The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in **“Risk Factors”** on page 25 and **“Management Discussion and Analysis of Financial Condition and Results of Operations”** on page 196 of this Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the **“Restated Financial Statements”**.

INTERNAL RISK FACTORS

1. **We are dependent on a few customers for a major part of our revenues. Further we do not have any long-term commitments from customers and any failure to continue our existing arrangements could adversely affect our business and results of operations**

The substantial portion of our revenue is significantly dependent on certain key customers. For instance, our top five customers for the six months period ended Sept.’22, F.Y. ended March 31, 2022 and March 31, 2021 accounted for 89.71%, 65.34% and 74.97% of our revenue from operations for the respective year. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our key customers, a failure to negotiate favourable terms with our key customers or the loss of these customers, all of which would have a material

adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company. We presently do not have any long-term or exclusive arrangements with any of our customers and we cannot assure you that we will be able to sell the quantities we have historically supplied to such customers. In the event our competitors' products offer better margins to such customers or otherwise incentivize them, there can be no assurance that our customers will continue to place orders with us. There can also be no assurance that our customers will place their orders with us on current or similar terms, or at all.

Although our Company maintains long-term relationship with our major customers, there can be no assurance that we will continue to maintain such relationship with our customers. Further, in the event our customers experience any delays in placing orders with us, or if they prefer to buy the products of our competitors, it could have a material adverse effect on our business growth and prospects, financial condition, results of operations and cash flows. Our inability to maintain our existing customer network could have a negative impact on our sales, business growth prospects, result in slowdown of operation, financial conditions and cash flows. Further, the performance of our customers, their sales network and their ability to expand their businesses are crucial to the future growth of our business and directly affect our sales volume and profitability. If any of the customers fails to sell our products to the end customers, or if our relationships with our customers are affected, our profitability could be significantly affected.

2. *Our Company's success depends largely upon its skilled professionals and its ability to attract and retain these personnel. The industry where our Company operates is a highly skilled and technical employee intensive industry.*

Our Company's ability to execute projects and to obtain new clients depends largely on their ability to attract, train, motivate and retain highly skilled software professionals and other mid-level professionals. The attrition rates in the industry in which we operate have been high due to a highly competitive skilled labour market in India. We invest in training human resources that we hire to perform the services we provide. These professionals are often targeted by the lateral recruitment efforts of our competitors. The performance of our Company will be benefited on the continued service of these persons or replacement of equally competent persons from the domestic or global markets. We may have difficulty in redeploying and retraining our employees to keep pace with continuing changes in technology, evolving standards and changing customer.

We incur various employee benefits expense, including salaries and bonus, contribution to provident and other funds and staff welfare expenses. For the six months period ended Sept.'22, F.Y. ended March 31, 2022 and March 31, 2021 our employee benefits expense accounted to Rs. 1309.46 Lakhs, Rs, 2003.74 Lakhs and 1346.21 Lakhs, respectively, representing for 80.71%, 77.47% and 78.72%, respectively, of our total expense for the respective year/period. For further details, kindly refer section titled "**Financial Information of the Company**" beginning on Page 147 of this Red Herring Prospectus.

There is intense competition for experienced skilled professionals with technical and industry expertise in our business and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realise our strategic objectives could be impaired. The loss of members of our team, particularly to competitors, could have a material adverse effect on our business and results of operations. For further details for employees of our Company, kindly refer section titled "**Our Business**" beginning on Page 102 of this Red Herring Prospectus.

3. *We are dependent on our ability to customize products as per the demands and requirements of the customer based on latest technology. If we are not able to enhance current portfolio in response to evolving industry requirements, our operating results may be negatively affected.*

Rapid technological advances, changing delivery models and evolving standards in software development and communications infrastructure, changing and increasingly sophisticated customer needs and frequent new product introductions and enhancements characterise the industry in which we operate. Digitization is driving major changes in the global business software market, with IT leaders looking to adopt new technologies and software platforms to meet business needs, including revenue growth driven through new products and services, better customer experience and delivery mechanisms, and growth in revenue and profits. Our success depends upon our ability to anticipate, design, develop, test, market and support new software products, services, and enhancements of current products and services in response to evolving industry requirements.

To effectively meet customer demand, it is important that we continue to enhance our products and service offerings. We have developed progressive web apps and data services. The markets for our offerings are rapidly evolving due to which the level of acceptance of such products and services is not certain. The software industry is increasingly focused on cloud computing, mobility, social media and platform as a service among other continually evolving trends.

If we are unable to enhance our product offerings and support services in a timely manner or position and price our products and services to meet demand including in response to new industry standards, customers may not purchase or subscribe to our software products or cloud offerings or renew software support or cloud subscription contracts. Renewals of these contracts are important to the growth of our business.

If the markets for our services fail to develop, develop slower than expected or experience increased competition, our business may suffer. As a result, we may be unable to successfully market our existing services and products, develop and successfully launch new products and services and enhancements to existing products and services, complete customer implementations on a timely basis, or complete products and services currently under development. If our services are not accepted by our customers or by associated businesses in our target verticals and markets, our business, operating results and financial condition will be materially adversely affected.

4. *We do not own the Registered Office, Administrative office and Branch office from which we carry out our business activities.*

Our Registered office and Administrative Office are not owned by us and are taken on lease basis from Madhya Pradesh Audyogik Kendra Vikas Nigam (Indore) Limited (“MPAKVNL”), however both lease and license agreement have expired and we have applied for the renewal with MPAKVNL vide letter dated December 15, 2022 and January 04, 2023. Although the said offices are in possession of our Company, but we may have to re-locate the offices in case lease has not been renewed consequent our business operations and future benefit of SEZs unit will be impacted. Further, Our Branch office is also not owned by us and is taken on rental basis from Nilesh Rathi HUF for a period of 11 months commencing from December 01, 2022. For further details, kindly refer section titled “**Our Business**” beginning on Page 102 of this Red Herring Prospectus

There can be no assurance that we will, in the future, be able to retain or/and renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the existing offices and operating locations on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, or to close facilities in desirable locations, affecting our financial condition and operations.

5. *Our Company operates under several statutory and regulatory permits, licenses and approvals. Our inability to obtain, renew or retain the statutory and regulatory licenses permits and approvals required to operate our business may have an adverse effect on our business & operations.*

We require various statutory and regulatory licenses, permits and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such approvals or licenses, or renewals thereof in a timely manner, or at all. Further any default by our Company in complying with the same may result in the cancellation of such licenses, approvals or registrations which may result in the interruption of our operations and adversely affect our business.

Further, some of the registration certificates of our company are in the old name of the company, prior to the conversion of the company to “Systango Technologies Limited”. The same needs to be updated in the records of concerned authorities. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures and an inability to comply with such regulatory requirements may attract penalty. For further details, please refer to section titled “**Government and Other Approvals**” beginning on page 210 of the Red Herring Prospectus.

Further, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied by us. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

6. *The restated Consolidated financial statements have been provided by peer reviewed Chartered Accountants who is not Statutory Auditor of our Company.*

The restated Consolidated financial statements of our Company for the six months period ended Sept.'22, F.Y. ended March 31, 2022, March 31, 2021 and March 31, 2020 has been provided by a peer reviewed chartered accountants who is not statutory auditor of our Company because our statutory auditor does not hold a valid peer review certificate.

7. *Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business.*

Since we provide services to customers in India and overseas such as USA, UK, Canada, Australia, Hongkong, Netherlands, Switzerland, South Africa, Qatar etc. As a result, we are subject to numerous, and sometimes conflicting, legal requirements on matters as diverse as import/export controls, content requirements, trade restrictions, the environment (including electronic waste), tariffs, taxation, sanctions, government affairs, anti-corruption, whistle blowing, internal and disclosure control obligations, data protection and privacy and labour relations and certain regulatory requirements that are specific in the jurisdictions we operate.

Non-compliance with these regulations in the conduct of our business could result in fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business and have an adverse impact on our reputation. Gaps in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient to defend us and preserve our rights. We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees, partners or other related individuals.

We have historically derived a significant portion of our revenues from exports to the USA and UK. For instance, the revenue generated from exports to the USA and UK for the six months period ended Sept.'22, F.Y. ended March 31, 2022 and March 31, 2021 accounted for 87.33%, 82.67% and 81.86% of our revenue from operations for the respective year. Accordingly, any materially adverse social, political or economic development, natural calamities, civil disruptions, regulatory developments or changes in the policies of the government in the USA and UK could adversely affect our business activities, result in modification of our business strategy or require us to incur significant capital expenditure, which will in turn have a material adverse effect on our business, financial condition, results of operations and cash flows. For further details on above litigations, please refer to the chapter titled ***“Our Business”*** on page 102 of this Red Herring Prospectus

We may be subject to risks relating to compliance with a variety of national and local laws, including multiple tax regimes, labour laws, and employee health, safety, wages and benefits laws. We may, from time to time, be subject to litigation or administrative actions resulting from claims against us by current or former employees individually or as part of class actions, including claims of wrongful terminations, discrimination, misclassification or other violations of labour law or other alleged conduct.

8. *There have been certain instances of non-compliances/ discrepancies, including with respect to certain secretarial/ regulatory filings for corporate actions taken by our Company and Subsidiaries in the past. Consequently, we may be subject to regulatory actions and penalties for any such non-compliance/ discrepancies and our business, financial position and reputation may be adversely affected*

We manage regulatory compliance by monitoring and evaluating our internal controls and ensuring that we are in compliance with all relevant statutory and regulatory requirements. There can be no assurance that deficiencies in our filings will not arise in future, or that we will be able to implement, or continue to maintain, adequate measures to rectify or mitigate any deficiencies in our internal control.

As required under the provision of Foreign Exchange Management Act, 1999 read with its applicable regulations on Overseas Direct Investment, the company is required to file Form FC along with incorporation documents or purchase agreement for investment in any Joint Venture or Wholly Owned Subsidiary in any country outside India. Our company has incorporated a Wholly Owned Subsidiary in Delaware, USA on March 04, 2020, however, the required forms for incorporation and annual return was not filed with its Authorised dealer Bank. The said form is now filed for approval to RBI. The RBI approval and sanction of Unique Identification Number is pending receipt. Even though no show cause notice has been received by our Company, we shall be required to file the compounding under FEMA, 1999 for the said delay in filing of requisite forms with RBI. We cannot assure you that we will not be subject to any other legal proceedings or regulatory actions, including monetary

penalties by statutory authorities on account of any inadvertent discrepancies in our FEMA filings and/or corporate records in the future, which may adversely affect our business, financial condition and reputation.

Further, in the past, our Company has made some clerical mistakes in documents and form filed in registrar of Companies, for instance, there were some errors in the form filed with RoC and errors in some of the documents attached thereto. The Company has registered some share transfers based on gift deeds with inadequate stamp duty which is non-compliance under the Companies Act, 2013 read with the Indian Stamp Act, 1899 & The Registration Act, 1908, However the same has been paid. Further, our company has made errors in complying with certain Accounting Standards AS-11 (The Effects of Changes in Foreign Exchange Rates), AS-13 (Accounting for Investment), however the same have been duly complied by us in the restated consolidated financial statements. For further details kindly refer section titled “Restated consolidated financial statements” beginning on Page 147 of this Red Herring Prospectus. Further, in the past, our company has been in continuous delay for payment of EPF and has also delayed in filing GST returns.

As we continue to grow, there can be no assurance that there will be no other instances of such inadvertent non-compliances with statutory requirements, which may subject us to regulatory action, including monetary penalties, which may adversely affect our business and reputation.

9. *We propose to utilize part of the Net Proceeds towards the acquisition of businesses in similar or complementary areas for which the targets have not yet been identified.*

We have expended our business through inorganic ways in the past and we believe that we will get benefit for these transaction. In Year 2020, we have incorporated Systango LLC in USA as wholly owned subsidiary and recently in year 2022 we have acquired 100% stake of Isystango Ltd, UK from our promoters.

We propose to utilize our Net Proceeds towards the acquisition of businesses in similar or complementary areas. Targets of acquisition are not yet finalized. We shall comply with the provisions of Companies Act, 2013 and SEBI ICDR Regulations with respect to utilization of Offer proceeds. As on date of filing this Red Herring Prospectus, we have not entered into any definitive agreements towards such Acquisitions. The estimates are based solely on management estimates of the amounts to be utilizing towards an acquisition and other relevant considerations. The actual deployment of funds will depend on a number of factors, including the timing, nature, size and general factors affecting our results of operations and financial conditions. For further details in relation to this object, please see section titled “**Objects of the Offer**” on page 71 of this Red Herring Prospectus.

10. *We may become liable to our customers and lose customers if we have defects or disruptions in our service or if we provide low quality service. We may also be liable in the event of misuse of our services or platforms.*

Quality control is a vital element for any industry whether primary, secondary, tertiary or quaternary. We deliver technology as a service, and errors or defects in the software applications underlying our services, or a failure of our hosting infrastructure, may make our services inaccessible to our customers. From time to time, our customers require our customer team to assist them in using our services, help them in resolving post-deployment issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our customers effectively, it could adversely affect our ability to retain existing customers and could prevent prospective customers from adopting our service. Any failure in a client’s system and any direct damages, expenses, costs, obligations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Any errors, defects, disruptions in service or other performance problems with our services, whether in connection with the day-to-day operation of our services, upgrades or otherwise, could damage our customers’ businesses.

If we have any errors, defects, disruptions in service or other performance problems with our services, our customers may choose not to renew our contract, or delay or withhold payments to us and we could lose future sales. Further our customers may make claims against us, which could result in an increase in our provision for doubtful accounts, an increase in collection cycles for accounts receivable or litigation costs. Any rapid change in our customer’s expectation on account of changes in technology or introduction of new service or any other reason and failure on our part to meet their expectation could adversely affect our business, results of operations and financial condition. We may in the future experience, misuse of our services or platforms. The occurrence of any such events in the future could lead to user dissatisfaction and discourage the use of our products and services. Such events may also give rise to complaints and actions against us. All these factors could adversely affect our business and results of operation.

12. Our Company in the past has entered into Related Party Transactions and may continue to do so in future also, which may affect our competitive edge and better bargaining power.

In the ordinary course of our business, we have entered into transactions with related parties including our Directors, Promoters, Subsidiaries, key managerial persons and may continue to do so in the future. These transactions, inter-alia includes remuneration, sales of services, sale and purchase of investments etc. Our Company has entered into such transactions due to easy proximity and quick execution. While we believe that all related party transactions that we have entered into are legitimate business transactions conducted on an arms' length basis, is in compliance with the Companies Act, 2013 and other applicable laws, including purchase of Shares from promoters of the company of Isystango Ltd. UK, there can be no assurance that we could not have achieved more favorable terms if such transactions had not been entered into with related parties. There can be no assurance to you that these or any future related party transactions that we may enter into individually or in the aggregate, will not have an adverse effect on our business, financial condition, results of operations and prospects. Further, the transactions we have entered into and any future transactions with our related parties have involved or could potentially involve conflicts of interest which may be detrimental to our Company. For details of transactions, please refer to “Annexure W” on **“Related Party Transactions”** under Section titled **“Financial Information of the Company”** and Chapter titled **“Capital Structure”** beginning on page 147 and 58 respectively of this Red Herring Prospectus.

13. Failure to adapt our product offerings to changing market technology and consumer preferences for our client's products could cause our sales to decline, and we may not be able to maintain our competitive position in the market.

The IT services market is characterised by rapid technological changes, evolving industry standards, changing customer platforms, customer interaction preferences, and new service introductions that could result in technology obsolescence. Our future success will depend on our ability to anticipate these advances, enhance our existing offerings or develop new service applications, enhance our performance base to meet client needs, in each case, in a timely manner. We may not be successful in anticipating or responding to these advances on a timely basis, or at all. If we do not respond, the services or technologies we develop may not be successful in the marketplace. We may also be unsuccessful in stimulating customer demand for new and upgraded services, or seamlessly managing new service introductions or transitions or platforms or customer base. Our failure to address the demands of the rapidly evolving IT environment, particularly with respect to emerging technologies, metaverse, web developments and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition. In addition, our success also depends on our ability to proactively manage our portfolio of technology alliances.

14. The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.

The deployment of funds as stated in the “**Objects of the Issue**” beginning on page 71 of the Red Herring Prospectus is entirely at the discretion of our management and has not been appraised by any bank or financial institution or any independent agency. Further, the purposes for which the Net Proceeds are to be utilised are based on management estimates. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability.

However, we may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost, inability to identify suitable location for our stores at favourable terms and other financial and operational factors. Accordingly, prospective investors in the issue will need to rely upon our management’s judgment with respect to the use of proceeds. If we are unable to deploy the proceeds of the issue in a timely or an efficient manner, it may affect our business and results of operations.

15. *If there is a change in tax regulations, our tax liabilities may increase and thus adversely affect our financial position and results of operations. We would indeed realise lower tax benefits if the special tax holiday scheme for units set up in special economic zones is substantially modified.*

Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, GST, income tax and other taxes, duties, surcharges and cess introduced from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability. Currently, we claim certain tax benefits under the Income Tax Act, which decrease our overall effective tax rates. There can be no assurance that these tax incentives will continue to be available to us in the future. These tax benefits will not be available if our operations are no longer located in SEZs, or if we fail to comply with the conditions specified under the SEZs Rules, 2006 or the Income Tax Act 1961.

However, we are subject to a MAT at a fixed rate as prescribed from time-to-time on our net profits as adjusted by certain prescribed adjustments. Where any tax is paid under MAT, such tax will be eligible for adjustment against regular income tax liability computed under the Income Tax Act, for the following ten years as MAT credit. We cannot assure that the Indian central government will continue these special tax exemptions or those we will continue to qualify for such tax benefits and other incentives. If we no longer receive these tax benefits and other incentives, or if the MAT rate of taxation is increased, our financial results may be adversely affected.

Financial turmoil in USA and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability, including the financial crisis and deterioration of credit conditions in the USA, could also have a negative impact on our business.

49. The extent to which the Coronavirus disease (COVID-19) or outbreak of any other severe communicable disease may affect our business and operations in the future is uncertain and cannot be predicted

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing “stay-at-home” orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future. We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

50. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India’s economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors’ reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

51. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

52. *Our performance is linked to the stability of policies and the political situation in India.*

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse affect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

53. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expend

54. *Government regulation of foreign ownership of Indian securities may have an adverse affect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. SECTION V – ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. GLOBAL OUTLOOK:-

Omicron, rising food prices and sticky inflation, the US Fed’s much anticipated lift-off, and escalation of geopolitical tensions towards the end of the year flaring up into conflict in early 2022 defined the macroeconomic and financial landscape during this Annual Report’s period under review. Over the first half of 2021, an uneven and divergent recovery had lifted the global economy out of the deep contraction imposed by the pandemic in the preceding year. According to the International Monetary Fund (IMF) in its World Economic Outlook of April 2022, world GDP expanded by 6.1 per cent in 2021 as against a contraction of 3.1 per cent in the previous year. After a sharp setback due to the virulent Delta variant of the coronavirus in the early part of 2021, the global recovery had regained some traction even as paths of growth were widely differentiated across jurisdictions by the size and durability of monetary and fiscal stimuli, and access to vaccines. Global growth lost pace in the second half of the year, beset by the highly transmissible but milder variant of COVID-19 – Omicron. Despite these waves superimposed on global supply chain and logistics disruptions, global trade recovered in the second half of the year and grew by 10.1 per cent in 2021. Underpinning this upturn, global manufacturing accelerated to 9.4 per cent in 2021 from 4.2 per cent in 2020.

Even as the release of pent-up spending supported aggregate demand, persisting supply disruptions fuelled inflation which increased markedly in the US, the Euro area and a number of emerging market economies (EMEs). Commodity prices increased sharply in 2021 from their lows a year ago as the nascent recovery in demand collided with supply bottlenecks. While fiscal and monetary policies remained largely accommodative, inflation ruling above targets forced several EMEs to tighten monetary policy, with advanced economy (AE) central banks following in their train. Tapers of pandemic induced liquidity overhangs but without tantrums tightened financial conditions. In the financial markets, risk-off sentiment drove equity markets into correction. Bearish government bond market experienced hardening of real yields across AEs. As shorter-term yields began to reflect the shift in the monetary policy stance, the consequent flattening of the yield curve pointed to global growth momentum losing steam towards the close of 2021 and in early 2022. As risk aversion set in with geopolitical conflict, there was considerable re-pricing of financial assets. Consequently, gold prices have surged, also buoyed by stagflation concerns and rate hike expectations. Investors face a very different dynamic as fiscal and monetary policy support fades in the face of elevated levels of public debt³ with higher and persisting inflationary pressures across AEs and EMEs alike.

INDIA ECONOMY OVERVIEW:-

Two years into the COVID-19 pandemic, the global economy continues to be plagued by uncertainty, with resurgent waves of mutant variants, supply-chain disruptions, and a return of inflation in both advanced and emerging economies. Moreover, the likely withdrawal of liquidity by major central banks over the next year may also make global capital flows more volatile. In this context, it is important to evaluate both the pace of growth revival in India as well as the strength of macro-economic stability indicators. It is also essential to look at progress in vaccination as this is not just a health response but also a buffer against economic disruptions caused by repeated waves of the pandemic.

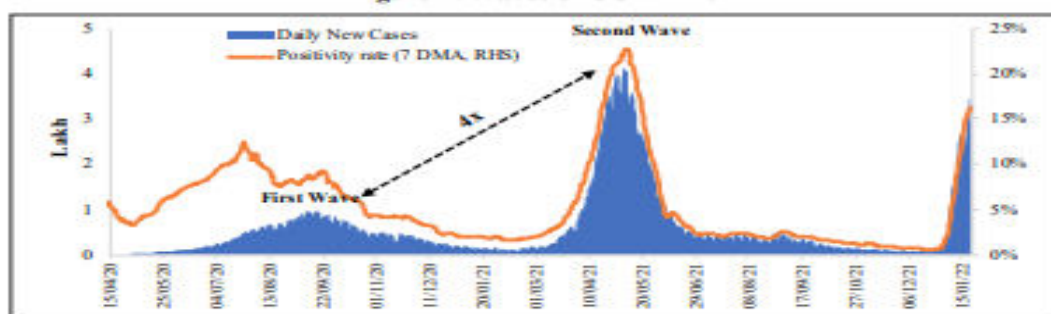

The Indian economy, as seen in quarterly estimates of GDP, has been staging a sustained recovery since the second half of 2020-21. Although the second wave of the pandemic in April June 2021 was more severe from a health perspective, the economic impact was muted compared to the national lockdown of the previous year (see Figures 1 & 2). Advance estimates suggest that GDP will record an expansion of 9.2 per cent in 2021-22. This implies that the level of real economic output will surpass the pre-COVID level of 2019-20.

The growth in real GDP during 2022-23 is estimated at 7.0 per cent as compared to 8.7 per cent in 2021-22.

During the first half of 2021-22, the sector's FDI inflows were US\$ 16.73 billion; accounting for 54% of the country's total FDI inflows. The computer software and hardware services sector of India is among the largest recipient of FDI with a share of about 25% in 2021-22 (India's 2021-22 total FDI was US\$ 83.57 billion).

India's economy is largely dependent on the services exports. The country exports various services, namely, travel, transportation, insurance, software – IT-BPM, business services, financial services and communication, etc. The total export of services from India in 2020-21 was US\$ 206 billion, which reached the targeted US\$ 250 billion in 2021-22 and is expected to reach US\$ 325 billion by 2022-23. During 2021-22, the trade surplus for Indian services exports was US\$ 105.2 billion, a 24% rise from 2019-20.

From April-September 2022 the total exports of services stood at US\$ 150.43 billion, a 27.88% rise as compared to the same period the previous year. The services exports of India during March 2022 was US\$ 22.52 billion. This was a growth of US\$ 8.31% from March 2021 and 28.3% from March 2020. The exports during March 2022 increased 6% over February 2022.

The IT-BPM is the largest exported service out of India accounting for about 49% of the total service exports during first half of 2021-22. The share of business services, transportation services, travel services and financial services during April-September 2021 was 23%, 12%, 3% and 2%, respectively. Between April-December 2021, India's services exports increased by 18.4% to US\$ 177.7 billion driven mainly by IT exports. Business and transportation services are also among India's top exported services comprising about 23% and 11% of the total services exports, respectively.

India exports services to many parts of the world. USA, the UK and Japan are the largest importers of Indian services. Due to the large scale workforce availability, cheap labour and english language skills, India’s services are popular around the world. Hence, the software, computer, IT, BPO and call centre are some of largest services that are exported to America, Europe, Asia and also the Gulf countries.

For the software services and the IT sector of India, USA, the UK and the EU are the top importers accounting for about 62%, 17% and 11% of the total IT-ITeS exports, respectively. Some of the other major software services from India are Canada, Asia, Australia, New Zealand. During 2020-21, USA and Canada imported US\$ 75 billion of software services from India. The share of Europe and Asia combined during the same period was about 37% (i.e. US\$ 49 billion). Also during the same period, the share of the same for Australia and New Zealand combined was 3% (i.e. US\$ 4.2 billion). Some of the other importers of services from India are Asia Pacific, Latin America and Middle East Asia. Some of India’s other top export markets are Hong Kong, Singapore, Germany, Bangladesh, Netherlands and Nepal.

A STUDY AND OVERVIEW OF THE APP DEVELOPMENT INDUSTRY:

INTRODUCTION:

In the Industry of Information Technology, a variety of software have been changing the way we look at things from the dawn of its era. We see that almost every other process we have been doing manually is now done and monitored by systems. Software Development is an industry that comes under this parent and is a general term used in developing and deploying software that is in the category of websites and standalone applications. While creating these applications, the minimum hardware requirements given were typically a personal computer with adequate specifications. In the age of software, people who could afford and own a computer were only able to use or utilize it. Till a particular time, people accessed websites only through Cyber Cafes. Now even though many have access to laptops and PC's, the count remained significantly low compared to the population. After mobile phones were introduced, which were typically a hand-held computer, the number of people who started buying mobile phones is significantly higher and the number of people who can get an idea of applications started getting multiplied. Today we can say that irrespective of which age group they belong to, people are learning to use an application in the form of a Mobile App. The App Development Industry has taken advantage of it ever since.

India's IT sector is one of the fastest growing industry, while global economy and multiple industries struggle to stay afloat, India's technology industry has seen tremendous growth of 15.5% (YoY) growth, from US\$196 billion in FY21 to US\$227 billion in FY22.

IT sector contributes 51% of relative share in services exports.

India has now become largest tech start-up hub in the world with more than 2500+ start-ups and 42 new unicorns.

The government of India has taken some major initiatives to promote the IT/ ITeS sector in India. Both central and state governments in India have taken steps toward developing technology solutions to enable citizen services. The government continues to focus on areas such as cybersecurity, hyper-scale computing, artificial intelligence and blockchain.

Up to 100% FDI is allowed in Data processing, Software development and Computer consultancy services; Software supply services; Business and management consultancy services, Market research services, Technical testing and Analysis services, under automatic route.

MOBILE APP DEVELOPMENT OVERVIEW:

Mobile App Development is the process by which software that primarily runs on a handheld digital device such as a Mobile Phone is developed. It is an ever-growing industry that is now an integral part of any business we can think about. Even though there is a variety of mobile phones available in the market, Android and iOS take the major chunk.

With this sort of market people generally look for development of Mobile Apps in Android and iOS, which makes up 99.24 % of the global market currently. Even though Android takes up 96.07 % in India, iOS takes the lead in the US by having 59.97 %. So, the App Development industry majorly focuses on these two Operating Systems as their target. Even though traditional software development is still viable, App Development supersedes them by providing features that a typical desktop or web application may fail to provide. For example, the availability of GPS, Compass, Accelerometer, Sensors, Bluetooth etc. makes the Mobile Phone a much powerful deployment device than a PC.

While developing a Mobile App, just like how typical software would be developed, we need to choose a programming language and/or an appropriate framework. Even though we might see Android and iOS development individually, it is essential to see the various types of Mobile App Development available. There are Three Major Types of App Development, they are:

Native App Development:

Native App Development is where a developer creates an app by targeting a particular platform like Android or iOS. It supports all the features that the OS provides and also allows us to utilize the maximum potential of a mobile device. It provides far superior performance than any other types of app development. In order to develop an Android app, developers use Android Studio as the official IDE and Java or Kotlin as the languages through which they create apps. Whereas, iOS developers use XCode and Objective-C or Swift as their languages to develop apps [7]. The Native App development has its own advantages and disadvantages. Let us see them in brief:

Advantages:

- Provides Faster and Efficient Performance since it targets only one OS
- They are more efficient in utilizing the resources that the mobile device has to offer.
- It can take advantage of all the hardware features of a phone such as Bluetooth, NFC, Sensors, Camera etc.
- Provides a Secure, Robust and interactive platform specific user interface.

Web App / Html5 Development

Web apps are simply websites that provide the look and feel of an actual responsive website. They are generally written using HTML5, CSS and JavaScript and run in a browser. Installing such an app just means we are creating a bookmark to this page and calling that link an app. Since they are responsive, they will adjust themselves according to whichever device screen size they are called on. Compared to the native app development, they are limited in their functionality and inferior in performance. Developing a Web App is typically developing a website, so the technologies needed are HTML5, CSS, JavaScript on the Client Side and PHP, Perl, Python Ruby, etc. and other server-side technologies

Advantages:

- No need to target a particular platform, so once developed, it can be deployed on any platform.
- Since there is nothing to download onto the mobile, little to no storage is utilized.

- Maintaining the app becomes easier since any changes or updates are automatically pushed through the web, so no need for any updates.

Hybrid App Development

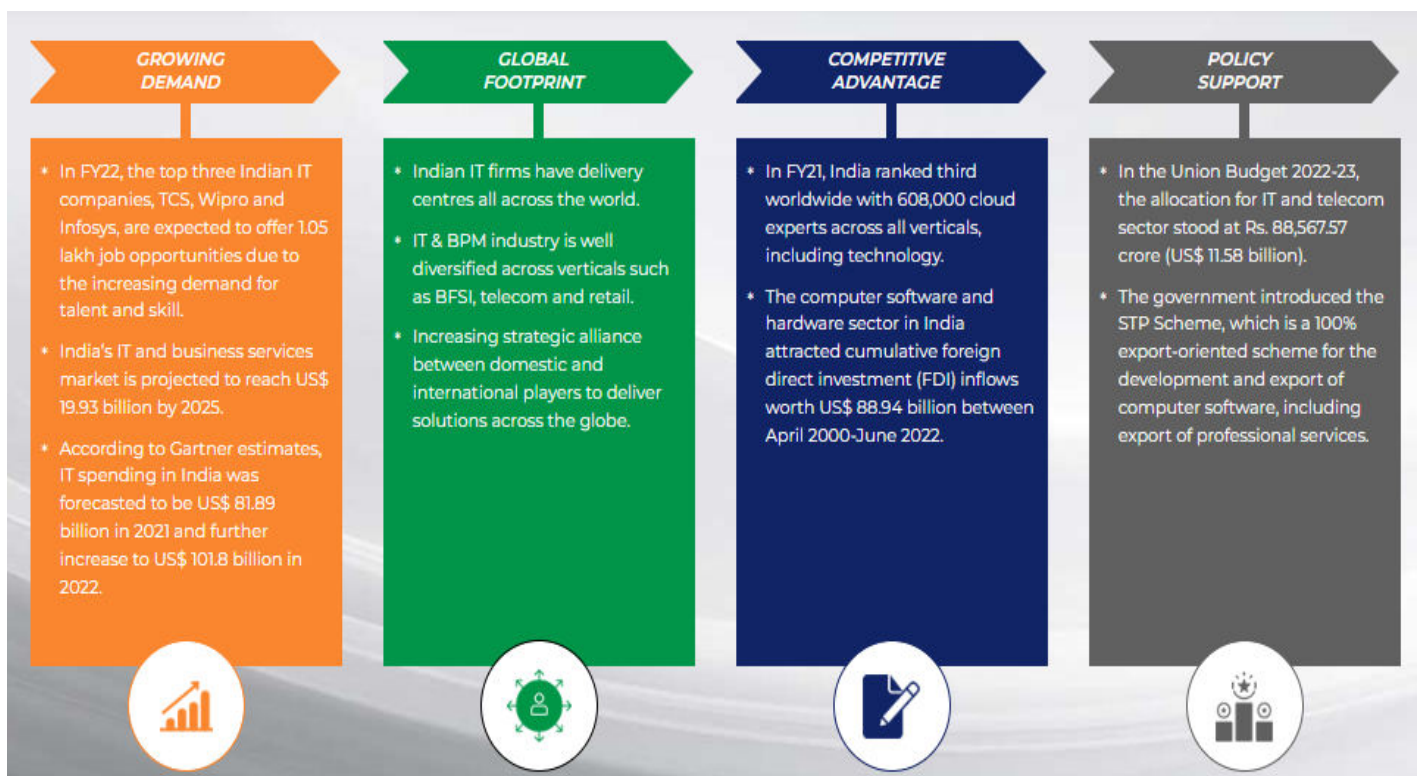

Hybrid apps are half native apps and half web-apps. They can be distributed through an app store and take advantage of some of the native features too. Since they are web apps too, they depend on HTML that gets presented in a browser. Even though they look and feel like a native app, they would still be a simple web app running on a browser and hence the name hybrid app. It helps the developers to reach a larger target audience and monitor how many people downloaded their apps, etc. without bothering about developing two different apps. There is a variety of ways in which we can develop a hybrid app, some of which are React Native, Flutter, Cordova, Ionic, Xamarin, etc.

Advantages:

- Much Faster to Develop and more economical compared to native app development
- Need to maintain only one code base that will update simultaneously into any platform that is targeted.
- Can be made available even offline.
- Best to make an MVP (the Most Viable Product) immediately available through an app.

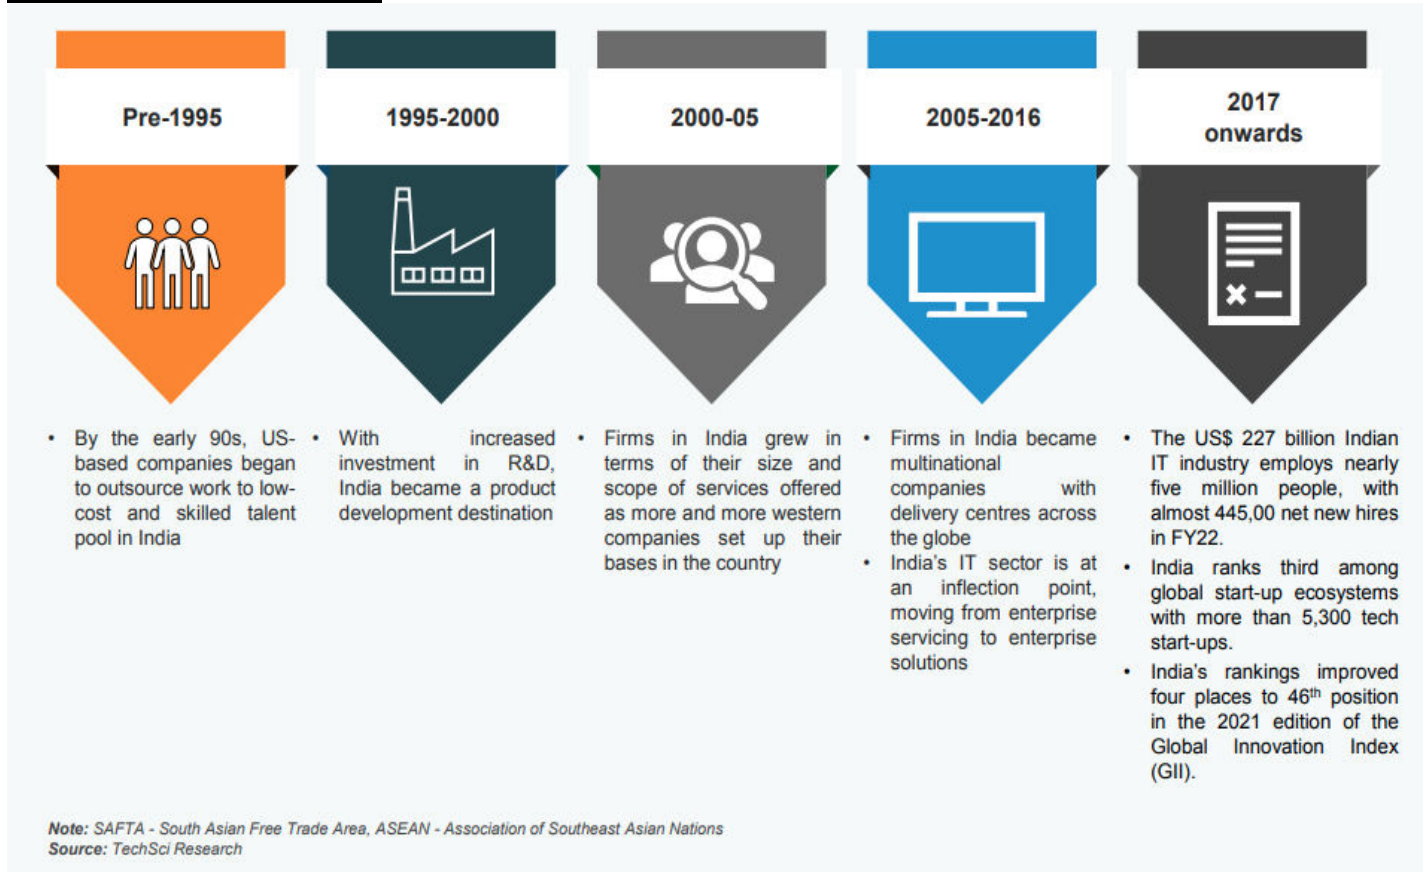

Even though there are a lot of apps currently in the market which use a combination of the abovementioned types of development, each app is developed in a particular type by taking a few points into consideration like Cost of Development, Time Taken, Features needed, and a lot of more customized choice. The industry of app development has grown so tremendously worldwide, and it is continuing to do so every day. This market had its value as \$106.27 Billion in 2018 and is expected to reach \$407.31 Billion by the year 2026. Apart from the revenue generated through the app, the development industry also needs to be spoken about. The charge to develop a typical app depends on a lot of factors, and there cannot be a fixed price. However, we can keep the development cost for a simple app between 15 to 25 thousand in USD and a medium complex app to be between 40 to 100 thousand in USD. The app development industry continues to grow since the need for apps is always on the rise.

BFSI - a key business vertical for IT & BPM industry:

- BFSI is a key business vertical for the IT & BPM industry. A major share of revenue of IT majors comes from the BFSI business vertical.
- Adoption of new technologies is expected to accelerate growth of the BFSI vertical. The need for undertaking investment in IT will also be required for gaining competitive advantage instead of solely reducing operational costs.
- In August 2022, Network People Services Technologies (NPST) announced that it was working on a banking super app. The high-end platform can be used by banks, fintech companies, and other BFSI players, and it will offer a seamless user experience with all banking, financial, and transactional services combined into a robust, smart app.

5. Digital Marketing

At a high level, digital marketing refers to advertising delivered through digital channels such as search engines, websites, social media, email, and mobile apps. Using these online media channels, digital marketing is the method by which companies endorse goods, services, and brands. Consumers heavily rely on digital means to research products.

6. Blockchain

- Blockchain can broadly be defined as a new type of network infrastructure (a way to organize how information and value moves around on the internet) that create ‘trust’ in networks by introducing distributed verifiability, auditability, and consensus.
- It is estimated that blockchain could generate USD3 trillion per year in business value by 2030. The World Economic Forum (WEF) anticipates that 10% of the global GDP will be stored on blockchain by 2025 and lists blockchain as one of 7 technologies that are anticipated to revolutionize various aspects of our lives.

A Database	A list of records / transactions, like a ledger, that keeps growing as more entries are added;
Which is Distributed	Copies of the entire database are stored on multiple computers on a network, syncing within minutes / seconds;
adjustably Transparent	Records stored in the database may be made visible to relevant stakeholders without risk of alteration;
highly Secure	Malicious actors (hackers) can no longer just attack one computer and change any records;
and Immutable	The mathematical algorithms make it impossible to change / delete any data once recorded and accepted.

- *Potential business features of blockchain solutions*
 - Improving profitability and quality
 - Increasing transparency
 - Reinventing products and processes
- Blockchain is part of a broader suite of technologies called Distributed Ledger Technologies (DLT). Though often used interchangeably, blockchain technology and distributed ledger technology distinguish themselves in their structures of data storage. Blockchain can be considered a subset of distributed ledger technology in which multiple transactions are stored in 'blocks' and cryptographically linked to the previous block by a 'chain'.
- Blockchain technology, simply stated is the use of distributed databases to store information about transactions between parties. A defining feature of these databases is that they cannot be altered except without concurrence of a significant fraction of the custodians (and users) of the distributed database. The use of cryptographic functions ensures that transactions can be authenticated as originating from a particular identity and transactions completed without the need for any central authority.
The first use of this technology that emerged in the public consciousness was by the Bitcoin phenomenon. For long the terms ‘blockchain’ and ‘bitcoin’ were used interchangeably without the realisation about the far-reaching impact of this new technology for new models of efficient and transparent governance, especially those involving multiple entities with differing incentives. It was only recently that the tremendous potential presented by this technology has emerged out of the shadows of the Bitcoin revolution and has developed an identity of its own. According to the World Economic Forum, blockchain technologies are one of the 7 technological forces alongside AI, IoT, etc. with the potential to fundamentally change the way the global economy works.
- Core features of blockchain
 - Recordkeeping on a time-stamped, fault-tolerant ledger
 - Smart Contracts for decentralized, corruption-proof, self-triggering applications
 - Digitization of assets and new economic models

AI is expected to change the way we work and live. In view of its positive impact on the economy, the technology is being embraced by the countries across the world. Its proliferation is being regarded as part of the fourth industrial revolution. The Government of India has also envisioned to support research and development and adoption of such technologies. In view of the possible impact of AI on the economy and society and to come out with a policy framework on AI, MeitY constituted four committees on AI.

2. Centre of Excellence (CoE) on Gaming, VFX, Computer Vision & AI at Hyderabad:

This CoE has been set up in collaboration with MeitY, STPI, the gaming industry and the Govt of Telangana in Jan 2020 to provide resources such as mentoring, technology support and funding for Gaming, Animation, VFX, Computer Vision and AI start-ups. It offers integrated programs, CVLAB and Game Lab for start-ups to scale up through its incubation facility. The centre has been branded as IMAGE. The IMAGE accelerator program includes premium plug and play co-working space for start-ups and offers access to the ecosystem which comprises IP owners, mentors, seed funding, investors and a platform to support GoToMarket strategy.

The STPI APIARY, a Centre of Entrepreneurship in Blockchain Technology has been setup in collaboration with MeitY, STPI, Govt. of Haryana, Padup Venture Private Limited, IBM, Intel, GBA and FITT in March 2020. This is an initiative to identify and evaluate promising start-ups in the field of Blockchain technology that will be hosted in the STPI Gurugram incubation facility. A Centre of Entrepreneurship (CoE) is a domain-specific specialized incubation facility for start-ups in the area of emerging technologies where the highest-standards and best-practices in terms of infrastructure, technology, leadership, mentoring, training, research & development, funding, networking for the given focus area are made available.

4. Design, Development, and Deployment of National AI Portal (INDIAai):

The National AI Portal of India (INDIAai) is a joint venture by MeitY, NeGD and NASSCOM that has been set up to prepare the nation for an AI future. The portal has plethora of research reports, datasets, case studies, educational institutes, courses, and articles about the ever-growing field of Artificial Intelligence.

5. Global Partnership on Artificial Intelligence:

The GPAI is an international and multi-stakeholder initiative to guide the responsible development and use of AI, grounded in human rights, inclusion, diversity, innovation, and economic growth. India is a founding member of GPAI, having joined the multi-stakeholder initiative on June 15, 2020. Since then, India has significantly contributed to the GPAI goals and objectives and is working on various domestic initiatives for the responsible development, deployment, and adoption of AI. As one of the largest Global South economies leading the AI race, India nominated itself for the position of incoming council chair of GPAI. India received more than two-thirds of first-preference votes and was therefore elected as the Incoming Council Chair in November 2022. India will serve as the Incoming Chair in 2023, then subsequently Lead Chair in 2024, and Outgoing Chair in 2025.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Bidder had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Bidders into the UPI mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Book Running Lead Manager.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the "FDI Policy"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.
