22. We are dependent on our Promoters, directors and key managerial personnel of our Company for success whose loss could seriously impair the ability to continue to manage and expand business efficiently.

Our Promoters, Directors and key managerial personnel collectively have vast experience in the textile industry and are responsible for the growth of our company. They provide expertise, which enables us to make well informed decisions in relation to our business and our future prospects. For further details of our Directors and key managerial personnel, please refer to Chapter "**Our Management**" on page 123 of this Prospectus. Our success largely depends on the continued services and performance of our management and other key personnel and their services are difficult to replace. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business

efficiently. Also, the loss of any of the management or other key personnel may adversely affect the operations, finances and profitability of our Company.

Further, our future performance will depend upon the skills, efforts, expertise, and continued services of these persons and our ability to attract and retain qualified senior and mid-level managers. The loss of their services or those of any other members of management could impair our ability to implement our strategy and may have a material adverse effect on our business, financial condition and results of operations.

23. Changes in market trends, fashion and consumer preferences and increase in competitors that are largely beyond our control could adversely affect our business, financial condition, results of operations and prospects.

Textile business is very sensitive to change in the fashion and market trend. Any change in the latest fashion can render the old stock obsolete and increase in competition with for close competitors will reduce the demand. Also Factors such as change in trend, fashion and customer preference are generally beyond our control. Some or all of our concepts may become less attractive in light of changing consumer preferences or better design by competitors, and we may be unable to adapt to such changes in a timely manner. Any change in consumer preferences that decreases demand could adversely affect our business, financial condition, results of operations and prospects.

24. We may face the risk of any future potential legal proceeding or claim made by any consumer including product liability claims.

Since we operate in the garment manufacturing sector, we may face the risk of any potential legal proceedings and claims being brought against us by our consumers for any defective product sold or any dissatisfaction caused to them. In the event that we are found to be liable for any product liability claim, we could be required to pay substantial monetary damages and our reputation could suffer. Further, even if we successfully defend ourselves against a claim, or successfully claim back compensation from others, we may need to spend a substantial amount of time and money in defending such a claim and in seeking compensation, and our reputation could suffer.

25. Our Company's manufacturing activities are labour intensive and are dependent upon availability of skilled and unskilled labour. In case of unavailability of such labourers and / or inability to retain such personnel or any strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees could affect our business and result of operations.

Our manufacturing activities are labour intensive and are largely dependent on availability of skilled and unskilled labour. Non-availability of labour at any time or any disputes with them, which may lead to strikes, lock-outs or increased wage demands could affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations.

26. We are subject to risks arising from exchange rate fluctuation. Any adverse fluctuation in currency exchange rates may adversely affect our financial condition and results of operations.

Certain portion of our revenue is denominated in currencies other than Indian Rupees. Uncertainties in the global financial markets may have an adverse impact on the exchange rate between Rupee vis- à-vis other currencies. The exchange rate between Rupee and other currencies may continue to remain volatile in future depending upon the foreign exchange reserve position of India. Although we may enter into hedging arrangements against such risks, but there can be no assurance that these arrangements will successfully protect us from losses due to fluctuations in exchange rates.

Accordingly, any adverse fluctuation in the exchange rate between Rupee and other currencies may adversely affect our financial position and results of operation.

27. We are highly dependent on certain third party services such as smooth supply of raw material and transportation and timely delivery of our product. Various uncertainties and delays or non delivery of our products will affect our sales.

We currently rely upon third-party transportation providers for substantially all of our product distribution. Our utilization of delivery services for shipments is subject to risks, including increases in fuel prices, which would increase our delivery costs, and employee strikes and inclement weather, which may impact the ability of providers to provide delivery services that adequately meet our transportation needs. If we lose one or more of our transportation providers, we may not be able to obtain terms as favorable as those we receive from the third party transportation providers that we currently use, which in turn would increase our costs and thereby adversely affect our operating results. Further, disruptions of transportation services because of weather related problems, strikes, lock-outs, inadequacies in road infrastructure or other events could impair our procurement of raw materials and our ability to supply our products to our customers which in turn may adversely affect our business operations and our financial condition.

28. *We operate in a competitive environment. We face competition from both organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market for our products is competitive on account existence of both the organized and unorganized players. Competition occurs generally on the key attributes such as quality of products, distribution network, pricing and timely delivery. Some of our competitors have longer industry experience and greater financial, technical and other resources, which may enable them to adopt faster in changing market scenario and remain competitive. Moreover, the unorganized sector can offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

29. *We have not identified any alternate source of raising the working capital mentioned as our ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

Our Company has not identified any alternate source of funding for our working capital requirement and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may result in borrowing funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the company.

For further details of our working capital requirement, Please refer chapter titled “**Object for the Issue**” beginning on page 66 of this Prospectus.

Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of Clause 52 of SME Listing Agreement. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE Limited and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

We are insured for a risks associated with our manufacturing business, through policies such as Standard Fire and Special Perils Insurance Policy and Burglary Policy. We believe that we have got our assets adequately insured; however there can be no assurance that any claim under the insurance policies maintained by us will be honored fully/in part or on time, to cover all material losses. Our policy of covering these risks through insurance may not always be effective or adequate. Failure to effectively cover ourselves against the associated risks for any of these reasons including other unforeseen circumstances could expose us to substantial costs and potentially lead to material losses. For details on insurance policies taken by our Company please refer Chapter titled “**Our Business**” on page no 94 of Prospectus.

32. *Our inability to maintain an optimal level of inventory for our business may impact our operations adversely.*

Our daily operations largely depend on consistent inventory control which is generally dependent on our projected sales in different months of the year. It also largely depends on the fashion forecast and trends for the forthcoming season. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our required working capital will increase and if we under-stock inventory, our ability to meet consumer demand and our operating results may be adversely affected. Any mismatch between our planning and the actual off take by customers can impact us adversely.

Further, the deployment of the funds towards the "**Objects of the Issue**" is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our audit committee.

Further, the proposed schedule may be delayed by any reason whatsoever, including any delay in completion of the Issue. As we have not identified any alternate source of finance for the "**Object of the Issue**", if the schedule of implementation is delayed, we may have to revise our working capital limits resulting in unprecedented financial mismatch and this may affect our revenues and results of operations.

Accordingly, the Promoters and the Promoter Group will continue to exercise significant influence over our business policies and affairs and all matters requiring shareholders approval, including the composition of the Board of Directors, the adoption of amendments to our constitutional documents, lending, investments and capital expenditures. This concentration of ownership also may delay, defer or even prevent a change in control of our company and may make some transactions more difficult or impossible without the support of these stockholders. The interests of the Promoters and Promoter Group as the Company's controlling shareholders could conflict

with the Company's interests or the interests of its other shareholders. We cannot assure that the Promoters and Promoter Group will act to resolve any conflicts of interest in the Company's or your favour.

37. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once our company gets listed on the stock exchange we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges may also change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

38. Any future issuance of Equity Shares may dilute the shareholding of the Investor or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may also adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Issue paid-up share capital, held by our Promoters or other shareholders will be locked-in for a period of 1 (one) year and minimum promoter contribution of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the sub-section titled "*Notes to the Capital Structure*" under the section titled "*Capital Structure*" beginning on page 44 of this Prospectus. The future issuance or sale of the equity shares of our company by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

39. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing of the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

40. Investor's may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Capital gains arising from the sale of shares are generally taxable in India. Any gain realised on the sale of shares and debentures on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax, or STT, has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which shares or debentures are sold. Any gain realised on the sale of shares and/or held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to capital gains tax in India. Further, any gain realised on the sale of shares and/or debentures held for a period of 12 months or less will be subject to capital gains tax in India. Capital gains arising from the sale of shares and/or debentures will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares and/or debentures, as the case may be.

41. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by the management and the lead managers on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled “*Basis for Issue Price*” beginning on page 71 of this Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

42. *Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

43. *There is no existing market for our Equity Shares and we cannot assure you that such a market will develop. The stock price may be volatile, and you may be unable to resell your shares at or above the Issue price or at all.*

Prior to this Issue, there has been no public market for the Equity Shares of our company, and an active trading market may not develop or be sustained upon the completion of this Issue. Even though a Market Maker has been appointed for our stock, since there has been no public market for our Company’s Equity Shares, an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Issue. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to, among other factors, variations in our Company’s operating results, market conditions specific to the textile sector in India, developments relating to India and volatility in the BSE and securities markets elsewhere in the world. The risk of loss associated with this characteristic may be greater for investors expecting to sell Equity Shares purchased in this Issue soon after the Issue.

EXTERNAL RISK FACTORS:

44. *The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

Majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in Prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing.

Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation. To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavor to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

45. *Any downgrading of India’s debt rating by a domestic or international rating agency could have a negative impact on our business.*

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares.

46. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude.

47. A slowdown in economic growth in India could cause our business to suffer.

Our results of operations and financial condition are dependent on, and have been adversely affected by, conditions in financial markets in the global economy and, particularly in India. The Indian economy could be adversely affected by various factors such as political or regulatory action, including adverse changes in liberalization policies, business corruption, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, interest rates, inflation, commodity and energy prices and various other factor Any slowdown in the Indian economy may adversely affect our business, financial condition, results of operations and the price of our Equity Shares.

48. Any change in the labour laws or any other Labour law become applicable to us, our profitability may be adversely affected.

India has very strict labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

49. Probable opposition from countries abroad from sourcing of textiles, apparel and related products from India could adversely affect our financial condition and results of operations.

There is a concern in the US over the domestic textile industry being rendered uncompetitive in face of the mounting competition from the cheap garments being exported from China into the country. As a result, there have been restrictions imposed by the US on cheap imports of textiles and garments from China in order to protect the domestic industry. This could be an indication of similar restrictions being laid on other exporters like India in future.

50. Our transition to the use of the IFRS-converged Indian Accounting Standards may adversely affect our financial condition and results of operations.

The financial data included in this Prospectus has been prepared in accordance with Indian GAAP. There are significant differences between Indian GAAP and IFRS. We have not attempted to explain those differences or quantify their impact on the financial data included herein and we urge you to consult your own advisors regarding such differences and their impact on our financial data. Accordingly, the degree to which the Indian GAAP financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

51. The extent and reliability of Indian infrastructure could adversely affect our results of operations and financial condition.

India's physical infrastructure is less developed than that of many developed countries. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have an adverse effect on our results of operations and financial condition.

52. *Our performance is linked to the stability of policies and the political situation in India.*

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive Indian governments have pursued policies of economic liberalization and financial sector reforms. The current Government has announced its general intention to continue India's current economic and financial sector liberalization and deregulation policies. However there can be no assurance that such policies will be continued and a significant change in the government's policies in the future could affect business and economic conditions in India and could also adversely affect our business, prospects, financial condition and results of operations. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

53. *The occurrence of natural or man-made disasters or erupt of communal disturbances or riots or erupt in India, or Terrorist attacks and other acts of violence or war involving India and other countries increase, this would adversely affect the Indian economy and our business.*

Any occurrence of natural like hurricanes, floods, earthquakes, tornadoes, fires, explosions, pandemic disease and man-made disasters like acts of terrorism and military actions or erupt of any communal disturbances or riots, or Terrorist attacks and other acts of violence or war involving India and other countries increase, this would adversely affect the Indian economy and our business.

54. *Financial instability in Indian financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Any financial development in the countries in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Any adverse condition happening in the financial systems of other emerging markets may also affect the investors' confidence in Indian Market which can cause increased volatility, in the Indian economy in general. Any worldwide financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy.

Overview of the Global & Indian Economy**The Global Scenario**

Global growth is expected to be 2.8 percent in 2015, lower than anticipated in January. Growth is expected to pick up to 3.2 percent in 2016–17, broadly in line with previous forecasts. Developing economies are facing two transitions. First, the widely expected tightening of monetary conditions in the United States, along with monetary expansion by other major central banks, has contributed to broad-based appreciation in the U.S. dollar and is exerting downward pressure on capital flows to developing countries. Many developing-country currencies have weakened against the U.S. dollar, particularly those of countries with weak growth prospects or elevated vulnerabilities. In some countries, this trend has raised concerns about balance sheet exposures in the presence of sizeable dollar-denominated liabilities. Currency depreciations have been significantly less in trade-weighted terms, partly due to a weakening euro and yen, thus offering only modest prospects for competitiveness gains to boost exports. Second, despite some pickup in the first quarter of 2015, lower oil prices are having an increasingly pronounced impact. In oil-importing countries, the benefits to activity have so far been limited, although they are helping to reduce vulnerabilities. In oil-exporting countries, lower prices are sharply reducing activity and increasing fiscal, exchange rate, or inflationary pressures. Risks remain tilted to the downside, with some pre-existing risks receding but new ones emerging.

Indian Economy Outlook

The Indian economy is reviving, helped by positive policy actions that have improved confidence and by lower global oil prices. To continue on this trend, India needs to revitalize the investment cycle and accelerate structural reforms. The Indian economy is the bright spot in the global landscape, becoming one of the fastest-growing big emerging market economies in the world. Growth numbers are now much higher and the current account deficit is comfortable, in part due to the fall in gold imports and lower oil prices. New investment project announcements have started to pick up, particularly in the power and transport sectors.

The revised GDP, the IMF forecasts growth will strengthen to 7.2 percent in 2014-15 and rise to 7.5 percent in 2015-16, driven by stronger investment following improvements to the business climate. The revised growth figures support our view that economic recovery in India is under way, albeit pointing to a somewhat faster pace than we, and others, previously believed. These GDP revisions portray a more resilient performance of the services and manufacturing sectors of the economy.

Inflation has fallen by half to around 5 percent, after hovering around 10 percent for several years. The Reserve Bank of India (RBI) steps to tighten monetary policy by raising interest rates during 2013–2014 and the government’s efforts to contain food

inflation, including by releasing buffer stocks of cereal and keeping agricultural procurement prices in check. Also the government's recent move to introduce a flexible inflation-targeting framework is a clear positive. It will help deliver low and stable inflation, and diminish the prospect of renewed bouts of high inflation.

Global Apparel & Textile Industry

Since the return of normal trading rules in 2005, when the Multi-fibre Arrangement quota system ended, world trade in textiles and clothing has increased by more than 68 percent, more or less at the same pace as the world trade in manufactures. It has surged from US\$454 billion in 2004 to US\$766 billion in 2013. Even with the significant economic downturn in most countries during the period of 2008-2009, trade data points to the enormous success of export-oriented textiles and clothing products. Today, developing economies and LDCs contribute to almost 70 percent of world exports of textiles and clothing.

India's Textile Industry

India is the one of the world's largest producers of textiles and garments. Abundant availability of raw materials such as cotton, wool, silk and jute as well as skilled workforce have made the country a sourcing hub. It is the world's second largest producer of textiles and garments. The Indian textiles industry accounts for about 24 per cent of the world's spindle capacity and eight per cent of global rotor capacity. The potential size of the Indian textiles and apparel industry is expected to reach US\$ 223 billion by 2021.

(Source: <http://www.ibef.org/industry/textiles.aspx>)

The textiles industry has made a major contribution to the national economy in terms of direct and indirect employment generation and net foreign exchange earnings. The sector contributes about 14 per cent to industrial production, four per cent to the gross domestic product (GDP), and 27 per cent to the country's foreign exchange inflows. It provides direct employment to over 45 million people. The textiles sector is the second largest provider of employment after agriculture. Thus, the growth and all round development of this industry has a direct bearing on the improvement of India's economy. It is also one of the largest contributing sectors of India's exports. The textiles industry is labour intensive and is one of the largest employers.

India has overtaken Italy, Germany and Bangladesh to emerge as the world's second largest textile exporter, as per recent data released by 'UN Comtrade'. India's share in Global Textiles increased by 17.5 per cent in 2013 compared to 2012.

Home Furnishing and Made-ups Market

The home furnishing products can be broadly categorized into five categories, which include - bedding, window dressings, bathroom textiles, cushions and covers, and table linen. Household penetration levels are high, especially in the largest sectors — bedding and window dressings. While replacement due to wear and tear is not inevitably frequent, an increased consumer interest in home interior products has stimulated buying in what is now very much a fashion-led industry. The industry also benefits from the growing number of households, a trend, which is expected to continue at an even faster rate. India produces a wide range of products, including home furnishings, household linen, curtain tapestry and yardage made with several textures and varying thickness. The home furnishing industry mainly exports fabrics, bed linen, table linen, toilet and kitchen linen, towels, cushions, curtains, pads, tapestries and upholstery's, carpets and floor coverings, etc. The industry has adopted measures and techniques to offer premium quality and eco-friendly products to the global industry.

Garments and Apparel Industry

The readymade garments industry in India is highly fragmented with presence of numerous players. The industry is classified under men's wear, women's wear, kids wear, and unisex wear. Readymade garments sector, which was previously dominated by men's wear, is now seeing growing contribution from women's wear as well as kid's wear. The growth of the sector was coming from tier I cities, however, industries in the sector are looking forward to tier II and tier III cities as part of the business expansion. Further, new concepts such as plus size clothing, customized clothing, etc. are also taking shapes in readymade garment industry.

The Global Scenario

Global growth is expected to be 2.8 percent in 2015, lower than anticipated in January. Growth is expected to pick up to 3.2 percent in 2016–17, broadly in line with previous forecasts. Developing economies are facing two transitions. First, the widely expected tightening of monetary conditions in the United States, along with monetary expansion by other major central banks, has contributed to broad-based appreciation in the U.S. dollar and is exerting downward pressure on capital flows to developing countries. Many developing-country currencies have weakened against the U.S. dollar, particularly those of countries with weak growth prospects or elevated vulnerabilities. In some countries, this trend has raised concerns about balance sheet exposures in the presence of sizeable dollar-denominated liabilities. Currency depreciations have been significantly less in trade-weighted terms, partly due to a weakening euro and yen, thus offering only modest prospects for competitiveness gains to boost exports. Second, despite some pickup in the first quarter of 2015, lower oil prices are having an increasingly pronounced impact. In oil-importing countries, the benefits to activity have so far been limited, although they are helping to reduce vulnerabilities. In oil-exporting countries, lower prices are sharply reducing activity and increasing fiscal, exchange rate, or inflationary pressures. Risks remain tilted to the downside, with some pre-existing risks receding but new ones emerging.

The global economy is growing somewhat more slowly than expected, with disappointments in developing countries, especially in oil exporters and Brazil. Forecasts have been revised upwards in the Euro Area and India, but downwards in the United States, Brazil and oil-exporting countries. As a result, growth in the BRICS is increasingly diverging.

*Shaded areas indicate forecasts.

*Oil importers exclude Brazil, China, and India.

Divergences across major economies will narrow in 2015-16 as growth plateaus in the United States and strengthens in the Euro Area and Japan. Lower oil prices will support consumer spending and hold inflation at record lows in the short term, but these effects will wane by 2016. Activity in China will continue to decelerate modestly in line with expectations, with the slowdown buffered by scaled-up monetary and fiscal accommodation.

*The red line shows the trend. The latest observation is May 2015. PMI = Purchasing Managers' Index.

The income shifts caused by falling commodity prices are having increasingly pronounced effects. Many commodity-importing countries have benefited from shrinking vulnerabilities: lower inflation and narrowing fiscal and external deficits. This has created room for central banks to support activity. In most oil-exporting countries, however, activity has slowed. Currencies have depreciated, compelling some central banks to tighten monetary policy. Governments have cut spending to offset falling resource revenues.

Indian Economy Outlook

The Indian economy is reviving, helped by positive policy actions that have improved confidence and by lower global oil prices. To continue on this trend, India needs to revitalize the investment cycle and accelerate structural reforms. The Indian economy is the bright spot in the global landscape, becoming one of the fastest-growing big emerging market economies in the world. Growth numbers are now much higher and the current account deficit is comfortable, in part due to the fall in gold imports and lower oil prices. New investment project announcements have started to pick up, particularly in the power and transport sectors.

While the country is well placed to cope with external shocks, there are possible risks on the horizon, both external and domestic. Spillovers from weak global growth and potential global financial market volatility could be disruptive, including from any unexpected developments as the United States begins to raise its interest rates. On the domestic front, the weaknesses in corporate balance sheets—especially in light of the increase in corporate leverage of the past few years—and worsening bank asset quality bear watching, as they could weigh on growth. Growth forecasts higher India's economic profile recently got a lift as the country improved the way it measures economic output.

The revised GDP, the IMF forecasts growth will strengthen to 7.2 percent in 2014-15 and rise to 7.5 percent in 2015-16, driven by stronger investment following improvements to the business climate. The revised growth figures support our view that economic recovery in India is under way, albeit pointing to a somewhat faster pace than we, and others, previously believed. These GDP revisions portray a more resilient performance of the services and manufacturing sectors of the economy.

Inflation has fallen by half to around 5 percent, after hovering around 10 percent for several years. The Reserve Bank of India (RBI) steps to tighten monetary policy by raising interest rates during 2013–2014 and the government’s efforts to contain food inflation, including by releasing buffer stocks of cereal and keeping agricultural procurement prices in check. Also the government’s recent move to introduce a flexible inflation-targeting framework is a clear positive. It will help deliver low and stable inflation, and diminish the prospect of renewed bouts of high inflation.

The government has made strong efforts to put its public finances on solid footing, with the central government’s fiscal deficit falling to 4.1 percent of GDP in 2014-15, helped by lower oil prices. By creating space for higher infrastructure spending, fiscal reforms can have a major impact on economic growth. The government has also deregulated diesel prices and raised natural gas prices. In addition, boosting spending on infrastructure, such as roads and ports, electricity transmission, and social spending (public health, education) would improve the quality of expenditure. With the steps towards introduction of the national goods and services tax would also help create a single Indian market by replacing a myriad of local levies. The Indian government’s efforts to improve the business climate have gained momentum, including with a “Make in India” campaign to attract investment.

Introduction - Textile Industry

The textile industry has two broad segments, namely handloom, handicrafts, sericulture, power looms in the unorganized sector and spinning, apparel, garmenting, made ups in the organized sector.

The Indian textiles industry is extremely varied, with a hand-spun and hand-woven sector at one end of the spectrum, and the capital intensive sophisticated mill sector at the other. The decentralized power looms/ hosiery and knitting sector form the largest and knitting sector form the largest section of the Textiles Sector. The close linkage of the Industry to agriculture and the ancient culture, the traditions of the country make the Indian textiles sector unique in comparison to the textiles industry of other countries. This also provides the industry with the capacity to produce a variety of products suitable to the different market segments, both within and outside the country.

Global Apparel & Textile Industry

Over the past two decades, the growth of the world textiles industry and trade has been influenced substantially by three major developments. The first two are directly related to the WTO:

1. The return of the textiles and clothing sector to the "normal rules" of the GATT/WTO – in other words, phasing out the long- standing Multi-Fibre Arrangement (MFA) which, for almost 40 years, allowed countries to protect their domestic textile industry through quotas. This was a major departure from the normal GATT/WTO rules. Next January will mark the 10th anniversary to end the quota system; and
2. The accessions to the WTO by China in 2001 and Viet Nam in 2005 have allowed both China and Viet Nam to benefit from the phasing-out of the MFA quota system and enlarge their share in the global textile and clothing market.

- Based on these two developments, the world trading system became more open to trade in textiles and clothing which made it possible to have the **third** major development - which is the significant transformation of the world textile industry through increased outsourcing, and the proliferation of global value chains and global production networks.

Since the return of normal trading rules in 2005, when the Multi-fibre Arrangement quota system ended, world trade in textiles and clothing has increased by more than 68 percent, more or less at the same pace as the world trade in manufactures. It has surged from US\$454 billion in 2004 to US\$766 billion in 2013. Even with the significant economic downturn in most countries during the period of 2008-2009, trade data points to the enormous success of export-oriented textiles and clothing products. Today, developing economies and LDCs contribute to almost 70 percent of world exports of textiles and clothing.

In 2013, China alone accounted for 34.8 percent of world textile exports and 38.6 percent of world clothing exports. However, it is interesting to note that, with the rising production cost in China and the shifting into higher-value goods and services, in recent years China has started to import finished textiles and garments from other countries, such as Bangladesh and, perhaps, very soon Sri Lanka. In 2013, Viet Nam accounted for 1.6 percent of world textile exports (it was 0.2 percent in 2000) and 3.7 per cent of world clothing exports (0.9 percent in 2000).

Other developing and least developed countries have also strengthened their positioning in this sector - notably India, Turkey, Bangladesh, Pakistan and Cambodia. The increased share of these countries in the world textiles market has had a great impact in their poverty reduction and economic development. Although textile production is always an important first step towards industrialization, this sector continues to provide an alternative for workers in low-wage agriculture or service jobs even after other manufacturing sectors are established, especially for women and the less-skilled.

India's Textile Industry

India is the one of the world's largest producers of textiles and garments. Abundant availability of raw materials such as cotton, wool, silk and jute as well as skilled workforce have made the country a sourcing hub. It is the world's second largest producer of textiles and garments. The Indian textiles industry accounts for about 24 per cent of the world's spindle capacity and eight per cent of global rotor capacity. The potential size of the Indian textiles and apparel industry is expected to reach US\$ 223 billion by 2021.

(Source: <http://www.ibef.org/industry/textiles.aspx>)

The textiles industry has made a major contribution to the national economy in terms of direct and indirect employment generation and net foreign exchange earnings. The sector contributes about 14 per cent to industrial production, four per cent to the gross domestic product (GDP), and 27 per cent to the country's foreign exchange inflows. It provides direct employment to over 45 million people. The textiles sector is the second largest provider of employment after agriculture. Thus, the growth and all round development of this industry has a direct bearing on the improvement of India's economy. It is also one of the largest contributing sectors of India's exports. The textiles industry is labour intensive and is one of the largest employers.

India has overtaken Italy, Germany and Bangladesh to emerge as the world's second largest textile exporter, as per recent data released by 'UN Comtrade'. India's share in Global Textiles increased by 17.5 per cent in 2013 compared to 2012.

Home Furnishing and Made-ups Market

The home furnishing products can be broadly categorized into five categories, which include - bedding, window dressings, bathroom textiles, cushions and covers, and table linen. Household penetration levels are high, especially in the largest sectors — bedding and window dressings. While replacement due to wear and tear is not inevitably frequent, an increased consumer interest in home interior products has stimulated buying in what is now very much a fashion-led industry. The industry also benefits from the growing number of households, a trend, which is expected to continue at an even faster rate. India produces a wide range of products, including home furnishings, household linen, curtain tapestry and yardage made with several textures

and varying thickness. The home furnishing industry mainly exports fabrics, bed linen, table linen, toilet and kitchen linen, towels, cushions, curtains, pads, tapestries and upholstery's, carpets and floor coverings, etc. The industry has adopted measures and techniques to offer premium quality and eco-friendly products to the global industry.

Garments and Apparel Industry

The readymade garments industry in India is highly fragmented with presence of numerous players. The industry is classified under men’s wear, women’s wear, kids wear, and unisex wear. Readymade garments sector, which was previously dominated by men’s wear, is now seeing growing contribution from women’s wear as well as kid’s wear. The growth of the sector was coming from tier I cities, however, industries in the sector are looking forward to tier II and tier III cities as part of the business expansion. Further, new concepts such as plus size clothing, customised clothing, etc. are also taking shapes in readymade garment industry.

The CST Act formulates principles for determining (a) when a sale or purchase takes place in the course of inter-state trade or commerce; (b) when a sale or purchase takes place outside a State and(c) when a sale or purchase takes place in the course of imports into or export from India. This Act provides for levy, collection and distribution of taxes on sales of goods in the course of inter-state trade or commerce and also declares certain goods to be of special importance in inter-State trade or commerce and specifies the restrictions and conditions to which State laws imposing taxes on sale or purchase of such goods of special importance (called as declared goods) shall be subject. Central Sales tax is levied on inter State sale of goods. Sale is considered to be inter-state when (a) sale occasions movement of goods from one State to another or (b) is effected by transfer of documents during their movement from one State to another.

A sale or purchase of goods shall be deemed to take place in the course of inter-state trade or commerce if the sale or purchase is affected by a transfer of documents of title to the goods during their movement from one state to another. When the goods

are handed over to the carrier, he hands over a receipt to the seller. The seller sends the receipt to buyer. The buyer gets delivery of goods on submission of the receipt to the carrier at other end. The receipt of carrier is 'document of title of goods'. Such document is usually called Lorry Receipt (LR) in case of transport by Road or Air Way Bill (AWB) in case of transport by air. Though it is called Central Sales Tax Act, the tax collected under the Act in each State is kept by that State only. Central Sales Tax is payable in the State from which movement of goods commences (that is, from which goods are sold). The tax collected is retained by the State in which it is collected. B. Cases filed by Our Company**1) Litigation involving Civil Laws****S.B. Civil Writ Petition**

Matter1 Our Company had filed a S,B, Writ Petition No. 2646/2010 against Union of India and RIICO in respect of loss suffered by Our Company by an unfortunate incident in which fire was caused in Eleven tanks of Indian Oil Corporation which led to huge losses to the industries including our Company. After the incident, Respondent-RIICO issued a public notice on 11.12.2009 for release of Rs 50 Crores, as given by the Indian Oil Corporation as a goodwill and Humanitarian Gesture, to the affected industries and others. Out of Rs 50 crore, lump sum amount of Rs 25,000/- was to be given to each affected industry as an ad hoc relief and balance thereupon to be distributed in proportion to the loss suffered by the industries. To evaluate the loss suffered, a Committee was constituted and accordingly damage was assessed and objections were to be raised within the time limit mentioned which was extended in another public notice dated 21.12.2009 and thereupon by public notice dated 5.01.2010. The respondents then again issued a public notice dated 01.02.2010 which indicated the amount of relief to each industrial unit in proportion to the loss assessed, however, with the cap of Rs 1 crore which was unfair and against the earlier public notices issued by the respondents.

Subsequently, Our Company in this Civil Writ Petition has challenged the decision of the respondents to distribute the amount of Rs50 Crores with the ceiling of Rs 1 Crore and that the ad-hoc relief should be given to the industries in proportion to the loss as assessed by the Committee. The Hon'ble High Court in its Order dated 29.04.2011 held that the public notice issued by the Respondents is discriminatory because an Industrial Unit which has sustained damage of Rs 2 Crores or less than Rs 1 Crore would be getting a full proportionate amount whereas any other industrial unit which has sustained damage of more than 1 Crore will be receiving the same amount of relief.

Thus, the ceiling limit of Rs 1 Crore is held to be discriminatory. Hence, the Respondents were asked to distribute the amount of Rs 50 Crore in the manner indicated in the public notice dated 11.12.2009. Our Company then filed a S.B. Civil Review Petition No. 116//2011 in which Our Company prayed to the Hon'ble High Court to direct the respondents to settle the claim of petitioner i.e. Our Company as verdict by surveyor to the tune of Rs 36,02,326/-. The Respondents to this claim of Our Company responded that the Cut-off date for submitting the IRDA approved surveyor report was 12.01.2010 whereas Our Company submitted the survey report on 15.02.2010 therefore the same could not be considered. Further, Our Company also raised an issued that the earlier Writ Petition No. 2646/2010 has been clubbed with S.B. Civil Writ Petition No. 1573/2010 titled as M/s Genus Innovations Ltd. Vs Union of India and Ors. Whereas it should have been clubbed with S.B. Civil Writ Petition No. 2289/2010 titled as M/s Podar Pigments Ltd and Ors. V/s Union of India.

The matter is pending before the Hon'ble High Court as on the date of this prospectus.

Matter2- Our Company has filed a CW 7284 of 2010 petition at the High Court of Rajasthan, Jaipur against RIICO and State of Rajasthan. In this petition our Company has challenged decision of the Committee of RIICO formed for assessing the loss suffered by our Company by the heavy fire caused in the Eleven Tanks of IOC destroying the industries in near by area as well as Our Company. As per the public notice dated 11.12.2009 issued by RIICO, it was informed that a committee constituted by the Management of RIICO vide office order No. IPI/PS/3527 dated 30.10.2003 and partial modification of the office order No. IPI/PS/3528 dated 31.10.2009 has allegedly assessed the damages caused by units to the industries. Our Company claims that it

had submitted its Claims and assessment on 6.11.2003 and its objection to the amount of damages assessed by the committee. Our Company also submitted the Individual valuation of damages duly verified by the certified surveyor of Insurance Regulatory and Development Authority (IRDA), as required by RIICO. However, RIICO did not considered the same and vide communication No. U(25)/2010/5025 dated 10.03.2010 informed Our Company that the assessment report of the undersigned cannot be considered and hence stands cancelled.

Consequently Our Company preferred S.B. Civil Writ petition No. 7284/2010 before the Hon'ble High Court and on 28.05.2010, the Hon'ble High Court after hearing the parties in the matter issued directions that meanwhile, operation of order date 10.03.2010 shall remain stayed and the respondents are directed to consider the claim application of the petitioner i.e. Our Company for compensation/damages in accordance with law, which will be subject to final outcome of the Writ Petition. Subsequently, Our Company filed a S.B. Civil Miscellaneous Stay Application in S.B. Civil Writ Application No.7284/2010 for final disposal of the Writ Petition 7284/2010 and to put stay on order dated 10.03.2010. The said matter is pending before the Hon'ble High Court.

Matter3 Our Company has a CMS 1120-2010-R petition filed at the High Court of Rajasthan, Jaipur bench against Union of India. The said matter is pending before the Hon'ble High Court for hearing.
