SECTION III: RISK FACTORS

An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Red Herring Prospectus, particularly the “Financial Information of the Company” and the related notes, “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on page 128, 90 and 166 respectively of this Draft Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Offer, including the merits and the risks involved. You should not invest in this Offer unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some events may not be material individually but may be found material collectively.*
- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “Risk Factors” on page 23 and “Management Discussion and Analysis of Financial Condition and Results of Operations” on page 166 of this Draft Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “Restated Financial Statements”.

INTERNAL RISK FACTORS

- 1. Our business is vulnerable to variations in demand of denim-based apparels and changes in consumer preferences, which could have an adverse effect on our business, results of operations and financial condition.*

Our Company is primarily engaged in manufacturing and selling of denim fabrics, which has a primary application in the production of denim apparels, particularly jeans. Our sales of denim fabrics are dependent on a number of factors, and may decline as a result of increased competition, regulatory action, pricing pressures or fluctuations in the demand for or supply of our products and other factors outside our control. In particular, our business is vulnerable to rapidly-changing customer preferences. Our results of operations are dependent on our ability to attract customers by anticipating, gauging and responding to such changes in customer preferences, and manufacture denim fabrics in line with changes in fashion trends as well as customer demands and preferences. Any change in consumer attitudes towards denim-based apparels may lead to decrease in demand for our products. A decline in demand for our products or a mis-judgement on our part could lead to increased market acceptance of our competitors’ products or may result in the substitution of our products in the market, which could lead to us having lower sales and excess inventories. This may cause a decline in our revenues and profits, which would adversely affect our business, results of operations, financial condition and cash flows.

2. Substantial portion of our revenues has been dependent upon few customers, with which we do not have any firm commitments. The loss of any one or more of our major customer would have a material adverse effect on our business, cash flows, results of operations and financial condition.

The substantial portion of our revenues has been dependent upon few customers. For instance, our top ten customers for the F.Y. ended March 31, 2023 and March 31, 2022 accounted for 96.04% and 92.58% of our revenue from operations for the respective year. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our significant customers, a failure to negotiate favourable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company.

The contribution of our top ten customers in our sales as a percentage of the revenue from operations during financial year ended Mar.'23 are disclosed hereunder:-

S. No.	Customer	% contribution in the revenue from operations for F.Y. ended March 31, 2023
1	Customer 1	30.96%
2	Customer 2	20.41%
3	Customer 3	18.76%
4	Customer 4	9.08%
5	Customer 5	5.08%
6	Customer 6	3.74%
7	Customer 7	3.34%
8	Customer 8	1.83%
9	Customer 9	1.44%
10	Customer 10	1.39%
Total		96.04%

In addition, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on maintaining good relationship with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows.

Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources. Additionally, our revenues may be adversely affected if there is an adverse change in any of our customers' supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers.

We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. We may be subject to working capital risks due to delays or defaults in payment by clients, which may restrict our ability to procure raw materials and make payments when due. Such defaults/ delays by our customers in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

3. We face competition, including from other large and established competitors, and we may fail to compete successfully against existing or new competitors, which may reduce the demand for our Products which may lead to reduced prices, operating margins, profits and further result in decline in revenue.

We face increasing competition from our existing and potential competitors in India and in overseas markets that may have substantially greater brand recognition, longer operating histories, greater financial, product development, sales, marketing, more experienced management, access to a cheaper cost of capital and other resources than we do. Some of our significant competitors in the organized segment includes R&B Denims Limited, Manomay Tex India Limited, United Polyfab Gujarat Ltd and Jindal Worldwide Ltd. Our competitors may have lower costs, or be able to offer lower prices and a larger variety of products in order to

gain market share. Our competitors may also make acquisitions or establish cooperative or other strategic relationships, among themselves or with third parties, including dealers of our products, thereby increasing their ability to address the needs of our targeted customers and offering lower cost products than we do which may have a negative effect on our sales. Further, new competitors may emerge at any time. Our competitors may be able to respond more quickly to new or emerging technologies or customer requirements, and may bring with them customer loyalties that may limit our ability to compete, which could decline our sales. In addition, a variety of known and unknown events could have a material adverse impact on our ability to compete. The success of our products as well as our ability to maintain or increase our sales may also depend upon the effectiveness of our marketing initiatives which may adversely affect our ability to compete effectively.

Competition in our industry is based on a range of factors including pricing, marketing, delivery time, payment terms etc. To remain competitive, we must continue to invest significant resources in capital expenditure, research and development, sales and marketing and customer support. There can be no assurance that we shall have sufficient resources to make these investments or that we shall be able to make the technological advances necessary to be competitive. In case we fail to effectively compete, including any delays in responding to changes in the industry and the market, we may also have to incur additional costs and expenses to conduct marketing campaigns, market research and investing in newer technologies and infrastructure to effectively compete. Increased competition could result in, amongst other things, a slowdown in the growth of our corporate accounts, a loss of our market share, price reductions, reduced demand for our Products, reductions in revenue and reduced margins and profitability.

Further, we may be subject to risk of consolidation amongst our competitors who may leverage their financial strength and market dominance to secure financing at competitive terms. Such a consolidation shall enable these market players to take aggressive steps, including but not limited to, making additional acquisitions, investing more aggressively in product development and capacity and displacing demand for our Products. The market in which we operate is fragmented and in case there is a trend of consolidation in future, our business could be at a comparatively disadvantageous position and as a result our business, results of operations, financial condition and prospects could be materially and adversely affected.

4. We are primarily dependent upon few key suppliers for procurement of raw materials. Any disruption in the supply of these raw materials or fluctuations in their prices could have a material adverse effect on our business operations and financial conditions.

We are dependent on third party suppliers for procurement of yarn, which is the main raw material for manufacturing denim fabrics. We procure a large portion of yarn from a few key suppliers, with whom we do not have any long-term supply contracts and therefore, we cannot assure you that we shall always have a steady supply of raw material at prices favourable to us. Inadequate supply of such raw materials caused either by a sudden change in the prices or imposition of any new taxes or for any other reason could have a material adverse effect on our business operations and financial condition. For the Fiscals 2023 and 2022, purchases from our top ten suppliers amounted to ₹ 26,370.60 lakhs and ₹ 19,001.70 lakhs respectively, and represented 78.36% and 84.20% of our total raw material purchases. In case of loss of any of our existing major vendors for any reason, it would have a material adverse effect on our business operations and profitability. If we cannot fully offset increases in the cost of raw materials, through increases in the prices for our products, we would experience lower margins and profitability, which would have a material adverse effect on our financial condition and results of operations.

Further, we do not have long term agreements with any of our raw material suppliers and we acquire such raw materials pursuant to our purchase orders from suppliers. Raw material supply and pricing can be volatile due to a number of factors beyond our control, including cotton prices, polyester prices, crude prices, global demand and supply of yarns, general economic and political conditions, tariff disputes, transportation, labour costs, labour unrest, natural disasters, competition, import duties, the outbreak of infectious diseases such as COVID-19, tariffs and currency exchange rates and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations. There can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Any delay in the supply or delivery of raw materials to us by our suppliers may in turn delay our process of manufacture and delivery of products to our customers and this may have an adverse effect on our business, cash flows and results of operations. Additionally, our inability to predict market conditions may result in us placing supply orders for inadequate quantities of such raw materials. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms.

Our suppliers may be unable to provide us with a sufficient quantity of raw materials, at prices acceptable to us. Further, we may not be able to renegotiate our pricing or delivery terms on a reasonable basis or find suitable alternative suppliers in the future, which may affect our business, financial condition, cash flows and results of operations. Any extended interruption in the supply of raw materials could disrupt our operations and can have a material adverse effect on our business, results of operations or financial condition. Although we believe we have maintained stable relationships with our suppliers in the past, we cannot assure you that, we will be able to source adequate quantities of raw materials in a timely manner from our existing suppliers in the

future or we will be able to find alternative suppliers at acceptable prices and quality levels. Our inability to do so may adversely affect our reputation, business, results of operations and cash flows.

5. *We rely on outsourcing a certain proportion of our production processes and activities to third-parties, without exclusivity arrangements. Any inability to obtain sufficient quantities of processed material of the requisite quality in a timely manner and at acceptable prices, or a slowdown, shutdown or disruption in such third parties' operations and performance, could adversely affect our business, results of operations and financial condition.*

Currently, we outsource certain proportion of our production process such as yarn dyeing, yarn sizing and fabrics singeing and finishing process to third party manufacturers. We rely on these third parties to provide us with an uninterrupted supply of our products. However, we cannot assure you that they may do so in a timely manner, or if at all. These third parties may decide not to accept our future orders on the same or similar terms, or at all. We may face the risk of our competitors offering them better terms, which may cause them to cater to our competitors alongside, or even instead of us. They may discontinue their work on short notice and our production process may be stalled or hindered due to this. Conversely, due to increased customer demand for our products, we may need to obtain more products from more third parties, and any inability to do so may render us unable to execute our growth strategy.

Additionally, our job workers manufacturing facilities may be subject to operating risks, such as performance below expected levels of efficiency, excessive wastage of raw materials, delays in production, decrease in quality of products made, labor disputes, natural disasters, industrial accidents, interruptions in power supply and statutory and regulatory restrictions. Any non-compliance by our jobbers with the applicable laws which may result in a shutdown of their facilities, could result in the delay or non-availability of the delivery of our products. In addition, we cannot ensure that the processes done by them on products will be of satisfactory quality. Any failure to adhere with quality may damage our reputation, and adversely affect our business, results of operations and financial condition. Any defects in the products they supply could expose us to product liability or damage our reputation and reduce demand for our products. If our jobbers perform unsatisfactorily, substantially reduce their volume of supply, substantially increase their prices or terminate their business relationship with us, the cost and time required to manufacture our products would increase. We may also need to replace jobbers or take other remedial actions. Any deficiency in the quality of products that our jobbers supply to us may adversely affect our business, financial condition and results of operations.

6. *We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. Our Company is in the process of making application for change in name in all the permits, licenses and approvals, which are under Company's former name. For details regarding pending approvals, please refer to section titled "**Government and Other Approvals**" beginning on page 178 of the Draft Red Herring Prospectus. There can be no assurance that the relevant authorities will issue these approvals or licenses in a timely manner, or at all.

12. Our continued operations at our manufacturing facility is critical to our business and any disruption, breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our manufacturing facility, may have a material adverse effect on our business, results of operations, financial condition and cash flows.

Our manufacturing facility is subject to operating risks, such as breakdown or failure of machinery, power supply or processes, performance below expected levels of efficiency, obsolescence of equipment or machinery, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. Our customers rely significantly on the timely delivery of our products and our ability to provide an uninterrupted and timely supply of our products is critical to our business. We also require substantial electricity for our manufacturing facilities which is sourced from state electricity board. In case, the supply is not available for any reason, our production schedule may be hampered. Further, our customer relationship, business and financial results may be materially adversely affected by any disruption of manufacturing operations of our products, including as a result of any of the factors mentioned above.

13. Any failure on our part to effectively manage our inventory may result in an adverse effect on our business, revenue from manufacturing operations and financial condition.

We are a manufacturing company, and, at all points of time, a certain portion of our assets comprises of an inventory of raw materials, work in progress and finished goods. Maintaining sufficient inventory of raw materials is critical for our operations including as a buffer against any supply disruptions. Any failure on our part to effectively manage our inventory of raw materials and finished products in response to changing market scenario may have an adverse effect on our financial condition and may even lead to loss of business and increase the costs of our operations.

In the event we overestimate our requirements for raw materials as compared to the demand for our products, it may lead to situations that require us to block more capital and increase our operating costs in connection with inventories and further expose us to variations in raw materials risk. Equally, if we underestimate our requirements for raw materials, it may adversely affect our ability to manufacture the required quantity of products for our customers' requirements in a timely and cost-efficient manner which may lead to loss of business and / or the opportunity to service customers which could adversely affect our business, results of operations and financial condition. Further, we may also lose opportunities to acquire raw materials in a cost-effective manner, thereby increasing costs of operations and adversely affecting our working capital requirements.

Additionally, if our inventory of finished products is not dispatched on time or if there is any unanticipated delay in the delivery of our finished products or if the finished products are not properly maintained or are damaged or destroyed, we could lose such inventory which could have an adverse impact on our production cycle, results of operation and financial condition.

14. Under-utilization of our manufacturing capacities and an inability to effectively utilize our existing manufacturing capacities could have an adverse effect on our business, future prospects and future financial performance.

As on date of this Draft Red Herring Prospectus, our Company has 96 airjet looms installed at Dholi unit which has an annual installed capacity of weaving 1,92,72,000 mtrs. of denim fabrics. In Fiscals 2023, 2022 and 2021, our overall capacity utilization is detailed below:

Capacity of weaving of yarn into grey fabrics:

Particulars	2020-21	2021-22	2022-23	Existing Capacity (p.a.)	Installed Capacity (p.a.)
Installed Capacity (in Mt)	1,92,72,000	1,92,72,000	1,92,72,000	1,92,72,000	
Actual Production (in Mt)	56,06,785	92,92,589	1,24,37,275		
Capacity Utilization (in %)	29.09%	48.22%	64.53%		

As certified by Mukesh M. Shah, Chartered Engineer, through certificate dated July 27, 2023

Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing facility as well as on the market demand of the products sold by us. Among others, the capacity utilization also depends upon the availability of raw materials, labour, industry/ market conditions and procurement practice followed by our customers. In the event we are unable to achieve considerable capacity utilization of our current manufacturing facility, it would result in operational inefficiencies which could have a material adverse effect on our business, results, financial condition and future prospects. Under-utilization of our manufacturing capabilities over extended periods, or significant under-utilization in the short-term, could materially and adversely impact our business, growth prospects and future financial performance.

15. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

Our operations are subject to risks inherent in manufacturing facilities such as risk of equipment failure, work accidents, fire, earthquakes, flood and other force majeure events, acts of terrorism and explosions including hazards that may cause injury and loss of life, severe damage to and the destruction of property and equipment and environmental damage. Our significant insurance policies consist of, among others, property insurance (building, stock, furniture & fixture and plant & machinery), burglary insurance of stock, windmill property insurance and vehicle insurance. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as cash in transit, goods in transit, machinery breakdown, keyman insurance, workmen compensation, group personal accident or mediclaim policy. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

16. *If we are not able to successfully manage our growth, our business and results of operations may be adversely affected.*

Continued growth of our business and customer base requires us to expand our product portfolio, strengthen our product quality, expand and enhance our sales channels, better manage our supply chain, upgrade our information systems and technologies and devote other resources to our business expansions, among others. As we continue to grow, managing our business will become more complicated as we develop a wider product mix, some of which we may have less experience in. In addition, as we increase our product offerings, we will need to work with a larger number of business partners and maintain and expand mutually beneficial relationships with our existing and new business partners. Our inability to manage the expansion of our products range, customer base and manufacturing capacities, and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition.

We cannot assure you that we will be able to effectively manage our growth, that our current personnel, infrastructure, systems, procedures and controls or any measures to enhance them will be adequate and successful to support our expanding operations or that our strategies and new business initiatives will be executed successfully. Our failure to manage our anticipated growth effectively could reduce our ability to execute our business strategies, recruit and retain personnel, innovate, and manage costs all of which could adversely affect our business, results of operations, cash flows and financial condition. In addition, the availability of funds plays a crucial role for growth and expansion of the business. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. Any downgrade in our credit ratings could increase our borrowing costs and adversely affect our access to capital. Further, in case we decide to raise additional funds through the issuance of equity or equity linked instruments, the interests of our shareholders may be diluted. Further, if we decide to meet our capital requirements through debt financing, our interest obligations shall increase and we may be subject to additional restrictive covenants under our respective financing arrangements. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations and financial condition could be adversely affected.

17. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Promoters and Key managerial personnel, particularly Mr. Bharat Bhushan Agarwal and Mr. Rikin Agarwal. The loss of any of our Promoter and Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section **“Our Management”** on page 110 of this Draft Red Herring Prospectus.

18. We have incurred indebtedness which exposes us to various risks which may have an adverse affect on our business and results of operations

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on March 31, 2023, our total outstanding indebtedness was ₹ 4177.66 Lakhs.

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a short notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an adverse affect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see **“Statement of Financial Indebtedness”** on page 163 of this Draft Red Herring Prospectus.

19. Our business operations are majorly concentrated in a particular geographical region and any adverse developments affecting our operations in this region could have a significant impact on our revenue and results of operations.

We carry our entire manufacturing operations from our unit located in Dholka, Ahmedabad, Gujarat. Due to the geographical concentration of our manufacturing operations primarily in Dholka, our operations are susceptible to local, regional and environmental factors, such as social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events and circumstances. Such disruptions could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in the transport of our products and raw materials, loss of key managerial personnel, and/or otherwise adversely affect our business, financial condition and results of operations.

In addition, we generate almost 100% of our revenue through our customers situated in Gujarat. Further, our most of the suppliers and third-party manufacturers are also located in Gujarat. Such geographical concentration of our business in the Gujarat region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

20. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

21. *We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.*

Our Company has entered into various transactions with our Directors, Promoters and Promoter Group members/entities. These transactions, inter-alia includes, sales, purchase, remuneration, loans and advances, purchase of fixed assets, payment of commission etc. For details, please refer to *Note-W - Related Party Transactions* under Section titled *"Financial Information of the Company"*, chapter titled *"Our Promoters and Promoter Group"* and *"Capital Structure"* beginning on page 158 and 52 respectively of this Draft Red Herring Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution. While we believe that all such transactions have been conducted on an arm's length basis and in the ordinary course of business, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

22. *Dependence upon third party transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.*

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a needs basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

23. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Offer price.*

Our Promoters average cost of acquisition of Equity Shares in our Company may be lower than the Offer Price as may be decided by the Company and the Selling Shareholders in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapters *"Risk Factors - Prominent Notes"* and *"Capital Structure"* beginning on pages 23 and 52 respectively of this Prospectus

24. *We have not received NOC from one of our lender for undertaking the initial public offer of equity shares.*

As on the date of this Draft Red Herring Prospectus, we have not received the NOC for the Proposed Offer from one of our lender, namely State Bank of India. However, our Company intends to obtain the necessary NOC in relation to the proposed Offer from such lender prior to the filing of the Prospectus with the RoC, undertaking the proposed Offer without obtaining such lender NOC may constitute a default under such loan agreement, which could impact our loan facilities and may have an effect on our financial condition and results of operations.

25. *Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.*

Our business requires significant amount of working capital and major portion of our working capital is utilized towards inventories and trade receivables. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. In case of any such defaults from our debtors, may affect our business operations and financials. For further details regarding working capital requirement, please refer to the section *"Objects of the offer"* on page 63 of this Draft Red Herring Prospectus.

26. *Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.*

Our business activities are dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any labour problem in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes, lock-outs or increased wage demands. Such issues could have adverse effect on our business, and results of operations.

27. Our contingent liabilities as stated in our Restated Financial Statements could affect our financial condition.

Our Contingent liability as on March 31, 2023 was Rs 79.53 lacs. If this contingent liability materializes, fully or partly, the financial condition of our Company could be affected. The details of Contingent Liability as on March 31, 2023 is as follows:

28. The Promoters (including Promoter Group) and Directors hold 87.49% of the Equity Shares of our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.

Our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company or their relatives, dividend entitlement, properties given by them on lease/rental basis or loans advanced by them to the Company, and benefits deriving from the directorship in our Company. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. For further information, please refer to the chapters/section titled “*Our Business*”, “*Our Promoters and Promoter Group*” and “*Note-W - Related Party Transactions*”, beginning on pages 90, 122 and 158 respectively of this Draft Red Herring Prospectus.

29. Our Promoters, Directors and Promoter Group members/entities have provided personal guarantees for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters/ Directors and thereby, impact our business and operations.

Our Promoters, Directors and Promoter Group entities/members, namely Bharat Bhushan Omprakash Agarwal, Rikin Bharatbhushan Agarwal, Vedprakash Devkinandan Chiripal along with certain other parties have extended personally guarantee towards loan facilities taken by our Company. Any default or failure by us to repay the loans in a timely manner, or at all could trigger repayment obligations of our guarantors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoters/Directors of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “*Statement of Financial Indebtedness*” on page 163 of this Draft Red Herring Prospectus.

For further details, please see the section entitled “*Statement of Financial Indebtedness*” on page 163 of this Draft Red Herring Prospectus

We cannot assure you that our Promoters will not favour the interests of our promoter group entity over our

interests in future or that we will be able to suitably resolve any such conflict without an adverse effect on our business or operations.

32. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Offer proceeds may delay the implementation schedule.*

The proposed fund requirement for our Working Capital requirements, as detailed in the section titled “**Objects of the offer**” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Offer proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “**Objects of the offer**” beginning on page 63 of this Draft Red Herring Prospectus.

Further, the purposes for which the Net Proceeds are to be utilised have not been appraised by an independent entity and are based on our estimates and on third-party quotations. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Offer without any action or approval of our shareholders. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us. EXTERNAL RISK FACTORS

46. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India’s economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse affect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors’ reactions to developments in one country can have adverse affects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

47. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter *“Government and Other Approvals”* on page 178 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse affect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax (*“GST”*) regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

48. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse affects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems,

particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse affect on our business, operations, financial condition, profitability and price of our Equity Shares.

49. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

50. Government regulation of foreign ownership of Indian securities may have an adverse affect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

51. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

52. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse affect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

53. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into

new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an Offer of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

54. The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer price and you may not be able to sell your Equity Shares at or above the Offer Price.

The Offer price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Offer. For further information please refer the section titled "***Basis for Offer Price***" beginning on page 69 of the Draft Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price.

55. Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the Offer within six Working Days from the Bid/ Offer Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

For further details on the method and procedure for Bidding, please see section entitled **“Offer Procedure”** on page 204 of this Draft Red Herring Prospectus.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

- Check eligibility for making a Bid (see section titled **“Offer Procedure”** on page 204 of this Draft Red Herring Prospectus);

GLOBAL ECONOMY

After growing 3.1 percent last year, the global economy is set to slow substantially in 2023, to 2.1 percent, amid continued monetary policy tightening to rein in high inflation, before a tepid recovery in 2024, to 2.4 percent. Tight global financial conditions and subdued external demand are expected to weigh on growth across emerging market and developing economies (EMDEs). Projections for many countries have been revised down over the forecast horizon, with upgrades primarily due to stronger than expected data at the beginning of 2023 more than offset by downgrades thereafter. Inflation has been persistent but is projected to decline gradually as demand weakens and commodity prices moderate, provided longer-term inflation expectations remain anchored.

Global growth could be weaker than anticipated in the event of more widespread banking sector stress, or if more persistent inflation pressures prompt tighter-than-expected monetary policy. Weak growth prospects and heightened risks in the near term compound a long-term slowdown in potential growth, which has been exacerbated by the overlapping shocks of the pandemic, the Russian Federation's invasion of Ukraine, and the sharp tightening of global financial conditions. This difficult context highlights a multitude of policy challenges. Recent bank failures call for a renewed focus on global financial regulatory reform. Global cooperation is also necessary to accelerate the clean energy transition, mitigate climate change, and provide debt relief for the rising number of countries experiencing debt distress. At the national level, it is imperative to implement credible policies to contain inflation and ensure macroeconomic and financial stability, as well as undertake reforms to set the foundations for a robust, sustainable, and inclusive development path.

Regional prospects

Growth is projected to diverge across EMDE regions this year and next. It is expected to pick up in 2023 in East Asia and Pacific (EAP) and Europe and Central Asia (ECA), as China's reopening spurs a recovery and as growth prospects in several large economies improve. In contrast, growth is forecast to moderate in all other regions, particularly in Latin America and the Caribbean (LAC) and the Middle East and North Africa (MNA). Headwinds from weak external demand, tight global financial conditions, and high inflation will drag on activity this year, especially in LAC, South Asia (SAR), and Sub-Saharan Africa (SSA). The lingering impact of Russia's invasion of Ukraine will continue to weigh on growth across regions, particularly in ECA. Next year, growth is projected to moderate in EAP and SAR but to pick up elsewhere as domestic headwinds ease and external demand strengthens. Downside risks to the outlook for all regions include possible further global financial stress and more persistent domestic inflation than projected in the baseline. Geopolitical tensions, conflict and social unrest, and natural disasters stemming from climate change also present downside risks, to varying degrees. The materialization of such risks could further weaken potential growth, leading to a prolonged period of slower growth in all EMDE regions.

Financial Spillovers of Rising U.S. Interest Rates

The rapid rise in interest rates in the United States poses a significant challenge to EMDEs. As the Federal Reserve has pivoted toward a more hawkish stance to rein in inflation, a substantial part of the sharp increases in U.S. interest rates since early 2022 has been driven by shocks that capture changes in perceptions of the Fed's reaction function. These reaction shocks are associated with especially adverse financial market effects in EMDEs, including a higher likelihood of experiencing a financial crisis. Their effects also appear to be more pronounced in EMDEs with greater economic vulnerabilities. These findings suggest that major central banks can alleviate adverse spillovers through proper communication that clarifies their reaction functions. They also highlight that EMDEs need to adjust macroeconomic and financial policies to mitigate the negative impact of rising global and U.S. interest rates.

Global outlook

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation's invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. The resilience that global economic activity exhibited earlier this year is expected to fade. Growth in several major economies was stronger than envisaged at the beginning of the year, with faster-than-expected economic reopening in China and resilient consumption in the United States. Nonetheless, for 2023 as a whole, global activity is projected to slow, with a pronounced deceleration in advanced economies and a sizable pickup in China (figure A). Inflation pressures persist, and the drag on growth from the ongoing monetary tightening to restore price stability is expected to peak in 2023 in many major economies. Recent banking sector stress will further tighten credit conditions. This will result in a substantial growth deceleration in the second half of this year. This slowdown will compound a period of already-subdued growth—over the first half of the 2020s (2020-2024), growth in EMDEs is expected to average just 3.4 percent, one of the

weakest half-decades of the past 30 years (figure B). This slowdown reflects both cyclical dynamics and the current trend of declining global potential output growth (figure C).

Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability. Many banks experienced substantial unrealized losses due to the sharp rise in policy interest rates. Concerns about the viability of balance sheets of some banks led to depositor flight and market volatility in the United States and Europe earlier in the year, which were stemmed by a swift and extensive policy response. Financial markets remain highly sensitive to evolving expectations about the future path of interest rates of major central banks. Spillovers from banking turmoil in advanced economies to EMDEs have so far been limited. However, countries with more pronounced macroeconomic policy vulnerabilities, as reflected by lower credit ratings, have experienced slower growth and greater financial stress, including large currency depreciations and a sharp widening of sovereign spreads. Projections for 2023 growth in these economies have fallen by more than half over the past year (figure D).

Inflation pressures persist. Although global headline inflation has been decelerating as a result of base effects, abating supply chain pressures, and falling commodity prices, core inflation in many countries remains elevated, and inflation is above target in almost all inflation-targeting economies. Inflation is expected to continue to be above its pre-pandemic level beyond 2024 (figure E). That said, inflation expectations in most inflation targeting countries have so far not undergone a major shift and appear to remain anchored.

In all, global growth is forecast to slow from 3.1 percent in 2022 to 2.1 percent in 2023, before edging up to 2.4 percent in 2024. Relative to the January projections, this is 0.4 percentage point stronger in 2023 and 0.3 percentage point weaker in 2024. Greater-than-expected resilience of major economies at the end of 2022 and early in 2023 led to the overall upgrade to growth in 2023. Growth in advanced economies is set to decelerate substantially for 2023 as a whole, to 0.7 percent, and to remain feeble in 2024, due to monetary tightening, less favorable credit conditions, softening labor markets, and still-high energy prices. In EMDEs, aggregate growth is projected to edge up to 4 percent in 2023, almost entirely due to a rebound in China following the removal of strict pandemic-related mobility restrictions. Excluding China, growth in EMDEs is set to slow substantially to 2.9 percent this year. This projection is predicated on the assumption of a protracted period of tight global monetary policy, fiscal consolidation in most EMDEs, and weak external demand. The slowdown is expected to be even more severe for EMDEs with elevated fiscal vulnerabilities and external financing needs. Persistent weak growth means that, excluding China, EMDEs are expected to continue making next to no progress at closing the differential in per capita incomes relative to advanced economies (figure F). By 2024, economic activity in EMDEs will still be about 5 percent below levels projected on the eve of the pandemic.

The global economy is projected to slow substantially this year, with a pronounced deceleration in advanced economies. The first half of the 2020s is expected to be one of the weakest half-decades of the past 30 years for emerging market and developing economies (EMDEs), as a result of both cyclical dynamics and slowing potential growth. EMDEs with lower credit ratings are set to experience a particularly sharp slowdown this year. Inflation remains elevated in many countries and is envisaged to remain above pre-pandemic levels beyond 2024. Excluding China, EMDEs are expected to make next to no progress at closing the gap in per capita incomes with advanced economies over the forecast horizon.

Global risks and policy challenges

An intensification of advanced-economy banking stress could result in a sharp slowdown in global growth in 2024, or even a global recession if it had major spillovers to emerging market and developing economies (EMDEs). A more hawkish U.S. monetary policy reaction to inflation could also further raise borrowing costs in EMDEs, especially in those with underlying vulnerabilities. There is an increasing need for debt relief for low-income countries amid a greater diversity of lenders. Substantial investments are needed to achieve resilient and low-carbon growth. Rising debt servicing costs are increasing the risk of debt distress. Reversing the decline in potential growth requires decisive structural reforms.

Global trade

Supply chain pressures and supplier delivery times have dropped back to pre-pandemic levels as goods demand has weakened and global shipping conditions have improved. A rising number of new trade measures have been protectionist. The ongoing shift in global consumption toward less trade-intensive goods will likely continue to lower the growth rate of trade relative to output. This shift and subdued demand are expected to dampen global trade growth substantially this year.

Global inflation and financial developments

Global core inflation remains elevated. Projections suggest inflation will continue to be above its pre-pandemic level beyond 2024. Market-based measures of long-term inflation compensation in advanced economies remain above 2 percent, despite a decline in oil prices. In many emerging market and developing economies (EMDEs), inflation is either accelerating or has stabilized at high levels. One-year-ahead EMDE inflation expectations have declined only slightly. Longer-term projections point to a faster decline in inflation in countries with inflation targets.

Prior to the advanced-economy bank failures in March, the U.S. yield curve registered its deepest inversion in four decades. During the banking stress, short-term government bond yields and bank stocks fell sharply. Despite these events, and much tightened bank lending standards, advanced economy credit spreads remain contained. As borrowing costs have risen globally, currency depreciation and credit spread widening in emerging market and developing economies have been disproportionately concentrated in the countries with the weakest credit ratings.

In general, global economic shocks in the past were severe but spaced out in time. This changed in the third decade of this millennium. At least three shocks have hit the global economy since 2020. It all started with the pandemic-induced contraction of the global output, followed by the Russian-Ukraine conflict leading to a worldwide surge in inflation. Then, the central banks across economies led by the Federal Reserve responded with synchronised policy rate hikes to curb inflation.

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world’s second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year’s capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. India’s economic growth in FY23 has been principally led by private consumption and capital formation. It has helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. Still, private capex soon needs to take up the leadership role to put job creation on a fast track. Recovery of MSMEs is proceeding apace, as is evident in the amounts of GST they pay, while the ECGLS is easing their debt servicing concerns.

Global growth has been projected to decline in 2023 and is expected to remain generally subdued in the following years as well. The slowing demand will likely push down global commodity prices and improve India’s CAD in FY24. However, a downside risk to the Current Account Balance stems from a swift recovery driven mainly by domestic demand and, to a lesser extent, by exports. Growth is expected to be brisk in FY24 as a vigorous credit disbursement, and capital investment cycle is expected to unfold in India with the strengthening of the balance sheets of the corporate and banking sectors.

Market Size

India’s nominal gross domestic product (GDP) at current prices is estimated to be at ₹ 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world.

The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at ₹ 147,686 crore (US\$ 17.92 billion).
- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.
- In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at ₹ 58,762 crore (US\$ 7.13 billion).

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports.

- Home & Cooperation Minister Mr. Amit Shah, laid the foundation stone and performed Bhoomi Pujan of Shri Tanot Mandir Complex Project under Border Tourism Development Programme in Jaisalmer in September 2022.
- In August 2022, Mr. Narendra Singh Tomar, Minister of Agriculture and Farmers Welfare inaugurated four new facilities at the Central Arid Zone Research Institute (CAZRI), which has been rendering excellent services for more than 60 years under the Indian Council of Agricultural Research (ICAR).
- The Union Budget of 2022-23 was presented on February 1, 2022, by the Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman. The budget had four priorities PM GatiShakti, Inclusive Development, Productivity Enhancement and Investment, and Financing of Investments. In the Union Budget 2022-23, effective capital expenditure is expected to increase by 27% at ₹ 10.68 lakh crore (US\$ 142.93 billion) to boost the economy. This will be 4.1% of the total Gross Domestic Production (GDP).
- In August 2022, a Special Food Processing Fund of ₹ 2,000 crore (US\$ 242.72 million) was set up with National Bank for Agriculture and Rural Development (NABARD) to provide affordable credit for investments in setting up Mega Food Parks (MFP) as well as processing units in the MFPs.
- In July 2022, Deendayal Port Authority (DPA) announced plans to develop two Mega Cargo Handling Terminals on a Build-Operate-Transfer (BOT) basis under Public-Private Partnership (PPP) Mode at an estimated cost of ₹ 5,963 crore (US\$ 747.64 million).
- In July 2022, the Union Cabinet chaired by the Prime Minister Mr. Narendra Modi, approved the signing of the Memorandum of Understanding (MoU) between India & Maldives. This MoU will provide a platform to tap the benefits of information technology for court digitization and can be a potential growth area for the IT companies and start-ups in both the countries.

Growth Outlook: 2023-24

India's recovery from the pandemic was relatively quick, and growth in the upcoming year will be supported by solid domestic demand and a pickup in capital investment. The current growth trajectory will be supported by multiple structural changes that have been implemented over the past few years. The private sector – financial and non-financial – was repairing balance sheets, which led to a slowdown in capital formation in the previous decade. The financial system stress experienced in the second decade of the millennium, evidenced by rising nonperforming assets, low credit

Source: IMF, WTO
Note: F stands for Forecast

growth and declining growth rates of capital formation, caused by excessive lending witnessed in the first decade-plus, is now behind us. Aided by healthy financials, incipient signs of a new private sector capital formation cycle are visible. More importantly, compensating for the private sector's caution in capital expenditure, the government raised capital expenditure substantially. Budgeted capital expenditure rose 2.7X in the last seven years, from FY16 to FY23, re-invigorating the Capex cycle. Structural reforms such as the introduction of the Goods and Services Tax and the Insolvency and Bankruptcy Code enhanced the efficiency and transparency of the economy and ensured financial discipline and better compliance.

Growth Magnets in this Decade (2023-2030)

After a long period of balance sheet repair in the financial and corporate sector, the financial cycle is poised to turn upward. As the health and economic shocks of the pandemic and the spike in commodity prices in 2022 wear off, the Indian economy is thus well placed to grow at its potential in the coming decade, similar to the growth experience of the economy after 2003. This is the primary reason for expecting India's growth outlook to be better than it was in the pre-pandemic years. The sound and healthy financial system developed over the last few years will ensure efficient credit provisioning, contributing to higher growth in the coming years through higher investments and consumption. Thanks to India's digital revolution and formalisation, banks have far more information about their customer's credit risks than before, thus being able to make credit and pricing decisions better than before.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

TEXTILE - INDUSTRY SCENARIO

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

The Indian textile and apparel industry is expected to grow at 10% CAGR from 2019-20 to reach US\$ 190 billion by 2025-26. India has a 4% share of the global trade in textiles and apparel. India is the world's largest producer of cotton. Estimated production stood at 362.18 lakh bales during cotton season 2021-22. Domestic consumption for the 2021-22 cotton season is estimated to be at 338 lakh bales. Cotton production in India is projected to reach 7.2 million tonnes (~43 million bales of 170 kg each) by 2030, driven by increasing demand from consumers. In FY23, exports of readymade garments (RMG) cotton including accessories stood at US\$ 7.68 billion till January 2023. It is expected to surpass US\$ 30 billion by 2027, with an estimated 4.6-4.9% share globally.

Production of fibre in India reached 2.40 MT in FY21 (till January 2021), while for yarn, the production stood at 4,762 million kgs during the same period. Natural fibres are regarded as the backbone of the Indian textile industry, which is expected to grow from US\$138 billion to US\$195 billion by 2025. India’s textile and apparel exports (including handicrafts) stood at US\$ 44.4 billion in FY22, a 41% increase YoY. During April-October in FY23, the total exports of textiles stood at US\$ 21.15 billion. India’s textile and apparel exports to the US, its single largest market, stood at 27% of the total export value in FY22. Exports of readymade garments including cotton accessories stood at US\$ 6.19 billion in FY22.

India is the world’s second-largest producer of textiles and garments. It is also the fifth-largest exporter of textiles spanning apparel, home and technical products. The textiles and apparel industry contribute 2.3% to the country’s GDP, 13% to industrial production and 12% to exports. Around 45 million people are working in the textile business, including 3.5 million people who work on handlooms. The Indian textile and apparel industry is expected to grow at 10% CAGR from 2019-20 to reach US\$ 190 billion by 2025-26. The Indian apparel market stood at US\$ 40 billion in 2020 and is expected to reach US\$ 135 billion by 2025.

India enjoys a comparative advantage in terms of skilled manpower and in cost of production relative to other major textile producers. India’s textile and apparel exports (including handicrafts) stood at US\$ 44.4 billion in FY22, a 41% increase YoY. Exports of readymade garments including cotton accessories stood at US\$ 6.19 billion in FY22. India’s ready-made garment (RMG) exports are likely to surpass US\$ 30 billion by 2027, growing at a CAGR of 12-13%.

The textiles industry (including dyed and printed) foreign direct investment (FDI) worth US\$ 4.03 billion from April 2000-June 2022. 100% FDI (automatic route) is allowed in the Indian textile sector. Companies involved in home textiles are using technology to optimise the value chain. For example, in October 2021, Welspun India introduced Wel-Trak 2.0—an upgraded, patented end-to-end traceability technology—to track textile raw materials throughout the supply chain.

The Government’s Rs. 10,683 crore (US\$ 1.44 billion) PLI scheme is expected to be a major booster for the textile manufacturers. The scheme proposes to incentivise MMF (man-made fibre) apparel, MMF fabrics and 10 segments of technical textiles products. The Government approved the Mega Integrated Textile Region and Apparel (MITRA) Park scheme worth Rs. 4,445 crore (US\$ 594.26 million) to establish seven integrated mega textile parks with state-of-the-art infrastructure, common utilities and R&D lab over a three-year period, which will boost textile manufacturing in the country.

The Indian government wants to establish 75 textile hubs, similar to Tiruppur, which will greatly increase employment opportunities while promoting the export of textile products and ensuring the use of sustainable technology. For the export of handloom products globally, the Handloom Export Promotion Council (HEPC) is participating in various international fairs/events with handloom exporters/weavers to sell their handloom products in the international markets under the National Handloom Development Programme (NHDP). Alongside, the Ministry of Textiles has also been implementing Handloom Marketing Assistance (HMA), a component of the National Handloom Development Programme (NHDP) all across India. HMA provides a marketing platform to the handloom weavers/agencies to sell their products directly to the consumers, and develop and promote the marketing channel through organizing expos/events in domestic as well as export markets.

The government has allocated funds worth Rs. 17,822 crore (US\$ 2.38 billion) between FY16-22 for the ‘Amended Technology Up-gradation Fund Scheme’ (A-TUFS) to boost the Indian textile industry and enable ease of doing business. Amazon India has signed a MoU with the Manipur Handloom & Handicrafts Development Corporation Limited (MHHDC), a Government of Manipur entity, to encourage the development of weavers and artisans throughout the state. To support the handloom weavers/weaver entrepreneurs, the Weaver MUDRA Scheme was launched to provide margin money assistance at 20% of the loan amount subject to a maximum of Rs. 10,000 (US\$ 134.22) per weaver. The loan is provided at an interest rate of 6% with credit guarantee of three years.

The new Economic Cooperation and Trade Agreements with Australia and the UAE will open multiple opportunities for textiles and handloom. Indian textile exports to Australia and the UAE will now face zero duties, and the government is expecting that soon, Europe, Canada, the UK and GCC countries would also welcome Indian textile exports at zero duty. Top players in the textiles sector are attaining sustainability in their products by manufacturing textiles that use natural recyclable materials. India’s textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country.

Export Statistics

During April-October in FY23, the total exports of textiles stood at US\$ 21.15 billion. Exports of textiles (RMG of all textiles, cotton yarns/fabs./made-ups/handloom products, man-made yarns/fabs./made-ups, handicrafts excl. handmade carpets, carpets and jute mfg. including floor coverings) stood at US\$ 44.4 billion in FY22. India’s ready-made garment (RMG) exports are likely to surpass US\$ 30 billion by 2027, growing at a CAGR of 12-13%. In July 2021, the government extended the Rebate of State and Central Taxes and Levies (RoSCTL) scheme for exports of apparel/garments and made-ups until March 2021. This helped boost exports and enhance competitiveness in the labour-intensive textiles sector.

In August 2021, Minister of Textiles, Commerce and Industry, Consumer Affairs, Food and Public Distribution, Mr. Piyush Goyal, said that steps need to be taken to boost production capacities of the handloom sector from existing Rs. 60,000 crore (US\$ 8.06 billion) to 125,000 crore (US\$ 16.80 billion) in three years. He added that target must be set to increase exports of handloom items from existing Rs. 2,500 crore (US\$ 335.92 million) to Rs. 10,000 crore (US\$ 1.34 billion). He also announced that a committee would be constituted consisting of all weavers, trainer equipment makers, marketing experts and other stakeholders to recommend ways and means to achieve these objectives and enhance overall progress of the handloom sector.

Government Initiatives

Foreign direct investment (FDI) of up to 100% is allowed in the textile sector through the automatic route.

In the academic year 2022–23, the opening of a new campus of the National Institute of Fashion Technology (NIFT) in Daman. Moreover, new campus buildings are being constructed in Bhopal and Srinagar. Under the National Technical Textile Mission (NTTM), 74 research projects for speciality fibre and technical textiles valued at US\$ 28.27 million (Rs. 232 crore) were approved. Opportunities in Textile Sector

1. Immense growth potential

The Indian textile industry is set for strong growth, buoyed by both strong domestic consumption as well as export demand. The textile and apparel industry is expected to grow to US\$ 190 billion by FY26. In October 2021, the government announced the target to achieve US\$ 100 billion from India's textile exports in the next five years. Urbanisation is expected to support higher growth due to change in fashion and trends.

The total amount of Raw Silk produced was 28,106 MT. A total of 44 R&D projects were started, and 23 of them were successfully completed. 9,777 people were trained in a variety of activities relating to the silk industry. The Central Silk Board sets a target for raw silk production and encourages farmers and private players to grow silk. To achieve these targets, alliances with the private sector, especially agro-based industries in pre-cocoon and post-cocoon segments, are encouraged. The total raw silk production stood at 33,000 MT in FY21.

3. Bilateral relations

In October 2021, the Ministry of Textiles and GIZ (Deutsche Gesellschaft für Internationale Zusammenarbeit) signed an MoU to implement the 'Indo German Technical Cooperation' project. The project aims to increase the value addition from sustainable cotton production in the country. In March 2021, Pakistan approved reinstatement of cotton and sugar imports from India, indicating softening of bilateral relations.

4. Proposed FDI in multi-brand retail

For the textile industry, the proposed hike in FDI limit in multi-brand retail will bring in more players, thereby providing more options to consumers. It will also bring in greater investment along the entire value chain - from agricultural production to final manufactured goods. With global retail brands assured of a domestic foothold, outsourcing will also rise significantly.

5. Union Budget 2023-24

Under the Union Budget 2023-24, the government has allocated:

The CoEs are aimed at creating testing and evaluation facilities as well as developing resource centres and training facilities. Existing 4 CoEs, BTRA for Geotech, SITRA for Meditech, NITRA for Protech and SASMIRA for Agrotech, would be upgraded in terms of development of incubation centres and support for development of prototypes. Fund support would be provided for appointing experts to develop these facilities.

7. Foreign investments

The Government is taking initiatives to attract foreign investment in the textile sector through promotional visits to countries such as Japan, Germany, Italy and France. According to the new Draft of the National Textile Policy, the Government is planning to attract foreign investment and creating employment opportunities for 35 million people.

In December 2019, online clothing brand Henry & Smith raised US\$ 1 million from WEH Ventures and Rukam Capital. Production Process:

Procurement of yarn:

Our Company requires yarn which is a major raw material for our manufacturing process. We procure the raw materials directly from the local suppliers, located in Gujarat.

Warping of yarn:

Warping process is done for making a weavers beam. The parallel winding of warp ends from many cones on to a warp beam is called warping. It includes arranging of yarn threads in long parallel lengths of equal tension, onto a beam in preparation for weaving. During the warping process cones of yarn are placed onto a rack called a creel. From this creel yarn passes through tension and spacing devices and through a leasing reed which separates the yarn threads and keeps them in the correct order before being wound onto a warping balloon.

Dyeing and sizing:

Currently, we outsource dyeing and sizing process to third parties. Dyeing and sizing is done in two stages. In the first stage, beams are dyed, oxidized, dried and wound on a batch roll. The batch roll is then sized, dried and wound on a weaver's beam. The object of Sizing is to improve the strength of yarn by chemically binding the fibres with each other and also improve upon its friction resistance capacity by chemically coating the surface of yarn.

Drawing in:

The drawing-in process mainly consists of two processes. The first process is called drafting and the second process is called denting. It is mostly performed manually but in large scale textile industries, automatic drawing-in machines are used, where more productivity is required.

Drafting - During this process, the individual warp yarns, which run lengthwise in a fabric, are carefully guided through a series of heddles. Heddles are devices in the loom that facilitate the raising and lowering of specific yarns, creating the shed through which the weft yarn will be inserted.

Denting - Subsequent to drafting, the warp yarns are then systematically guided through the reed in a process known as denting. The reed is a comb-like component within the loom, comprising a series of slots through which the warp yarns are threaded.

Weaving:

The warp yarns are stretched vertically on the loom's frame, while the weft yarn is wound onto a shuttle. The warp yarns are separated to create an opening known as the "shed." This opening allows the weft yarn to be inserted through the warp yarns. In airjet looms, the weft yarn is propelled through the shed by a jet of compressed air. The air jet carries the weft yarn across the width of the loom at high speeds, inserting it into the shed. After the weft yarn is inserted, the loom's mechanism compacts the weft against the already woven fabric, securing it in place. This process is called "beat-up." The shed is then changed, reversing the positions of the warp yarns. The process is repeated, and the weft is again inserted through the new shed using the air jet. By repeating the process of shed formation, weft insertion, and beat-up, the loom gradually creates a woven fabric with the desired pattern.

Mending:

Mending involves the actual repair of imperfections such as weaving in a missing warp or weft yarn with a hand needle and repairing tears as well as small holes.

Inspection:

The inspection process for denim fabrics involves a series of tests and evaluations to ensure the quality and adherence to standards. It includes:

- Visual Inspection: Check for defects, weave irregularities, and color consistency.
- Color Fastness Test: Assess how well color withstands washing, rubbing, and light exposure.
- Residual Shrinkage Test: Measure fabric dimensions before and after treatments to assess shrinkage.
- Stretchability Test: Evaluate fabric's elasticity and ability to stretch and recover.
- Skew Test: Measure warp/weft angles to ensure alignment and prevent distortion.

By conducting these tests and evaluations, the inspection process ensures that denim fabrics meet the desired quality standards, functional attributes, and customer expectations.

Singeing and Finishing:

Currently, we are outsourcing the singeing and finishing process to third parties. In the singeing process, one or both sides of a fabric is passed over a gas flame to burn off the protruding fibres. It is usually done in order to obtain a clean fabric surface which allows the structure of the fabric to be clearly seen. The process is usually treated on the cotton fabric only. The finishing process

in fabrics is the crucial final stage that imparts a polished touch to textiles. Through a series of treatments like scouring, bleaching, dyeing, and softening, fabrics undergo a transformation that enhances their appearance, texture, and performance. Finishing ensures that fabrics not only meet quality standards but also achieve desired functional attributes.

Packaging & Dispatch:

The finished products are stacked in plastic packaging and are sent to the stockroom facility for labelling and from thereon it is dispatched to the buyers.

Some of our significant competitors in the organized segment includes R&B Denims Limited, Manomay Tex India Limited, United Polyfab Gujarat Ltd and Jindal Worldwide Ltd.

Infrastructure & Utilities:

Raw Materials: The essential raw material used by our manufacturing facility for production of denim fabrics is yarn which is procured by us majorly from Gujarat.

Power: The requirement of power for our operations, like power for lighting and operating the plant/machinery/equipment is met through the state electricity board i.e. Uttar Gujarat Vij Company Ltd. In Nov.’22, as part of our efforts to minimize the power cost, we have commissioned a wind energy power plant (“Wind Farm”) of combined capacity of 2 MW in the village Likhala, Taluka Savarkundla, District Amreli, Gujarat. Our Company has outsourced all operations and maintenance activities relating to Wind Farm to a third party. The electricity generated from the Wind Farm is adjusted by UGVCL against our electricity bill of manufacturing facility. Further, as our step towards environmental sustainability and to further reduce the power cost, we have recently installed the 852 kw rooftop solar plant at our Dholi unit.

Water: The existing water requirement for our manufacturing unit is met from local sources.

I. SIGNIFICANT ACCOUNTING POLICIES

1.1 Basis of preparation of Financial Statements:-

These financial statements have been prepared under historical cost convention from books of accounts maintained on an accrual basis in conformity with accounting principles generally accepted in India and comply with the Accounting Standards issued by the Institute of Chartered Accountants of India and referred to Sec 129 & 133 of the Companies Act, 2013, of India. The accounting policies applied by the company are consistent with those used in previous year.

1.3 Revenue recognition:-

Revenue is recognized to the extent that it is probable that economic benefits will flow to the company and the revenue can be reliably measured. Commission/adat Income has been recognized on accrual basis.

1.4 Valuation of Inventories:-

Inventories are measured at cost and net realizable value, whichever is lower. Net realizable value is the estimated selling price in the ordinary course of business less estimated cost necessary to make the sale. Cost in respect of raw materials and stock in trade are determined on FIFO basis. Costs in respect of all other Inventories are computed on weighted average basis method. Finished goods and process stock include cost of conversion and other costs incurred in acquiring the inventory and bringing them to their present location and condition.

1.5 Property Plant & Equipment and Capital Work in Progress :-

a) Fixed assets are stated at cost of acquisition or construction. All cost relating to the acquisition and installation of fixed assets (Net of CENVAT/VAT/gst credits where ever applicable) are capitalized and include borrowing costs directly attributable to construction or acquisition of fixed assets, up to the date of asset is put to use and adjustment arising out of exchange rate variation relating to liabilities attributable to those fixed assets.

b) Advances paid towards the acquisition of fixed assets outstanding at each balance sheet date and cost of fixed assets not ready for their intended use before such date are disclosed under capital work-in progress. Work-in progress excludes expenditure pending for capitalization.

1.6 Depreciation:-

Depreciation of Property, Plant and Equipment Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately on straight-line method. Parts of plant and equipment that are technically advised to be replaced at prescribed intervals / periods of operation, insurance spares and cost of inspection/overhauling are depreciated separately based on their specific useful life provided these are of significant amounts. The depreciation charge for each period is recognised in profit or loss unless it is included in the carrying amount of another asset.

Depreciable amount of an item of property, plant and equipment is arrived at after deducting estimated residual value. The depreciable amount of an asset is allocated on a systematic basis over its useful life. The Company reviews the residual value and useful life at each financial year-end and, if expectations differ from previous estimates, the residual value and useful lives are changed prospectively and accounted for as a change in accounting estimate. Depreciation commences when the item of property, plant and equipment is in the location and condition necessary for it to be capable of operating in the manner intended by management.

2.7 Leases:-

At inception of contract, the Company assesses whether the Contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. At inception or on reassessment of a contract that contains a lease component, the Company allocates consideration in the contract to each lease component on the basis of their relative standalone price.

As a lessee

i) Right-of-use assets

The Company recognizes right-of-use assets at the commencement date of the lease. Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, lease payments made at or before the commencement date less any lease incentives received and estimate of costs to dismantle. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

The Company presents right-to-use assets that do not meet the definition of investment property in 'Property, plant and equipment'.

ii) Lease Liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. In calculating the present value of lease payments, the Company generally uses its incremental borrowing rate at the lease commencement date if the discount rate implicit in the lease is not readily determinable.

After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. The carrying amount is remeasured when there is a change in future lease payments arising from a change in index or rate. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the lease payments or a change in the assessment of an option to purchase the underlying asset.

The Company presents lease liabilities under financial liabilities in the Balance Sheet.

iii) Short term leases and leases of low value of assets

The Company applies the short-term lease recognition exemption to its short-term leases. It also applies the lease of low-value assets recognition exemption that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

As a lessor

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

2.8 Employee Benefits

Short Term Employee Benefits

Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related services are provided. Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within twelve months as at the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period.

Other Long Term Employee Benefits

Government grants are recognised when there is a reasonable assurance that the Company will comply with the conditions attaching to them and the grants will be received. A forgivable loan from government is treated as a government grant when there is a reasonable assurance that the entity will meet the terms for forgiveness of the loan. The Company recognises Government grants in profit or loss on a systematic basis over the periods in which the entity recognises as expenses the related costs for which the grants are intended to compensate. Grants related to assets, including non-monetary grants at fair value, are presented in the balance sheet as deferred income. Deferred income is recognised in profit or loss on the basis the related assets are depreciated or amortised if they are related to asset or under other income when the grant becomes receivable. OVERVIEW

Incorporated in 2010, our Company is primarily engaged in manufacturing and selling of denim fabrics. We began our business as a fabrics trading concern in the F.Y. 2014-15. In 2016, our Company established its fabric weaving unit at Dholi - Integrated Spinning Park, Dholka, Ahmedabad on plot area measuring to 8660 sq. mtrs. As on date of this Draft Red Herring Prospectus, our Company has 96 airjet looms installed at Dholi unit which has an annual installed capacity of weaving 1,92,72,000 mtrs. of denim fabrics. Weaving is the process of converting yarn into fabrics wherein two distinct sets of yarns or threads are interlaced at right angles to form a fabric. The airjet looms installed by us utilize a technique where a jet of compressed air is used to insert the weft (crosswise) yarn into the warp (lengthwise) yarn to create the raw fabrics also known grey fabrics.

We manufacture various type of denim fabrics such as power stretch spandex denim, knit denim, light weight denim, rigid denim, over dyed denim and flat finish 3/1 denim. Our production facility has capability to produce grey fabrics in various designs such as twill weave, knit dobby weave, structure dobby weave, broken twill weave and satin weave. We offer denim fabrics in diverse spectrum of shades such as indigo blue, IBST, sulphur black, sulphur grey, halogen blue and ecru colour which has weights ranging from 4.50 Oz./sq. yd to 14.50 Oz./sq. yd. and widths spanning from 62" (157cm) to 78" (198 cm).

Our operations encompass utilization of diverse type of yarns such as cotton yarn, ring yarn, viscose yarn, slub yarn, cotton spandex, polyester spandex, tencel, lyocell etc. which are procured by us from domestic market. In addition to yarn, we also directly procure grey fabrics from the market, which are subsequently sent for finishing, and is then sold to customers. We outsource the yarn dyeing and grey fabrics finishing process to third parties.

We have a strong track record of revenue growth and profitability. The following table sets forth certain key performance indicators for the years indicated:

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public Offer of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public Offer closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and

smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Offer closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public Offer closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public Offer closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the "FDI Policy"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

(Non-debt Instruments) Rules, 2019. Any equity holding by a person resident outside India resulting from conversion of any debt instrument under any arrangement shall be reckoned as foreign investment under the composite cap.

Key assumptions for working capital projections made by Our Company:

Particulars	March 31, 2021	March 31, 2022	March 31, 2023	March 31, 2024
Inventories (Days)	10 days	10 days	19 days	20 days
Debtors (Days)	123 days	74 days	67 days	70 days
Creditors (Days)	127 days	55 days	73 days	60 days

Justification:

Debtors	The historical holding days of trade receivables has been ranging from 67 days to 123
----------------	---

	days during Fiscal 2021 to Fiscal 2023. As per the current credit terms and in order to expand company's operations, the holding level for debtors is anticipated at 70 days of total revenue from operations during Fiscal 24. We intend to provide our customers with extended credit periods, allowing them more time to settle their invoices. By offering this flexibility, we expect to stimulate increased sales volume and foster stronger customer relationships.
Creditors	The past trend of Trade payables holding days has been in the range of 55 days to 127 days approximately during Fiscal 2021 to Fiscal 2023. However, with additional working capital funding, our Company intends to reduce trade payable to 60 days during Fiscal 2024 to avail cash discount as well as competitive purchase price to increase overall profitability of our Company. By reducing the time, it takes to settle our payables we aim to negotiate more favourable terms and conditions with our suppliers, enabling us to access competitive pricing for the goods we procure.
Inventories	The historical holding period for our inventories has consistently remained within a range of 10 to 19 days over the span of Fiscal 2021 to Fiscal 2023. In alignment to cater to the demand for our products and maintain a well-structured inventory position that meets our customers demand, we anticipate a modest increase in the inventory holding days to around 20 days in Fiscal 2024.
