *Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.***

Our promoter along with the promoter group will continue to hold collectively 73.38% of the post issue paid up share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholders vote. Such a concentration of the ownership may also have the affect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter and promoter group will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

**52. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.***

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt - equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

**53. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.***

The issue price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "**Basis for Issue Price**" beginning on page 95 of the Draft Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

**54. Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.**

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

**55. Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.**

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the issue within six Working Days from the Bid/ Issue Closing Date, events affecting the Bidders decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the bidder's ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

**EXTERNAL RISK FACTORS****56. A decline or reprioritisation of the Indian defence budget, reduction in orders, termination of existing contracts, delay of existing or anticipated contracts or programmes or any adverse change in the GoI's defence policies or initiatives will have a material adverse impact on our business.**

Our contracts for defence business segment depend upon the continuing availability of budgets extended to the Ministry of Defence ("MoD"). In 2022-23, the Ministry of Defence has been allocated Rs 5,25,166 crore ([Source:https://prsindia.org/files/budget/budget\\_parliament/2022/Defence%20DFG%20Analysis%202022-23.pdf](https://prsindia.org/files/budget/budget_parliament/2022/Defence%20DFG%20Analysis%202022-23.pdf)). While there is an increase in the total defence allocations over a period of time, the level of defence spending by the GoI in the future is difficult to predict and may be impacted by numerous factors such as the evolving nature of the national security concerns, foreign policy, domestic political environment and macroeconomic conditions. Thus any decline or changes in GoI Entities defence requirements or geo-political situations will have a material adverse impact on our business.

Moreover, the MoD has promulgated the Defence Acquisition Procedure 2020 ("DAP") which has been aligned with the vision of the Government's Aatmanirbhar Bharat (self-reliant India) initiative and to empower the Indian domestic defence industry through 'Make in India' projects. These policies of the GoI have increased competition and we cannot assure you that we will be as competitive as we have been in the past and we will continue to be successfully awarded contracts by the GoI.

Further any change in Government policy like the government of India announced a revision of the rules on Foreign Direct Investment (FDI) in the defence sector may have a material impact on our business. In May, 2001, the Defence Industry sector, which was hitherto reserved for the public sector, was opened up to 100% for Indian private sector participation, with Foreign Direct Investment (FDI) up to 26% both subject to licensing. Further, Department for Promotion of Industry and Internal Trade, Ministry of Commerce & Industry vide Press Note No. 5 (2016 Series), allowed FDI under automatic route upto 49% and above 49% through government route wherever it was likely to result in access to modern technology or for other reasons to be recorded. The Government of India in May 2020 has announced that the FDI limit in Defence Production will be raised to 74% from existing 49% under Automatic Route as part of the reform in defence sector to boost self-reliance ([Source: https://pib.gov.in/PressReleasePage.aspx?PRID=1654091](https://pib.gov.in/PressReleasePage.aspx?PRID=1654091)). Thus any such reforms increasing FDI ceiling in

defence sector will increase competition for us and may have any adverse impact on our defence sector business and its growth.

***57. The extent to which the Coronavirus disease (COVID-19) or outbreak of any other severe communicable disease may affect our business and operations in the future is uncertain and cannot be predicted.***

The outbreak, or threatened outbreak, of any severe epidemic caused due to viruses (particularly COVID19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding COVID-19 and no government-certified treatment is available. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact COVID-19 may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of COVID-19 or its consequences, including downturns in business sentiment generally or in our sector in particular.

***58. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.***

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

***59. Our business is dependent on the Indian and global economy.***

The performance and growth of our business is necessarily dependent on economic conditions prevalent in India and abroad, which may be materially and adversely affected by political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future

slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on our services and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results. As a result, the performance and growth of our business may be dependent on the economic conditions in these regions, and in particular, in India.

**60. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.***

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "**Key Industrial Regulations and Policies.**" beginning on page 137 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations.

**61. *Instability in financial markets could materially and adversely affect our results of operations and financial conditions.***

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in benchmark index of stock exchanges i.e. NSE-NIFTY and BSE-SENSEX. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

**62. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.***

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other

government agency can be obtained.

**63. *If certain labour laws become applicable to us, our profitability may be adversely affected.***

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

**64. *Our performance is linked to the stability of policies and the political situation in India.***

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive Indian governments have pursued policies of economic liberalization and financial sector reforms. The current Government has announced its general intention to continue India's current economic and financial sector liberalization and deregulation policies.

However, there can be no assurance that such policies will be continued and a significant change in the government's policies in the future could affect business and economic conditions in India and could also adversely affect our business, prospects, financial condition and results of operations.

Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

For details in this regards, specific attention are invited to the chapter titled “**Issue Procedure**” beginning on page 287 of the Draft Red Herring Prospectus.

The process of Book Building under the SEBI ICDR Regulations is subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to making a Bid or application in the Issue.

For further details on the method and procedure for Bidding, please see section entitled “**Issue Procedure**” on page 287 of this Draft Red Herring Prospectus.

**Illustration of the Book Building and Price Discovery Process:** Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

#### **World Economic Outlook**

Global economic growth is now expected to be 5.8% this year, a sharp upwards revision from the December 2020 Economic Outlook projection of 4.2% for 2021. The vaccines rollout in many of the advanced economies has been driving the improvement, as has the massive fiscal stimulus by the United States. World GDP growth is expected to be 4.4% next year but global income will still be some USD 3 trillion less by end 2022 than was expected before the crisis hit. USD 3 trillion is about the size of the entire French economy.

Differences in the strength of economic recovery across countries are being driven by the extent of government support to vulnerable workers and businesses, by a country’s dependency on particular sectors such as tourism (**Rebuilding tourism for the future**), as well as by public health and vaccination policies. Trade is also playing a role. Consumers have been spending less on services and more on goods since the pandemic began. The pick-up in merchandise trade has benefitted countries heavily involved in supply chains, particularly pharmaceuticals, medical supplies and IT material.

(Source: <https://www.oecd.org/economic-outlook>)

Monetary authorities across the world have eased monetary conditions with broad-based cuts in short-term policy rates and reserve requirements to support activity and provided emergency liquidity support to stabilize financial markets. Several central banks around the world engaged in unconventional monetary policy interventions in the form of long-term asset purchase programs (for the first time in many EMDEs), relending facilities, relaxation in asset provisioning requirements and supporting credit provision to a wide range of borrowers. The corresponding injections of reserve money into the banking system have been effective in stabilizing bond markets, reducing bond yields, boost equity prices without putting pressure on exchange rates.

### Trend in Global Policy Rates

The deep economic contractions across many countries and heightened uncertainties about the post pandemic global economic landscape, however, may set back long-term growth prospects

## Overview of the Indian Economy

### ECONOMIC GROWTH

COVID-19 pandemic led to disruptions in global economic activity impacting not only the lives but also livelihoods. The Indian industry experienced interlude in business activity leading to slowdown in its performance. With the gradual unlocking of the country coupled with supportive policy initiatives which included easing of supply side bottlenecks through easier access to credit especially, emergency credit line guarantee scheme to MSMEs, relief to the real estate sector, production-linked incentives for 14 champion sectors and other direct tax measures, the industrial growth started to recover. In the past few months, record vaccinations as well as improvement in consumer demand and business confidence have had a positive impact on the performance of the industrial sector. This period also saw a boost to digital infrastructure, structural reforms in telecommunications and big-ticket disinvestment in Air India. The pace of this recovery and further growth is likely to continue due to consistent efforts of the government to bring in various structural, fiscal and infrastructural reforms in addition to a slew of measures/ schemes like the production linked incentive scheme (PLI) to support industries .

The gross value addition at constant prices (GVA) in the industrial sector grew at the compound annual growth rate (CAGR) of 4.53 percent between 2011-12 and 2019-20 while total GVA grew by CAGR of 5.63 percent over the same period. The share of the industrial sector in the nominal GVA(at current prices) was 25.9 percent in 2020-21. With the industrial sector recovering and expected to grow at 11.8 percent, as per advance estimates for 2021-22 by National Statistical Office, industry's share is expected to increase to 28.2 percent.

Manufacturing, with an average share of 16.3 percent in nominal GVA over the last decade, has a dominant presence within the industrial sector. In 2020-21, the share of manufacturing fell to 14.4 percent but is expected to improve to 15.3 percent in 2021-22. The share of electricity has been showing an increasing trend since 2012-13 and was 2.7 percent 2020-21. Figures 1 and 2 show value added in the industrial sector and growth respectively. In 2020-21, electricity, gas, water supply and other utility services was the only sub sector that had experienced a positive growth of 1.9 percent (table 1). In 2021-22, the manufacturing sector is expected to grow by 12.5 percent, mining and quarrying by 14.3 percent, construction by 10.7 percent and electricity, gas and water supply by 8.5 percent. This improvement is on the back of industrial contraction in the corresponding period of the last financial year

### Defense Industry Scenario

India accounts for 3.7% of the global military spending, making it the third highest military spender in the world. The defence expenditure constituted 2.9% of India's total GDP with approximately \$72.9 billion spent on defence in 2020. Under the Field Artillery Rationalization Plan - 1,580 towed guns, 100 tracked guns, 814 Mounted Gun System will be required in India.

With the growing demand in the defence sector the government has identified it as one of the core areas to boost 'Atma Nirbhar Bharat or Self-Reliant India. The value of exports of defence items including major items in FY 2014-15 and 2020-21 was INR 1,940.64 crore and INR 8,434.84 crore respectively. The Government has also spelt out its vision of achieving a turnover of \$25 bn including export of \$5 bn in Aerospace and Defence goods and services by 2025.

To support defence modernisation, in the budget 2021-22 the defence capital outlay has been increased by 18.75% from the preceding year. This is the highest ever increment in the last 15 years.

The government of India has called for increased participation of defence manufacturing companies from the private sector to cater to the growing demand. The opening up of the Indian defence industry also paves the way for foreign original equipment manufacturers to enter strategic partnerships with defence equipment manufacturers in India.

The government aims to ensure transparency, predictability, and ease of doing business by creating a robust eco-system and supportive government policies. Towards this end the government has taken steps to bring about de-licensing, de-regulation, export promotion and foreign investment liberalisation. To meet export requirements, a draft Production and Export Promotion Policy (DPEPP) 2020 has also been formulated.

The Government of India has enhanced FDI in Defence Sector up to 74% through the Automatic Route for companies seeking new defence industrial license and up to 100% by Government Route.

To provide impetus to self-reliance in defence manufacturing it is necessary to develop a robust eco-system and supportive government policies.

## **DPEPP 2020**

Ministry of Defence formulated a draft Defence Production and Export Promotion Policy 2020 (DPEPP) to position India amongst the leading countries of the world in defence and aerospace sectors

The 8 Pillars DPEPP 2020 are:

- Reform procurement ecosystem
- Indigenize and support MSME and start-ups
- Optimize resource allocation
- Promote investments, FDI and ease of doing business.
- Promote innovation and R&D
- Encourage and reform DPSUs and OFB
- Provide quality assurance and testing infrastructure
- Promote exports

## **Defence Acquisition Procedure 2020 (DAP)**

The government released Defence Acquisition Procedure 2020 (DAP) to transform India into a global manufacturing hub with a focus on indigenously designed, developed, and manufactured weapon systems.

Under the DAP'20 offset guidelines have been revised to incentivize discharge of offsets. Preference would be given to manufacture complete defence products over components or sub-parts.

The offset guidelines have also been revised, wherein preference will be given to manufacture of complete defence products over components and various multipliers have been added to give incentivisation in discharge of offsets.

To engage better with foreign OEMs and enhance indigenous content, the following categories have been provided for procurement:

- Buy (Indian-IDDM)
- Buy (Indian)
- Buy & Make (Indian)
- Buy (Global-Manufacture in India)
- Buy (Global)

## **Positive Indigenization List**

Under the 'Atmanirbhar Bharat' campaign of Govt of India, Ministry of Defence (MoD) has prepared a list of 209 items, Positive Indigenization List, for which there would be an embargo on the import beyond the timeline indicated against them. This would offer a great opportunity to the Indian defence industry to manufacture these items.

## **Strategic Partnership Model**

In the defence sector, the 'Strategic Partnership (SP)' Model envisages establishment of long-term strategic partnerships with Indian entities through a transparent and competitive process, wherein they would tie up with global Original Equipment Manufacturers (OEMs) to seek technology transfers to set up domestic manufacturing infrastructure and supply chains.

## **Demand for Grants 2022-23 Analysis Defence**

The Ministry of Defence frames policies on defence and security-related matters, and ensures its implementation by the defence services (i.e. Army, Navy and Air Force). In addition, it is responsible for production establishments such as defence public sector undertakings, research and development organisations, and ancillary services that assist the defence services, such as the Armed Forces Medical Services.

**Overview of finances**

In 2022-23, the Ministry of Defence has been allocated Rs 5,25,166 crore. This includes expenditure on salaries of armed forces and civilians, pensions, modernisation of armed forces, production establishments, maintenance, and research and development organisations. The allocation to the Ministry of Defence is the highest (13%) among all ministries of the central government.

**Budget Announcements**

In order to reduce imports and promote self-reliance, the Budget for 2022-23 proposed that 68% of the defence capital procurement budget will be earmarked for the domestic industry. This has been increased from 58% in 2021-22. Defence research and development will be opened up for industry, start-ups and academia. Private industry will be encouraged to take up design and development of military platforms and equipment in collaboration with Defence Research and Development Organisation and other organisations

**Figure 1: Budget of Ministry of Defence (2012-13 to 2022-23) (in Rs crore)**

**Composition of defence budget**

In 2022-23, the allocation made to the Ministry is 4.4% higher as compared to the revised estimate of 2021-22. This is broadly in line with the 4.6% growth in overall central government expenditure in 2022-23. Capital outlay is estimated to see the highest increase of 10% followed by 8% for salaries and 2% for pensions.

Expenditure on salaries and pensions forms the largest portion of the defence budget (Rs 2,83,130 crore which is 54% of the defence budget). Capital outlay of Rs 1,44,304 crore, forms 27% of the defence budget. The remaining allocation is towards stores (maintenance of equipment), border roads, research, and administrative expenses.

**Table 2: Defence budget allocation (in Rs crore)**

**Analysis of the three armed forces**

In 2022-23, the total allocation of the three forces (including pensions) is Rs 5,25,166 crore which is 94% of the total defence budget. Out of this, allocation for Army accounts for 58% of the defence budget followed by the Air Force at 19% and Navy at 16%. The expenditure on Army, Navy, and Air Force is in the ratio 3.5:1:1.2. The Army has the highest pension obligations. Excluding pensions (which is a cost for former staff and does not contribute to present or future defence preparedness), the expenditure of Army, Navy, and Air Force are in the ratio 2.5:1:1.1. The table below shows the defence budget allocation amongst the three forces.

**Table 5: Defence budget allocation (in Rs crore)**

### Expenditure on modernization of Navy

**Figure 7: Expenditure on modernisation of Navy (in Rs crore)**

Between 2012-13 and 2022-23, funds for modernisation of the Navy have increased at an annual average rate of 10%. Note that between 2012-13 and 2018-19, Navy's modernisation expenditure increased an average annual rate of only 3% while between 2018-19 and 2022-23, it increased at a significantly higher rate of 23%. In 2022-23, Navy's modernisation expenditure is expected to increase by 4% over the revised estimate of 2021-22. The modernisation expenditure of the Navy as a percentage of total defence expenditure decreased from 7% in 2012-13 to 5% in 2018-19. It has since recovered to reach 9% in 2021-22 and 2022-23.

### Defence Procurement

Defence procurement refers to the acquisition of defence equipment, systems and platforms which is undertaken by the Ministry of Defence, and the three armed forces. In 2016, the government released the Defence Procurement Procedure (DPP) which has been revised and replaced by the Defence Acquisition Procedure (DAP). The Committee on Estimates (2018) noted that procurement and acquisition of defence hardware is a long-drawn process which involves a large number of stakeholders

Issues of coordination between such large number of stakeholders sometimes lead to avoidable delays.<sup>16</sup> For instance, the Comptroller and Auditor General (CAG) of India observed that in case of procurement of equipment for the air force, it took three to five years to sign the contract, and another three to five years to complete the delivery.<sup>15</sup> The Committee on Estimates observed that such delays adversely impact the defence preparedness of India. It recommended creating an integrated institutional mechanism to reduce the delays in the procurement process

### Indigenisation

In order to promote indigenisation and domestic production of defence equipment, the government has notified 209 items which will be procured from indigenous sources. These items, notified through two separate lists in August 2020 and May 2021, are placed under import embargo in a staggered manner. In August 2020, the government estimated that between April 2015 and August 2020, the armed forces had spent close to Rs 3.5 lakh crore on the items that were put under import embargo.<sup>19</sup> It estimated that contracts worth around four lakh crore rupees will be placed with the domestic industry within the next five to seven years.

The table shows the procurement of defence equipment by the three armed services imported from foreign vendors and acquired from indigenous sources. Between 2015-16 and 2018-19, the percentage of defence equipment acquired from foreign vendors increased to up to 50%. It has reduced since then. In the first six months of 2021-22, the armed forces had spent Rs 62,975 crore on procurement of defence equipment out of which 34% of the amount has been spent on procurement from foreign sources

**Table 9: Procurement from domestic and foreign sources (in Rs crore)**

Year	Total Procurement	Indian Vendors	Foreign Vendors	% Foreign vendors
2015-16	61,914	39,752	22,163	36%
2016-17	69,080	40,545	28,534	41%
2017-18	72,437	41,892	30,545	42%
2018-19	75,491	37,728	37,764	50%
2019-20	96,438	54,759	41,679	43%
2020-21	75,283	50,898	24,385	32%

Note: Figures for 2020-21 are up to January 2021.

### Low capacity of domestic industry

A key variable that would help to determine the potential of indigenisation of defence procurement is the production capacity of the domestic industry. Table 10 shows the annual turnover of defence public sector undertakings (DPSUs), other public sector undertakings (PSUs), and private companies in the defence sector over the last few years. It also compares the total domestic production of defence equipment to the overall budget for capital outlay of the armed forces.

**Table 10: Total production versus capital outlay on defence services (in Rs crore)**

Year	Private companies	Defence and other PSUs	Total Production	% Capital outlay budget
2017-18	15,347	63,473	78,820	90%
2018-19	17,350	63,770	81,120	90%
2019-20	15,894	62,676	78,570	74%
2020-21	17,292	67,375	84,667	64%

Note: Capital outlay includes Coast Guard Organisation and Border Roads Development Board.

Note that after 2018-19, the share of total production by the domestic defence industry has fallen as a proportion of capital outlay for the armed forces. In 2020-21, total production by the domestic defence industry amounted to 64% of the overall budget for capital outlay. Decline in production of defence equipment by the domestic industry as a percentage of funds available for capital outlay with the armed services may increase the reliance of the armed forces on imports. The Standing Committee on Defence (2021) had recommended that steps should be taken so that ordnance factories, DPSUs, and private industries work in coordination.

This will help to promote import substitution of defence products and expand the export potential of these entities. An Expert Committee (2015) noted that majority of defence material manufacture in India is in the public sector. In 2020-21, private companies contributed to only 20% of the overall production of the domestic defence industry. This ratio has broadly remained the same since 2017-18. The Expert Committee recommended that the government should support the private defence sector on a long-term basis.

This would require both long-term projections and stable current orders along with hand holding in various stages of the procurement cycle. With effect from October 1, 2021, the central government dissolved the Ordnance Factory Board (OFB) and transferred its operations to seven new DPSUs. OFB was engaged in the production of arms, ammunitions, weapons, and defence equipment. It operated under the administrative control of Department of Defence Production in the Ministry of Defence. According to the government, this is expected to enhance the functional autonomy and efficiency of these entities. The Ministry of Defence has set a target of achieving a turnover of Rs 1.75 lakh crore by 2024 for indigenous manufacturing of aerospace and defence goods and services. This target includes exports worth Rs 35,000 crore.

**Global Dairy Equipment Manufacturing Industry**

**Major Milk Processing Global Companies**

New Zealand exports almost 49 % of the total dairy products manufactured in the world. Germany ranks second in the global dairy products export, with a share of about 18% of global dairy products. Further, Netherlands and France have almost same quantity of global; export which values US\$ 1.9 and US\$ 1.5Billion respectively. United States exports dairy products worth 5.50% of the world’s total dairy product manufactured.

**Major Importing Countries with quantity & Value of Dairy Products in 2016**

Germany ranks first in the import of dairy products which was US\$ 5,991 Million in 2016, followed by Italy with a value of US\$ 3,488. China ranks third whose import was valued at US \$ 3,371 Million in 2016. Netherland and France ranked fourth & fifth respectively in the import of dairy products in 2016.

**Indian Scenario**

**The Dairy Sector**

Dairy is the single largest agricultural commodity contributing 5 per cent of the national economy and employing more than 8 crore farmers directly. India is ranked 1st in milk production contributing 23 per cent of global milk production. Milk production in the country has grown at a compound annual growth rate of about 6.2 per cent to reach 209.96 million tonnes in 2020-21 from 146.31 million tonnes in 2014-15

## Milk Production

India is the largest milk-producing country in the world by a wide margin over the United States, the second-largest producer. India is unique among the major milk producers because more than half of its production is from water buffalo, rather than cattle (table 1). India's dairy herd, also the largest in the world, consists of the largest herds of both dairy cattle and water buffalo

USDA, the Food and Agriculture Organization of the United Nations (FAO), and the Government of India (GOI) all provide similar, but different, estimates of total Indian milk production. The USDA data (fig. 1) indicate that production has grown consistently at an annual rate of about 4.2 percent. The official Indian production estimates for milk, on which the USDA data are based, are collected through the Integrated Sample Survey commissioned by India's Department of Animal Husbandry, Dairying, and Fisheries (DAHDF) and conducted by State Governments. According to the data, although India's water buffalo herd is smaller than the cattle herd, water buffalo milk is the largest and fastest-growing component of milk production. Water buffalo milk now accounts for about 53 percent of total milk output and production is growing at about 4.4 percent annually, compared with 4.1 percent annual growth in cattle milk.

## Milk Marketing

According to GOI estimates, nearly half of India's milk production is consumed by the household in which it is produced and is not marketed (fig. 14). Milk that is not marketed is either consumed in unprocessed fluid form or is converted in the home into traditional products like butter, ghee (clarified butter), paneer (a type of cottage cheese), and curd (yogurt)

The bulk of the milk sold outside the household is marketed as either unprocessed (not homogenized or pasteurized) fluid milk or processed products manufactured by small-scale, private vendors. These traditional milk supply chains are prevalent throughout rural and urban India, and typically involve a chain of intermediaries who collect milk from producers for retail distribution within a small area. It is estimated that only about 15 percent of the milk produced is marketed, in roughly equal shares, through formal cooperatives or private firms, as either processed fluid milk or other processed products.

**Dairy Cooperatives.** India's network of farmer-owned dairy cooperatives, organized using the "Anand model" that originated in the State of Gujarat prior to independence, has been one of the most successful cooperative movements in India and the key early driver of dairy development in India. In 2011, the dairy cooperative now included 22 State milk marketing federations, 183 district milk producer unions, and nearly 156,000 village-level cooperative societies with a total membership of about 15.1 million dairy farmers. Currently available data indicate that there were 263 cooperative dairy plants with a total daily processing capacity of about 43 million liters of fluid milk (table 9), with the States of Gujarat, Maharashtra, Karnataka, and Tamil Nadu accounting for large shares of cooperative-owned processing capacity. The cooperative plants process fluid milk, and many also manufacture other value-added products (Planning Commission, 2012).

**Private Dairy Processing:** Prior to 1991, investment in dairy marketing and processing facilities was, with a few exceptions, restricted to the cooperative sector. In 1991, dairy processing was delicensed (opened to private investment without prior approval), leading to the expansion of private investment in the sector. Private-sector capacity is now expanding faster than the cooperative sector. Official data indicate that there were about 765 private

processing plants in 2011, with a daily capacity of about 73 million liters, about 70 percent more than cooperative capacity (table 9). Since the private and cooperative sectors now handle roughly equal shares of milk output (fig. 14), these data suggest a large amount of excess capacity has been developed by private investment. The largest concentrations of private capacity are in the northern State of Uttar Pradesh—also the largest milk producer—and the western State of Maharashtra, but with substantial capacity in the other major milk-producing States of Punjab, Andhra Pradesh, Madhya Pradesh, and Tamil Nadu.

### Various Schemes & Initiatives by Government of India and NABARD for Expanding Milk Processing in the country

For creating infrastructure for strengthening production of quality milk, procurement, processing and marketing of milk and milk products, the Central Government has been implementing several schemes. Some of the key schemes and their impacts have been mentioned in brief.

#### National Programme for Dairy Development (NPDD)

Department of Animal Husbandry & Dairying (DAHD) is implementing NPDD with an objective to:

- to create and strengthen infrastructure for production of quality milk including cold chain infrastructure linking the farmer to the consumer
- to create and strengthen infrastructure for procurement, processing and marketing of milk
- to create training infrastructure for training of dairy farmers
- to strengthen dairy cooperative societies/Producers Companies at village level
- to increase milk production by providing technical input services like cattle feed, mineral mixture, etc.
- to assist in rehabilitation of potentially viable milk federations/unions;

The NPDD focuses on creating and strengthening of infrastructure for production of quality milk, procurement, processing and marketing of milk & milk products by the State agencies like state cooperative dairy federations and District Cooperative Milk Producers' Union.

DAHD has received 164 proposals from various state governments under NPDD during March 2014-February 2020. As on 25.02.2020, 129 new projects have been approved in 28 States and 2 UTs with total outlay of Rs 1535 crore (Central Assistance Rs 1249 crore) during 2014-15 to 2019-2020

**Dairy Processing and Infrastructure Development Fund (DIDF):**

A large number of dairy processing plants with India's Dairy Cooperatives were commissioned during Operation Flood, which came to an end in 1996. Majority of these plants have never been expanded or modernised since decades. These plants mostly have obsolete technologies, which may not be energy efficient as compared to currently available modern technologies. In order to improve efficiencies as well as increase production of products with higher value addition, replacement and modernisation of these dairy plants were much needed.

Considering the interests of both producers and consumers, Dairy Cooperatives pass on maximum share of sales realisation (generally about 75-80%) to milk producers and make available safe milk to the consumers at an affordable price. Cooperatives are unable to invest in modernisation or expansion of dairy processing infrastructure since they have limited resources due to relatively low profit margins. For ensuring that Dairy Cooperatives remain competitive for the sustained benefit of farmers, a dedicated Dairy Processing and Infrastructure Development Fund under National Bank for Agriculture and Rural Development (NABARD) was announced in the Union Budget (2017-18) with a total corpus of Rs 8000 crore over a period of three years (2017-18 to 2019-20). Rs 2001 crore was as end borrower's contribution, and interest subvention of Rs 864 crore was part of DIDF. The major components of the DIDF includes creation, modernisation, expansion of milk processing infrastructure, manufacturing facilities for value-added products, setting up of chilling infrastructure and electronic milk testing equipment at village level and NDDDB is the implementing agency for DIDF

The Cooperative Milk Unions, State Cooperative Dairy Federations, Multi-state Milk Cooperatives, Milk Producer Companies and NDDDB subsidiaries are the eligible borrowers under DIDF. Assistance under the scheme is available in the form of loan with an interest rate of 6.5% per annum.

The government had approved an upward revision of interest subvention from current level of 2% to upto 2.5% under the DIDF with a revised outlay of Rs 11,184 crore<sup>17</sup>. The scheme envisages to have interest subvention component of Rs 1167 crore to be contributed by DAHD during 2018-19 to 2030-31 with a spill over into the first quarter of 2031-32. The scheme also has a loan component of Rs. 8004 crore to be contributed by NABARD. Rs. 2001 cr shall be contributed by borrowers and Rs 12 crore would be jointly contributed by NDDDB and National Cooperative Development Corporation (NCDC).

**Impact of DIDF:**

- 95 Lakh milk producers will be benefited by covering 50,000 villages.
- Establishment of 28000 Bulk Milk Coolers with 140 LLPD as additional milk chilling capacity.
- Creation of additional 210 MTPD milk drying capacity.
- Modernization, expansion and creation of Milk Processing capacity of 126 LLPD.
- Creation of Infrastructure of 59.78 LLPD capacity for Value-Added Dairy products to ensure remunerative prices to milk producers.
- 28000 Milk Testing Equipment to check adulteration in milk.

**Chilling infrastructure created at village level**

Milk being highly perishable and considering the tropical climate of India, handling of raw milk is the most critical activity of entire dairy value chain. Poor handling of raw milk at village level with non-existent or inadequate chilling facilities impacts subsequently the quality and safety of processed milk and milk products. Therefore, to maintain the quality and safety of milk, it is essential to maintain a proper cold chain from the time of milk collection till it reaches the processing facility. In case of organised sector, milk from individual producers is collected at the village dairy cooperative society/ milk pooling point in either cans or poured directly in bulk milk cooler. The chilled milk collected is thereafter transported in insulated tankers directly to a dairy plant for processing or a chilling centre, where it is chilled and then transported to a dairy plant in insulated tankers

Collection of milk at DCSs/ milk pooling point directly in BMCs results in much superior quality of milk than chilling it at the Chilling Centres, as in the former case the waiting time at the DCSs and transportation time are saved. This result in bacterial growth in the milk is restricted at the point of milk production reducing souring and other quality deterioration of milk. This improves quality of milk received at the Dairy Plant which leads to manufacturing of quality milk & milk products.

### Processing infrastructure

The Chilled milk is transported in insulated tankers to the Processing Plants where it is pasteurised and packed to be sold as packed liquid milk and processed further into different milk products

At present, most of the milk processing plants with Cooperatives are old and majority of these plants have never been expanded and/or modernised. These plants are operating with old technology, which may not be energy efficient in comparison to available modern technologies. Therefore, there is urgent need to create/ upgrade/ modernise the milk processing infrastructure with the Cooperatives. Total milk processing infrastructure available with organised sector is indicated

### Dairy Equipment Manufacturing Industry

The Indian dairy sector has witnessed a phenomenal growth where milk production today stands at 155.5 million tonnes per annum or 4620 litres per day (LLPD) and marketable surplus is 52% i.e. 2400 LLPD. The present chilling and processing capacity can handle only 757 LLPD and 1396 LLPD respectively. Further, 60% of the existing dairy plants are over 30 years old and needs modernisation with newer technology in plant & machinery, energy efficient systems, new packaging technology, efficient energy system etc

The proposed National Action Plan aims at meeting the projected demand of about 254.5 million tonnes by 2021-22 and 300 million tonnes of milk by 2023-24 and envisages the share of the organised sector in milk processing rising from the current 30 per cent to about 65 per cent. To meet this 65 per cent level by 2021-22 and 2023-24, hitech processing facilities would be required as the objective of National Dairy Plan is not only to increase the milk production but also to bridge the wide gap between milk production and processing. Statistics indicate an exponential demand for dairy equipment's in the coming years with completely automated dairy processing plants and processing lines for new products. Emphasis will be on energy efficient equipment's. Technology, price, delivery and performance standards would determine the market for any dairy equipment. Other important factors would be upgrading, add-ons and after sales service. Most of the dairy units are now looking into the improvement of sanitary and hygienic conditions by adopting ISO certification as well as HACCP programmes. The Sanitary and

Phyto-Sanitary (SPS) measures are becoming mandatory for export and serious efforts have to be made to achieve the international standards of quality

India's recent progress in dairy equipment manufacturer has been remarkable. Though it still imports advanced machinery from regions like Europe and Italy around 70-80% of machinery is now being produced in India. However, dairy equipment industry in India is still confined to certain categories such as road milk tankers, storage tanks, bulk milk coolers, small homogenisers, milk pasteurisers, milk vending machines and liquid milk packaging system etc. Equipment for packaging of butter, cheese, paneer and other traditional products needs attention with an eye on the industry's need for small and large-scale operations.

Infrastructure Gap by 2021-22 and 2023-24

The enhanced milk procurement by organised sector would require creation of additional chilling capacities, milk processing infrastructure along with additional drying capacities & dairy products manufacturing infrastructure and Feed & Feed supplement infrastructure.

As on March 2016, total chilling capacity with Dairy Cooperatives, Producer Companies and Private is 46.4 Million LPD, 10 Million LPD and 29.3 Million LPD respectively. An additional chilling capacity of 212 Million LPD and 349.3 Million LPD would be required by 2021-22 and 2023-24 respectively.

Presently Dairy Cooperatives, Producer Companies and Private dairies have milk processing capacity of about 66 Million LPD, 2.5 Million LPD and 73 Million LPD respectively. Most of the processing capacities with Dairy Cooperatives are functioning on age old technology and need expansion & renovation in the context of expanding production & demand. In view of above, it becomes imperative that the dairy plants with dairy cooperatives be refurbished with new energy saving technology along with creation of 226.9 Million LPD and 392.4 Million LPD processing infrastructure by 2021-22 and 2023-24 respectively.

In addition to above, additional drying capacity of 3083 MTPD and 5439 MTPD and infrastructure for Value Added Products of 10335 MTPD and 12616 MTPD capacity would need to be created by 2021-22 and 2023-24 respectively.

The increased milk production would require support in terms of Feed & Feed Supplements. Therefore, Cattle Feed Plants of 4222 MTPD and 5638 MTPD Capacity would also need to be installed to provide input services to farmers at village level by 2021-22 and 2023-24 respectively.

### **Challenges**

Though India has become the largest milk producing country in the world, still this sector faces numerous challenges, which hinder the optimum growth in milk production, access of milk producers to organised market, processing of milk & Value Added Products and availability of quality milk & milk products to consumers. Some of the major challenges being faced by Indian Dairy sector are given below:

- Low Productivity of Indian bovine ·
- Imbalanced feeding to animals ·
- Limited access of milk producers to organized sector ·
- Age old infrastructure operating on obsolete technology ·
- Lack of organised credit system ·
- Lack of manufacturing facilities for Value Added Products. ·
- Lack of efficient chilling infrastructure at village level ·
- Lack of penetration in smaller cities/ towns in terms of milk marketing ·
- Lack of efficient cold chain distribution network.

### **OVERVIEW**

We are engaged in the diversified business of manufacturing defence application products, dairy equipment products and kitchen equipments. We have entered into various licensing agreement with Defence Research and Development Organisation (“DRDO”) for obtaining the know-how and rights which enable us to manufacture and supply specialized defence application products for the Indian Armed Forces. Under defence application, we provide a wide array of high performance products for naval applications and other utilities such as ship building steel bulb bar, special steel alloy bricks used as ballast weight for critical applications, super alloys weld consumables like welding wire, flux and electrodes, food container and improved space heating device, which is also known as bukhari.

In 1997, we started our operations in the dairy equipment manufacturing as a partnership firm, M/s Krishna Industries and over the years our company has developed a wide range of dairy equipment products such as stainless steel milk Cans, Milk Cooling Tanks or Bulk Milk Coolers, Milking Machine, Cow Brooming Brush and Robotic Milk Collection Unit. Our Company achieved a new milestone in 2015 in the dairy industry after acquiring patent for invention of automated milk analysis and collection apparatus called Robotic Milk Collection Unit (RMCU) upto to the year 2035. The developed product works like a kiosk for Milk Collection for Milk Society, and it analyzes the farmer milk not only for Fat & SNF but also tests the milk for adulteration. The RMCU ensures only top-quality milk is collected by the Milk Society and below par milk or adulterated milk is rejected.

In the year 2010, we stretched our operations into the business of manufacturing Kitchen Equipment and commenced manufacturing of Bulk Cooking Equipment like Rice Cauldron, Dal Cauldron, Braising Pan, Distribution Vessels, Rice Chute, Dal Storage Tank, which are used by organizations which run Midday Meal Programs where cooking is done for up to 1,00,000 meals a day. Presently we are supplying such products to The Akshayapatra Foundation.

In the year 2006, our Company attempted for the first time to develop ship Building Steel Bulb Bars which was a very critical component for the Indian Navy’s indigenization program and the attempt successfully yielded the result in the trial batch exactly as per the requirement of the Indian Navy. We received appreciation certificate from Defence Metallurgical Research Laboratory (DMRL), Hyderabad for successfully carrying out the project of manufacturing the indigenized steel Bulb Bars which are used in hull construction of Naval warships. The project was of national importance involving import substitution.

Over the years our Company was awarded Transfer of Technology for manufacture and sale of various defence application products to be supplied to Indian Armed forces like: 5.5 Ltr Plastic Food Container for Extreme Cold Condition, Space Heating Device (Bukhari) used at high altitude in very Cold conditions, Man Mounted Cooling

System to be used in extremely Hot Conditions as well as cold conditions, Solar Snow Melter to be used at high altitude, Improvised Explosive Device (IED) Containment Vessel to be used for protection and Mounting & support Equipment for Camouflage Net. We have successfully developed the 5.5 ltrs Plastic Food Container, Improved Space heating device or Bukhari and Super alloys weld consumables like Welding Wire, flux and Electrodes and are ready to market the same. We are now in the stage of developing Man Mounted Cooling System, Solar Snow Melter, Improvised Explosive Device (IED) Containment Vessel and Mounting & support Equipment for Camouflage Net.

We have received developmental order from Indian Navy for developing Super Alloy Weld Consumables which will be used in critical applications, wherein the delivery of first lot is expected to be completed in last quarter of this financial year. Lately in the year 2021 we successfully developed and delivered the first order for Special Steel Alloy Bricks used as Ballast weight for critical applications of the Indian Navy.

In the year 2020 our Company has also forayed in a new business vertical of manufacturing and marketing of Homeland & Security products, wherein we plan to manufacture products like Modular Vehicle Barrier, Automatic tyre Killer, Multi-purpose Launcher and Long Range LED Searchlight used by the Indian Armed Forces, for which we have entered into agreements with foreign vendors for import of critical component required to manufacture/assemble these products in our factory. We propose to sell such product under MAKE IN INDIA Program.

We have two manufacturing facilities in Gujarat, located at Kalol and Halol district near Vadodara. Our manufacturing facilities are accredited with ISO 9001:2015 quality management system as manufacturer and exporter of stainless-steel milk cans, milking machine, milk coolers, dairy and kitchen Equipment, milk testing Equipment, Galley Equipment, shipbuilding steel bulb bars, modular vehicle barrier & automatic tyre killer.

We have diversified our products under various business verticals, mainly due to our strong research and development (“R&D”) and technological capabilities. Our R&D capabilities include product design, product engineering, product simulation, prototyping and testing. Our R&D activities are mainly undertaken at our manufacturing facilities. Our research activities are focused on creating new products and solutions which are customized to meet customer expectations and end-user preferences and also improving our production processes and improving the quality of our existing products. With our R&D capabilities, we are currently developing several new products for some of which we have secured orders as well.

We derive most of our revenues under the contracts from the Government sectors (both central and state) and associated entities. Our Dairy customer base includes The Panchmahal District Co-operative Milk Producers' Union Ltd, Hatsun Agro Products Limited, Delicia Foods India Pvt Ltd, Thanjavur Dist Co-Op Milk Prod. Un. Ltd (Aavin Federation), Amritsar Dist Co-Op Milk Prod Union Ltd (Verka Federation), Pune Zillha Sahakari Dudh Utpadak Sangh Limited (Katraj), Bihar State Milk Co-Operative Federation Ltd (COMFED) etc and various other milk cooperative societies in India and the Defence customer base includes Ministry of Defence, Mazagaon Dock Shipbuilders Limited, Garden Reach Shipbuilders & Engineers Ltd, Goa Shipyard Limited.

Our core competencies include product prototype design and development, functional testing, validation and verification. The transfer of technology awarded to our company for various defence application products and the focus of the Indian government to enhance indigenization has endowed us with greater exposure and opportunity to benefit from the make-in-india programme.

Our range of dairy equipment products have been benefitting dairy farmers in many ways like, savings on milk samples for testing, automatic milk deposit ensuring less human dependency for milk collection, detect milk adulteration, organized and structured data base for farmers and milk societies, efficient milk production, proper, healthy and odorless transportation of milk, preservation of milk for longer duration etc. The entrusted benefits thus increase the dependency and usage of our products for effective and efficient milk output. Moreover, the patent acquired by our company for invention of Automated Milk Analysis and Collection Apparatus gives us an additional edge to exclusively manufacture one of our products, Robotic Milk Collection unit. We have also successfully delivered Kitchen Equipment Products like: Rice Cooker, Dal Cauldrons, and Distribution Vessels to organizations like The Akshay Patra Foundation. We believe that offering high-quality products and operational execution focused on continual improvement supports our ability to offer a wide range of products and solutions.

We therefore benefit from diversification of our business by creating economic buffer, thereby minimizing the risk of loss and consistently generating returns. For details of our Product Portfolio, please see **“Our Products Portfolio”** on page 123

***Precision engineering expertise with complex product manufacturing capability***

We have comprehensive in-house capabilities of developing and manufacturing defence application products, dairy equipments and kitchen equipments. Our Company develops and manufactures a wide range of critical assemblies and precision components with close tolerances through its precision machining, assembly, and specialized fabrication facilities, for onward usage by our customers in the defence sectors and dairy sectors of India. All raw materials procured for manufacturing our products are sourced from trusted vendors and our quality control team applies stringent quality measurements at every manufacturing stage to ensure low rejection rate such that our finished product confirms to the exact requirement of our customers and successfully passes all validations and quality checks.

As we have secured orders from the government sectors for Indian Armed Forces and dairy societies in the past, and have been able to deliver successfully on these mandates, we believe that we are well positioned to capitalize on this opportunity and to take advantage of future orders placed by the Indian public sector undertakings working for Indian Armed Forces and dairy farms and societies.

Given our operations are specialized, our manufacturing facilities also employ extensive and stringent quality control mechanism at various stages including that of material issue and manufacturing process, to ensure that our finished product confirms to the quality and traceability requirements of our customers. Owing to the critical end applications of our products and such stringent quality requirements, we believe it becomes very difficult for new players to get qualified for the projects we undertake.

***Strong R&D capabilities with a focus on innovation***

In order to enhance our product offerings, we have leveraged our adaptability and manufacturing agility by continually investing in the Research and Development activities of the company over the years. We have experienced and qualified team of Engineers who help us develop complex products and assembly. We believe that our R&D capabilities have enabled us to keep abreast of technological developments in the precision manufacturing industry thereby allowing us to have a focused approach on consistently upgrading the technology and the processes used in the manufacture of our products.

We place strong emphasis on R&D which has helped us develop a wide range of products in the defence and dairy sector. Over the years our R&D team has successfully developed defence application products like: bulb bars, bhukhari, food containers, super alloys weld consumables like welding wire, flux and electrodes, special steel alloy bricks used as ballast weight for critical applications etc. for Indian Armed Forces. In the dairy sector we have successfully developed products like: Solar BMC where the milk union can save expenses from electricity, Robotic Milk Collection Unit where automatic milk collection and analysis can be facilitated, etc. Our R&D team is consistently dedicated to expand our product portfolio by developing more products both for defence and dairy sector in India.

***Long Standing Relationship with our customers***

While the bids for the projects in the defence sectors are invited by issuing tender enquiries, the qualification process for securing such tenders is extremely stringent as there is no scope for faults in such sectors. We are registered as capable producers of defence stores with Directorate General of Quality Assurance and Directorate of Quality assurance (Naval). These registrations along with our past experience in the supply of our products, ability to meet specific technical requirements of our customers, reputation for quality and safety features present in our products,

financial strength, and the price competitiveness of our offerings, has not only strengthened our position in the market but also has enabled us to establish and maintain relationships with our customers.

We have been in the business of manufacturing the dairy equipment products since the last two decades and have successfully developed and supplied quality products to our customers. We strive to understand our customers' specific business needs and provide products to meet their requirements. Our ability to provide quality products as per the customer specification, and our consistent customer servicing standards has enabled us to increase our customers' dependence on us.

We believe the engineering capability of our Company, evolved over decades, has enabled us to consistently offer quality complex precision manufactured components and assemblies, within stipulated timelines and at reasonable cost in most cases, allowing us to forge a robust relationship with our customers.

### ***Experienced and Qualified Management and Employee base***

We have an experienced and qualified management team led by our Promoter and Managing Director, Mr. Ankur Ashwin Shah who is a Bachelor of Engineering with overall work experience of around 22 years. Our Whole Time Directors, Mr. Sandeep Ramrao Kadam is a Bachelor of Engineering with overall work experience of around 25 years, and Mr. Suwendu Banerjee is a Bachelor of Science with overall work experience of around 25 years. Thus we are well placed to capitalize the knowledge and experience of our management team which has been instrumental in growth of our Company. Our management team has substantial experience in the sectors which we serve, which enables us to capture market opportunities, formulate and execute business strategies, manage client expectations as well as proactively respond to changes in the market conditions. Moreover the independent directors on our Board, Mr. Divyakant Ramniklal Zaveri and Mr. Jaykumar Toshniwal are Chartered Accountants with both having experience of around 45 years and 35 years respectively. Their advisory services and inputs are a value addition to our performance, compliance and overall operations.

Each business vertical is being managed by experienced and hands-on segment heads having in-depth technical and industry knowledge of the segments that we cater to. These business heads are instrumental in establishing and maintaining relationships with our customers. Our mid-level management is supported by our trained personnel and skilled workers who benefit from our regular in-house training initiatives. We therefore believe that our qualified management and employee base have enabled us to extend our operating capabilities, improved the technical quality of our products and facilitated our growth in the industry.

## **OUR BUSINESS STRATEGIES**

### ***Continue to strengthen our existing product portfolio and diversify into products with attractive growth and profitability prospects***

We seek to leverage our capabilities, including our manufacturing facilities and quality control practices, to further expand our product portfolio in the existing segments and also enter new business segments. Currently we are manufacturing various kinds of products catering to the defence sector & the dairy and kitchen equipment sector. We intend to enhance our capabilities and hence grow value chains to supply critical and differentiated engineered products with a healthy mix of developmental and volume-based production. This we believe, will be possible through acquisition of new customers for existing product lines / capabilities as well as through establishment of new capabilities and enhancement of existing specialized fabrication capabilities that could be used to cater to existing and new customers.

We have been awarded the Transfer of Technology for defence application products like improvised explosive device (IED) containment vessel, man mounted cooling system, solar snow melter and mounting & support equipment. Successful development of these products will expand our product portfolio and help us to garner more orders from the defence sector. Moreover our initiative to successfully manufacture and deliver the homeland security products used by Indian Armed Forces shall further add another feather to our cap. We aim to secure potential orders for these products and successfully manufacture and deliver them as per the customer specifications.

Delivery of appropriate and quality products will pave the way for repeat orders leading to growth in revenue and profitability. We thus intend to grow on our experience, market position and ability to timely deliver quality products and to successfully foray into other sectors as well as to foreign geographies and establish a robust relationship with our customers.

***Capitalize on upward trend of Defense and Dairy sector, increasing indigenization, commercialization and policy initiatives in the sectors.***

The Indian defence sector is currently focused on indigenization of various defence technologies and products. The Government of India has also recently announced Import embargo on 101 items beyond given timelines to boost indigenization of defence production which will provide more opportunities for our products and aid job creation. (Source: <https://pib.gov.in/PressReleasePage.aspx?PRID=1644570>) Further Union Budget for the Financial Year 2021-22, has given push to defence modernisation by increasing defence capital outlay by 18.75% increasing Defence allocation in the budget to Rs 4.78 lakh crores for the FY 2021-22 (Source: <https://pib.gov.in/PressReleaseFramePage.aspx?PRID=1693987>). The Indian defence sector is at an inflection point and several policies are being laid out by the Government of India to promote the Indian manufacturing sector. The 'Make in India' campaign introduced in 2014 and the 'Atma-Nirbhar Bharat' initiative, share similar goals with regards to development of domestic defence industry and we believe that owing to our prior experience and robust relationships with our customers, we have an advantage in securing the potential orders. The objective behind these programs is to attain strategic independence by reducing import dependence. Recently the Ministry of Defence has issued Request for Proposal (RFP) for construction of six P-75(I) submarines for Indian Navy. The project would not only aid in boosting the core submarine/ship building industry but would also greatly enhance manufacturing/industrial sector, especially the MSME by development of an industrial eco-system for manufacture of associated spares/systems/equipment related to submarines. (Source: <https://pib.gov.in/PressReleaseFramePage.aspx?PRID=1737191>). We believe that our Company is well-poised to capitalize on these opportunities and thereby contribute to the 'Atma-Nirbhar Bharat' initiatives by the Government of India, creating value for all of the stakeholders involved, in the process. We believe a significant demand for our defence application products is generated in India owing to our government's objective to enhance domestic sourcing as well as self-reliance, especially in areas of national importance, and that our ability to supply technologically advanced products enables us to tap growth opportunities.

The Government has implemented several schemes relating to the dairy industry like: National Dairy Plan, Intensive Dairy Development Scheme, Assistance to Cooperative Scheme, Strengthening Infrastructure and Clean Milk Production Scheme, Dairy Venture Capital Fund Scheme which are focused to increase milk production, to fund milk processing units in rural areas, to revive sick dairy cooperative unions or to provide competitive loans to urban and rural investors in the dairy industry. All these schemes shall boost the milk production in India, thereby increasing the demand for our products.

We are therefore well positioned to benefit from the Government's initiatives towards development of Defense and Dairy sector of India. This will help us to increase our foothold as a supplier for products which are currently manufactured by us and will also give us an opportunity to expand our existing products portfolio by using R&D.

***Expand international presence through increase in exports***

A certain portion of our business operations are focused on exports to international customers. For instance, we have in the past exported our dairy equipment products like: Bulk Milk Coolers, Solar Power Bulk Milk Coolers, Stainless Steel Milk Cans, Milking Machines etc to countries like: Finland, Sri Lanka, Fiji etc

We intend to continue expanding our international operations to enhance our global presence in the sectors we cater to. We seek to identify markets where we believe we can provide cost and operational advantages to our clients and distinguish ourselves from other competitors. To support our exports and international presence, our Company has a dedicated business development resource. We have subscribed to few Tender Portals & Directories that publish upcoming tender information. Our overseas dealers scout the potential within their territories and update us for quotations. Our monthly mailers help us to stay in sight within our overseas customers, prospects, and dealers.

Given our manufacturing capabilities, we believe that there is significant potential for us to move into newer geographies and markets. We intend to identify market opportunities in overseas jurisdictions and tie up with local partners to utilize our existing product portfolio and further develop products suitable for meeting the respective country’s native requirements.

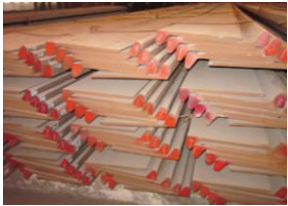

**Continue to strive for cost efficiency**

We aim to continue to maintain our focus on cost management, including in-house integrated manufacturing capabilities across our business to deliver growth as well as to achieve economies of scale. We will continue to seek to manage our supply chain costs through optimal inventory levels, economic orders and other measures. Economies of scale will also enable us to continuously improve our operational efficiencies.

One of the strategies we have adopted in the past and shall continue to adopt in the future is flexibility in manufacturing lines for different product verticals. We believe that this gives us higher utilization levels while also helping us in attaining cost advantage. Further, we intend to leverage technology for effective utilization of our machinery through digital solutions which would enable effective monitoring of the machine status and study of various shop floor patterns thereby allowing us to address the bottlenecks and to improve our output efficiency.

**Manufacturing Processes**

Our manufacturing process varies depending upon the type of products. Broadly, our manufacturing facilities undertake the operations as per the process plans laid-out and the in-process quality inspection procedures, that are carried out as per the QAPs. Once operation/process is completed, the product is tested once again to ensure dimensional and other properties. While the manufacturing of each product involves different processes, set forth below is a typical product lifecycle of manufacturing carried out by our Company:

- Company Purchases Raw Material from authorized dealer and quality check is done by the in house quality control team.
- Once the QC team approves the Raw Material, it is sent for cutting into different shapes and sizes.
- After cutting, the product is rolled into different profiles as per customer requirement.
- Rolled products are generally uneven for which we need to do straightening process of the given profiles.
- The profiles are straightened and then heat treatment is done which generally alters physical and chemical properties of the material. After which quenching is done to cool down the raw material. Once the profile is out from quenching, we do straightening again for the final finish. We carry out internal QC. In case of any issue, we rectify the issue and call for final inspection by third party approved by relevant quality department.
- Goods are then packed as per customer requirement and its ready for dispatch.

- Raw Materials and components are procured from registered vendors and quality check is done by the In house quality control team.
- Once done with initial inspection, we start cutting the material in required shapes and sizes.
- Fabrication is then carried out by our team. Fabricated units are then inspected by the internal quality control team.
- After quality control procedures, assembling is carefully done of all components and the product is then ready for final inspection.
- Final assembly inspection is done by quality control team. In case of any issue, we rectify the units so that they are approved by relevant quality department.
- The goods are then packed as per customer specifications and sent for dispatch procedures.

We have a strong sales and marketing team focusing on customer development and maintaining customer relationship. **2. Statement on Significant Accounting Policies**

**a) Basis of Preparation**

Basis of accounting and preparation of financial statements:

The Restated Summary Statement of Assets and Liabilities of the Company as on September 30, 2021, March 31, 2021, March 31, 2020 and March 31, 2019 and the Restated Summary Statement of Profit and Loss and Restated Summary Statements of Cash Flows for the same period mentioned above and the annexure thereto (collectively, the “Restated Financial Statements” or “Restated Summary Statements”) have been extracted by the management from the Financial Statements of the Company for the period ended on September 30, 2021, March 31, 2021, March 31, 2020 and March 31, 2019

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 (‘the Act’) read with Rule 7 of the Companies (Accounts) Rules, 2014, the provisions of the Act. The accounting policies adopted in the preparation of financial statements have been consistently applied. All assets and liabilities have been classified as current or non-current as per the company’s normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of operations and time difference between the provision of services and realization of cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

**b) Use of estimates**

The preparation of the financial statements in conformity with Indian GAAP requires the management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognized in the periods in which the results are known / materialize.

### c) Property , Plant and Equipment

#### (i) Tangible Fixed Assets

Lease hold is carried at historical cost less amortisation of lease charges over the tenure of lease agreement. All other items of property, plant and equipment are stated at cost, which includes capitalized borrowing costs, less accumulated depreciation, and impairment loss, if any. Cost includes purchase price, including non-refundable duties and taxes, expenditure that is directly attributable to bring the assets to the location and condition necessary for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located, if any

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognized impairment loss. Cost includes professional fees, and for qualifying assets, borrowing costs capitalized in accordance with the Company's accounting policies. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Spare parts are treated as capital assets when they meet the definition of property, plant and equipment. Otherwise, such items are classified as inventory.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for, as separate items (major components) of property, plant and equipment. Any gains or losses on their disposal, determined by comparing sales proceeds with carrying amount, are recognised in the Statement of Profit or Loss.

#### Subsequent expenditure:

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

#### De-Recognition:

An item of property, plant and equipment is de-recognised upon disposal or when no future economic benefits are expected to arise from its use. Any gain or loss arising from its de-recognition is measured as the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in Statement of Profit and Loss when the asset is de-recognised.

#### Depreciation methods, estimated useful lives and residual value:

Depreciation on property, plant and equipment is provided using the written down value method based on the life and in the manner prescribed in Schedule II to the Companies Act, 2013, and is generally recognized in the statement of profit and loss. Cost of Lease hold is amortised over the tenure of lease agreement. Freehold land is not depreciated. In case where the cost of part of asset is significant to total cost of the asset and useful life of that part is different from the useful life of the remaining assets, the useful life of that significant part has been determined separately.

Asset Group	Useful Life
Buildings	Factory Building - 30 years, Others-60 years
Plant and Equipment	15 years
Lab Equipments	10 years
Furniture and Fixtures	10 years
Vehicles	8 years
Office equipments	5 years
Computer Equipments	Server and Equipments-6 years, Others- 3 years
Electrical Installation	10 years

The depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate. Based on technical evaluation and consequent advice, the management believes that its estimates of

useful lives as given above best represent the period over which management expects to use these assets. Depreciation on additions (disposals) is provided on a pro-rata basis i.e. from (upto) the date on which asset is ready for use (disposed of).

**Capital work in progress:**

Capital work-in-progress is carried at cost, comprising direct cost and related incidental expenses.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under “Long Term Loans and advances” and the cost of assets not put to use before such date are disclosed under ‘Capital work-in-progress’

**(ii) Intangible assets:**

Intangible assets are carried at cost less accumulated amortisation and impairment losses, if any. The cost of an intangible asset comprises its purchase price, and any directly attributable expenditure on making the asset ready for its intended use and net of any trade discounts and rebates. Subsequent expenditure on an intangible asset after its purchase is recognised as an expense when incurred unless it is probable that such expenditure will enable the asset to generate future economic benefits in excess of its originally assessed standards of performance and such expenditure can be measured and attributed to the asset reliably, in which case such expenditure is added to the cost of the asset.

**Amortisation of Intangible assets**

The amortisation of an Intangible Assets is allocated on a systematic basis over the best estimate of its useful life of the Intangible asset

<b>Asset Group</b>	<b>Useful Life</b>
Intangible Assets	3 – 10 Years

**d) Impairment**

- i) At each Balance Sheet date, the company assesses whether there is any indication that an asset may be impaired. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset’s net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.
- ii) After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.
- iii) A previously recognised impairment loss is increased or reversed depending on changes in circumstances. However the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment.

**e) Assets Held for Disposal**

Items of Fixed assets that have been retired from active use and held for disposal are stated at the lower of their net book value or net realisable value.

**f) Inventories**

Inventories are measured at lower of cost and net realizable value. Cost of inventories is determined on a First in First Out (FIFO) (as mentioned below), after providing for obsolescence and other losses as considered necessary. Cost includes expenditure incurred in acquiring the inventories, conversion costs and other costs incurred in bringing them to their present location and condition.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

Raw materials and other supplies held for use in the production of finished products are not written down below cost except in cases where material prices have declined and it is estimated that the cost of the finished products will exceed their net realizable value.

Items of Inventory are valued on the principle laid down by the AS 2 on Inventories:

(a)	Raw Materials	Lower of cost (determined on First In First Out Basis ) and net realizable value.
(b)	Packing Material	Lower of cost (determined on FIFO basis) and net realizable value.
(c)	Finished Goods	Lower of cost (determined on FIFO basis) and net realizable value.
(d)	Work in progress	Lower of cost (determined on FIFO basis) and net realizable value.
(e)	Stores & spares	At cost
(f)	Scrap	At net realizable value

### **g) Investments**

Investments that are readily realisable and intended to be held for not more than a year are classified as current investments. All other investments are classified as Non Current investments.

Current investments are carried at lower of cost and fair value determined on an individual investment basis.

Non Current investments are carried at cost. However, provision for diminution in value is made to recognise a decline other than temporary in the value of these investments.

### **Investment properties**

Property , plant and Equipment not intended to be occupied substantially for use by, or in the operations, of the company are classified as Investment property. The said Investment property is accounted in accordance with Cost model prescribed in Accounting Standard 10- Property, Plant and Equipment and accordingly depreciated over the useful life of the asset

### **h) Revenue Recognition**

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

#### **Sale of goods**

Revenue from sale of goods is recognised when the significant risks and rewards or ownership of the goods have passed to the buyer. Revenue is recognised to the extent there is reasonable certainty of its ultimate collection.

#### **Interest**

Interest Income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

#### **Rent Income**

Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction and non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

#### **Exchange Differences**

Exchange differences arising on the settlement of monetary items or on reporting such monetary items of company at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or as expenses in the year in which they arise.

#### **iii. Defined benefit Plans**

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-

line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.

The Company has a defined benefit gratuity plan. Every employee who has completed five years or more of service gets a gratuity on post employment at 15 days salary (last drawn salary) for each completed year of service as per the rules of the Company. The scheme is funded by the policy from Life insurance corporation of India.

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use. All other borrowing costs are charged to Statement of Profit and Loss over the tenure of the borrowing.

#### **n) Earnings per share**

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they were entitled to participate in dividends relative to a fully paid equity share during the reporting period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

These are reviewed at each balance sheet date and adjusted to reflect the best current estimates.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company or the present obligations that arises from past events, where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Bidder had the option to submit the Bid Cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

**Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

**Phase III:** The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Bidders into the UPI mechanism.

The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%

### **RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES**

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the "FDI Policy"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.
