SECTION III: RISK FACTORS

An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Red Herring Prospectus, particularly the “**Financial Information of the Company**” and the related notes, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on page 140, 96 and 175 respectively of this Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “**Risk Factors**” on page 24 and “**Management Discussion and Analysis of Financial Condition and Results of Operations**” on page 175 of this Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “**Restated Financial Statements**”.

INTERNAL RISK FACTORS

1. **We derive a significant portion of our revenues from clients located in the United States of America and Netherland and any adverse developments in these markets could adversely affect our business.**

We have historically derived a significant portion of our revenues from operations from clients located in the United States of America and Netherland. Revenue from operations from these locations amounted to Rs. 1300.63 Lakhs, Rs. 1,540.38 Lakhs, Rs. 1,985.11 Lakhs & Rs. 1,093.70 Lakhs for the period and financial year ending December 31, 2023, March 31, 2023, March 31, 2022 & March 31, 2021 respectively, and represented 46.39%, 59.03%, 77.72% & 63.58% of our revenue from operations, in such periods, respectively. Our revenues from the United States of America and Netherlands may decline as a result of increased competition, regulatory action, pricing pressures, fluctuations in the demand for or supply of our services, or the outbreak of an infectious disease such as COVID-19. Our failure to effectively react to these situations or to successfully introduce new services could adversely affect our business, prospects, results of operations and financial condition. Further, international operations are subject to risks that are specific to each country and region in which we operate, as well as risks associated with international operations, in general. These risks include complying with changes in foreign laws, regulations and policies, including restrictions

on trade, import and export license requirements, and tariffs and taxes, intellectual property enforcement issues and changes in foreign trade and investment policies.

2. *We are dependent on a few customers for a major part of our revenues. Further we do not have any long-term commitments from customers and any failure to continue our existing arrangements could adversely affect our business and results of operations.*

The substantial portion of our revenue is significantly dependent on certain key customers. For instance, our top three customers for the nine months' period ended December 2023, F.Y. ended March 31, 2023 and March 31, 2022 accounted for 65.17%, 78.60% and 99.93% of our revenue from operations in such periods. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our key customers, a failure to negotiate favourable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company. We presently do not have any long-term or exclusive arrangements with any of our customers, hence, there can be no assurance that our customers will place their orders with us on current or similar terms, or at all.

Although our Company maintains long-term relationship with our major customers, there can be no assurance that we will continue to maintain such relationship with our customers. Further, in the event our customers experience any delays in placing orders with us, or if they prefer to buy the software products or services of our competitors, it could have a material adverse effect on our business growth and prospects, financial condition, results of operations and cash flows. Our inability to maintain our existing customer network could have an adverse impact on our sales, business growth prospects, result in slowdown of operations, financial conditions and cash flows. Further, the performance of our customers, their sales network and their ability to expand their businesses are crucial to the future growth of our business and directly affect our sales volume and profitability. If any of the customers fails to sell our products to the end customers, or if our relationships with our customers are affected, our profitability could be significantly affected.

3. *Exchange rate fluctuations may adversely affect our results of operations as significant portion of our revenues and some portion of our expenditure is denominated in foreign currencies.*

We are exposed to foreign exchange related risks as a significant portion of our revenue from operations are in foreign currency, including the US Dollar. For the period ending December 31, 2023 and Fiscal year ending 2023, 2022 and 2021, revenue from operations outside India represented 67.87%, 83.47%, 77.72% and 63.58% respectively, of our total revenue from operations in such periods. While we make provisions for foreign exchange fluctuations, a significant or frequent fluctuation in the exchange rate between the Indian Rupee and other currencies, may adversely affect our results of operations.

The exchange rate between the Indian Rupee and foreign currencies, primarily the USD, has fluctuated in the past and our results of operations have been impacted by such fluctuations in the past and may be impacted by such fluctuations in the future. For example, during times of strengthening of the Indian Rupee, we expect that our revenue from offerings overseas will generally be negatively impacted as foreign currency received will be translated into fewer Indian Rupees. However, the converse positive effect of depreciation in the Indian Rupee may not be sustained or may not show an appreciable impact in our results of operations in any given financial period due to other variables impacting our business and results of operations during the same period. Accordingly, any appreciation or depreciation of the Indian Rupee against these currencies can impact our results of operations. We may from time to time be required to make provisions for foreign exchange differences in accordance with accounting standards.

Our ability to foresee future foreign currency fluctuations is limited and due to the time gap between the accounting of sales and actual receipts, the foreign exchange rate at which the sale is recorded in the books of accounts may vary with the foreign exchange rate at which the receipt is made, thereby benefiting or affecting us negatively, depending on the appreciation or depreciation of the Rupee. We may, therefore, be exposed to risks arising from exchange rate fluctuations and we may not be able to pass on all losses on account of foreign currency fluctuations to our clients, and as a result, suffer losses on account of foreign currency fluctuations. There is no guarantee that we may be able to manage our foreign currency risk effectively or mitigate exchange exposures, at all times and our inability may harm our results of operations and cause our results to fluctuate and/or decline. We may experience foreign exchange losses and gains in respect of transactions denominated in foreign currencies.

For further details, kindly refer section titled "*Financial Information of the Company*" beginning on Page 140 of this Red Herring Prospectus.

4. *Our business will suffer if we fail to anticipate and develop new services and enhance existing services in order to keep pace with rapid changes in technology and the industries on which we focus.*

The Information Technology industry is characterized by rapid technological changes, evolving industry standards, changing client preferences, and new service introductions that could result in technology obsolescence. Our future success will depend on our ability to anticipate these advances, enhance our existing offerings or develop new service offerings to meet client needs, in each case, in a timely manner. We may not be successful in anticipating or responding to these advances on a timely basis, or at all. If we do respond, the services or technologies we develop may not be successful in the marketplace. We may also be unsuccessful in stimulating customer demand for new and upgraded services, or seamlessly managing new service introductions or transitions. Our failure to address the demands of the rapidly evolving IT environment, particularly with respect to emerging technologies, and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition. In addition, our success also depends on our ability to proactively manage our portfolio of technology alliances.

Additionally, during the regular course of operating our business, we may adjust our future plans as a result of our research, experience, technology evolution and market demand. Accepting unforeseen business opportunities may also result in change in business model. We cannot give assurance that any adjustment in our future plans will become successful or be more successful than our current business model. A shift in our plans may result in the use of other technologies. Other technologies may in the future prove to be more efficient and/or economical to us than our current technologies. We cannot give assurance that any change in technology will become successful or be more successful than our current technology.

5. *Our Company's success depends largely upon its skilled professionals and its ability to attract and retain these personnel. The industry where our Company operates is a highly skilled and technical employee intensive industry.*

Our Company's ability to execute projects and to obtain new clients depends largely on their ability to attract, train, motivate and retain highly skilled software professionals and other mid-level professionals. The attrition rates in the industry in which we operate have been high due to a highly competitive skilled labour market in India. We invest in training human resources that we hire to perform the services we provide. These professionals are often targeted by the lateral recruitment efforts of our competitors. The performance of our Company will be benefited on the continued service of these persons or replacement of equally competent persons from the domestic or global markets. We may have difficulty in redeploying and retraining our employees to keep pace with continuing changes in technology, evolving standards and changing customer.

We incur various employee benefits expense, including salaries and bonus, contribution to provident and other funds and staff welfare expenses. For the nine months' period ended December 2023, F.Y. ended March 31, 2023, March 31, 2022 and March 31, 2021 our employee benefits expense accounted to Rs. 1714.93 Lakhs, Rs. 1680.32 Lakhs, Rs. 1694.49 Lakhs and Rs. 902.83 Lakhs, respectively, representing for 72.31%, 75.91%, 74.07% and 59.73%, respectively, of our total expense for the respective period/year. For further details, kindly refer section titled "**Financial Information of the Company**" beginning on Page 140 of this Red Herring Prospectus.

There is intense competition for experienced skilled professionals with technical and industry expertise in our business and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realize our strategic objectives could be impaired. The loss of members of our team, particularly to competitors, could have a material adverse effect on our business and results of operations. For further details for employees of our Company, kindly refer section titled "**Our Business**" beginning on Page 96 of this Red Herring Prospectus.

6. *We do not own the Registered office, Corporate office and Delivery Centres from where we carry out our business activities.*

Our Registered office, Corporate office and Delivery Centres from which we carry out our business activities, are being taken by us on rent/NOC. In the event of termination/non-renewal of said agreements/NOC, we may be required to vacate the said premises which may cause disruption in our corporate affairs and business and impede our effective operations which could temporarily impact on our business operations until we get suitable alternative premises. For details on the duration of existing rent/lease agreements for our premises, please refer to the section titled "**Our Business**" beginning on page 96 of this Red Herring Prospectus.

There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations. In the event that the rent agreement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our manufacturing operations which could materially and adversely affect our business, financial condition and results of operations.

7. *Intense competition in the market for technology services could affect our pricing, which could reduce our share of business from clients and decrease our revenues and profitability.*

We operate in a competitive industry that experiences rapid technological developments, and changes in customer requirements. Our competitors include the big Global System Integrators, mid-sized, and several smaller local competitors in the various geographic markets in which we operate.

We may face competition from companies that grow in size or scope as the result of strategic mergers or acquisitions, which may result in larger competitors with significant resources that benefit from economies of scale and scope. Such events could have a variety of negative effects on our competitive position and our financial results, including reducing our revenue, increasing our costs, and lowering our gross margin percentage.

If our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to issue services similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and client needs, our competitors may be more successful at selling their services. If we are unable to provide our clients with superior services and solutions at competitive prices or successfully market those services to current and prospective clients, our business, results of operations and financial condition may suffer. Further, a client may choose to use its own internal resources rather than engage an outside firm to perform the types of services we provide. We cannot be certain that we will be able to sustain our current levels of profitability or growth in the face of competitive pressures, including competition for skilled technology professionals and pricing pressure from competitors employing an on-site/ offshore business model.

8. *We have had certain inaccuracy in relation to regulatory filings to be made with the RoC and our company has made non-compliances of certain provision under applicable laws*

Our company has not complied with certain statutory provisions in the past including but not limited to the details as mentioned herein. Further, there are few discrepancies noticed in some of our corporate records related to e-forms filed with the Registrar of Companies, which includes non-filing of e-form CHG-1 for creation of charge on term loans, which is a non-compliance of Section 77 of the Companies Act, 2013.

Further, Our Company has not complied with certain Accounting Standards such as AS-15 (Employee Benefits), however the same have been duly complied by the company in the restated financial statements. please refer to section titled ***“Reconciliation of Restated Profit”*** on page no. 140 of the Red Herring Prospectus. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business and reputation. Although, no show cause notice in respect of the non-compliance has been received by the Company till date, any penalty imposed for such non-compliance in future by the any regulatory authority could affect our financial conditions to that extent.

9. *Our services may contain coding or configuration errors or other defects that could harm our reputation, be expensive to correct, delay revenues, and expose us to litigation.*

Our services are fairly complex as despite testing prior to the release and throughout the lifecycle of any service, coding or configuration errors can impact their function, performance and security, and result in negative consequences. Errors may be found in new software products or services or improvements to existing products or services after delivery to our customers. If these defects are discovered after the release of such products to our customers, we may not be able to successfully correct such errors in a timely manner. In addition, despite the extensive tests we conduct on all our software products and services, we may not be able to fully simulate the environment in which our products and services will operate in the customers’ ecosystem and, as a result, we may be unable to adequately detect the design defects or software errors which may become apparent only after the products are used in an end-user’s environment, and users have transitioned to our services. The occurrence of errors, defects and failures in our software products and services could result in the delay or the denial of market acceptance of our products and alleviating such errors and failures may require us to incur significant expenditure.

Customers often use our services for critical business processes and as a result, any defect or disruption in our products and solutions, any data breaches or misappropriation of proprietary information, or any error in execution, including human error or third-party activity such as denial of service attacks or hacking, may harm our quality. The errors in or failure of our software products and services could also result in us losing customer transaction documents and other customer files, causing significant customer dissatisfaction and possibly giving rise to claims for monetary damages and litigations. The harm to our reputation resulting from such product and service errors and failures may be materially damaging. For further details of our business, please refer to chapter titled ***“Business Overview”*** beginning on Page 96 of this Red Herring Prospectus.

10. *Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.*

Our business is subject to loss due to theft or occurrence of any unforeseen event such as fire, earthquake, other natural calamities, terrorism and force majeure events. We maintain insurances for the same which include Bharat Sookshma Udyam Suraksha policy

from Go Digit, which provide appropriate coverage in relation to terrorism, STFI, earthquake, theft, computer programmes, information or data etc. Along with the same, we have taken Medical Insurance of Employees covering general health policy for them.

While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks. Further, we have not taken insurance in respect of our registered office in Mumbai. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

11. *Cyber risk and the failure to maintain the integrity of our operational or security systems or infrastructure, or those of our customers with which we conduct business, could have a material adverse effect on our business, results of operations, financial condition and cash flows.*

Cyber threats are evolving and are becoming increasingly sophisticated. Our Company may experience cyber threats from time to time, which pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data. There have been no instances of the loss/ leakage of confidential information or protected non-public personal information from our Company's IT systems or due to cyber-attacks on our Company in past. Any disruptions or failures in the physical infrastructure or operating systems that support our businesses and customers, or cyber-attacks or security breaches of our networks or systems in the future, could result in the loss of customers and business opportunities legal liability, regulatory fines, penalties or intervention, other litigation, regulatory and legal risks and the costs associated therewith, reputational damage, reimbursement or other compensatory costs, remediation costs, increased cybersecurity protection costs, additional compliance costs, increased insurance premiums, and lost revenues, damage to the Company's competitiveness and any of which could materially adversely affect our business, results of operations, financial condition and cash flows. We also maintain and have access to sensitive, confidential or personal data or information in certain of our businesses that is subject to privacy and security laws and regulations. Despite our efforts to protect such sensitive, confidential or personal data or information, our facilities and systems and those of our customers may be vulnerable to security breaches, theft, fraud, misplaced or lost data, "Act of God", programming and/or human errors that could lead to the compromising of sensitive, confidential or personal data or information, improper use of our systems, software solutions or networks, unauthorized access, use, disclosure, modification or destruction of information, defective products, manufacturing downtimes and operational disruptions, which in turn could adversely affect our business, results of operations, financial condition and cash flows. For further details for business of our Company, kindly refer section titled "***Our Business***" beginning on Page 96 of this Red Herring Prospectus.

12. *Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business.*

Since we provide services to customers in India and overseas such as USA, Netherland, Ireland, Canada etc. as a result, we are subject to numerous, and sometimes conflicting, legal requirements on matters as diverse as import/export controls, content requirements, trade restrictions, the environment (including electronic waste), tariffs, taxation, sanctions, government affairs, anti-corruption, whistle blowing, internal and disclosure control obligations, data protection and privacy and labour relations and certain regulatory requirements that are specific in the jurisdictions we operate.

Non-compliance with these regulations in the conduct of our business could result in fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business and have an adverse impact on our reputation. Gaps in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient to defend us and preserve our rights. We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees, partners or other related individuals.

We may be subject to risks relating to compliance with a variety of national and local laws, including multiple tax regimes, labour laws, and employee health, safety, wages and benefits laws. We may, from time to time, be subject to litigation or administrative actions resulting from claims against us by current or former employees individually or as part of class actions, including claims of wrongful terminations, discrimination, misclassification or other violations of labour law or other alleged conduct.

13. *We have a Subsidiary company named Enfuse Solutions S.R.L. in Romania which is not operational and in the process of*

closure.

Currently, we have a subsidiary company named Enfuse Solutions S.R.L. in Romania, which was incorporated in 2021. Since the company was doing business across United States of America and Europe, hence, the company decided to set up an organization in European Union during the second wave of COVID for marketing and related activities. Thus, the organisation setup was initiated by the company in 2021 named Enfuse Solution S.R.L.

The documents were prepared with Enfuse Solutions Private Limited proposed to be the shareholder in the Company. However, after setting up, it became apparent that the conditions were not favourable, and the company might not achieve its objectives. Consequently, the company chose not to invest in share capital. The intention was to treat this setup as temporary and dispose of it in the near future. As no investment was made, the same is not treated as Investment by the Company. Further, the Management is of the view that as per Accounting Standard 21 – “Consolidated Financial Statements”, the operations were never initiated and hence exemption to Paragraph 11 of the said standard is applicable and hence no consolidation of financial statements is required.

The company has not started any business operations till now and thus, the Management has already decided to close the said company. There can be no assurance that the said closure process will be completed as planned or scheduled, and if it is not completed in a timely manner, we will have to comply with the necessary legal compliances as applicable on us.

14. We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business.

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations.

Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorized access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors. While we have not faced any major technological disruptions in the past, we cannot assure you that such disruptions will not occur in the future. Further, if our customers are unable to anticipate and rapidly adapt to technological changes, our business and results of operations will be materially and adversely affected.

15. The implementation process of solutions may in some cases be time consuming, and any failure to satisfy our clients or perform as desired could harm our business, results of operations, and financial condition.

Our services are complex and are deployed in a wide variety of network environments. Solution designing is a complex and lengthy process since we often customize our services for a client’s requirements and environment. Inability to meet these requirements of our clients may result in client dissatisfaction and/or damage to our reputation, which could materially harm our business. In addition, if our clients do not use our services as intended, inadequate performance or outcomes may result. It is possible that our services may be used by clients with smaller or less sophisticated IT departments, potentially resulting in sub-optimal performance at a level lower than anticipated by the client. As our clients rely on our services to address important business goals and challenges, the incorrect or improper use or configuration of our services, or failure to properly provide implementation or analytical or maintenance services to our clients may result in contract terminations or non-renewals, reduced client payments, negative publicity, or legal claims against us.

16. Any unfavorable publicity in service quality may cause the Company substantial costs which in turn could adversely affect our goodwill and our sales could be diminished.

Like any other business our business also relies on our service quality which enables us to gain customer trust. In this scenario it is very crucial for us to always maintain positive image of the Company. Any unfavorable publicity regarding our Company, brand, or facility we provide or any other unpredicted events could affect our reputation and our results from operations. We currently carry no products liability insurance with respect to our products. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.

- 17. We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.**

We have entered into various transactions with our Directors/ Promoters and Promoter Group members. These transactions, inter alia include, remuneration, loans and advances, etc. For details, please refer to "Annexure-Y- Related Party Transactions" under Section titled "**Financial Information of the Company**" of this Red Herring Prospectus. Our Company has entered such transactions due to easy proximity and quick execution on arms-length price in compliance with provisions of Companies Act 2013 and other applicable laws. Although all related-party transactions that we may enter into in the future are subject to approval by Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favourable terms if such transactions are not entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

- 18. We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may adversely affect our operations.**

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

Our Company has made an application under Shops & Establishment Act for our registered office and corporate office of the company, which is pending for approval. The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. Our Company is in the process of making application for change in name in all the permits, licenses and approvals, which are under Company's former name. For further details, please refer to section titled "**Government and Other Approvals**" beginning on page 186 of this Red Herring Prospectus.

- 19. If we are unable to collect our receivables from, or bill our unbilled services to, our clients, our results of operations and cash flows could be materially adversely affected.**

Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. We usually bill and collect on relatively short cycles. We maintain allowances against receivables and unbilled services. Actual losses on client balances could differ from those that we currently anticipate and, as a result, we might need to adjust our allowances. There is no guarantee that we will accurately assess the creditworthiness of our clients. Weak macroeconomic conditions and related turmoil in the global financial system could also result in financial difficulties, including limited access to the credit markets, insolvency, or bankruptcy for our clients, and, as a result, could cause clients to delay payments to us, request modifications to their payment arrangements that could increase our receivables balance, or default on their payment obligations to us. Timely collection of client balances also depends on our ability to complete our contractual commitments and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/ or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be materially adversely affected. In addition, if we experience an increase in the time to bill and collect for our services, our cash flows could be adversely affected.

During the period ending December 31, 2023 and Fiscal year ending 2023, 2022 & 2021, our trade receivables were Rs. 875.45 Lakhs, Rs. 375.34 Lakhs, Rs. 88.03 Lakhs and Rs. 124.85 Lakhs respectively. For details regarding our receivables, please refer to section titled "**Financial information of the company**" beginning on page 140 of this Red Herring Prospectus.

- 20. Our inability to modify our pricing models to retain existing clients and attract prospective clients may have an adverse impact on our business, financial condition and results of operations.**

We expect that we may change our pricing model from time to time, including as a result of competition, global economic conditions, general reductions in our clients' spending levels, pricing studies, or changes in how our offerings are broadly consumed. Similarly, as we introduce new services, or further customize existing services, we may have difficulty determining the appropriate price structure for our offerings. In addition, as new and existing competitors introduce new services that compete with ours, or revise their pricing structures, we may be unable to attract new clients at the same price or based on the same pricing model as we have used historically. Moreover, as we continue to target selling our services to larger organizations, these larger organizations may demand substantial price concessions. If we are unable to modify or develop pricing models and strategies that are attractive to existing and prospective clients, while enabling us to significantly grow our sales and revenue relative to our associated costs and expenses in a reasonable period of time, our business, financial condition, and results of operations may be adversely impacted.

21. *We rely on third-party data centres and cloud computing providers, and any interruption or delay in service from these facilities could impair the delivery of our products and adversely impact our business and results of operations.*

We currently serve our clients from third-party data centres and cloud computing providers located around the world. Some of these facilities may be located in areas prone to natural disasters and may experience events such as earthquakes, floods, fires, severe weather events, power loss, computer or telecommunication failures, service outages or losses, and similar events. They may also be subject to break-ins, sabotage, intentional acts of vandalism and similar misconduct or cybersecurity issues, human error, terrorism, improper operation, unauthorized entry and data loss. In the event of significant physical damage to one of these data centres, it may take a significant period of time to achieve full resumption of our services, and our disaster recovery planning may not account for all eventualities. We may also incur significant costs for using alternative equipment or taking other actions in preparation for, or in reaction to, events that damage the data centres that we use. Although we carry business interruption insurance, it may not be sufficient to compensate us for the potentially significant losses, including the potential harm to the future growth of our business that may result from interruptions in our services or products.

As we grow and continue to add new third-party data centres and cloud computing providers and expand the capacity of our existing third-party data centres and cloud computing providers, we may move or transfer our data and our clients' data. Despite precautions taken during this process, any unsuccessful data transfers may impair the delivery of our products. Any damage to, or failure of, our systems, or those of our third-party data centres or cloud computing providers, could result in interruptions to our services or damage to, or loss or compromise of, our data and our clients' data. Any impairment of our or our clients' data or interruptions in the functioning of our offerings, whether due to damage to, or failure of, third-party data centres and cloud computing providers or unsuccessful data transfers, may reduce our revenue, result in significant fines, cause us to issue credits or pay penalties, subject us to claims for indemnification and other claims, litigation or disputes, result in regulatory investigations or other inquiries, cause our clients to terminate their subscriptions and adversely affect our reputation, renewal rates and our ability to attract new clients. Our business will also be harmed if our existing and potential clients believe our products are unreliable or not secure.

22. *Our Company's logo  is not registered as on date of this Red Herring Prospectus.*

As on date of Red Herring Prospectus, we have made an application for registration of our logo  under class of 35, 41 and 42 of the Trade Marks Act, 1999. However, the Registrar of Trademarks has raised objections under section 11 of the Trademark Act, 1999. We may face challenges after the publication of our trademark in the trademark journal, based on opposition grounds under the Trademark Act, 1999. Third parties with similar or identical names, already registered in the Trademark Department, can oppose our application. This opposition could impact our ability to protect our trademark in the event of intellectual property infringement. Such a scenario could have a material adverse effect on our business, potentially impacting our operational results. For further details on our trademark, please refer to chapter titled "**Our Business**" beginning on page 96 of this Red Herring Prospectus

23. *We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.*

Our success heavily depends on the efforts and abilities of our Key managerial personnel, along with support of our Promoters. We are dependent on our Promoters and Key Managerial Persons to manage our current business operations. The loss of any of our Promoter and/or Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoter and/or Key Managerial Personnel may lead to loss of technical knowledge which may materially and adversely impact our business, results of operations, and financial condition. For further details of our Directors and Key Managerial Personnel, please refer to Section "**Our Management**" on page 119 of this Red Herring Prospectus.

24. *The loss of licences to use third party software or the lack of support or enhancement of such software could adversely affect our business and operations.*

We currently depend on a limited number of third party software products. If such software products were to become unavailable for any reason, we might experience delays or increased costs in continuing the production of our existing software products or the development of our new software products. For our products, we typically rely on software that we license from third parties, including software that is integrated with internally developed software and which may be used in our products to perform key functions. These third party software licenses may not continue to be available to us on commercially reasonable terms or at all and the related software may not continue to be appropriately supported, maintained, or enhanced by the licensors. The loss of the license to use, or the inability by licensors to support, maintain, or enhance any of such software, could result in increased costs, lost revenues or delays until equivalent software is internally developed or licensed from another third party and integrated with our software. There can be no assurance that we will be successful in licensing third party software on commercially acceptable terms in a timely manner. Such increased costs, lost revenues or delays could adversely affect our business and operations.

25. *Increases in manpower cost for IT professionals could reduce our cash flows and profit margins.*

Historically, manpower costs in the Indian IT services industry have been significantly lower than manpower costs in developed countries for comparable skilled technical personnel, which has been one of India's competitive strengths. However, manpower cost increases in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. In the long term, salary increases may make us less competitive unless we are able to continue increasing the efficiency and productivity of our professionals and the quality of our services and the prices we can charge for our products and services. Increases in salary, including an increase in the cash component of our compensation expenses, may reduce our cash flows and our profit margins and have a material adverse effect on our business, financial conditions and results of operations. For further details regarding our human resource, please refer to chapter titled "***Business Overview***" beginning on Page 96 of this Prospectus.

26. *Our ability to design and implement solutions depends in part on our ability to operate with third-party products and services, and if we are not successful in maintaining and expanding the capability of our workforce in using such third party products and services, business, financial condition, and results of operations could be adversely impacted.*

Our ability to design and implement digital solutions depends in part on our ability to operate with products and services of third parties, software services, and infrastructure. As such, we must continuously invest in building our capabilities to adapt to changes in hardware, software, networking, browser, and database technologies, and to remain empanelled with our partners through various certified personnel. In the future, one or more technology companies may choose not to support the operation of their hardware, software, or infrastructure, or we may not possess the capabilities needed to operate with such hardware, software, or infrastructure. In addition, to the extent that a third-party were to develop software or services that compete with ours, that provider may choose not to support one or more of our solutions. We intend to facilitate the compatibility of our solutions with various third-party hardware, software, and infrastructure by maintaining and expanding our business and technical relationships. If we are not successful in achieving this goal, our business, financial condition, and results of operations could be adversely impacted.

27. *Our marketing and advertising campaigns may not be successful in increasing the popularity of our products and offerings. If our marketing initiatives are not effective, this may adversely affect our business and results of operations.*

Our revenues are influenced by our marketing plans including advertising. If we adopt unsuccessful marketing and advertising campaigns, we may fail to attract new customers or retain existing customers. If our marketing and advertising strategies are unsuccessful, our business and results of operations could be materially adversely affected. In addition, the support of our employees is also critical for the success of our marketing programmes, such as local marketing and any new strategic initiatives we seek to undertake. While we can mandate certain strategic initiatives, we need the active support of our employees if the implementation of these initiatives is to be successful. The failure of our employees to support our marketing programmes and strategic initiatives could adversely affect our ability to implement our business strategy and harm our business, financial condition, results of operations and prospects.

In addition, increased spending by our competitors on advertising and promotion or an increase in the cost of advertising in the markets in which we operate, could adversely affect our results of operations and financial condition. Moreover, a material decrease in our funds earmarked for marketing and advertising or an ineffective advertising campaign relative to that of our competitors, could also adversely affect our business and results of operations.

28. *We have incurred indebtedness which exposes us to various risks which may have an effect on our business and results of operations*

Our ability to borrow and the terms of our borrowings will depend on our financial condition, the stability of our cash flows, general market conditions, economic and political conditions in the markets where we operate and our capacity to service debt. As on December 31, 2023, our total outstanding indebtedness was Rs. 905.75 lakhs

Our significant indebtedness in future may result in substantial amount of debt service obligations which could lead to:

1. increasing our vulnerability to general adverse economic, industry and competitive conditions;
2. limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
3. affecting our credit rating;
4. limiting our ability to borrow more money both now and in the future; and
5. increasing our interest expenditure and adversely affecting our profitability.

If the loans are recalled on a shorter notice, we may be required to arrange for funds to fulfil the necessary requirements. The occurrence of these events may have an effect on our cash flow and financial conditions of the company. For further details regarding our indebtedness, see “*Statement of Financial Indebtedness*” on page 173 of this Red Herring Prospectus.

29. *Loans availed by Our Company has been secured on personal guarantees of our directors.*

Our directors namely Imran Yasin Ansari, Mohammedk Lalmohammed Shaikh, Rahul Mahendra Gandhi and Zaynulabedin Mohmadbhai Mira have provided personal guarantee to secure a portion of our existing borrowings taken from the banks and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal guarantees provided by the aforesaid may be invoked which could negatively impact their reputation and net worth. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “*Statement of Financial Indebtedness*” on page 173 of this Red Herring Prospectus.

30. *Failure or malfunction of our equipment could adversely affect our ability to conduct our operations.*

Our operations are subject to risks inherent in the use of the equipment and servers. We may experience failures or other issues either because of defects, faulty maintenance or repair, or improper use or lack of timely servicing of our equipment. Any significant malfunction or breakdown of our machineries may entail significant repair and maintenance costs and cause disruptions and delays in our operations. Any injury caused by our equipment due to equipment defects, improper maintenance or improper operation could subject us to liability claims. We cannot assure you that we would be able to effectively respond to any such events, in a timely manner and at an acceptable cost, which could lead to an inability to effectively provide our services and, therefore, affect our business and reputation.

31. *Our Company has unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans may adversely affect our cash flows.*

Our Company has availed unsecured loans which may be recalled by lenders at any time with or without the existence of an event of default, on short or no notice. As of December 31, 2023, such loans amounted to Rs. 541.94 lakhs.

In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. As a result, any such demand may materially affect our business, cash flows, financial condition and results of operations. For further details, please see the section entitled “*Statement of Financial Indebtedness*” on page 173 of this Red Herring Prospectus.

32. *We are required to comply with certain restrictive covenants under our financing agreements. Any non-compliance may lead to, amongst others, accelerated repayment schedule and suspension of further drawdowns, which may adversely affect our business, results of operations, financial condition and cash flows.*

The loan agreements entered into by us with banks contain specific covenants which require us to obtain the prior approval/ permission from the banks on the occurrence of certain events such as formulation of any scheme of amalgamation or reconstruction, undertaking of any new project or expansion, making any substantial change in our management set up, any change in our capital structure resulting in reduction of capital, etc. Further, there can be no assurance that such consents will be granted or that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see “*Statement of Financial Indebtedness*” on page 173 of this Red Herring Prospectus.

33. *We have not paid Advance Tax in Financial Year 2023-24 in lieu of application made for Tax Exemption under Section 80IAC of Income Tax Act, 1961, which is still under process.*

Further, company has applied for Tax Exemption under Section 80IAC of Income Tax Act, 1961 as per which recognized Startups receive 100% tax deduction on profits for any 3 consecutive financial years after DPIIT recognition. For details please refer the section “*statement of tax benefits*” beginning on page no. 82 of this Red Herring Prospectus. Since the applicant can choose these 3 FYs at its will, we have not made the payment of advance taxes in F.Y 2023-24 in lieu of this exemption application. The said application is still under process and we are not sure that the same will be granted in future. If our application is not approved, we may face burden of payment of pending tax liabilities along with interest & penalty which may affect our business and cash flows from operations.

34. *We are subject to the risk of failure of, or a material weakness in, our internal control systems.*

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. In addition, several of our collection related processes are yet to be fully automated, which may increase the risk that human error, tampering or manipulation will result in losses that may be difficult to detect. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

The deployment of funds as stated in the “**Objects of the Issue**” beginning on page 68 of this Red Herring Prospectus is entirely at the discretion of our management and has not been appraised by any bank or financial institution or any independent agency. Further, the purposes for which the Net Proceeds are to be utilized are based on management estimates. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability.

However, we may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost and other financial and operational factors. Accordingly, prospective investors in the issue will need to rely upon our management's judgment with respect to the use of proceeds. If we are unable to deploy the proceeds of the issue in a timely or an efficient manner, it may affect our business and results of operations.

Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, working capital requirements, business prospects and any other financing arrangements. 51. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

52. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME platform of National Stock Exchange of India Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

53. *QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Issue Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Issue within six (6) Working Days from the Bid/ Issue Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the

Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing.

Retail Individual Investors can revise their Bids during the Bid/Issue Period and withdraw their Bids until Bid/Issue Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Issue within three Working Days from the Bid/Issue Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS:

54. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India. In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries.

55. Our business and results of operations could be adversely affected by disruptions in global economic and geo political conditions.

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or manmade disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business.

56. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by Centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy.

Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

57. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details, please refer to the chapter **“Government and Other Approvals”** on page 186 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India's Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would influence our profitability.

The Finance Act, 2022 (“Finance Act”), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax (“DDT”), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as nonresident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

58. *The continuing effect of the COVID-19 pandemic on our business, results of operations and financial condition is highly uncertain and cannot be predicted.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our consumers. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and

in the rest of the world. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession.

59. *Our performance is linked to the stability of policies and the political situation in India.*

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

60. *If certain labour laws become applicable to us, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

61. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

62. *Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares. India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

63. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The issue price of the equity shares has been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. Particulars	March 31, 2021	March 31, 2022	March 31, 2023	December 31, 2023	March 31, 2024	March 31, 2025

Average Debtors Turnover days	14	15	32	61	97	101
Average Creditors Turnover days	NA	NA	NA	NA	NA	NA
Average Inventory Turnover days	NA	NA	NA	NA	NA	NA

Verification of Assumption made by Management:

S. No.	Particulars
Debtors	The historical holding days of trade receivables has been ranging between 14 days to 32 days during Fiscal year 2021 to 2023. As per the current credit terms and in order to expand company's operations, the holding level for debtors is anticipated at 97 days and 101 days of total revenue from operations during Fiscal 2024 and Fiscal 2025 respectively. The projected increase in trade receivables days is a strategic decision aimed at fostering higher sales growth. By offering this flexibility, we expect to stimulate increased sales volume and foster stronger customer relationships..
Creditors	Company is operating in the service sector and hence, the trade payables reported in restated financial statements primarily correspond to professional fees, salary to employees, general expenses etc. Thus, average Creditors Turnover days doesn't apply to the company.
Inventory	Company is operating in the service sector and hence, Average Inventory Turnover days doesn't apply to the company

Justification of increase in working capital requirement

Working capital requirement of the Company was negative in F.Y. 2020-21 and F.Y. 2021-22, as the company was in the initial phase of growth. Company had outstanding payables, which consist of professional fees, salary to employees, general expenses etc., which have a longer payment cycle, but company had a policy of realizing the debtors within 15 days, hence, effectively managing its receivables during such period.

The company foresees a rise in working capital needs for 2024 and 2025. This projection is based on the substantial growth in revenue from F.Y. 2020-21 to F.Y. 2022-23 at a CAGR of 23.15% and shall be continued in the coming years as well.

Further, recently the company secured a government project as a System Integrator for the Computerization of PACS in Maharashtra for a total work order of Rs. 64.53 crores. The said project is to be executed in two phase involving critical services where Phase 1 will include the scope of operationalization of the ERP software, Data digitization and migration, UAT and System Test, and Phase 2 will involve the Handholding and Support. The phase 1 is expected to be completed by June 30, 2024. Then for next three years' company will be providing Handholding and Support services for said project. To meet the commitments associated with this project and to meet the surge for our other service portfolio, the company strategically increased its workforce, which further increased our payables.

We are specializing in data management and machine learning solutions and technology consultancy, primarily serving a B2B clientele and including niche development services for companies. With increase in revenue, average debtor's turnover days is anticipated to increase to 97 to 101 days. Company software development projects, typically spanning 14-15 months until UAT deployment, necessitate robust deployment of high-skilled resources and equipment, reflecting in our working capital needs. The skillset required for servicing top-tier clients is premium, and maintaining a resource pool to meet growing demands is critical. Our payment structure, aligned with project milestones, and engagements with government clients involving performance guarantees, lead to capital being tied up. After the submission of the bills the client has to certify the work done and then the bills are processed. This leads to increase in receivables holding period. We strategically purchase from manufacturers upfront to leverage cost benefits, contributing further to our working capital considerations.

Hence, increase in payables along with increase in receivables holding period justifies the anticipated rise in working capital requirements of the company.

GLOBAL ECONOMIC OVERVIEW

After a stronger-than-expected start to 2023, helped by lower energy prices and the reopening of China, global growth is expected to moderate. The impact of tighter monetary policy is becoming increasingly visible, business and consumer confidence have turned down, and the rebound in China has faded. Global GDP growth is projected to remain sub-par in 2023 and 2024, at 3% and 2.7% respectively, held back by the macroeconomic policy tightening needed to rein in inflation. Annual GDP growth in the United States is expected to slow from 2.2% this year to 1.3% in 2024, as tighter financial conditions moderate demand pressures. In the euro area, where demand is already subdued, GDP growth is projected to ease to 0.6% in 2023, and edge up to 1.1% in 2024 as the adverse impact of high inflation on real incomes fades. Growth in China is expected to be held back by subdued domestic demand and structural stresses in property markets, easing to 5.1% in 2023 and 4.6% in 2024.

Headline inflation is declining, but core inflation remains persistent in many economies, held up by cost pressures and high margins in some sectors. Inflation is projected to moderate gradually over 2023 and 2024, but to remain above central bank objectives in most economies. Headline inflation in the G20 economies is projected to ease to 6% in 2023 and 4.8% in 2024, with core inflation in the G20 advanced economies declining from 4.3% this year to 2.8% in 2024.

Risks remain tilted to the downside. Uncertainty about the strength and speed of monetary policy transmission and the persistence of inflation are key concerns. The adverse effects of higher interest rates could prove stronger than expected, and greater inflation persistence would require additional policy tightening that might expose financial vulnerabilities. A sharper-than-expected slowdown in China is an additional key risk that would hit output growth around the world. Monetary policy needs to remain restrictive until there are clear signs that underlying inflation pressures have durably abated. Policy interest rates appear to be at or close to a peak in most economies, including the United States and the euro area, with policy judgements more finely balanced as the effects of higher interest rates become visible.

Governments are faced with mounting fiscal pressures from rising debt burdens and additional spending on ageing populations, the climate transition and defence. Enhanced near-term efforts to rebuild fiscal space and credible medium-term fiscal plans are needed to better align near-term macroeconomic policies and help ensure debt sustainability. Structural policy efforts need to be reinvigorated to strengthen growth prospects. Reducing barriers in labour and product markets and enhancing skills development would help to boost investment, productivity and labour force participation, and make growth more inclusive. A key priority is to revive global trade, which is an important source of long-term prosperity for both advanced and emerging-market economies. Concerns about economic security should not prevent advantage being taken of opportunities to lower trade barriers, especially in service sectors. Enhanced international co-operation is needed to ensure better coordination and faster progress in carbon mitigation efforts.

RECENT DEVELOPMENTS

1. Global GDP advanced at an annualised pace of 3.2% in the first half of 2023 compared to the second half of 2022 (Figure 1, Panel A), somewhat stronger than expected a few months ago. Growth was comparatively robust in the United States and Japan, but weak in most of Europe, particularly Germany. Amongst the G20 emerging-market economies, growth surprises have mostly been positive so far this year, especially in Brazil, helped by favourable weather-related agricultural outcomes, India and South Africa. Growth in China has however lost momentum, with the initial impetus from reopening fading and structural problems in the property sector continuing to weigh on domestic demand.
2. Contrary to global output, trade volumes have risen more slowly than expected in the first half of this year, with trade intensity declining (Figure 1, Panel B). Merchandise trade volumes have been particularly weak, especially in the major advanced economies, with global trade in goods falling by 2½ per cent over the year to June. Services trade has held up better, helped by tourism continuing to rebound strongly from the steep drop in the early part of the COVID-19 pandemic.

Figure 1. GDP growth has picked up, but trade growth remains weak

Note: Panel A: GDP growth using moving nominal GDP weights at purchasing power parities (PPPs). Quarter-on-quarter growth is expressed at an annualised rate. Panel B: global trade is computed as the average of exports and imports. All figures are expressed in volume terms and aggregated at USD market exchange rates.

Recent signals, especially from survey indicators, point to a loss of momentum

- High-frequency activity indicators across the largest economies present a mixed picture, but on balance signal a loss of momentum in the second half of 2023. Labour markets generally remain tight, with unemployment rates at or near multi-year lows and vacancy rates still high by historical standards in most major advanced economies. However, the number of vacancies has fallen steadily, job growth has slowed and quit rates have started to ease. Declines in headline inflation are now helping to stabilise or improve household real disposable incomes, but real wage losses over the past two years and tighter financial conditions continue to restrain consumer spending in most advanced economies, with the United States a notable exception. Industrial production has continued to stagnate in many economies, despite some signs of an upturn in tech-related activity.
- Weakness is most marked in some survey indicators. At a global level, PMI indicators of output and new orders in manufacturing are at levels normally consistent with stagnation or contraction in that sector (Figure 2). Service sector indicators are stronger but have also softened recently. There are signs of growing cross-country divergence as well, with notable strength in August PMIs in some emerging-market economies, especially India, but moderation in the United States and China, and weakness in the euro area and the United Kingdom. The gradual recovery in consumer confidence over the past year has also stalled in many countries, with confidence still lower than pre-pandemic norms.

Figure 2. Business survey indicators have recently weakened in many economies

- A key factor shaping global growth is the rise in interest rates in most major economies since early 2022. Financial conditions have become more restrictive, borrowing rates for firms and households have risen (Figure 3, Panel A), credit conditions have tightened, and asset price growth has moderated or turned negative. Forward-looking real interest rates have now become positive in most economies, with Japan an exception, encouraging saving and making investment more expensive. In the United States real interest rates are at their highest level since 2005 (Figure 3, Panel B). Even if policy rates are not raised further, the effects of past rises will continue to work their way through economies for some time, as the rates on existing mortgage loans

are adjusted or as corporate loans are rolled over. Bank lending has slowed sharply in the euro area, a relatively bank-dependent economy, particularly to households. Some countries are already seeing rising loan and credit card delinquency rates and increases in corporate insolvencies. As already seen with the US bank failures in March and the takeover of Credit Suisse, risks remain that the high interest rates needed to lower inflation may also produce stresses in the financial system that will require prompt policy responses to stabilise financial conditions.

Figure 3. Financial conditions have tightened

- House prices have fallen substantially from their peaks in some G20 countries, including Korea, Germany and the United Kingdom, and housing investment has declined sharply, especially in the United States and Canada. However, some signs of stabilisation have begun to appear in recent monthly data. Supported by structural factors including robust population growth and a limited inventory of houses for sale, prices have turned back up in a number of countries, including the United States, Canada, and Australia. Across the major advanced economies as a whole, risks remain that falling house prices prompt households to curb consumption substantially or trigger a surge in mortgage defaults, though so far these have not materialised. At the same time, most countries have seen a sharp reduction in the volume of transactions and lending for house purchases (Figure 4), which may presage further weakness in housing markets. In the United States, the euro area and the United Kingdom, these declines are comparable in percentage terms to those seen at the time of the global financial crisis.

Figure 4. Lending for house purchases has fallen sharply

Index January 2022 = 100

- Energy prices remain important for both growth and inflation in G20 economies. Sharp declines in the prices of oil, gas and coal since their 2022 peaks contributed to the upturn in growth and decline in inflation in the first half of 2023. However, the OPEC+ economies have implemented output cuts, and with inventories at relatively low levels oil prices have risen by over 25% since the end of May. This upward move in oil prices has pushed up the contribution of energy to consumer price inflation in many G20 countries
- The signs of a slowdown in Chinese economic activity are also a concern given China's importance for global growth, trade and financial markets. High debt, and the scale of the ailing real estate sector provide significant challenges. Consumer spending has been slow to recover after reopening, with high precautionary saving in the absence of broad social safety nets, and the property sector remains very weak. Numerous policy initiatives have been announced recently to support activity,

including small reductions in policy interest rates, but it remains unclear how effective these will be. The marked fall in the dollar price of Chinese exports this year has helped to lower import prices and global inflation, but the scope to offset subdued domestic demand with stronger export volume growth may be limited given weak external demand and the ongoing restructuring of trade and value chains.

INDIAN ECONOMIC OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Real GDP at constant prices in the second quarter of 2022–23 is estimated at US\$ 1.94 trillion (Rs. 160.06 trillion), showing a growth of 7.2% as compared to the First Revised Estimates of GDP for the year 2021–22 of US\$ 1.81 trillion (Rs. 149.26 trillion), indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. In FY22, India's service exports stood at US\$ 254.4 billion. Furthermore, India's overall exports (services and merchandise) was estimated at US\$ 770.18 billion in FY23. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalization of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April–December 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10–15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 301.75 trillion (US\$ 3.62 trillion) in 2023–24. Additionally, the Nominal GDP at current prices in Q1 of 2023–24 was Rs. 70.67 trillion (US\$ 848.92 billion), as against Rs. 65.42 trillion (US\$ 785.85 billion) in 2022–23, estimating a growth of 8%. With 115 unicorns valued at more than US\$ 350 billion, as of February 2023, India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8–8.5% GDP growth between same time period. India's current account deficit (CAD) decreases to US\$ 9.2 billion in Q1 of 2023–24 from US\$ 17.9 billion in Q1 of 2022–2023.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023–24, stood 37.4% higher than the same period last year. In the budget of 2023–24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023–24 to Rs.10 lakh crore (US\$ 120.12

billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

SERVICES SECTOR OF INDIA

Both domestic and global factors influence the growth of the services sector. An extensive range of service industries has experienced double-digit growth in recent years, supported by digital technologies and institutional frameworks made possible by the government. The ease of doing business in India has significantly increased for domestic and foreign firms due to considerable advancements in culture and the government outlook. Due to ongoing changes in the areas of lowering trade barriers, easing FDI regulations, and deregulation, India's services sector is poised to grow at a healthy rate in the coming years. Criminal law occupies a pre-dominant place among the agencies of social control and is regarded as a formidable weapon that society has forged to protect itself against anti-social behaviour. The law of criminal procedure is meant to be complimentary to criminal law. It is intended to provide a mechanism for the enforcement of criminal law. The Code of Criminal Procedure creates the necessary machinery for apprehending the criminals, investigating the criminal cases, their trials before the criminal courts and imposition of proper punishment on the guilty person. The Code enumerates the hierarchy of criminal courts in which different offences can be tried and then it spells out the limits of sentences which such Courts are authorized to pass.

The law of criminal procedure is intended to provide a mechanism for the enforcement of criminal law. Without the proper procedural law, the substantive criminal law which defines offences and provides punishment for them would be almost worthless.

The following significant accounting policies are adopted in the preparation and presentation of these financial statements:

1. REVENUE RECOGNITION

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Income from services

Revenue from services is recognized when services have been rendered and there should be no uncertainty regarding consideration and its ultimate collection.

Interest Income

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable."

Dividend Income

Dividend Income is recognized on receipt basis.

2. FIXED ASSETS

1. Fixed are stated as per Cost Model i.e., at cost less accumulated depreciation and impairment, if any;
2. Costs directly attributable to acquisition are capitalized until the Fixed Assets are ready for use, as intended by the management;
3. Subsequent expenditures relating to fixed assets are capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably. Repairs & maintenance costs are recognized in the Statement of profit & Loss when incurred;
4. The cost and related accumulated depreciated are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit or Loss. Assets to be disposed of are reported at the lower of the carrying value or the fair value less cost to sell;
5. Depreciation on Tangible Assets in case of company is provided in such a manner so that the cost of asset (Net of realizable value) will be amortized over their estimated remaining useful life on SLM basis as per the useful life prescribed under Schedule II to the Companies Act 2013.
6. Depreciation methods, useful lives, and residual values are reviewed periodically, including at each financial year end;

3. IMPAIRMENT

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. INVENTORIES

There are no inventories as company is dealing in services.

5. RETIREMENT BENEFITS & OTHER EMPLOYEE BENEFITS

Short term Employee Benefits: All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries and other incentives are recognized at the undiscounted amount in the Profit and Loss Account in the period in which the employee renders the related service.

Long term Employee benefits: The Company has opted to change the policy of accounting of Gratuity, and during the restatement, Company has accounted all gratuity expenses basis of actuarial valuation certificate as obtained at every period/year ended. - iii. The transactions that are due at the end of financial year are revalued at closing rate and the difference of realized gains and losses on foreign exchange transactions are recognized in the Profit and Loss Account.

7. CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated.

8. BORROWING COSTS

Borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of that asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

9. CONSOLIDATED FINANCIALS STATEMENT

Since the company was doing business across United States of America and Europe, hence, the company decided to set up an organization in European Union during the second wave of COVID for marketing and related activities, thus the organization setup was initiated by the company in 2021 named Enfuse Solution S.R.L.

After setting up, it became apparent that the conditions were not favorable, and the company might not achieve its objectives. Consequently, the company chose not to invest in share capital. The intention was to treat this setup as temporary and dispose of it in the near future.

The company has now closed the dormant bank account. The company further has already initiated the process for closure of the said company.

The Management is of the view that as per Accounting Standard 21 – “*Consolidated Financial Statements*”, the operations were never initiated and hence exemption to Paragraph 11 of the said standard is applicable and hence no consolidation of financial statements is required.

10. INCOME TAX

The accounting treatment for the Income Tax in respect of the Company’s income is based on the Accounting Standard on ‘Accounting for Taxes on Income’ (AS-22). The provision made for Income Tax in Accounts comprises both, the current tax and deferred tax. Provision for Current Tax is made on the assessable Income Tax rate applicable to the relevant assessment year after considering various deductions available under the Income Tax Act, 1961.

Deferred tax is recognized for all timing differences; being the differences between the taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Such deferred tax is quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date. The carrying amount of deferred tax asset/liability is reviewed at each Balance Sheet date and consequential adjustments are carried out.

11. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

12. PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

13. CASH & CASH EQUIVALENTS

Cash and cash equivalents comprise cash and cash on deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

14. SEGMENT REPORTING

Company is operating under a single segment

15. EMPLOYEE BENEFITS

The Company has adopted the Accounting Standard 15 (revised 2005) on Employee Benefits during the restated financials period. The disclosure as envisaged under the Accounting Standard is provided hereunder:

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative

purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.
