2. We require certain approvals, licenses, registrations and permits for our business, and failure to obtain or renew them in a timely manner may adversely affect our operations.

We require several statutory and regulatory permits, licenses and approvals to operate in our manufacturing business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition.

Currently, our Provident Fund Registration is in the name of “Universal Foundry”, and not in the name of our Company. However, we are now in process of applying for updating the name of our Company in records of PF Department. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues, profits and operations. For further details read section on “**Government and Other Approvals**” beginning on page 225 of the Draft Prospectus.

3. Our Company has allotted Equity Shares during the preceding one year from the date of the Draft Prospectus which is lower than the Issue Price.

For further details, please see the section titled “*Outstanding Litigation and Material Developments*” on page 219 and Annexure U forming part of the Chapter titled “Financial Information of the Company” on page 150 of this Draft Prospectus.

5. Our Company has not yet placed orders for equipments aggregating Rs. 272.75 lacs required by us for the proposed expansion. Any delay in placing the orders / or supply of plant and machinery may result in time and cost overruns, and may affect our profitability.

Our Company proposes to acquire plant and machinery aggregating Rs. **272.75 lacs** for our proposed expansion plan, which is 84.18% of the Issue Proceeds. Our Company has identified the machineries to be acquired and has received the quotations from the suppliers, but we have not placed orders for plant and machinery aggregating to Rs. **272.75 lacs** which are proposed to be acquired for our expansion plan. Our Company is further subject to risks on account of inflation in the price of plant and machinery.

Since the funding for the plant and machinery is from the IPO proceeds, any delay in access to IPO proceeds would eventually delay the process of placing the orders. The purchase of machineries would require us to consider factors including but not limited to pricing, delivery schedule and after-sales maintenance. There may be a possibility of delay at the supplier’s end in providing timely delivery of these equipments, which in turn may delay the implementation of our expansion plan. For further details read section “*Objects of the Issue*” beginning on page 61 of the Draft Prospectus.

6. Any Penalty or demand raise by statutory authorities in future will affect our financial position of the Company.

Our Company engaged in business of manufacturing of equipments which attract tax liability such as Excise, Sales tax and Value added Tax as per the applicable provision of Central Excise Act, Central Sales Tax and Rajasthan Value added Tax Act. However the Company has deposited the returns under above applicable Acts but any demand or penalty raise by concerned authority in future for any previous year and current year will affect the financial position of the Company.

7. Our Substantial portion of our revenues has been dependent upon few customers. The loss of any one or more of our major customer would have a material adverse effect on our business operations and profitability.

For the Financial Year ended March 31, 2015, more than 90.00% of our revenues was generated from our top 5 customers. The loss of our major customers or a decrease in the volume of sales may adversely affect our revenues and profitability. We cannot assure you that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our operations and profitability.

8. Our Company has taken unsecured loans, which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our business operations and financial condition of our Company.

As on March 31, 2015, our Company has taken unsecured loans aggregating to ₹ 367.10 lacs from our Promoters, Promoter Group Members, Directors and others which are repayable on demand. However, as on date we have not entered into any understanding or formal agreement with them in respect of their lending to the Company. If the loan is recalled on a short notice, our Company may have to, on an urgent basis arrange for equivalent funds to fulfil the necessary requirements. Inability of our Company to do so may require creating a security for such loan. The occurrence of these events may have an adverse effect on our cash flow and financial conditions. For more details regarding the loan, please refer the chapter titled “*Financial Information of the Company*” beginning on page 150 of this Draft Prospectus.

- 9. Our Promoter Group companies/Entities are engaged in the line of business similar to our Company. There are no non - compete agreements between our Company and Promoter Group Companies/Entities. We cannot assure that our Promoters will not favour the interests of such Entities over our interest or that the said entities will not expand which may increase our competition, which may adversely affect business operations and financial condition of our Company.**

Our Group Companies/Entities namely, A V Casters Private Limited, Jain Autocastings Private Limited, Precision Autocastings Private Limited, M/s Unicast are engaged in the similar line of business of manufacturing of Casting Components as of our Company. Further, we have not entered into any non-compete agreement with any of our said entities. We cannot assure that our Promoters who have common interest in said entities will not favour the interest of the said entities As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our Group Company in circumstances where our respective interests diverge. In cases of conflict, our Promoters may favour other companies in which our Promoters have interests. There can be no assurance that our Promoters or our Group Companies or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations. For further details, please refer to “*Common Pursuits*” on **Page 133** of this Draft Prospectus.

Universal Foundry”, pursuant to a deed of partnership dated September 1, 1971 with two partners Shri Kishan Lal Gupta and Shri Vimal Chand Jain. The partnership deed was registered on 01-04-1972. However, we do not possess a copy of the initial partnership deed, although we have records of entry of Registrar made under Section 67 of the Indian Partnership Act, 1932 by Office of the Registrar of Firms Rajasthan, Jaipur and copy of subsequent partnership deeds as amended from time to time. - 11. Our Promoter, promoter group member, Directors and CFO has given personal guarantees in relation to borrowings made by the Company from IndusInd Bank Limited. In event of default on the debt obligations, the personal guarantees may be invoked thereby adversely affecting our Promoter’s, Director’s ability to manage the affairs of our Company and consequently impact our business, prospects, financial condition and results of operations.**

Our Company has availed of Credit facility aggregating to ₹ 1558.37 Lacs from IndusInd Bank Limited which is currently outstanding at March 31, 2015 at ₹ 754.78 Lakhs. Basic terms and conditions of the said facility stipulate that the facility shall be secured by personal guarantee of our Directors Mr. Kishan Lal Gupta, Mr. Vimal Chand Jain, Mr. Vikram Jain, promoter group member Mr. Amit Gupta and CFO Mr. Vinit Jain. In event of default on the debt obligations, the security or personal guarantees may be invoked thereby adversely affecting the ability of our Promoter, Director and CFO to manage the affairs of our Company and consequently impact our business, prospects, financial condition and results of operations.

For further details in this regard, please refer to section titled “*Financial Indebtedness*” on page 198 of the Draft Prospectus.

- 12. Our funds requirements are based on internal management estimates and on the basis of quotations obtained, wherever possible, and have not been appraised by any bank or financial institution. Any increase in the actual deployment of funds may cause an additional burden on our finance plans. We have not entered into definitive agreements to utilize our Issue proceeds.**

The fund requirement mentioned as a part of the Objects of the Issue is based on internal management estimates and on the basis of quotations obtained, wherever possible, and has not been appraised by any bank or financial institution or any external agency. These are based on current conditions and are subject to change in light of changes in external circumstances or costs or in other financial conditions, business strategy, etc. With increase in costs, our actual deployment of funds may exceed our estimates and may cause us an additional burden on our finance plans. As on the date of the Draft Prospectus, we have not entered into any definitive agreements for implementing the Objects of the Issue.

For more information, please refer to “Objects of the Issue” on page 61 of the Draft Prospectus.

13. Our operations will have significant raw material requirements, and we may not be able to ensure the availability of the raw materials at competitive prices, which may adversely affect results of our operations

The success of our operations will depend on, inter-alia, our ability to source raw materials at competitive prices. Currently, we have not entered into any firm arrangement for purchase of our raw material. Historically, we have not encountered any problems in sourcing our raw materials. However, we cannot assure you about the same in future and that we may be unable to procure raw material in time or in the required quantities or may have to procure it at a higher price, which may adversely affect our results of operations and financial performance.

14. Increased cost of raw materials for inventory and, in particular, of Iron Scrap and pig iron may affect our business and results of operations

The principal raw materials used by us to manufacturing castings are Iron Scrap and Pig iron. For further details, please refer "Our Business on page 86 of this Draft Prospectus.". The prices and supply of raw materials may depend on factors beyond our control, including economic conditions, exchange rates, competition, consumer demand, production levels, transportation costs and import duties. In the event that any of our suppliers of raw materials curtail, discontinue or delay their delivery of raw materials to us, we will be required to replace such suppliers. There can be no assurance that we will be able to replace such suppliers on commercially acceptable terms, or at all, which could adversely affect our production schedule, volumes and results of our operations. Further, if we are unable to pass such increased costs to our customers, this could have a material adverse effect on our financials, business and results of operations.

15. Our products are being manufactured from our sole manufacturing facility in Jaipur, Rajasthan.

We manufacture our products from our sole manufacturing facility in Jaipur, Rajasthan, which substantially caters to our domestic demand and export commitments. Any disruption in the operations due to supply of power, fire outages or industrial accidents at this unit could hamper or delay our ability to continue production. Any disruption or suspension in the production process in this facility can significantly impact our ability to service our customer needs and relation with our customers and have a material adverse effect on our business, revenues, reputation, results of operation and financial condition.

16. The shortage or non-availability of power may adversely affect our manufacturing processes and our performance may be affected adversely.

The manufacturing processes of our Company require substantial amount of power and fuel for operation of our factory. Our manufacturing facilities may face power interruptions due to power cuts and as a result our operations or financial condition may be adversely affected. The shortage of electricity supply may further increase our dependency on the usage of DG sets. The same can increase our cost of power and may have an adverse impact on our profitability.

17. Any loss of or breakdown of operations at our manufacturing facility may have a material adverse effect on our business, financial condition and results of operations.

Our manufacturing facilities are subject to operating risks, such as the breakdown or failure of machines, or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results. We are required to carry out planned shutdowns of our plants for maintenance, statutory inspections and testing. Although precautions are taken to minimize the risk of any significant operational issues at our manufacturing facilities. Our business, financial condition and results of operations may be adversely affected by any disruption of operations at our facilities, including due to any of the factors mentioned above.

18. We are highly dependent on smooth supply and transportation and timely delivery of our products from our manufacturing facility to our customers. Various uncertainties and delays or non delivery of our products will affect our sales.

We depend on transportation services to deliver our products from our manufacturing facility to our customers. We rely on third parties to provide such services. Disruptions of transportation services because of weather related problems, strikes, lock-outs, inadequacies in road infrastructure or other events could impair our procurement of raw materials and our ability to supply our products to our customers which in turn may adversely affect our business operations and our financial condition.

19. Our Company may require additional capital resources to achieve our expansion plans.

The rate of our expansion will depend to an extent on the availability of adequate debt and equity capital. Our cash flow requirements will be based on cash flows generated by our business. Further, the actual expenditure incurred may be higher than current estimates owing to but not limited to, implementation delays or cost overruns. We may, therefore, primarily try to meet such cost overruns through our internal generations and in case if the same is not adequate, we may have to raise additional funds by way of additional term debt from banks/ financial institutions, which may have an adverse effect on our business and results of operations.

20. Any penalty or action taken by any regulatory authorities in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.

Our Company has not complied with the provisions of Section 129 of Companies Act, 2013, Accounting Standards 18, 22 & 15 and Section 4A of The Payment of Gratuity Act, 1972, in the past. However, now the Company has made necessary provision for gratuity and has made necessary compliance in accordance with the applicable Accounting Standards and laws in the re-stated financial statements of the Company. Also there are some cases where delay form are filed in Registrar of Companies for which requisite delayed fees was paid by the Company.

Although no show cause notice have been issued against the Company till date in respect of above, in the event of any cognizance being taken by the concerned Registrar of Companies in respect of above, penal actions may be taken against the Company and its directors, in which event the financials of the Company and its directors may be adversely affected.

For further details on the same please refer section “**Financial Information**” beginning on page 150 of Draft Prospectus.

21. We are dependent on our Promoters, directors and key managerial personnel of our Company for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.

Our Promoters, Directors and key managerial personnel collectively have vast experience in the industry and are difficult to replace. They provide expertise, which enables us to make well informed decisions in relation to our business and our future prospects. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. In case of a new found technology in the Casting Components Industry, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business and results of operations could be adversely affected.

Our policy of covering these risks through insurance may not always be effective or adequate. Failure to effectively cover ourselves against the associated risks for any of these reasons including other unforeseen circumstances could expose us to substantial costs and potentially lead to material losses. Faults in designing and installation might also require repair work, which may not be foreseen or covered by our insurance. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us which may materially affect our Company. For details on insurance policies taken by our Company please refer page 86 in chapter titled "Our Business" of Draft Prospectus.

We cannot assure you that our Promoters and Promoter Group will always act in the best interests of the Company or you.

The majority of our issued and outstanding Equity Shares are currently beneficially owned by the Promoters and the Promoter Group. Upon completion of the Offer, the Promoters and Promoter Group will own 47,59,965 Equity Shares, or 58.69% of our post-Offer Equity Share capital, assuming full subscription of the Offer. Accordingly, the Promoters and the Promoter Group will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders approval, including the composition of the Board of Directors, the adoption of amendments to our constitutional documents, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our company and may make some transactions more difficult or impossible without the support of these stockholders. The interests of the Promoters and Promoter Group as the Company's controlling shareholders could conflict with the Company's interests or the interests of its other shareholders. We cannot assure you that the Promoters and Promoter Group will act to resolve any conflicts of interest in the Company's or your favour.

35. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed fund requirement for our expansion plan, as detailed in the section titled "Objects of the Issue" is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe.

36. We do not have a track record for payment of dividend on Equity Shares.

We have not declared and hence not paid any dividend on our Equity Shares since inception as we had been deliberately pursuing the policy of ploughing back our profits to fund our expansion plans. The future payment of dividends, if any, would be based on the then available distributable profits and the recommendations of our Board of Directors.

37. *We may not be able to sustain effective implementation of our business and growth strategies.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long-term business outlook.

38. *Quality concerns could adversely impact our business.*

The business of our Company is dependent on the trust of our customers they are having in the quality of our product. Any goods sold by us to our customers, which do not comply with the quality specifications or standards prevalent in the business or market segment, may result in customer dissatisfaction, which may have an adverse effect on our sales and profitability.

39. *We have not independently verified certain data in this Draft Prospectus.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

40. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

41. *We cannot assure you that our equity shares will be listed on the SME platform of BSE in a timely manner or at all, which may restrict your ability to dispose of the equity shares.*

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of our Equity Shares issued. We have only applied to BSE Limited to use its name as the Stock Exchange in this Offer Document for listing our Equity Shares on the SME Platform of BSE Limited. Permission for listing of the Equity Shares will be granted only after the Equity Shares offered in this Issue have been allotted. Approval from BSE Limited will require all relevant documents authorizing the issuing of the Equity Shares to be submitted to it. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Further, certain procedural and regulatory requirements of SEBI and the Stock Exchanges are required to be completed before the Equity Shares are listed and trading commences. Trading in the Equity Shares is expected to commence within 12 Working Days from the Issue closing Date. However, we cannot assure you that the trading in the Equity Shares will commence in a timely manner. Any failure or delay in obtaining the approvals would restrict your ability to dispose off your equity shares.

42. *The requirements of being a listed company may strain our resources.*

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges which will require us to file audited annual halfyearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting

obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

43. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.*

Prior to the Issue, there has not been a public market for our Equity Shares. We cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling our Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of our Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors.

44. *Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.*

Any future equity issuances by us, including a primary offering, may lead to dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences for us including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares.

45. *You may be subject to Indian taxes arising out of capital gain.*

Under current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian Companies are generally taxable in India. Any gain realized on the sale of listed Equity Shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax ("STT") has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Any gain realized on the sale of Equity Shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed Equity Shares held for a period of 12 months or less will be subject to short term capital gains tax in India. For more details, please refer to "*Statement of Tax Benefits*" on page 69 of this Draft Prospectus.

EXTERNAL RISK FACTORS

46. *Our business is dependent on economic growth in India.*

Our performance is dependent on the health of the overall Indian economy. There have been periods of slowdown in the economic growth of India. India economic growth is affected by various factors including domestic consumption and savings, balance of trade movements primarily resulting from export demand and movements in key imports, such as oil and oil products, and annual rainfall, which affect agricultural production. For example, in the monsoon of 2009, Several parts of the country experienced below average rainfall, leading to reduced farm output which impaired economic growth. In the past, economic slowdowns have harmed industries and industrial development in the country. Any future slowdown in the Indian economy could harm our business, financial condition and results of operations.

47. *Any downgrading of India's debt rating by a domestic or international rating agency could have a negative impact on our business.*

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares.

48. *Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.*

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, such as the attacks in Mumbai in November 2008 and in July 2011, may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

49. If the rate of Indian price inflation increases, our results of operations and financial condition may be adversely affected.

In recent years, India's wholesale price inflation index has indicated an increasing inflation trend compared to prior periods. An increase in inflation in India could cause a rise in the price of transportation, wages, raw materials or any other expenses. In particular, the prices of raw materials required for manufacturing of our products are subject to increase due to a variety of factors beyond our control, including global commodities prices and economic conditions. If this trend continues, we may be unable to reduce our costs or pass our increased costs on our customers and our results of operations and financial condition may be materially and adversely affected.

50. There can be no assurance that Our Company's securities will continue to be listed on the Stock Exchanges.

Pursuant to the listing of our Equity Shares on the Stock Exchanges, we will be required to comply with certain regulations and/or guidelines as prescribed by SEBI and the Stock Exchanges. However, in the event that we fail to comply with any of the aforesaid regulations and/or guidelines, there can be no assurance that our Equity Shares will continue to be listed on the Stock Exchanges.

51. Any changes in regulations or applicable government incentives would materially affect our operations and growth prospects.

We are subject to various regulations and policies. For details see section titled "Key Industry Regulations and Policies" beginning on page 98 of the Draft Prospectus. Our business could be materially affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that we will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which would have a material adverse affect on our business, financial condition and results of operations.

52. We are exposed to currency exchange risks. Any adverse fluctuation in currency exchange rates may adversely affect our financial condition and results of operations.

While most of our revenues are denominated in Indian Rupees, certain portion of our revenues and expenses are denominated in currencies other than Indian Rupees, primarily U.S. Dollars. The exchange rate between the Indian Rupee and the U.S. Dollar has fluctuated substantially in recent years and may continue to fluctuate significantly in the future. Depreciation of the Indian Rupee against foreign currencies may adversely affect our results of operations. Currently, the Company does not use foreign currency forward contracts or other derivative instruments to hedge its risks associated with foreign currency fluctuations. There can be no assurance that any such forward contracts or similar hedging mechanisms that we may enter in future will be effective or adequate to cover any losses arising from foreign currency fluctuations.

53. Instability of economic policies and the political situation in India could adversely affect the fortunes of the industry.

Unstable internal and international political environment could impact the economic performance in both the short term and the long term. The Government of India has pursued the economic liberalization policies including relaxing restrictions on the private sector over the past several years. The present Government has also announced policies and taken initiatives that support continued economic liberalization. The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Our Company's business, and the market price and liquidity of the Equity Shares, may be affected by changes in interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments affecting India.

54. The extent and reliability of Indian infrastructure could adversely affect our results of operations and financial condition.

India's physical infrastructure is less developed than that of many developed countries. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have an adverse effect on our results of operations and financial condition.

55. The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factor. The extent and severity of these natural disasters determines their effect on the Indian economy. Although the long term effect of diseases such as the H5N1 "avian flu" virus, or H1N1, the swine flu virus, cannot currently be predicted, previous occurrences of avian flu and swine flu had an adverse effect on the economies of those countries in which they were most prevalent. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

56. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

57. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have come into effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital (including provisions in relation to issue of securities on a private placement basis), disclosures in offering documents, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in futures trading. Further, the Companies Act, 2013 imposes greater monetary and other liability on us and our directors for any non-compliance.

To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited jurisprudence on them. In the event our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations..

Global Economy Outlook

Global growth is expected to be 2.8 percent in 2015, lower than anticipated in January. Growth is expected to pick up to 3.2 percent in 2016–17, broadly in line with previous forecasts. Developing economies are facing two transitions. First, the widely expected tightening of monetary conditions in the United States, along with monetary expansion by other major central banks, has contributed to broad-based appreciation in the U.S. dollar and is exerting downward pressure on capital flows to developing countries. Many developing-country currencies have weakened against the U.S. dollar, particularly those of countries with weak growth prospects or elevated vulnerabilities. In some countries, this trend has raised concerns about balance sheet exposures in the presence of sizeable dollar-denominated liabilities. Currency depreciations have been significantly less in trade-weighted terms, partly due to a weakening euro and yen, thus offering only modest prospects for competitiveness gains to boost exports. Second, despite some pickup in the first quarter of 2015, lower oil prices are having an increasingly pronounced impact. In oil-importing countries, the benefits to activity have so far been limited, although they are helping to reduce vulnerabilities. In oil-exporting countries, lower prices are sharply reducing activity and increasing fiscal, exchange rate, or inflationary pressures. Risks remain tilted to the downside, with some pre-existing risks receding but new ones emerging.

Indian Casting and Foundry Industry

The Indian foundry industry manufacturers metal cast components for applications in Auto, Tractor, Railways, Machine tools, Defence, Earth Moving /Textile / Cement / Electrical / Power machinery, Pumps / Valves etc. Foundry Industry has a turnover of approx. USD 15 billions with export approx. USD 2 billions.

The Indian Metal Casting (Foundry Industry) is well established & producing estimated 9.344 Million MT of various grades of Castings as per International standards. The various types of castings which are produced are ferrous, non ferrous, Aluminium Alloy, graded cast iron, ductile iron, Steel etc for application in Automobiles, Railways, Pumps Compressors & Valves, Diesel Engines, Cement/Electrical/Textile Machinery, Aero & Sanitary pipes & Fittings etc & Castings for special applications.

However, Grey iron castings have the major share i.e. approx 68% of total castings produced. There are approx 4500 units out of which 85% can be classified as Small Scale units & 10% as Medium & 5% as Large Scale units.

Approx 800 units are having International Quality Accreditation. Several large foundries are modern & globally competitive & are working at nearly full capacity. Most foundries use cupolas using LAM Coke. There is growing awareness about environment & many foundries are switching over to induction furnaces & some units in Agra are changing over to cokeless cupolas.

Production in Million Tonnes:

(Source: http://www.foundryinfo-india.org/profile_of_indian.aspx)

The Indian casting industry produces 6 MMT of various grades of casting and ranks sixth in the world. The forging industry comprises around 10 organised players, with nearly 100 players in the small and medium sector, and an installed capacity of 3.7 million tonnes in 2012-13. The industry exports a substantial part of its production apart from catering to the local demand.

Exports trends:

The Exports have been showing healthy trends approx 25-30% YOY as can be seen from the charts below. However, the current exports for FY 2012-13 are approx Rs. 12180 Crore. The exports are slowdown due to weak demand.

Employment:

The industry directly employs about 5,00,000 people & indirectly about 1,50,000 people & is labour intensive. The small units are mainly dependant on manual labour However, the medium & Large units are semi/ largely mechanized & some of the large units are world class.

Auto Components Manufacturing Industry

Auto component industry is among one of the major end users of the casting products

The Indian auto component industry is expected to register a turnover of US\$ 66 billion by FY 15-16 with the likelihood to touch US\$ 115 billion by FY 20-21 depending on favourable conditions, as per the estimates by Automotive Component Manufacturers Association of India (ACMA). In addition, industry exports are projected to reach US\$ 12 billion by FY 15-16 and add up to US\$ 30 billion by FY 20-21.

Revenues for the auto industry in 2014-15 are expected to grow by 11-12 per cent supported by healthy recovery by major original equipment manufacturers (OEMs) in the medium and heavy commercial vehicles (M&HCV) and passenger vehicle (PV) segment.

Future Outlook

The engineering sector is a growing market. Current spending on engineering services is projected to increase to US\$ 1.1 trillion by 2020. With development in associated sectors such as automotive, industrial goods and infrastructure, coupled with a well-developed technical human resources pool, engineering exports are expected to touch US\$ 120 billion by 2015.

Also, the Union Budget 2014-15 has allocated funds for several infrastructure projects which are further expected to provide a boost to the engineering sector. The industry can also look forward to deriving revenues from newer services and from newer geographies with Big Data, Cloud, M2M and Internet of Things becoming a reality.

Global Economy Outlook

Global growth is expected to be 2.8 percent in 2015, lower than anticipated in January. Growth is expected to pick up to 3.2 percent in 2016–17, broadly in line with previous forecasts. Developing economies are facing two transitions. First, the widely expected tightening of monetary conditions in the United States, along with monetary expansion by other major central banks, has contributed to broad-based appreciation in the U.S. dollar and is exerting downward pressure on capital flows to developing countries. Many developing-country currencies have weakened against the U.S. dollar, particularly those of countries with weak growth prospects or elevated vulnerabilities. In some countries, this trend has raised concerns about balance sheet exposures in the presence of sizeable dollar-denominated liabilities. Currency depreciations have been significantly less in trade-weighted terms, partly due to a weakening euro and yen, thus offering only modest prospects for competitiveness gains to boost exports. Second, despite some pickup in the first quarter of 2015, lower oil prices are having an increasingly pronounced impact. In oil-importing countries, the benefits to activity have so far been limited, although they are helping to reduce vulnerabilities. In oil-exporting countries, lower prices are sharply reducing activity and increasing fiscal, exchange rate, or inflationary pressures. Risks remain tilted to the downside, with some pre-existing risks receding but new ones emerging.

Indian Economy Outlook

India is set to emerge as the world's fastest-growing major economy by 2015 ahead of China, as per the recent report by The World Bank. India's Gross Domestic Product (GDP) is expected to grow at 7.5 per cent in 2015, as per the report.

The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, RBI's inflation focus supported by benign global commodity prices.

Market size

According to IMF World Economic Outlook April, 2015, India ranks seventh globally in terms of GDP at current prices and is expected to grow at 7.5 per cent in 2016.

India's economy has witnessed a significant economic growth in the recent past, growing by 7.3 per cent in 2015 as against 6.9 per cent in 2014. The size of the Indian economy is estimated to be at Rs 129.57 trillion (US\$ 2.01 trillion) for the year 2014 compared to Rs 118.23 trillion (US\$ 1.84 trillion) in 2013.

The steps taken by the government in recent times have shown positive results as India's gross domestic product (GDP) at factor cost at constant (2011-12) prices 2014-15 is Rs 106.4 trillion (US\$ 1.596 trillion), as against Rs 99.21 trillion (US\$ 1.488 trillion) in 2013-14, registering a growth rate of 7.3 per cent. The economic activities which witnessed significant growth were 'financing, insurance, real estate and business services' at 11.5 per cent and 'trade, hotels, transport, communication services' at 10.7 per cent.

Stating that its great time to invest in India, Minister of State for Finance Mr Jayant Sinha said the Indian economy has potential to become a US\$ 4-5 trillion economy in the next 10-12 years.

Investments/developments

With the improvement in the economic scenario, there have been various investments leading to increased M&A activity. Some of them are as follows:

- India has emerged as one of the strongest performers with respect to deals across the world in terms of mergers and acquisitions (M&A). M&A activity increased in 2014 with deals worth US\$ 38.1 billion being concluded, compared to US\$ 28.2 billion in 2013 and US\$ 35.4 billion in 2012. The total transaction value for the month of May 2015 was US\$ 3.3 billion involving a total of 115 transactions. In the M&A space, pharma continues to be the dominant sector amounting to 23 per cent of the total transaction value.
- India's Index of Industrial Production (IIP) grew by 4.1 per cent in April 2015 compared to 2.5 per cent in March 2015. The growth was largely due to the boost in manufacturing growth, which was 5.1 per cent in April compared to 2.8 per cent in the previous month.
- India's Consumer Price Index (CPI) inflation rate increased to 5.01 per cent in May 2015 compared to 4.87 per cent in the previous month. On the other hand, the Wholesale Price Index (WPI) inflation rate remained negative at 2.36 per cent for the seventh consecutive month in May 2015 as against negative 2.65 per cent in the previous month, led by low crude oil prices.
- India's consumer confidence continues to remain highest globally for the fourth quarter in a row, riding on positive economic environment and lower inflation. According to Nielsen's findings, India's consumer confidence score in the first quarter of 2015 increased by one point from the previous quarter (Q4 of 2014). With a score of 130 in the first quarter (2015), India's consumer confidence score is up by nine points from the corresponding period of the previous year (Q1 of 2014) when it stood at 121.
- India's current account deficit reduced sharply to US\$ 1.3 billion (0.2 per cent of GDP) in the fourth quarter of 2015 compared to US\$ 8.3 billion (1.6 per cent of GDP) in the previous quarter, indicating a shrink in the current account deficit by 84.3 per cent quarter-on-quarter basis.
- India's foreign exchange reserve stood at a record high of US\$ 354.28 billion in the week up to June 12, 2015 – indicating an increase of US\$ 1.57 billion compared to previous week.
- Owing to increased investor confidence, net Foreign Direct Investment (FDI) inflows touched a record high of US\$ 34.9 billion in 2015 compared to US\$ 21.6 billion in the previous fiscal year, according to a

Nomura report. The report indicated that the net FDI inflows reached to 1.7 per cent of the GDP in 2015 from 1.1 per cent in the previous fiscal year.

Government Initiatives

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Mr Narendra Modi, Prime Minister of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy. This initiative is expected to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Currently, the manufacturing sector in India contributes over 15 per cent of the GDP. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP. Following the government's initiatives several plans for investment have been undertaken which are as follows:

- Foxconn Technology group, Taiwan's electronics manufacturer, is planning to manufacture Apple iPhones in India. Besides, Foxconn aims to establish 10-12 facilities in India including data centers and factories by 2020.
- India Electronics and Semiconductor Association (IESA) and Nasscom have signed a MoU to push electronics manufacturing share to 25 per cent of GDP by 2025. Under the MoU approval has been given to 21 electronic clusters.
- Hyderabad is set to become the mobile phone manufacturing hub in India and is expected to create 150,000 – 200,000 jobs. Besides, the Telangana Government aims to double IT exports to Rs 1.2 trillion (US\$ 18.7 billion) by 2019.
- Ford Motor Company has started working on plans to manufacture EcoSport in India for exporting it to US. The company has provided the quotation for 90,000 units every year, which is greater than the vehicles it sells in India.
- Hyundai Heavy Industries (HHI) and Hindustan Shipyard Ltd have joined hands to build warships in India. Besides, Samsung Heavy Industries and Kochi Shipyard will be making Liquefied Natural Gas (LNG) tankers.
- Mercedes-Benz plans to increase the number of cars it manufactures in India by doubling the capacity to 20,000 vehicles a year and has come up with a new plant in Pune.

Under the Digital India initiative numerous steps have been taken by the Government of India. Some of them are as follows:

- The Government of India has launched a digital employment exchange which will allow the industrial enterprises to find suitable workers and the job-seekers to find employment. The core purpose of the initiative is to strengthen the communication between the stakeholders and to improve the efficiencies in service delivery in the MSME ministry. According to officials at the MSME ministry over 200,000 people have so far registered on the website.
- The Ministry of Human Resource Development recently launched Kendriya Vidyalaya Sangthan's (KVS) e-initiative 'KV ShaalaDarpan' aimed at providing information about students electronically on a single platform. The program is a step towards realising Digital India and will depict good governance.
- The Government of India announced that all the major tourist spots like Sarnath, Bodhgaya and Taj Mahal will have a Wi-Fi facility as part of digital India initiative. Besides, the Government has started providing free Wi-Fi service at Varanasi ghats.

Based on the recommendations of the Foreign Investment Promotion Board (FIPB), the Government of India has approved 10 proposals of FDI amounting to Rs 2,857.83 crore (US\$ 445.21 million) approximately. Out of the 10 approved proposals, six belonged to the pharmaceutical sector with a total value of Rs 1,415 crore (US\$ 221.05 million) excluding the outflows.

The Union Cabinet, chaired by the Prime Minister Mr Narendra Modi, has given its approval to enter into a Memorandum of Understanding (MoU) for strengthening cooperation in the field of Micro, Small and Medium Enterprises (MSMEs), between India and Sweden. The purpose of the MoU is to achieve and promote cooperation between MSMEs of the two countries by providing a structured framework and creating an environment to identify each other's technologies, strengths, markets, policies, etc.

The Government of India has launched an initiative to create 100 smart cities as well as Atal Mission for Rejuvenation and Urban Transformation (AMRUT) for 500 cities with an outlay of Rs 48,000 crore (US\$ 7.47 billion) and Rs 50,000 crore (US\$ 7.78 billion) crore respectively. Smart cities are satellite towns of larger cities which will consist of modern infrastructure and will be digitally connected. The program was formally launched on June 25, 2015. The Phase I for Smart City Kochi (SCK) is set to launch in July 2015 which will be built on a total area of 650,000 sq. ft., having a floor space greater than 100,000 sq. ft. Besides, it will also generate a total of 6,000 direct jobs in the IT sector.

Indian Engineering Industry

Introduction

The Indian Engineering sector has witnessed a remarkable growth over the last few years driven by increased investments in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors of the economy, is of strategic importance to India's economy. Growth in the sector is driven by various sub-sectors such as infrastructure, power, steel, automotives, oil and gas, consumer durables etc.

India on its quest to become a global superpower has made significant strides towards the development of its engineering sector. The Indian government has appointed the Engineering Export Promotion Council (EEPC) to be the apex body in charge of promotion of engineering goods, products and services from India. India exports transport equipment, capital goods, other machinery/equipment and light engineering products such as castings, forgings and fasteners to various countries of the world. Coupled with favourable regulatory policies and growth in the manufacturing sector, many foreign players have started to invest in the country. India recently became a permanent member of the Washington Accord (WA) on June 13, 2014. The country now joins an exclusive group of 17 countries who are permanent signatories of the WA, an elite international agreement on engineering studies and mobility of engineers.

Market size

Driven by strong demand for engineering goods, exports from India registered a double digit growth at 10.22 per cent to touch US\$ 26.4 billion in June 2014 from US\$ 24.02 billion in the corresponding month last year. This growth can be credited to the robust expansion in shipments of aircraft, spacecraft parts and automobiles. The second best performing sector was non-ferrous metals and metal products.

Engineering exports from India are expected to cross US\$ 70 billion in FY 15 registering a growth of 15 per cent over the previous fiscal, as demand in key markets such as the US and the UAE is on the rise. Apart from these traditional markets, markets in Eastern and Central European countries such as Poland also hold huge promise.

India exports its engineering goods mostly to the US and Europe, which accounts for over 60 per cent of the total exports. Recently, India's engineering exports to Japan and South Korea have also increased with shipments to these two countries rising by 16 and 60 per cent respectively.

Exports performance of principle commodities

Transport equipment accounted for 32.5 per cent of the total engineering exports during FY13.

Investments

The engineering sector in India attracts immense interest from foreign players as it enjoys a comparative advantage in terms of manufacturing costs, technology and innovation.

The foreign direct investment (FDI) inflows into India's miscellaneous mechanical and engineering industries during April 2000 to January 2015 stood at around US\$ 3,948.17 million, as per data released by the Department of Industries Policy and Promotion (DIPP).

There have been many major investments and developments in the Indian engineering and design sector, which are as follows:

- Hyderabad-based infra player IL&FS Engineering Services has informed the bourses that it has bagged a port project worth Rs 179.84 crore (US\$ 28.74 million) in Maharashtra. "The company has received a letter of award (LOA) from IL&FS Maritime Infrastructure Company Limited (IMICL) on behalf of Dighi Port Limited for engineering, procurement, and construction (EPC) contract for the development of multipurpose berth, backup yard development and utilities of multipurpose terminal berth 5 on the north of Dighi Port, Agardanda in Maharashtra," the company said. According to the company, the project completion period is 545 days from the date of notice to proceed (NTP) and the scope of work includes design and construction of multipurpose berth, reclamation of 50 acres of backup area, among others.
- Vistara, the Tata Sons-Singapore Airlines JV, has signed an agreement with Airbus for engineering support services which include components supply and airframe maintenance.
- Leading online retailer Snapdeal is increasing focus on mobile commerce, where it will be doubling its engineering staff count to 700 soon as it sees over 90 per cent of business coming in through this platform over the next three years. Accordingly, the company has shifted half of its 350 engineers from PC to mobile commerce following the massive jump in traffic on this platform till last year.
- Honeywell Turbo Technologies has partnered with Tata to develop their first ever petrol turbocharged engine. The new Tata Revotron 1.2T engine launched in the 2014 Tata Zest delivers improved power and torque and a multi-drive mode, according to a Honeywell statement. Honeywell's engineering teams in Pune and Bangalore leveraged local capabilities and global expertise in petrol turbo technologies to address the specific needs of a local customer.
- The engineering and R&D division of HCL Technologies will likely cross the US\$ 1 billion mark in the next financial year as the company sees larger deals in a market that's widely expected to be the next big source of growth for the Indian IT sector. HCL Tech's engineering services unit contributed about 17 per cent to the company's revenue in the September quarter, coming in at US\$ 245 million.
- Rolta has been awarded an additional scope of work by Sadara Chemical Company, Saudi Arabia to implement a comprehensive engineering information system within Sadara's Jubail integrated chemical complex.
- Engineers India Ltd (EIL) has inked a US\$ 139 million consultancy deal for a 20 million tonnes (MT) refinery and polypropylene plant being built in Nigeria by Dangote Group.

Government Initiatives

Describing Germany and India as a "perfect match" for engaging in mutually beneficial collaboration in a host of areas, Mr Mark Hauptmann, political scientist and member of the German Parliament, has stressed on the time being ideal from a political and economic standpoint to further energise the bilateral relationship.

Mr. Hauptmann, who has led a German delegation to India to explore potential areas for more intense collaboration, said while from a political perspective India and Germany were headed by leaders who emerged from elections with

sweeping mandates, there was also “a lot in favour of getting started from an economic viewpoint as Germany viewed India as not a developing country but a world power.”

Reflecting rapid expansion in military ties, Israel has announced its willingness to share cutting-edge defence technologies with India and both countries will go for co-development of a number of key weapon systems soon. Israeli Defence Minister Mr Moshe Ya'alon said both countries have overcome hurdles in co-development of Barak 8 missile defence system and work on another key project of aerial defence systems was on track.

Mr Narendra Modi government's `Make in India' campaign has got the attention of several in infrastructure and engineering multi nationals including GE and ThyssenKrupp, which are considering investing in the country.

The Indian engineering sector is of strategic importance to the economy owing to its intense integration with other industry segments. The sector has been de-licensed and enjoys 100 per cent FDI. With the aim to boost the manufacturing sector, the government has relaxed the excise duties on factory gate tax, capital goods, consumer durables and vehicles. It has also reduced the basic customs duty from 10 per cent to 5 per cent on forged steel rings used in the manufacture of bearings of wind operated electricity generators.

Cumulative FDI inflows in Indian engineering sector

The Government of India in its Union Budget 2014-15, has provided investment allowance at the rate of 15 per cent to a manufacturing company that invests more than US\$ 4.17 million in any year in new plant and machinery. The government has also taken steps to improve the quality of technical education in the engineering sector by allocating a sum of Rs 500 crore (US\$ 79.92 million) for setting up five more IITs in the states of Jammu, Chhattisgarh, Goa, Andhra Pradesh and Kerala.

Steps have also been taken to encourage companies to perform and grow better. For instance, EIL was recently conferred the Navaratna status after it fulfilled the criteria set by the Department of Public Enterprises, Ministry of Heavy Industries and Public Enterprises, Government of India. The conferred status would give the state-owned firm more financial and operational autonomy.

Classification of Indian Engineering Sector

The engineering sector can be broadly categorised into heavy and light engineering goods. The heavy engineering sector includes machineries such as power generating sets, earthmoving and mining equipment, power plant equipment, textile machinery, process plant machinery, packaging machinery equipment and automotive equipment. The light engineering sector consists of a diverse set of sub-sectors including items such as medical instruments, sophisticated process control equipment, castings, forgings, fasteners, bearings, steel pipes and tubes.

A number of products that constitute the light engineering segment serve as an input for high engineering and capital goods sector. Demand for high engineering and capital goods therefore influence the overall health of the light engineering sector. Some of the products manufactured under the light engineering sectors such as different types of fasteners (except high tensile and special purpose fasteners), conventional hand-operated sewing machines, bicycle parts and other components are reserved for the SSI sector.

Indian Casting and Foundry Industry

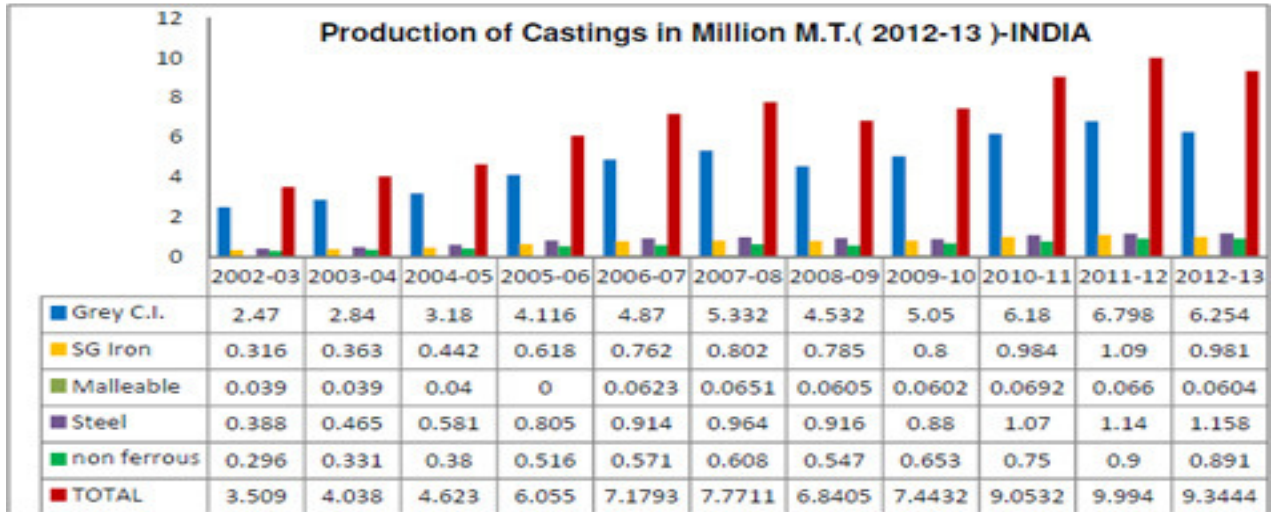

The Indian foundry industry manufactures metal cast components for applications in Auto, Tractor, Railways, Machine tools, Defence, Earth Moving /Textile / Cement / Electrical / Power machinery, Pumps / Valves etc. Foundry Industry has a turnover of approx. USD 15 billions with export approx. USD 2 billions.

The Indian Metal Casting (Foundry Industry) is well established & producing estimated 9.344 Million MT of various grades of Castings as per International standards. The various types of castings which are produced are ferrous, non ferrous, Aluminium Alloy, graded cast iron, ductile iron, Steel etc for application in Automobiles, Railways, Pumps Compressors & Valves, Diesel Engines, Cement/Electrical/Textile Machinery, Aero & Sanitary pipes & Fittings etc & Castings for special applications.

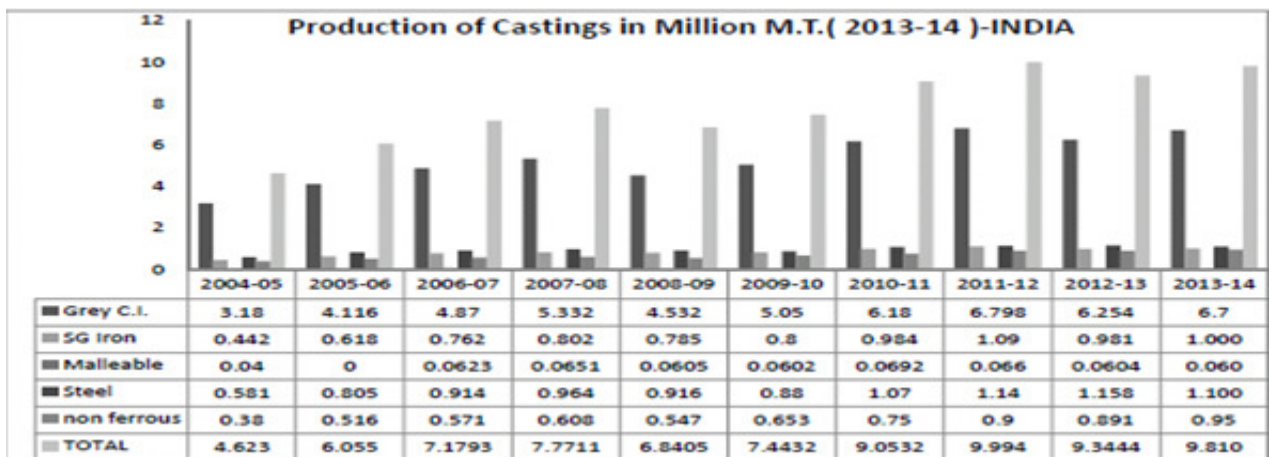

However, Grey iron castings have the major share i.e. approx 68% of total castings produced. There are approx 4500 units out of which 85% can be classified as Small Scale units & 10% as Medium & 5% as Large Scale units.

Approx 800 units are having International Quality Accreditation. Several large foundries are modern & globally competitive & are working at nearly full capacity. Most foundries use cupolas using LAM Coke. There is growing awareness about environment & many foundries are switching over to induction furnaces & some units in Agra are changing over to cokeless cupolas.

Production in Million Tonnes:

(Above statistics are based on data till 2012-13)

(Source: http://www.foundryinfo-india.org/Production_of_castings.aspx)

The Indian casting industry produces 6 MMT of various grades of casting and ranks sixth in the world. The forging industry comprises around 10 organised players, with nearly 100 players in the small and medium sector, and an installed capacity of 3.7 million tonnes in 2012-13. The industry exports a substantial part of its production apart from catering to the local demand.

(Source: <http://www.ibef.org/download/Engineering-March-2015.pdf>)

Exports trends:

The Exports have been showing healthy trends approx 25-30% YOY as can be seen from the charts below. However, the current exports for FY 2012-13 are approx Rs. 12180 Crore. The exports are slowdown due to weak demand.

Employment:

The industry directly employs about 5,00,000 people & indirectly about 1,50,000 people & is labour intensive. The small units are mainly dependant on manual labour However, the medium & Large units are semi/ largely mechanized & some of the large units are world class.

Auto Components Manufacturing Industry

Auto component industry is among one of the major end users of the casting products

The Indian auto component industry is expected to register a turnover of US\$ 66 billion by FY 15–16 with the likelihood to touch US\$ 115 billion by FY 20–21 depending on favourable conditions, as per the estimates by Automotive Component Manufacturers Association of India (ACMA). In addition, industry exports are projected to reach US\$ 12 billion by FY 15–16 and add up to US\$ 30 billion by FY 20–21.

Revenues for the auto industry in 2014-15 are expected to grow by 11-12 per cent supported by healthy recovery by major original equipment manufacturers (OEMs) in the medium and heavy commercial vehicles (M&HCV) and passenger vehicle (PV) segment.

Future Outlook

The engineering sector is a growing market. Current spending on engineering services is projected to increase to US\$ 1.1 trillion by 2020. With development in associated sectors such as automotive, industrial goods and infrastructure, coupled with a well-developed technical human resources pool, engineering exports are expected to touch US\$ 120 billion by 2015.

Also, the Union Budget 2014-15 has allocated funds for several infrastructure projects which are further expected to provide a boost to the engineering sector. The industry can also look forward to deriving revenues from newer services and from newer geographies with Big Data, Cloud, M2M and Internet of Things becoming a reality.

MANUFACTURING PROCESS

A description of the manufacturing process followed by the Company is discussed hereunder:

Designing and Development

The drawings of the component / equipment are generally supplied by the customers who also give their technical requirements. The drawings are converted into 3D simulations for estimation and production planning purposes using CAD techniques. All Methoding Designs are freezed using Simulation Software before releasing to Pattern Shop. CAD / CAM Facilities are used to manufacture components requiring Reverse Engineering. This includes

determining the number of feeders, spruce, runners, risers, in - gates, required in the pattern, which allows additional molten metal to flow into the moulds, helping to compensate for the shrinkages in the castings caused by the process of cooling of the metal in the moulds. This is a crucial step and takes effort and time to perfect.

Tooling

Tooling is the process of making patterns and core boxes of the moulds which gives the desired shapes to the castings, by using them in moulding boxes into which green sand is filled. After finalizing the designs, patterns are made out of Aluminium, or cast iron through programmed machining using VMC. If the casting is required to be hollow, as in some parts Housings, additional material known as cores, are used to make the desired cavities. The process of core making depends on the customer's requirements of the attributes of the castings.

Melting

Pig Iron, CRCA scrap and foundry returns are charged and melted in a Medium Frequency Electric Induction Furnace along with carburisers and ferro alloys. A sample of the molten metal is taken for analysis with a spectrometer which determines the correction required in the molten metal to reach the correct composition. The Liquid Metal is heated to the required temperature (around 1530°C) after which the metal is ready for pouring into moulds. Since the induction furnaces melt the charge by electromagnetic flux instead of heating crucible through external heating, it guarantees quality melt with minimal emissions.

Magnesium treatment

For obtaining SG Iron castings, the molten metal is treated with Nodulazier like Ferro Silicon Magnesium with careful timing and precision in a Treatment ladle. The graphite flakes are rendered into graphite nodules, which is a salient feature of SG Iron. Production of large quantities of quality SG Iron comes from continuous process refinement and quality control.

Moulding

Moulding is a critical activity for a foundry. The most widely accepted process for moulds making is green sand mould process. The advantage of the green sand process is that it enables mass production of castings at a low cost, especially for cast irons. Return Silica sand is mixed with predetermined quantities of New Silica Sand, Bentonite, coal dust and water. The mixed sand is then fed through conveyors to the moulding machines. Match plates with the required patterns, designed according to the Customers' requirements, are mounted on the moulding machine. The moulds are made by 2 halves Cope and Drag by applying pressure to the green sand and then as per requirement cores are placed into the moulds. Both the half of moulds were closed in the machine & then moved to mould / pouring line for pouring the molten iron into mould box. The Company makes mostly cored castings.

Knock-Out

The sand in mould boxes, after allowing sufficient time for the cooling of the liquid metal poured into the moulds, is knocked out, thus separating the castings from the sand. The hot castings are kept separately for quality checks. After the quality clearance the runners, risers, feeders, in - gates etc., are removed from the castings. These are called foundry returns and are recycled for the process of melting and casting after shot blasting. The separated silica sand is cooled by using water sprayer techniques and the cooled sand along with new silica sand, bentonite and coal dust is mixed in a Muller, resulting in green sand, which is again used for the process of moulding.

Shot Blasting

The Castings are decored and shot blast using powerful shot blasting machines and steel shots / cut wire shots to remove the sand and other adhering materials. The good castings are separated through visual inspection and are taken for fettling and finishing operations while the defective ones are scrapped and are sent back for re-melting.

Fettling and Grinding

Fettling is the process by which excess of metal is removed from the castings by using cutting, chipping and grinding tools. Grinding is done using Pedestal or Swing Frame grinding machines.

Inspection and Despatch

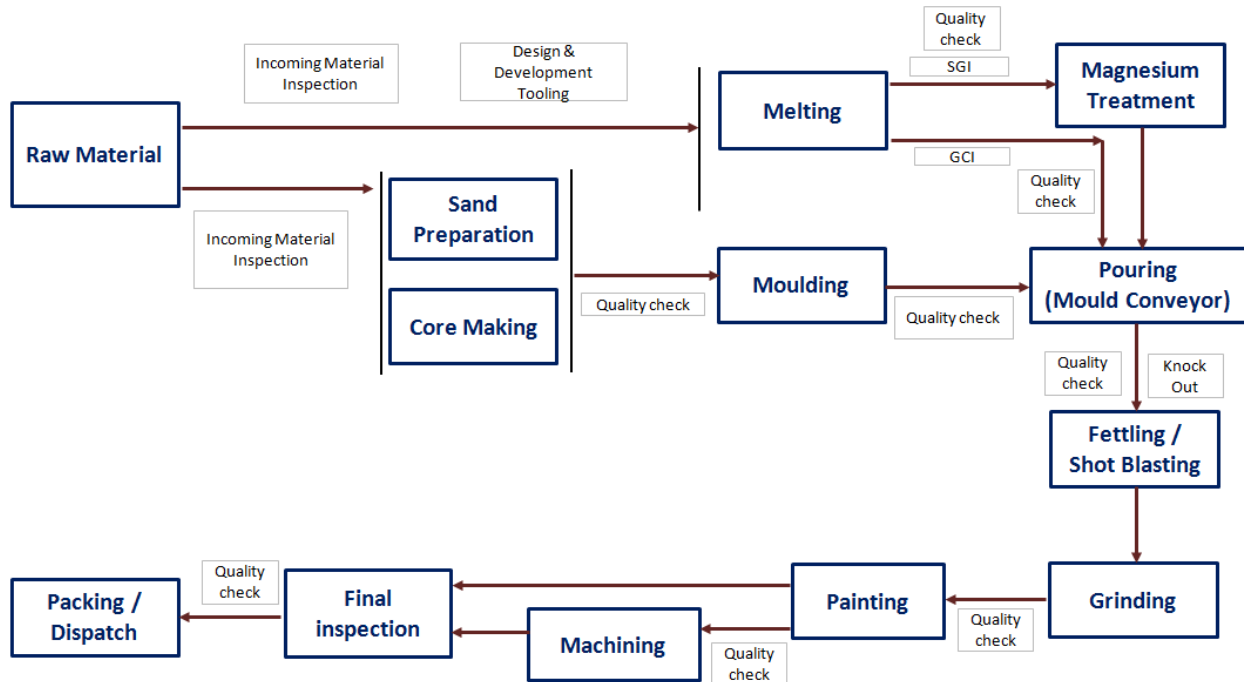

All casting products are carefully inspected for defects. The good ones are moved to the paint shop / dispatch area or to the machining shop / machining vendors.

Machining and Finishing

Machining of castings involves usage of sophisticated machine tools to make the castings into components for ready usage in equipment and machinery at customer end.

We are equipped with In-house Machine Shop consists of CNC Turning Centres up to Turning Diameter 360 mm. Vertical Machining Centres with maximum Table Size 760 X 510 X 510 mm for machining of castings.

2. USE OF ESTIMATES

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities, if any, as at the date of the financial statements and reported amounts of income and expenses during the year. Examples of such estimates include provisions for doubtful debts, employee retirement benefit plans, provision for income tax and the useful lives of fixed assets. The difference between the actual results and estimates are recognized in the period in which results are known or materialized.

3. FIXED ASSETS

Fixed assets are stated at historical cost less accumulated depreciation and impairment losses. Cost includes purchase price and all other attributable cost to bring the assets to its working condition for the intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Projects under which assets are not ready for their intended use are shown as Capital Work-in-Progress. Cost includes cost of land, materials, construction, services, borrowing costs and other overheads relating to projects.

4. DEPRECIATION

Tangible Fixed Assets

Pursuant to Companies Act, 2013 ('the Act') being effective from 1 April 2014, the Company has revised depreciation rates on tangible fixed assets as per the useful life specified in Part 'C' of Schedule II of the Act.

In accordance with AS-6 "Depreciation", depreciation on tangible fixed assets is computed on considering useful life provided in the Schedule - II of the Act. During the preceding years, the Company was providing depreciation on written down value basis at the rate prescribed in Schedule XIV of the Companies Act, 1956.

Pursuant to Companies Act, 2013 ('the Act') being effective from April 1, 2014, the Company has revised depreciation rates on tangible fixed assets as per useful life specified in Part 'C' of Schedule II of the Act. And due to the same there has been a change in the estimated useful life of depreciable tangible assets which affects the depreciation in the current period and in each period during the remaining useful life of the assets. As the change is only in regard to accounting estimate requiring an adjustment of the carrying amount of tangible assets. The same do not require adjustment in the financial information for the years ended on March 31, 2014, 2013, 2012 and 2011.

In respect of assets whose useful life had already exhausted as on 1 April 2014, has been adjusted in Reserves and Surplus in accordance with requirements of Para 7 of Schedule II of the Act. However there were no such assets which do not have useful life as on 01.04.2014.

5. BORROWING COSTS

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

6. IMPAIRMENT OF ASSETS

The company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount. An asset's (including goodwill) recoverable amount is the higher of an asset's net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

(ii) After impairment, depreciation/ amortization is provided on the revised carrying amount of the asset over its remaining useful life.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.
