Further, we have applied for change in name on our approvals upon conversion of our Company from private limited to public limited Company. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on our business. For further details, please see chapters titled "Key Industry Regulations and Policies" and "Government and Other Approvals" at pages 95 and 209 respectively of this Draft Prospectus.

4. We have limited operating history and loss making operations and investors may not be able to analyse our past performances or future prospects.

Our company was incorporated on January 05, 2010 with Registrar of Companies, Gujarat, Dadra & Nagar Havelli. Initially, we have commenced our operations by manufacturing uPVC pipes in the year 2010 with an installed capacity of 7,500 MT p.a. and subsequently diversified our manufacturing line by introducing uPVC Plumbing Fittings and uPVC Agri Fittings to its products line in February, 2014. During the limited operating history of our Company, we have incurred losses in the financial year ended 2010, 2011, 2012 and 2014. Our Company has net profit after tax in the financial year ended 2013 and during the period ended September 10, 2014. As on September 10, 2014, we have accumulated losses of Rs. 79,76,062 as reflected by the financial statements of our Company. With our limited operating history, potential investors may not be able to analyse our past performances or future prospects. For further details of our financial position and information please refer to section titled "**Financial Information of the Company**" on page 142 of this Draft Prospectus.

5. We have high working capital requirements. Our inability to meet our working capital requirements may have a material adverse effect on our business, financial condition and results of operations.

Our business requires a significant amount of working capital for smooth functioning. For instance, as at September 10, 2014 and for the FY 2014, FY 2013 and FY 2012, our working capital requirements (Fund and Non Fund based) were Rs. 699.25 Lakhs, Rs. 540.06 Lakhs, Rs. 273.39 Lakhs and Rs. 291.83 Lakhs respectively. We meet our requirement for working capital majorly through banking facilities or fresh infusion of funds by way of issue of shares or internal accruals. In future, our inability, if any to meet our working capital requirements through banking arrangements can adversely impact our business operations and financial position.

6. We have not entered into any long term supply agreement for the major raw materials required for manufacturing of our products. Also volatility in the prices and non availability of these raw materials may have an adverse impact in our business.

We depend highly on uPVC resin, which are the prime raw material for our products and constitute approximately 85% of our total raw material cost. We have not entered into any agreement to procure these raw materials except that we have entered into an agreement with Yamunaji Enterprise (RIL-Surat Distributor) for supply of uPVC resin and the agreement is renewed on yearly basis. In the absence of any long-term arrangement with our suppliers and in event of any disruption in the supply of raw materials in terms of requisite quantities and qualities, our production schedule may also be adversely affected. Moreover all these raw materials are by-products of petroleum; any fluctuation in the international price of crude oil affects the price and supply of these raw materials. Therefore, any significant increase in the prices of these raw materials due to any reason and our inability to pass on increased costs of raw material to our customers may adversely affect our sales and profitability.

7. We are highly dependent on our Top 5 suppliers for uninterrupted supply of raw-materials. Any disruption in supply of raw materials from these suppliers will adversely affect our operations.

We are highly dependent on uPVC resin and Calcium Carbonate which are the prime raw material for our products. We procure our supply of raw materials from various Domestic and International suppliers depending upon the price and quality of raw materials. However, our Top 5 supplier contributes significantly to supply of raw materials. Any disruption of supply of raw materials from these suppliers or our procurement of raw materials at terms not favorable to us will adversely affect our operations and financial cost. The contributions of our top 5 suppliers to our total supplies are as follows:

Particulars	For period ended September 10, 2014	Year ended March - 14	Year ended March - 13	Year ended March - 12
Purchase from Top 5 Suppliers (Rs. In Lakhs) (inclusive of all taxes)	1376.56	3576.38	1998.15	505.63
% of Total Purchase	89.54%	84.42%	63.93%	46.04%

8. *We have experienced negative cash flows in previous years. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions.*

The details of Cash flows of the Company are as follows:

Particulars	For the period April 1, 2014 to September 10, 2014	For the year ended March 31,		
		2014	2013	2012
Net cash (used in) / from Operating Activities	9,336,521	4,594,151	16,649,511	(11,184,970)
Net cash (used in) / from Investing Activities	(22,081,622)	(26,895,376)	(25,338,717)	(6,402,270)
Net cash (used in) / from Financing Activities	12,968,168	27,043,654	9,922,157	17,924,052
Net increase/(decrease) in cash and cash equivalents	223,067	4,742,429	1,232,951	336,812

Cash flow of a Company are perceived to be a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and to make new investments without raising finance from external resources. In future, any operating losses or negative cash flows could adversely affect our results of operations and financial conditions. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For more information, regarding Cash flows, please refer **Annexure III** in chapter titled "**Financial Information of the Company**" beginning on page 142 of this Draft Prospectus.

9. *We rely significantly on our Dealers/Distributors and Agents network in open market for sale of our products.*

We sell our products in open market through our network of Dealers/Distributors and agents. At present, we have entered into arrangements/understanding with over 30 dealers/ distributors located across various states. Furthermore, our business growth depends on our ability to attract additional dealerships/distributorships to our network. While, we believe that we have good relations with our dealers / distributors but there is no assurance that our current dealers / distributors will continue to do business with us or that we can continue to attract additional dealers / distributors to our network. If we do not succeed in maintaining the stability of our dealership / distributorship network, our market share may decline materially affecting our results of operations and financial condition.

10. *Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent*

Our Company may have not complied with certain accounting standards and Section 4A of The Payment of Gratuity Act, 1972, in the past. Although no show cause notice in respect of the same has been received by the Company till date. Any penalty imposed for such non-compliance could affect our financial conditions to that extent. In relation to gratuity we have not received any notice/communication from the relevant authority, for the previous defaults till date. Further, our Company has not obtain any insurance for its liability towards the payment for gratuity as prescribed under Section 4A of The Payment of Gratuity Act, 1972 from Life Insurance Corporation of India or any other prescribed insurer till date. However, now our Company is complying with all the accounting standards and has given effects in the Restated Financial Statements for such non compliances.

11. *Our indebtedness, including various conditions and restrictions imposed on us under our financing agreements, could adversely affect our ability to grow our business or react to changes in our business environment.*

Our Total Debts as per our restated summary statements was Rs. 1,323.95 Lakhs as at September 10, 2014 and our Debt Equity ratio was 3.33 as of such date. As of March 31, 2014, the Total Debt as per our restated summary statements was Rs. 1,201.96 Lakhs and our Debt Equity ratio was 4.56 as of such date.

Our indebtedness could:

- require us to dedicate a substantial portion of our cash flow from operations to payments in respect of our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate expenditures;
- increase our vulnerability to adverse general economic or industry conditions;
- limit our flexibility in planning for, or reacting to, competition and/or changes in our business or our industry;
- limit our ability to borrow additional funds;
- Place us at a competitive disadvantage relative to competitors that have less debt or greater financial resources.

There can be no assurance that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt or fund our planned capital expenditures. In addition, we may need to refinance some or all of our indebtedness. For further details, please see *Statement of Financial Indebtedness* beginning on page 186 of this Draft Prospectus.

12. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans / facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs. 1,227.55 Lakhs as on September 10, 2014. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be forfeited by lenders. For further information on the financing and loan agreements along with the total amounts outstanding and the details of the repayment schedule, please refer to chapter “*Statement of Financial Indebtedness*” beginning on page 186 of this Draft Prospectus.

13. *There are several restrictive covenants in the loan agreements, which could influence our ability to expand, in turn affecting our business and results of operations*

We current avail credit facilities from Bank of Baroda and Tata Capital Financial Services Limited. We have entered into agreements for term loans and financial facilities with our banker / lenders and the covenants in borrowings from bank / lenders, among other things require us to obtain permissions in writing in respect of, including, but not limited to effecting any change in the management/Board of the Company, capital structure of the Company; undertake any new expansion/modernization/diversification scheme except which are approved by Bank/lenders, formulate any scheme of amalgamation, acquisition, merger, or reconstruction etc. These covenants may have an adverse effect on the functioning of our Company. For further details on restrictive covenants, please refer to chapter “*Statement of Financial Indebtedness*” beginning on page 186 of this Draft Prospectus.

14. *We are awaiting permission/consent letter from one of our lender; Tata Capital Financial Services Limited, for our proposed alteration of our capital Structure through this present issue.*

The loan agreement as entered by our Company with one of our lender, Tata Capital Financial Services Limited for the loan availed prescribes for prior intimation for effecting any change in the Company’s capital structure. Our Company has intimated the said lender of our proposed public issue that will alter our capital structure. As on date of this Draft Prospectus, we are awaiting the reply from Tata Capital Financial Services Limited, our lender, by way of their permission/consent for the said alteration of our Capital Structure.

15. *We cannot assure of securing adequate financing in future on acceptable terms, in time or at all.*

We may require additional funds in connection with future business expansion and development initiatives. In addition to the our existing available funds , we may need additional sources of funding to meet these requirements, which may include entering into new debt facilities with lending institutions or raising debt or Equity in the capital markets. If we decide to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of any of our business development plans and this may affect our business and future results of operations.

16. *The objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. There is no monitoring agency appointed by Our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.*

Our funding requirements and the deployment of the proceeds of the Issue are purely based on our management’s estimates and have not been appraised by any bank or financial institution. Further, as per SEBI (ICDR) Regulations, 2009, as amended, appointment of monitoring agency is required only for Issue size above Rs. 50,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of Clause 52 of SME Listing Agreement. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

17. We have not made any alternate arrangements for meeting our fund requirements for the Objects of the issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. If we fail to mobilize resources as per our plans, our growth plans, operations and financial performance could be adversely affected.

As on date, we have not made any alternate arrangements for meeting our fund requirements for the objects of the issue. We meet our fund requirements through bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our fund requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled “**Objects of the Issue**” beginning on page 58 of this Draft Prospectus.

18. We face competition in our business from organized and unorganized players, which may affect our business operation and financial condition.

Our Company faces significant competition from both the organized and unorganized players in the industry in which we operates. We compete on the basis of a number of factors, including execution, depth of product, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than us in certain areas of our business;
- Greater brand recognition among clients;
- Larger client bases in and outside India; or
- More diversified operations which allow profits from certain operations to support others with lower profitability.

These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

19. The brand name and logo which is being used by us belongs to our Corporate Promoter viz. Captain Polyplast Limited.

Our Company does not own any intellectual property in its name. Our Company uses the intellectual property like brand name of “**CAPTAIN**” and Logo which belongs to our Corporate Promoter. Our Company has signed MOU dated December 16, 2010 with Captain Polyplast Limited for use of the brand name “**CAPTAIN**” and also has received a consent letter dated September 27, 2014 from Captain Polyplast Limited permitting our Company to use the logo on our products and corporate communications including Letterheads, Banners etc. The brand name is registered in the name of our Corporate Promoter “Captain Polyplast Limited”, whereas as on date of this Draft Prospectus the application for registration of logo has been accepted and advertised by the Trade Mark Registry and is pending approval. In case, of any third party objection to the registration of the logo, our Corporate Promoter may not be in a rightful position to allow us the usage of the same. This may have negative impact on our prevailing brand image in the market. Further there is no assurance that our Corporate Promoter will not withdraw its consent to our usage of the brand name and logo. In such a case we may be unable to continue use of the logo.

20. Our manufacturing activities are dependent upon availability of skilled and unskilled labour.

We do not have any permanent arrangement of labour and recruitments are made as per requirements except for those who are on permanent pay rolls of our Company. Our manufacturing activities are dependent on availability of skilled and unskilled labour. The BSE is not required to inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. Indian Economic Outlook 2020

Over the years, the Indian economy has gone through phases of remarkable transformation. After witnessing the Hindu rate of growth for the first three decades post-independence, the Indian economy got its first “big push” with the first phase of economic reforms in 1980s. The economy recorded annual average growth of around 5.6% during this decade, with significant decline in population below the poverty line from more than 50% in late 1970s to below 40% in late 1980s. The second major push came post 1991, following liberalisation of the economy, which helped it to move on to a sustainable higher growth trajectory. India’s growth performance was even more impressive in the subsequent decade, with per capita income (at constant prices) rising to ₹38,408 in FY10, versus ₹16,065 in FY91. Although India has made significant economic progress as the result of reforms over the years, it still has a long distance to go before it is able to make abject poverty a history.

India has been increasingly looked at as an engine that will drive global growth in future. This is reason enough to look at the economic prospects of India over the current decade. According to D&B’s forecast, the likelihood of India sustaining 9.0% growth during the current decade is very high. According to D&B’s estimate, in the journey during the current decade as India traverses a high growth path, it would eventually surpass Japan’s GDP level (as in 2010 at current US\$) by FY20. The concomitant rise in income levels coupled with increasing young working-age population will work towards increasing the share of discretionary spending in private final consumption expenditure and raising the savings rate. Growth of urban population will be one of the most important demographic shifts that country will witness during the current decade.

Infrastructure will be both a cause and a consequence of economic growth during the current decade. The rising incomes and urbanisation will boost demand for infrastructure investment in sectors such as electricity, roads; telecom et al. Massive infrastructure investment by the Government along with increased investment activity by the private sector will accelerate overall investment during the current decade. Government of India’s (GoI’s) thrust on infrastructure development in recent years and the structural policy changes is expected to provide the third “big push” to the Indian economy, enabling it to achieve inclusive growth during the current decade (Current decade refers to FY11-FY20).

Indian Pipe Industry

The Indian Pipe Industry has experienced rapid growth in the last several years. The major reasons for the growth of this industry is increasing demand for pipes in the irrigation sector, oil and gas sector and also the real estate industry. The demand for steel pipes such as seamless pipes, HSAW, LSAW pipes is increasing as the need for oil and gas transportation in India is growing. The demand for plastic pipes such as PVC and CPVC is also increasing as these pipes are better in quality and durability. Infrastructure development, urbanization and the subsequent development of residential and industrial construction are facilitating the growth of the pipe industry in India. The Government of India is coming up with new projects and investments in the irrigation sector. The focus of the government is on rural water management, which will be fulfilled only when there will be proper transportation of water to the end-user. This is one of the major demand drivers of the pipe industry along with expansion of housing sector and increasing demand for oil and gas transportation.

UPVC Pipes

uPVC (Unplasticized Polyvinylchloride) pipes and fittings exhibit excellent resistance to aggressive environments both naturally occurring and as a result of industrial activity. They are resistant to almost all types of corrosion, either chemical or electrochemical in nature. Since uPVC is a non-conductor, galvanic and electro chemical effects do not occur in uPVC pipes. Due to its long-term strength characteristics, high stiffness and cost effectiveness, UPVC systems account for a large proportion of plastic piping installations uPVC Pipes and fittings a often used in the following circumstances:

- For drinking water pipe distribution systems, both main and supply lines
- Sewer and discharge pipe systems

Due to its non-metallic nature, the material used is totally resistant to all forms of metallic corrosion. Aggressive water resulting from high sulphate soils and low hardness water does not attack uPVC pipes. Being made of a tasteless and odorless material, uPVC pipes remain neutral to all transported fluids. uPVC is completely inert and is widely used for transporting liquids made for human consumption. Because of their mirror-smooth inside surface, uPVC pipes have minimum flow head loss. There is also no buildup of inside deposits, a particular advantage in the construction of sewerage systems.

The physical properties of uPVC pipes are not affected by direct sunshine, or wind & rain. However, to avoid surface browning due to long exposure to direct sunlight, it is recommended that the pipes are kept protected from direct sunlight. Rigid PVC is not conductive to combustion. They therefore offer added safety when used for electrical installations, both domestic and industrial. uPVC pipes are relatively light. Their specific weight 1.43 is one-fifth that of steel pipes. This cuts down transportation costs and facilitates installation in difficult and remote places. Installation is quick and easy with a complete line of fittings either with the solvent glue weld sockets or the rubber seal socket joints. In either case, a leak-proof joint is assured. Subsequent maintenance work is also carried out with a minimum of complication and cost. In case of fire, flames are unable to travel along the pipe because of its self extinguishing feature. Being an integral insulator uPVC are also ideal for electric conduits eliminating the possibility of electrolytic corrosion. They are an ideal application for water supplies, irrigation systems, casing & screen, industrial, soil, waste & drainage sewer system, mining, electrical and telecommunications cables.

Application of UPVC Fittings

- For distribution of hot and cold water in residential, industrial and public projects.
- For use in water and waste water treatment systems.
- For the transportation of hot and chemical fluids in the chemical processing industry.
- For metal finishing and plating of metals.

Overview of major Demand Sectors

Indian Agriculture Sector

At 179.9 million hectares, India holds the second largest agricultural land in the world. A majority of the Indian population relies on agriculture for employment and livelihood. Steady investments in technology development, irrigation infrastructure, emphasis on modern agricultural practices and provision of agricultural credit and subsidies are the major factors contributing to agriculture growth.

Market Size

Given the good monsoon, the agriculture sector in India is likely to grow in the range of 5.2–5.7 per cent in the 2013–14 agriculture year (July-June), nearly three times as compared to the previous year. In FY 12, total food grains production in India reached an all-time high of 259.3 million tonnes (MT). Rice and wheat production stood at 105.3 MT and 94.9 MT respectively.

Total exports of Indian agri and processed food products in the period April–February 2013–14 stood at US\$ 20,331.05 million as compared to US\$ 19,144.45 million during the corresponding period of the previous year, according to the Agricultural and Processed Food Products Export Development Authority (APEDA).

In 2012–13, the share of exports of ‘agricultural and processed food products’ in total exports rose to 13.53 per cent from 10.5 per cent share in 2010–11. Guar gum has emerged as India’s largest item of farm exports with a share of 9.58 per cent during the period, followed by basmati rice and marine products.

On account of higher output in Assam and West Bengal, tea production in India in April–February, 2013–14 rose by 7 per cent to 1,152.91 million kg. The production was 1,073.93 million kg during the corresponding period of the previous year, according to data from the Tea Board.

Indian Construction Sector

The Indian real estate sector has come a long way and is today one of the fastest growing markets in the world. It comprises four sub-sectors – housing, retail, hospitality, and commercial. While housing contributes to five–six percent of India’s gross domestic product (GDP), the remaining three sub-sectors are also increasing at a fast pace. The total realty market in the country is expected to touch US\$ 180 billion by 2020.

Real estate in India is being recognised as an infrastructure service that is driving the economic growth engine of the country. Growing infrastructure requirement in diverse sectors such as tourism, education, healthcare, etc., are offering several investment opportunities for both domestic as well as foreign investors. Total investment by private equity (PE) funds in the real estate sector from January–March 2014 was approximately Rs 28 billion (US\$ 465.19 million). This is a substantial increase of 28 per cent compared to the previous quarter and close to 2.5 times the investments during January–March 2013.

The role of the Government of India has been instrumental in the development of the sector. With the government trying to introduce developer and buyer friendly policies, the outlook for the real estate sector in 2014 does look promising.

Market Size

The market size of the Indian real estate sector stood at US\$ 55.6 billion in 2010–11 and is expected to touch US\$ 180 billion by 2020. In fact, the demand is expected to grow at a compound annual growth rate (CAGR) of 19 per cent in the period 2010–2014, with Tier I metropolitan cities expected to account for about 40 per cent of this growth.

The net office space absorption across the top eight cities – Delhi-NCR, Mumbai, Bengaluru, Chennai, Hyderabad, Pune, Kolkata and Ahmedabad – was up 58 per cent during January–March 2014 as compared to the corresponding period last year, according to real estate consultancy Cushman & Wakefield. Among the eight cities, Ahmedabad and Delhi-NCR recorded a threefold increase in net absorption during the period over January–March 2013.

The number of new launches in the residential segment during the first quarter of 2014 has increased by 43 per cent at 55,000 units across eight major cities. Bengaluru recorded the largest number of units launched at an increase of 22 per cent at 16,838 units, followed by Mumbai and Chennai, according to a report by Cushman & Wakefield.

Indian Economic Outlook 2020

Over the years, the Indian economy has gone through phases of remarkable transformation. After witnessing the Hindu rate of growth for the first three decades post-independence, the Indian economy got its first “big push” with the first phase of economic reforms in 1980s. The economy recorded annual average growth of around 5.6% during this decade, with significant decline in population below the poverty line from more than 50% in late 1970s to below 40% in late 1980s. The second major push came post 1991, following liberalisation of the economy, which helped it to move on to a sustainable higher growth trajectory. India’s growth performance was even more impressive in the subsequent decade, with per capita income (at constant prices) rising to ₹38,408 in FY10, versus ₹16,065 in FY91. Although India has made significant economic progress as the result of reforms over the years, it still has a long distance to go before it is able to make abject poverty a history.

India has been increasingly looked at as an engine that will drive global growth in future. This is reason enough to look at the economic prospects of India over the current decade. According to D&B’s forecast, the likelihood of India sustaining 9.0% growth during the current decade is very high. According to D&B’s estimate, in the journey during the current decade as India traverses a high growth path, it would eventually surpass Japan’s GDP level (as in 2010 at current US\$) by FY20. The concomitant rise in income levels coupled with increasing young working-age population will work towards increasing the share of discretionary spending in private final consumption expenditure and raising the savings rate. Growth of urban population will be one of the most important demographic shifts that country will witness during the current decade.

Infrastructure will be both a cause and a consequence of economic growth during the current decade. The rising incomes and urbanisation will boost demand for infrastructure investment in sectors such as electricity, roads; telecom et al. Massive infrastructure investment by the Government along with increased investment activity by the private sector will accelerate overall investment during the current decade. Government of India’s (GoI’s) thrust on infrastructure development in recent years and the structural policy changes is expected to provide the third “big push” to the Indian economy, enabling it to achieve inclusive growth during the current decade (Current decade refers to FY11-FY20).

Indian Pipe Industry

The Indian Pipe Industry has experienced rapid growth in the last several years. The major reasons for the growth of this industry is increasing demand for pipes in the irrigation sector, oil and gas sector and also the real estate industry. The demand for steel pipes such as seamless pipes, HSAW, LSAW pipes is increasing as the need for oil and gas transportation in India is growing. The demand for plastic pipes such as PVC and CPVC is also increasing as these pipes are better in quality and durability. Infrastructure development, urbanization and the subsequent development of residential and industrial construction are facilitating the growth of the pipe industry in India. The Government of India is coming up with new projects and investments in the irrigation sector. The focus of the government is on rural water management, which will be fulfilled only when there will be proper transportation of water to the end-user. This is one of the major demand drivers of the pipe industry along with expansion of housing sector and increasing demand for oil and gas transportation.

UPVC Pipes

uPVC (Unplasticized Polyvinylchloride) pipes and fittings exhibit excellent resistance to aggressive environments both naturally occurring and as a result of industrial activity. They are resistant to almost all types of corrosion, either chemical or electrochemical in nature. Since uPVC is a non-conductor, galvanic and electro chemical effects do not occur in uPVC pipes. Due to its long-term strength characteristics, high stiffness and cost effectiveness, UPVC systems account for a large proportion of plastic piping installations uPVC Pipes and fittings are often used in the following circumstances:

- For drinking water pipe distribution systems, both main and supply lines
- Sewer and discharge pipe systems

Due to its non-metallic nature, the material used is totally resistant to all forms of metallic corrosion. Aggressive water resulting from high sulphate soils and low hardness water does not attack uPVC pipes. Being made of a tasteless and odorless material, uPVC pipes remain neutral to all transported fluids. uPVC is completely inert and is widely used for transporting liquids made for human consumption. Because of their mirror-smooth inside surface, uPVC pipes have minimum flow head loss. There is also no buildup of inside deposits, a particular advantage in the construction of sewerage systems.

The physical properties of uPVC pipes are not affected by direct sunshine, or wind & rain. However, to avoid surface browning due to long exposure to direct sunlight, it is recommended that the pipes are kept protected from direct sunlight. Rigid PVC is not conductive to combustion. They therefore offer added safety when used for electrical installations, both domestic and industrial. uPVC pipes are relatively light. Their specific weight 1.43 is one-fifth that of steel pipes. This cuts down transportation costs and facilitates installation in difficult and remote places. Installation is quick and easy with a complete line of fittings either with the solvent glue weld sockets or the rubber seal socket joints. In either case, a leak-proof joint is assured. Subsequent maintenance work is also carried out with a minimum of complication and cost. In case of fire, flames are unable to travel along the pipe because of its self-extinguishing feature. Being an integral insulator uPVC are also ideal for electric conduits eliminating the possibility of electrolytic corrosion. They are an ideal application for water supplies, irrigation systems, casing & screen, industrial, soil, waste & drainage sewer system, mining, electrical and telecommunications cables.

Features

- High resistance to corrosion
- High durability in all circumstances
- Weigh only 1/6 of steel pipes, 1/5 of molded steel pipes, and 2/3 of cement pipes
- Maintain consistent flow of water due to its super smooth surface
- Resistant to external impact and internal pressure
- Safe for drinking water with no toxic contamination
- Unflammable
- High electric resistance so suitable for electrical wiring and phone cables
- Have heat insulation quality, protecting the damage from "pipe freeze"
- Easy to install and maintain
- Low cost, compared to other types of pipes

Application of UPVC Fittings

- For distribution of hot and cold water in residential, industrial and public projects.
- For use in water and waste water treatment systems.
- For the transportation of hot and chemical fluids in the chemical processing industry.
- For metal finishing and plating of metals.

Demand Drivers

Considered highly economical, pipelines are essential for transporting fluids and gases across the country. Demand for laying pipes emanates from the need for water supply, sewage disposal, irrigation system, oil & gas supply, exploration etc, hence the various demand drivers for the pipe industry are-

- Oil & Gas transport
- Replacement market
- Domestic Water Supply, Irrigation and Sanitation Projects
- Population divide and Sanitation Levels
- Oil Exploration

Overview of major Demand Sectors

Indian Agriculture Sector

Introduction

At 179.9 million hectares, India holds the second largest agricultural land in the world. A majority of the Indian population relies on agriculture for employment and livelihood. Steady investments in technology development, irrigation infrastructure, emphasis on modern agricultural practices and provision of agricultural credit and subsidies are the major factors contributing to agriculture growth.

Market Size

Given the good monsoon, the agriculture sector in India is likely to grow in the range of 5.2–5.7 per cent in the 2013–14 agriculture year (July-June), nearly three times as compared to the previous year. In FY 12, total food grains production in India reached an all-time high of 259.3 million tonnes (MT). Rice and wheat production stood at 105.3 MT and 94.9 MT respectively.

Total exports of Indian agri and processed food products in the period April–February 2013–14 stood at US\$ 20,331.05 million as compared to US\$ 19,144.45 million during the corresponding period of the previous year, according to the Agricultural and Processed Food Products Export Development Authority (APEDA).

In 2012–13, the share of exports of ‘agricultural and processed food products’ in total exports rose to 13.53 per cent from 10.5 per cent share in 2010–11. Guar gum has emerged as India’s largest item of farm exports with a share of 9.58 per cent during the period, followed by basmati rice and marine products.

On account of higher output in Assam and West Bengal, tea production in India in April–February, 2013–14 rose by 7 per cent to 1,152.91 million kg. The production was 1,073.93 million kg during the corresponding period of the previous year, according to data from the Tea Board.

Investments

The foreign direct investment (FDI) inflows in agricultural services and machinery sector during April 2000–February 2014 stood at US\$ 1,696.98 million and US\$ 338.65 million respectively, as per data released by Department of Industrial Policy and Promotion (DIPP). The following are some of the major investments and developments in the sector:

- The agriculture division of Mahindra and Mahindra (M&M) has entered into a joint venture (JV) with the Netherlands-based seed company HZPC for sourcing high quality potato seeds for Indian farmers.

- Private equity fund India Agribusiness Fund plans to invest Rs 75 crore (US\$ 12.44 million) in Bengaluru-based Beloorbayir Biotech which supplies key ingredients to global nutraceutical, food, beverage and pharmaceutical makers.
- The National Bank for Agriculture and Rural Development (NABARD) has sanctioned Rs 1,112 crore (US\$ 184.31 million) for creation of 1,336 warehouses in various states and state government corporations in the country, which will create 0.75 MT of additional storage space.
- Tractors and Farm Equipment Ltd (TAFE) plans to invest Rs 250 crore (US\$ 41.44 million) by the end of FY 15 on expansion and development of new products. The company, with four factories, has a capacity of around 200,000 units a year. It plans to increase the total capacity to around 300,000 units a year over the next two years, according to Ms Mallika Srinivasan, Chairman and CEO, TAFE.
- Indian Council of Agricultural Research (ICAR) has sought Rs 5,700 crore (US\$ 945.55 million) to strengthen Krishi Vigyan Kendras (KVK) in the 12th Five Year Plan. The allocation for KVK was Rs 2,000 crore (US\$ 331.77 million) during the 11th Plan. In addition, a sum of Rs 500 crore (US\$ 82.94 million) has been allocated to the states of Punjab, Haryana and western Uttar Pradesh for diversification of crops.

Government Initiatives

- The Government of India is implementing many programmes for raising investments in agriculture. Notable among them are Rashtriya Krishi Vikas Yojana (RKVY); National Food Security Mission (NFSM); National Horticulture Mission (NHM); Gramin Bhandaran Yojana; Integrated Scheme of Oilseeds, Pulses, Oil palm, and Maize (ISOPOM), etc. The following are some of the major initiatives taken by the Government of India:
- The government has allowed 100 per cent FDI under automatic route in storage and warehousing, including cold storages. Hundred per cent FDI is also permitted for development of seeds under the automatic route.
- The government is promoting production of various organic inputs in the country, including bio-fertilisers under the National Project on Organic Farming (NPOF). The project provides financial assistance up to 25 per cent of total financial outlay up to a ceiling of Rs 40 lakhs as credit linked back-ended subsidy for setting up bio-fertilisers production units.
- In the Union Budget 2014–15, a target of Rs 8 trillion (US\$ 132.71 billion) for agriculture credit has been set for 2014–15. The credit target for 2013–14 was Rs 7 trillion (US\$ 116.06 billion). Further, the government on January 31, 2014 released Rs 180.22 crore (US\$ 29.89 million) as grant-in-aid to states under the scheme to develop infrastructure facilities for production and distribution of quality seeds.
- The Cabinet Committee on Economic Affairs (CCEA) has approved the implementation of the National Mission on Agricultural Extension and Technology (NMAET) during the 12th Five Year Plan with a total outlay of Rs 13,073.08 crore (US\$ 2.17 billion). The mission aims to restructure and strengthen agricultural extension to enable delivery of appropriate technology and improved agronomic practices to farmers.
- Further, in 2013–14, a pilot scheme on Nutri Farms was launched with an outlay of Rs 200 crore (US\$ 33.18 million) to promote cultivation of bio-fortified food crops enriched with critical micro nutrients such as iron-rich bajra, protein-rich maize and zinc-rich wheat, etc., to improve the nutrition status of the most vulnerable sections of the country's population.

Road Ahead

With a population of about 1.2 billion, India requires a robust, modernised agriculture sector to ensure food security. The 12th Five Year Plan estimated a potential storage capacity expansion of 35 MT. Cold storage capacity also needs to grow rapidly from the current level of 24 MT. The government has targeted an overall growth rate of 4 per cent for the farm sector under the 12th Plan.

“The growth momentum in India’s agricultural exports is expected to continue in the next few years, with an increased share of processed food, including mango pulp, dried and preserved vegetables, meat and poultry items. Factors such as reduced transaction costs, time, better port gate management and fiscal incentives contributed to this upward trend. With continued focus on issues such as food safety and compliance with international standards, we can surely reach new heights,” as per Mr Piruz Khambatta, Chairman and Managing Director, Rasna, and Chairman, Confederation of Indian Industry’s (CII) National Committee on Food Processing.

Indian Construction Sector

Introduction

The Indian real estate sector has come a long way and is today one of the fastest growing markets in the world. It comprises four sub-sectors – housing, retail, hospitality, and commercial. While housing contributes to five–six percent of India’s gross domestic product (GDP), the remaining three sub-sectors are also increasing at a fast pace. The total realty market in the country is expected to touch US\$ 180 billion by 2020.

Real estate in India is being recognised as an infrastructure service that is driving the economic growth engine of the country. Growing infrastructure requirement in diverse sectors such as tourism, education, healthcare, etc., are offering several investment opportunities for both domestic as well as foreign investors. Total investment by private equity (PE) funds in the real estate sector from January–March 2014 was approximately Rs 28 billion (US\$ 465.19 million). This is a substantial increase of 28 per cent compared to the previous quarter and close to 2.5 times the investments during January–March 2013.

The role of the Government of India has been instrumental in the development of the sector. With the government trying to introduce developer and buyer friendly policies, the outlook for the real estate sector in 2014 does look promising.

Market Size

The market size of the Indian real estate sector stood at US\$ 55.6 billion in 2010–11 and is expected to touch US\$ 180 billion by 2020. In fact, the demand is expected to grow at a compound annual growth rate (CAGR) of 19 per cent in the period 2010–2014, with Tier I metropolitan cities expected to account for about 40 per cent of this growth.

The net office space absorption across the top eight cities – Delhi-NCR, Mumbai, Bengaluru, Chennai, Hyderabad, Pune, Kolkata and Ahmedabad – was up 58 per cent during January–March 2014 as compared to the corresponding period last year, according to real estate consultancy Cushman & Wakefield. Among the eight cities, Ahmedabad and Delhi-NCR recorded a threefold increase in net absorption during the period over January–March 2013.

The number of new launches in the residential segment during the first quarter of 2014 has increased by 43 per cent at 55,000 units across eight major cities. Bengaluru recorded the largest number of units launched at an increase of 22 per cent at 16,838 units, followed by Mumbai and Chennai, according to a report by Cushman & Wakefield.

Investments Opportunities

As corporates look to expand businesses, India is expected to witness major demand for office space in 2014. Office space absorption across the country’s seven major cities – Delhi-NCR, Mumbai, Bengaluru, Chennai, Pune, Hyderabad and Kolkata – is likely to increase seven per cent this year to 29 million square feet (sq ft), according to global real estate consultant DTZ.

New supply of retail space in shopping malls in India’s top seven cities is expected to more than double to 11.7 million sq ft in 2014. This will take up the mall stock across India’s metropolitan cities to 87.7 million sq ft by the end of the year, according to a report by Jones Lang LaSalle.

The construction development sector, including townships, housing, built-up infrastructure and construction-development projects garnered total foreign direct investment (FDI) worth US\$ 23,131.64 million in the period April 2000–February 2014. Construction (infrastructure) activities during the period received FDI worth US\$ 2,462.60 million, according to the Department of Industrial Policy and Promotion (DIPP).

The following are some of the major investments and developments in the Indian real estate sector:

- Larsen & Toubro (L&T) has bagged a major residential order to build 271 villas and 24 towers in Bengaluru. “One of our key focus areas has been the growing potential in the residential sector and by winning these prestigious orders we have made significant inroads into this space,” said Mr S N Subrahmanyam, Senior Executive Vice-President (Infrastructure and Construction), L&T.
- Somany Ceramics plans to invest Rs 150 crore (US\$ 24.93 million) over the next 12–24 months for capacity expansion and brand building. “We are looking to finalise two joint ventures (JV) soon. The capacity of our own facilities will also be expanded to shore up total production by 15 million sq m,” according to Mr Abhishek Somany, Joint Managing Director, Somany Ceramics.
- Lodha Developers has acquired Clariant Chemicals’ 87-acre plot of land in Thane, Mumbai, for Rs 1,154 crore (US\$ 191.76 million). “Thane is a rapidly developing part of the Mumbai Metropolitan Region and we see strong, sustained demand for quality homes in the region,” said Mr Abhinandan Lodha, Deputy Managing Director, Lodha Group.

- Xander Group has invested Rs 370 crore (US\$ 61.47 million) in Kapstone Constructions, a subsidiary of Mumbai-based developer, Rustomjee. Kapstone Constructions is currently developing the Rustomjee Urbania township in Thane, spread over 127 acres.
- Ambience Group plans to invest about Rs 1,800 crore (US\$ 299.07 million) over the next four years to develop two housing projects in Noida and Gurgaon, comprising 1,100 housing units and a 350-acre township at Panipat.
- Ansal Buildwell Ltd has signed a memorandum of understanding (MoU) with Bahrain-based VKL Holdings, Al-Namal Group. The MoU will provide both companies the opportunity for joint development in the housing and infrastructure sectors in both India and Bahrain.

Government Initiatives

- The Government of India has allowed FDI up to 100 per cent in development projects for townships and settlements. Hundred per cent FDI is also permitted in the hotel and tourism sector through the automatic route.
- A committee on Streamlining Approval Procedure for Real Estate Projects (SAPREP) was constituted by the Ministry of Housing & Urban Poverty Alleviation (MHUPA) to streamline the process of seeking clearances for real estate projects.
- The Real Estate (Regulation and Development) Bill, 2013, as approved by the Union Cabinet is a pioneering initiative aimed at delivering a uniform regulatory environment to protect the consumer, help in quick verdicts of disputes and ensure systematic growth of the sector.

Road Ahead

- The Indian construction and real estate sector continues to be a favoured destination for global investors. Several large global investors, including a number of sovereign funds, have taken the first move by partnering with successful local investors and developers for investing in the Indian real estate market. This is expected to result in high transaction activity, especially in income yielding commercial office assets during 2014.
- The residential asset class looks to have great potential for growth. “With housing requirements growing across cities and funds investing in the asset class primarily in the form of NCDs providing fixed returns, investments in the right project have the potential to yield healthy returns,” said Mr Sanjay Dutt, Executive Managing Director – South Asia, Cushman & Wakefield.
- Further, demand for space from sectors such as education and healthcare has opened up ample opportunities in the real estate sector. The country still needs to add three million hospital beds to meet the global average of three for every 1,000 people.

Manufacturing Process:

A. Process Flow for uPVC Column / Plumbing / Pressure / Casing Pipes

For manufacturing uPVC Pipes the main apparatus which are used are as follows:

1. High speed mixture
2. Cooler
3. Extruder plant
4. Dies
5. Traction
6. Chilling plant
7. Belling machine

a. Procurement of Raw Materials & Preparation of uPVC Compound

The Raw material for pipes is a mixture of uPVC resin, Calcium Carbonate, different PVC stabilizers and other essential chemicals additives. All these material are mixed in a fixed ratio at high speed in Fully Automatic centralized mixer at required temperature of about 130°C and then cooled at 40°C. The raw materials are sourced from local and international market from various petrochemical companies and their importing agents based in India, for details regarding the sourcing of these raw materials please refer to the section titled *“Infrastructural Facilities”* appearing on page no. 92 of this Draft Prospectus.

b. Uses of uPVC compound & Feeder zone

The Prepared uPVC compound could be directly used through hopper in which compounding materials passes through screw convey. Feeder zone presses the materials to the screw convey.

c. Function of Screw & Barrel Zone

The mixture of uPVC compound passes through the screw & barrel zone, which melt the product uniformly to form homogeneous mixture. The temperature of different barrel zone should be maintained between 150°C- 210°C.

d. Die zone

In die zone, for different sizes of Die, Pin & Sizer of different sizes are used. Now the homogenous mixture comes in die zone from screw & barrel zone & then passes through it to get the pipe of the required diameter that is passed through sizer in vacuums tank.

e. Vacuum Tank/ Cooling Tank

When the homogenous mixture in the form of pipe comes in vacuum tank which form the diameter of the pipe, then pipe enter into the cooling tank in order to get cool by water at 18°c and then passes through traction. Pipes outer diameter may be formed with the help of pressure (not by vacuum) and then cooled at 18°c.

f. Traction

From the cooling tank pipes passes through the Traction at different speed so to get the different wall thickness. The Speed of traction can be varied for different wall thickness as per required for specific pipes.

g. Cutting

After Traction and before cutting online printing is done for branding. After printing, the pipes get cut as per required length with the help of the cutter installed in the Machine.

h. Belling and Threading

After cutting is done pipes goes into belling (only Pressure Pipes and Casing Pipes) in order to get the socket form at one end of the pipe. From here pipes are sending for threading (only Column Pipes and Casing Pipes). Thereafter Column Pipes send for making In-Bulit Locking with the help of coupler at one end.

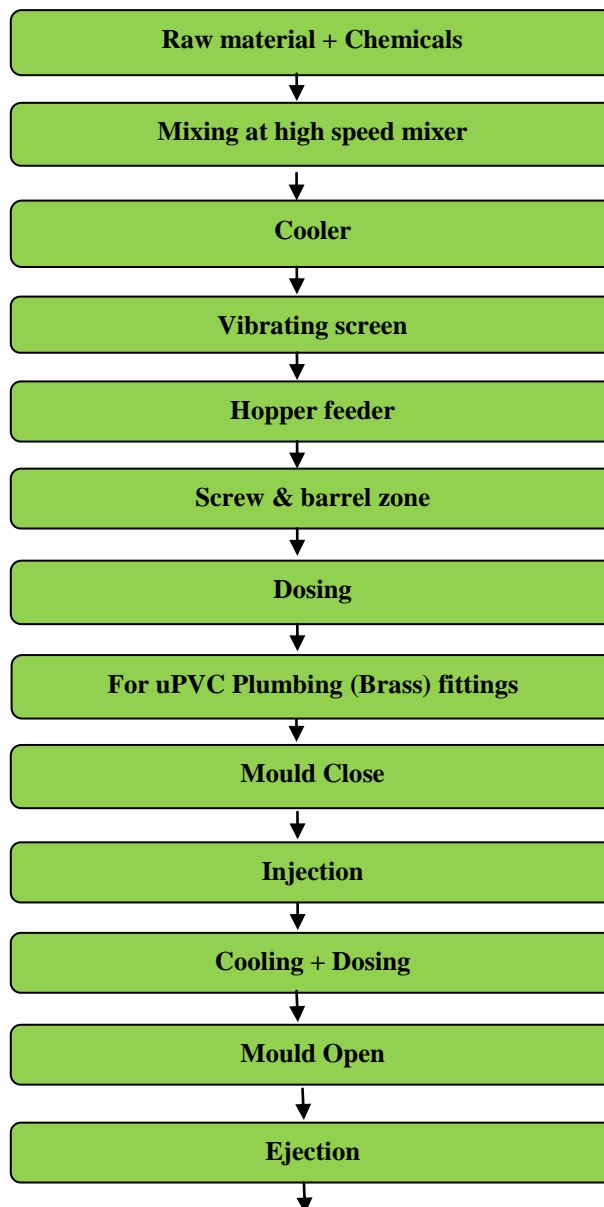

i. Testing

Finally Finished Products are send to the testing department. We have a quality-testing laboratory which has required equipments for checking quality of pipes in line with Indian and International standards. The equipments include Tensile testing Machine, Hydraulic Pressure Testing Equipment, Reversion testing Machine , Impact Tester and Muffle Furnace Test . The objectivity of the quality testing is to avoid defects in the pipes.

B. Process Flow for uPVC Plumbing & Agri Fittings

For manufacturing uPVC Plumbing & Agri Fittings the main apparatus which are used are as follows:-

1. High speed mixture
2. Cooler
3. Injection Moulding Machine
4. Moulds

a. Procurement of Raw Materials & Preparation of uPVC Compound

The Raw material used for Fitting are almost same as used in Pipe manufacturing. All material are mixed in a fixed ratio at high speed in Fully Automatic centralized mixer at required temperature of about 110°C – 115°C and then cooled at 40°C.

b. Uses of uPVC compound & Feeder zone

The uPVC Homogeneous Compounding is stored in a Silo from where material is suck up with the help of pipe and spring to the machines hopper. From hopper materials enter in to the feed zone of screw for further process.

c. Function of Screw & Barrel Zone, Dosing

After placing the raw material in the hopper, dosing take place in the barrel where its temperature is between 160°C - 190°C. Then mould closes & injection is done which fills all the cavities of the mould. After that cooling is done with the help of water that circulates in the mould & dosing start till the time set, then moulds opens and ejection is done of the final pieces.

For Brass fittings we have to insert Brass manually after dosing and then mould closes, injection, cooling & ejection are done.

d. Testing

Finally completed & Finished Products are send to the testing department. We have a quality-testing laboratory which has required equipments for checking quality of pipes in line with Indian and International standards. The objectivity of the quality testing is to avoid defects in the fittings.

CRIMINAL LAWS

Negotiable Instruments Act, 1881

In India, the laws governing monetary instruments such as cheques are contained in the Negotiable Instruments Act, 1881, which is largely a codification of the English Law on the subject. To ensure prompt remedy against defaulters and to ensure credibility of the holders of the negotiable instrument a criminal remedy of penalty was inserted in Negotiable Instruments Act, 1881 in form of the Banking, Public Financial Institutions and Negotiable Instruments Laws (Amendment), 1988 which were further modified by the Negotiable Instruments (Amendment and Miscellaneous Provisions) Act, 2002. The Act provides effective legal provision to restrain people from issuing cheques without having sufficient funds in their account or any stringent provision to punish them in the event of such cheque not being honoured by their bankers and returned unpaid. Section 138 of the Act, creates statutory offence in the matter of dishonour of cheques on the ground of insufficiency of funds in the account maintained by a person with the banker which is punishable with imprisonment for a term which may extend to two year, or with fine which may extend to twice the amount of the cheque, or with both.

BUSINESS LAWS

Indian Contract Act, 1872

Indian Contract Act 1872 is the main source of law regulating contracts in Indian law, as subsequently amended. The Indian Contract Act 1872 sections 1-75 came into force on 1 September 1872. It applies to the whole of India except the state of Jammu and Kashmir. It is not a complete and exhaustive law on all types of contracts.

It determines the circumstances in which promise made by the parties to a contract shall be legally binding on them. Each contract creates some right and duties upon the contracting parties. Indian contract deals with the enforcement of these rights and duties upon the parties. As per the provisions of the Indian Contract Act all agreements are contracts if they are made by the free consent of the parties competent to contract, for a lawful consideration and with a lawful object and are not expressly declared to be void. The parties to a contract must either perform or offer to perform their respective promises unless such performance is dispensed with or excused under the provisions of the Act or of any other law. Promises bind the representative of the promisers in case of death of such promisers before performance, unless a contrary intention appears from the contract. When a contract has been broken the party who suffers by such breach is entitled to receive from the party who has broken the contract, compensation for any loss or damage caused to him thereby, which naturally arose in the usual course of things from such breach or which the parties knew, when they made the contract, to be likely to result from the breach of it. Under the Act it is also provided that when a contract has been broken, if a sum is named in the contract as the amount to be paid in case of such breach, or if the contract contains any other stipulation by way of penalty, the party complaining of the breach is entitled, whether or not actual damage or loss is proved to have been caused thereby, to receive from the party who has broken the contract reasonable compensation not exceeding the amount so named or, as the case may be, the penalty stipulated for. Even a person who rightfully rescinds a contract is entitled to a compensation for any damage which he has sustained for a non-fulfillment of the contract. The Indian Contract Act also lays down provisions of indemnity, guarantee, bailment and agency. Provisions relating to sale of goods and partnership which were originally in the act are now subject matter of separate enactments viz., the Sale of Goods Act and the Indian Partnership Act.

Sale of Goods Act, 1930

Sale of Goods Act is one of very old mercantile law. Sale of Goods is one of the special types of Contract. Initially, this was part of Indian Contract Act itself in chapter VII (sections 76 to 123). Later these sections in Contract Act were deleted, and separate Sale of Goods Act was passed in 1930. The Sale of Goods Act is complimentary to Contract Act. Basic provisions of Contract Act apply to contract of Sale of Goods also. Basic requirements of contract i.e. offer and acceptance, legally enforceable agreement, mutual consent, parties competent to contract; free consent, lawful object, consideration etc. apply to contract of Sale of Goods also.

The law relating to the sale of goods is codified in the Sale of Goods Act, 1930. It defines sale and agreement to sell as a contract whereby the seller transfers or agrees to transfer the property in goods to the buyer for a price and provides that there may be a contract of sale between part owner and another and that the contract of sale may be absolute or conditional. According to the provisions of this act, a contract of sale is made by an offer to buy or sell the goods for a price and the acceptance of such offer. The act further provides that the contract may provide for the immediate delivery of the goods or immediate payment of the price or both or for the delivery or payment by installments or that the delivery or payment or both shall be postponed. Provisions are made in this Act for existing or future goods, perishable goods, ascertainment of price, conditions and warranties, effects of the contract, delivery to carrier, duties of seller and buyer, buyer's right of examining the goods, liability of buyer for neglecting or refusing the delivery of goods, rights of unpaid seller, suits for breach of the contract, sale, etc.

Environmental Laws

Our business is subject to environment laws and regulations. The applicability of these laws and regulations varies from operation to operation and is also dependent on the jurisdiction in which we operate. Compliance with relevant environmental laws is the responsibility of the occupier or operator of the facilities. Our operations require various environmental and other permits covering, among other things, water use and discharges, stream diversions, solid waste disposal and air and other emissions. Major environmental laws applicable to our operations include:

The Environment (Protection) Act, 1986, as amended (the "EPA")

The EPA is an umbrella legislation in respect of the various environmental protection laws in India. The EPA vests the Government of India with the power to take any measure it deems necessary or expedient for protecting and improving the quality of the environment and preventing and controlling environmental pollution. This includes rules for inter alia, laying down the quality of environment, standards for emission of discharge of environment pollutants from various sources, inspection of any premises, plant, equipment, machinery, examination of manufacturing processes and materials likely to cause pollution. Penalties for violation of the EPA include fines up to Rs. 100,000, imprisonment of up to five years or both. There are provisions with respect to certain compliances by persons handling hazardous substances, furnishing of information to the authorities in certain cases, establishment of environment laboratories and appointment of Government analysts.

The Environment Impact Assessment Notification S.O. 1533(E), 2006 (the "EIA Notification")

The EIA Notification issued under the EPA and the Environment (Protection) Rules, 1986 provides that the prior approval of the Ministry of Environment and Forests or State Environment Impact Assessment Authority as the case may be, is required in the event of any new project or activities or the expansion or modernization of existing projects or activities as specified in the EIA Notification. The EIA Notification states that obtaining of prior environmental clearance includes a maximum of four stages, i.e., screening, scoping, public consultation and appraisal.

The Water (Prevention and Control of Pollution) Act, 1974, as amended (the "Water Act")

The Water Act aims to prevent and control water pollution as well as restore water quality by establishing and empowering the Central Pollution Control Board and the State Pollution Control Boards. Under the Water Act, any person establishing any industry, operation or process, any treatment or disposal system, use of any new or altered outlet for the discharge of sewage or new discharge of sewage, must obtain the consent of the relevant State Pollution Control Board, which is empowered to establish standards and conditions that are required to be complied with. In certain cases the State Pollution Control Board may cause the local Magistrates to restrain the activities of such person who is likely to cause pollution. Penalty for the contravention of the provisions of the Water Act include imposition of fines or imprisonment or both.

The Central Pollution Control Board has powers, inter alia, to specify and modify standards for streams and wells, while the State Pollution Control Boards have powers, inter alia, to inspect any sewage or trade effluents, and to review plans, specifications or other data relating to plants set up for treatment of water, to evolve efficient methods of disposal of sewage and trade effluents on land, to advise the State Government with respect to the suitability of any premises or location for carrying on any industry likely to pollute a stream or a well, to specify standards for treatment of sewage and trade effluents, to specify effluent standards to be complied with by persons while causing discharge of sewage, to obtain information from any industry and to take emergency measures in case of pollution of any stream or well. A central water laboratory and a state water laboratory have been established under the Water Act.

The Water (Prevention and Control of Pollution) Cess Act, 1977, as amended (the “Water Cess Act”)

The Water Cess Act provides for levy and collection of a cess on water consumed by industries with a view to augment the resources of the Central and State Pollution Control Boards constituted under the Water Act. Every person carrying on an industry specified under the Water Cess Act is required to pay a cess calculated on the basis of the amount of water consumed for any of the purposes specified under the Water Cess Act at such rate not exceeding the rate specified under the Water Cess Act. A rebate of up to 25% on the cess payable is available to those persons who install any plant for the treatment of sewage or trade effluent, provided that they consume water within the quantity prescribed for that category of industries and also comply with the provision relating to restrictions on new outlets and discharges under the Water Act or any standards laid down under the EPA. For the purpose of recording the water consumption, every industry is required to affix meters as prescribed. Penalties for non-compliance with the obligation to furnish a return and evasion of cess include imprisonment of any person for a period up to six months or a fine of Rs. 1,000 or both and penalty for non payment of cess within a specified time includes an amount not exceeding the amount of cess which is in arrears.

The Air (Prevention and Control of Pollution) Act, 1981, as amended (the “Air Act”)

Pursuant to the provisions of the Air Act, any person, establishing or operating any industrial plant within an air pollution control area, must obtain the consent of the relevant State Pollution Control Board prior to establishing or operating such industrial plant. The State Pollution Control Board is required to grant consent within a period of four months of receipt of an application, but may impose conditions relating to pollution control equipment to be installed at the facilities. No person operating any industrial plant in any air pollution control area is permitted to discharge the emission of any air pollutant in excess of the standards laid down by the State Pollution Control Board. The penalties for the failure to comply with the above requirements include imprisonment of up to six years and the payment of a fine as may be deemed appropriate. Under the Air Act, the Central Board for the Prevention and Control of Water Pollution has powers, inter alia, to specify standards for quality of air, while the State Board for the Prevention and Control of Water Pollution have powers, inter alia, to inspect any control equipment, industrial plant or manufacturing process, to advise the State Government with respect to the suitability of any premises or location for carrying on any industry and to obtain information from any industry.

The Hazardous Wastes (Management and Handling) Rules, 1989

The Hazardous Wastes (Management and Handling) Rules, 1989 require that the occupier and the operator of the facility that treats hazardous wastes, must properly collect, treat, store or dispose the hazardous wastes without adverse effects on the environment. Moreover, they must take steps to ensure that persons working on the site are provided adequate training and equipment for performing their work. When an accident occurs in a hazardous site or during transportation of hazardous wastes, then the relevant State PCB has to be immediately alerted. If, due to improper handling of hazardous waste, any damage is caused to the environment, the occupier or the operator of the facility must pay the necessary remedial expenses.

Thereafter, questionnaire cum notice dated September 5, 2007

under section 142(2) of the IT Act was issued to the Company, subsequent to which the case was assigned to Income Tax officer of Ward 5(1) as the Assessing officer (hereinafter referred to as “IT officer or AO”), who issued another notice dated October 29, 2007 under section 142(2) of the IT Act.

In response to the said notice the Company’s Director Mr. Ashokbhaia Patel alongwith Mr. Ghanshyambhai Kathrotia, C. A., and Mr. Kaushik Mori, Accountant attended the said AO and furnished details and produces books of accounts as called for. During the course of the said assessment proceedings, the Company filed its written submission stating details of comparative trading results of present year as well as proceeding year, GP Chart. On verification of Audit Report, the AO noticed that the Company has debited Sale Commission expenses, hence, vide letter dated October 29, 2007 he called upon the Company to prove the genuineness of the same alongwith documentary evidence like complete address, contra account and income tax particulars of the receiver of the said commission. In response to the same, on November 19, 2007 the Company submitted its contra account for sales commission alongwith evidences stating payment of Total Rs.27,35,764/- as Sales Commission Expenses to its agent K.R. Enterprises, Aditya marketing, Dineshchandra N. Parekh and Syncom formulation Ltd. Thereafter, the AO concluded that the Company failed to submit any details in the case and issued a Show Cause Notice dated November 28, 2007 calling upon the Company to show cause why the said sales commission of Rs.27,35,764/- is not to be treated as Bogus Expenditure and should not be disallowed under section 37 (1) of the IT Act. In response to the same the Company submitted its written submission alongwith list of goods sold, accounts, banks statements reflecting payments made, written agreements with agents, claims of agents and details of cheques paid to Syncom Formulations Ltd and thereby denied the allegations in the show cause notice. During pendency of the said proceeding, on December 17, 2007 the Company also filed its revised return for Assessment year 2005-06 before the AO under section 139(5) of IT Act surrendering its additional income of Rs.Rs.23,57,200.

On December 24, 2007, the said AO passed an Assessment order in the said proceeding concluding that the Company has not submitted any details/documents in respect of sale commission paid to Syncom formulation Ltd. of Rs.23,57,200, and that the Company has debited sales commission of Rs.23,57,200 in the fictitious name of Syncom formulation Ltd. and treated the same as un genuine and bogus sales commission and disallowed the same; this was done only on the ground of statement given by Mr. Purswami engaged in the business of cheque discounting, that the cheque of Syncon Formulation Ltd. was discounted by him to unknown person. Therefore, the AO determined total income of Rs.20,71,600 after deduction under section 801B of the IT Act and issued a notice of Demand for Rs.21,308/-.

Penalty proceedings under section 271(1)(c) of the IT Act was initiated by the Assistant Commissioner of Income Tax (hereinafter referred to as “Asst. CIT”) against the Company vide notice under section 274 read with section 271 of the IT Act. However, on June 26, 2008, the Asst. CIT passed an order holding that the Company has concealed the income and furnished inaccurate particulars of income by showing bogus payment of commission to fictitious party and thereby imposed a penalty of Rs.6,03,793/- under section 271 (1)(c) of the IT Act and accordingly issued a demand notice dated.

The Company has paid the said penalty of Rs.6,03,793/- vide challans dated March 9, 2010. The amount of Rs.21,308/- demanded under Section 143 (3) is payable. CIT imposing penalty of Rs.6,03,793/-, which is pending for hearing and disposal.

(b) In respect of Assessment Year 2007-08

On October 29, 2007 our Corporate Promoter “Captain Polyplast Limited” (hereinafter “the Company”) filed its Annual Return including Profit & Loss account, Balance Sheet, Audit Report and other documents which was processed under section 143 (1) of Income Tax Act, 1961 (hereinafter referred to as “ the Act”) without any modification to the income returned by the Company. Subsequently the case was reopened under section 147 of the Act by issuing notice dated March 25, 2011 under section 148 of the Act. Subsequently notices under section 143(2) and 142(1) both dated July 21, 2011 was also issued which required the Company to furnish certain details. The Company submitted its written submissions dated November 12, 2011 and November 22, 2011 alongwith details regarding sale, purchase, expenses incurred confirmations of depositors and creditors and produced books of accounts etc. The Assistant Commissioner of Income Tax (hereinafter referred to as “Asst. CIT or AO”) on verification of audited books of account and audit report submitted during the course of reopened proceeding found that the Company has claimed expenses of Rs.21,17,570/- towards sale commission paid to 39 different persons. The AO passed an order disallowing the payment of sales commission of Rs.8,40,790/- paid to 8 persons on the basis that the said commission claimed during the present year includes the payment to following 8 persons in whose respect payments were disallowed by the AO in the Assessment order for AY 2008-09 as the same was found to

be bogus. Hence, for the same reason, Show cause notice dated November 16, 2011 was issued to disallow the said commission to 8 persons. The Company filed its reply dated November 22, 2011 on the ground that the said commission paid in present year were paid directly to the parties and are paid by account payee cheques on which tax has been deducted and paid to the government exchequer and that the principle of resjudicata is not applicable in the income tax proceedings. It was contended that in AY 2008-09 the payment of said 8 person (sub dealers) was not direct but was made through sales network and routed through M/s. Dishman Pharmaceuticals and Chemicals Ltd.(DPCL), Whereas the commission of Rs.9,20,281/- paid directly to 8 parties were allowed. Hence, prayed that the commission to said 8 person be allowed.

On December 12, 2011, the said AO vide its Assessment order denied the Company's contentions and grounds in the reply and concluded that the commission paid in AY 2008-09 were paid to DPCL for their work of appointing sub dealers and supervising them, however, the said sub dealers were the same persons who were already working in preceding years for the Company as sub dealers and that the Company inflated its commission to reduce its profit and in the year under consideration the Company has paid to those persons, hence, AO denied to allow the said commission of Rs.8,40,790/- and determined total income of Rs.17,67,400/- after deduction under section 801B of the IT Act. Accordingly imposed a penalty of Rs.4,75,670/- and issued a demand notice for the same.

The Company has filed an Appeal before the Commissioner of Income Tax (Appeals)-IV, Rajkot challenging the said order dated December 12, 2011 imposing penalty of Rs.4,75,670/-, which is pending for hearing and disposal. However, the Company has paid an amount of Rs. 413,000/- against the said demand.

(c) In respect of Assessment Year 2008-09

Dishman Pharmaceuticals and Chemicals Ltd. (DPCL), it was observed that the said commission was paid to DPCL for their work of appointing sub dealers and supervising them, however, AO observed that the said sub dealers were the same persons who were already working in preceding years for the Company as sub dealers and that the Company inflated its commission to reduce its profit.

Accordingly a Show Cause Notice dated December 8, 2010 was issued calling upon the Company to show cause why the said deduction of Rs.15,54,236/- under section 801B of the Act should not be disallowed and added back to total income and not to disallow the sale commission of Rs.8,59,163/- out of total commission of Rs.47,25,126/-. However, the Company has paid an amount of Rs.6,50,000/- vide challan dated February 10, 2011. An amount of Rs.3,53,800/- is payable in terms of the aforesaid Demand Notice.

However, the AO issued a Show Cause notice dated December 9, 2011 to show cause why not to disallow the payment of sales commission of Rs.18,80,952/- paid to 8 persons on the basis that the said commission claimed during the present year includes the payment to following 8 persons in whose respect payments were disallowed by the AO in the Assessment order for AY 2008-09 as the same was found to be bogus. The Company filed its reply dated December 12, 2011 on the ground that the said commission paid in year under consideration were paid directly to the parties and are paid by account payee cheques on which tax has been deducted and paid to the government exchequer and that the principle of resjudicata is not applicable in the income tax proceedings. It was contended that in AY 2008-09 the payment of said 8 person (sub dealers) was not direct but was made through sales network and routed through M/s. Dishman Pharmaceuticals and Chemicals Ltd. (DPCL), whereas the commission of Rs.9,20,281/- paid directly to 8 parties were allowed. Hence, prayed that the commission to said 8 person be allowed.

On December 26, 2011, the said AO passed an Assessment order and denied the Company’s contentions and grounds in the reply and concluded that the commission paid in AY 2008-09 were paid to DPCL for their work of appointing sub dealers and supervising them, however, the said sub dealers were the same persons who were already working in preceding years for the Company as sub dealers and that the Company inflated its commission to reduce its profit and in the year under consideration the Company has paid to those persons, hence, AO denied to allow the said commission of Rs.18,80,952/-. Further, AO upon verification of records observed that the Company raised new share capital aggregating to Rs.7,00,000/- with a premium of Rs.63,00,00/- which was allotted to four unlisted entities namely (1) M/s. Bhumidev Credit Corporation Ltd. (Rs.20,00,000), (2) M/s. Jay DurgaTradelink P. Ltd. (Rs.20,00,000), (3) M/s. Jay Adhayshakti Marketing Ltd. (Rs.10,00,000), and (4) M/s. Ideal Fertilizers P Ltd.
