This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus. INTERNAL RISK FACTORS

1. **Our projects are exposed to various implementation and other risks and uncertainties such as time and cost overrun, which may adversely affect our business, financial condition, results of operations, and prospects.**

The completion of our projects is susceptible to substantial increases in both time and costs due to a myriad of factors, introducing a range of challenges that may significantly impact our operations. These factors include shortages of, or price increases in, crucial designing and signage materials or equipment, technical skills and labour, construction delays, unforeseen cost escalations, changes in the regulatory environment, adverse weather conditions, third-party performance risks, environmental challenges, alterations in market conditions, delays in obtaining approvals and permits from relevant authorities, and other unforeseeable problems and circumstances.

The cumulative effect of these variables can result in project delays and costs that surpass the initially budgeted amounts.

It's important to note that such cost overruns may not be adequately compensated by contractual indemnities or passed on to customers, if applicable. This potential scenario poses a risk to our results of operations, potentially impacting profitability and financial performance.

Moreover, any delays in project completion as per the scheduled timelines could lead to dissatisfaction among our customers. This, in turn, may result in negative publicity and a loss of confidence among potential buyers for our projects in the future. The reputation of our projects and the overall brand may be compromised. Additionally, the economic benefits expected from these projects may not be fully realized if delays persist. Importantly, in the event of significant delays in project completion, there is a risk that relevant approvals obtained for these projects may lapse, potentially leading to regulatory complications. The uncertainty associated with our ability to complete ongoing, forthcoming, or future projects within stipulated budgets and time schedules adds an additional layer of risk. Although, there has not been any instance of time and cost overrun till the date of filing of this Prospectus but any possibility of the same can adversely affect our business financial condition, result of operations and prospect.

2. Our product is subject to frequently changing designs, patterns, customer requirements and tastes, our inability to meet such needs or preferences may affect our business.

Our product's success hinges on our adept navigation through the dynamic landscape of spatial design, marked by frequently changing designs, patterns, and evolving customer preferences. In the realm of environmental branding solutions, this dynamic nature of the market necessitates a heightened awareness of shifting trends and an ability to swiftly adapt to new styles and requirements in spatial design.

The appeal of our product is intricately tied to our capacity to stay ahead of changing customer tastes and remain attuned to emerging design preferences within the spatial context. A failure to do so could result in a misalignment between our spatial design offerings and the current demands of the market, potentially impacting our market share, customer satisfaction, and overall business performance in the realm of spatial environments.

It is imperative for our Company to maintain a robust feedback loop with customers, closely monitor industry trends within spatial design, and invest in research and development to anticipate and respond to evolving tastes in the spatial context. This adaptability serves as a strategic approach not only for meeting current spatial design demands but also for staying ahead of competitors and fostering long-term customer loyalty in the domain of spatial experiences.

Furthermore, as customer requirements within spatial design continue to shift, the importance of flexibility in our product development processes becomes paramount. This involves not only the prompt introduction of new spatial design concepts but also the ability to modify existing spatial offerings based on feedback and changing preferences in spatial environments.

In essence, acknowledging and proactively addressing the ever-changing dynamics of spatial design is essential for our sustained success in the broader context of environmental branding solutions. This strategic approach involves a combination of innovation, market research within spatial design, and customer engagement to ensure that our spatial products not only remain relevant but also stay at the forefront of the evolving tastes and preferences of our customer base within the spatial context. This strategic approach will safeguard our current market position and position us for continued growth and success in an ever-changing business landscape, particularly within the unique realm of spatial design.

3. We are highly dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these customers may have a material adverse effect on our profitability and results of operations.

Our clientele comprises major entities including Banks, IT Companies, MNCs, Hotel chains, Fashion Retail chains, NBFCs, and large government companies. Notably, our top ten customers have consistently accounted for significant percentages of our revenue from operations approximately 80.42%, 87.81%, 85.23%, and 84.96% for the periods ending on September 30, 2023, and the financial years ending on March 31, 2023, March 31, 2022, and March 31, 2021, respectively. It's crucial to highlight that we haven't formalized long-term agreements with these customers, emphasizing the pivotal role of maintaining positive relationships in sustaining our business.

The potential loss of one or more of these major customers or a reduction in the volume of business derived from them could have adverse effects on our overall business, financial condition, and cash flows. While we cannot guarantee the continuity of historical business levels or the negotiation and execution of commercially viable long-term contracts with these significant customers, we acknowledge the need to address customer concentration concerns moving forward.

Factors such as a substantial reduction in business volume with these key customers or a preference for competitors could impact our revenues and profitability. Furthermore, our future growth is intrinsically linked to acquiring new customers, and any failure to do so may significantly and adversely affect our business, financial condition, and results of operations.

In essence, our business is significantly dependent on key customers, and the potential loss of any such relationship poses a critical risk with the potential for material adverse effects on our profitability and overall results of operations. Recognizing this dependency emphasizes the necessity of maintaining robust, mutually beneficial relationships with key customers. To mitigate the potential impact of changes in these key customer relationships, proactive measures, including comprehensive customer relationship management strategies and diversification efforts, are imperative for the continued stability and success of our business.

4. Our results of operations and cash flows could be adversely affected, if we are unable to collect our dues and receivables from, or invoice our unbilled services to, or retention money to our clients.

Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. We evaluate the financial condition of our clients and usually bill and collect on relatively short cycles. There is no guarantee that we will accurately assess the creditworthiness of our clients. Such conditions could cause clients to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of fees for client services also depends on our ability to complete our contractual commitments and subsequently bill for and collect our contractual service fees. If we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. Our results of operations and cash flows could be adversely affected, if we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our client balances. In addition, if we experience delays in billing and collection for our services, our cash flows could be adversely affected.

5. Our customers have a right to cancel the contract by giving a minimal notice on the occurrence of certain events. Any such cancellation may adversely affect our business, financial condition and results of operations.

Our contracts usually provide for a right to our customer(s) to cancel the contract upon the occurrence of certain events such as, among other things, our failure to comply with the terms of the purchase order including specifications and other technical requirements; our failure to carry out the work as per the schedule or to maintain the acceptable quality of the workmanship or to observe the safety precautions at site or noncompliance of rules and regulations of local and government policies or non-compliance of any other conditions of the agreement. Further, our contracts may also provide that the customer shall not be responsible for any payment for any loss sustained by us by reason of our having purchased any materials or entered into any commitments or made any advances in connection with the execution of the contract. In the event any of the above events occur, our contract may be cancelled which may adversely affect our business, financial condition and results of operations. Further, such termination may also affect our reputation and growth prospects.

6. We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.

In the arena of our operations, we contend with competition from domestic rivals, constituting a dynamic and challenging landscape. The presence of these competitors introduces complexities that could potentially affect our business and financial performance. To thrive in this competitive environment, it is imperative that we adopt a proactive stance and implement strategic measures to not only withstand the challenges posed by domestic competitors but also to emerge stronger and more resilient.

The impact of competition necessitates a continual commitment to excellence and innovation. Staying ahead in the market involves not only meeting but exceeding customer expectations, fostering brand loyalty, and consistently delivering high-quality products or services. Furthermore, we recognize the need for operational optimization to ensure efficiency, cost-effectiveness, and adaptability to changing market dynamics.

Engaging in thorough market analysis allows us to identify emerging trends, customer preferences, and potential gaps in the offerings of our domestic competitors. This insight becomes a cornerstone for strategic decision-making, enabling us to tailor our products or services to align with market demands and stay competitive.

Moreover, our response to competition extends beyond the product or service itself. Building a robust brand image, effective marketing strategies, and responsive customer service are integral components of our approach. These elements contribute not only to customer retention but also to attracting new business in the face of domestic competition. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

7. Any rise in costs or a deficiency in the availability of the raw materials we procure could impact on our company's sales, profitability, and operational results in an adverse manner.

Our Company is dependent on third party suppliers for procuring the raw materials and other designing and decorative bought out material which we use to print and provide for executing our projects. Our cost of material to sales ratio was 49.12%, 56.87%, 49.28% and 51.16% for the stub period ended September 30, 2023 and financial year March 31, 2023, 2022 and 2021 respectively, which implies whenever there is change in raw material cost there is a change in cost to sales ratio. We are exposed to fluctuations in the prices of these materials as well as its unavailability, particularly as we typically do not enter into any long term supply agreements with our suppliers and our major requirement is met in the spot market.

The cost and availability of such materials are subject to a variety of factors and any increase in their cost and their availability at a reasonable price or at all, could adversely affect our margins, sales and results of operations. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of materials. If we were to experience a significant or prolonged shortage of such materials from any of our suppliers, and we cannot procure the products from other sources, we would be unable to meet our execution schedules and to deliver such products to our customers in timely fashion, which would adversely affect our sales, margins and customer relations. We cannot assure you that a particular supplier will continue to supply the required materials to us in the future. Any change in the supplying pattern of our products can adversely affect our business and profits. Though we enjoy favorable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our execution cycles and delivery schedules, which may result in the loss of our customers and revenues.

Company's elaboration on its supply chain dynamics encompasses not only the financial aspects of cost and availability but also emphasizes the strategic importance of quality, flexibility, and customer-centric considerations in navigating the complexities of the procurement landscape.

8. *An inability to effectively manage project execution may lead to project delays which may affect our business and results of operations.*

Our business is dependent on our ability to effectively manage the execution of our projects. An inability to effectively manage our operations, including ineffective or inefficient project management procedures could increase our costs and expenses, result in project delays and thereby affect our profitability. The effectiveness of our project management processes and our ability to execute projects in a timely manner may be affected by various factors. Additionally, in some projects, in case of delay due to our fault or because of defective work done by us, clients have the right to rectify the defective work, or engage a third party to complete the work and deduct additional costs or charges incurred for completion of the work from the project price payable to us. Such factors would have an effect on our results of operations and financial condition.

9. *We have not placed orders for the purchase of machinery for which part of the funds are being raised through the Issue.*

Our Company has identified the machineries to be acquired and has received the quotations from the suppliers, but we have not placed final orders for all the machineries, equipment's and utilities aggregating to Rs. 493.04 lakhs which is approximately 27.17% of the Issue Proceeds are proposed to be acquired for our expansion plan by utilization of Issue Proceeds. Our Company is further subject to risks on account of inflation in the price of machinery.

Since the part funding for the machinery is from the IPO proceeds, any delay in access to IPO proceeds may eventually delay the process of placing the orders. The purchase of machineries and equipment's would require us to consider factors including but not limited to pricing, delivery schedule and after-sales maintenance. There may be a possibility of delay at the supplier's end in providing timely delivery of these machineries, equipment's and utilities, which in turn may delay the implementation of our expansion plan. Further, the quotations relied upon by us in arriving at the total cost of machineries, equipment's and utilities are valid for a specific period of time and may lapse after the expiry of the specific period. Consequent upon which, there could be a possible escalation in the cost of machineries and equipment's proposed to be acquired by us at the actual time of purchase, resulting in increase in the project cost, which may result in cost overruns, and may affect our profitability. For further details, read section "Objects of the Issue" beginning on page 60 of the Prospectus.

10. *Our business is working capital intensive. If we experience insufficient cash flows to meet required payments on our working capital requirements, there may be an adverse effect on the results of our operations.*

Our business is working capital intensive as the majorly for investment in trade receivables, inventories and payment to trade payables and funding day to day operations. Any changes in our assumptions or project sizes could impact our working capital requirements. We may need to secure additional debt in such cases. Additionally, our projects involve performance guarantees and/or retention money withheld by clients upon project completion. While we aim to maintain good relationships with financial institutions, changes in lending practices or credit conditions could affect our financing terms, potentially leading to delays and increased costs. Managing trade receivables from clients, including progress

payments and retention money, carries the risk of potential delays and bad debt. Government authorities' payment certification timelines also influence our working capital. These factors collectively pose challenges to our financial stability and operational results.

11. *Our pricing structures may not accurately anticipate the cost and complexity of performing our work and if we are unable to manage costs successfully, then certain of our contracts could be or become unprofitable*

We negotiate pricing terms with our clients utilizing a range of pricing structures and conditions. Depending on the particular contract, we may use time-and-materials pricing, pursuant to which we typically invoice on periodical basis for the services that we provide to our client. In certain instances, we enter into time-and materials pricing arrangements, but with the inclusion of fixed-price elements for certain specified services. Our ability to improve or maintain our profitability is dependent on managing our costs successfully. Our cost management strategies include maintaining appropriate alignment between the demand for our services and our resource capacity, optimizing the costs of service delivery through business process digitalization and deployment of tools, and effectively leveraging our sales and marketing and general and administrative costs.

Our contracts could yield lower profit margins than anticipated, if we do not accurately estimate the resources required, costs and timing for completing projects, future rates of wage inflation and currency exchange rates, or if we fail to complete our contractual obligations within the contracted timeframe. In particular, any increased or unexpected costs, or wide fluctuations compared to our original estimates or delays, or unexpected risks we encounter in connection with the performance of this work, including those caused by factors outside of our control, could make these contracts less profitable or unprofitable, which could adversely impact our profit margin. However, our contracts usually provide for escalation and delay charges clause to minimize such risks.

12. *We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may adversely affect our operations.*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. Our Company is in the process of making application for change in name in all the permits, licenses and approvals, which are under Company's former name. For further details, please see "Government and Other Approvals" on page 176 of the Prospectus. If we are unable to obtain the requisite licenses in a timely manner or at all, our business operations and results may be affected. There can be no assurance that the relevant authorities will issue these approvals or licenses in a timely manner, or at all.

13. *We do not own registered office and other offices from where we carry out our business activities. Any dispute in relation to use of the premises could have a material adverse effect on our business and results of operations.*

Our Company do not own its registered office, corporate office and other offices, we have obtained our Registered Office vide NOC dated September 04, 2017 and leave and licence agreement dated January 01, 2024 entered with our promoter Nalin Gagrani and our corporate office and other offices has been obtained on rental basis. For details on the duration of existing rent agreements for our offices, please refer to Chapter titled "Our Business" beginning on page 90 of this Prospectus. In the event of termination/ non-renewal of said rent agreements, we may be required to vacate such premises which may cause disruption in our corporate affairs and business and impede our effective operations and thus can adversely affect our business, financial condition and result of operations.

There can be no assurance that we will, in the future, be able to renew the agreements for the existing locations on same or similar terms, or will be able to find alternate locations for the offices on similar terms favorable to us, or at all. We may also fail to negotiate the renewal of our rent agreements for our premises, either on commercially acceptable terms or at all, which could result in increased rental rates for subsequent renewals or searching of new premises, affecting our financial condition and operations.

14. We have had negative net cash flows in the past and may continue to have negative cash flows in the future

The following table sets forth our cash flow for the periods indicated:

Particulars	(Amount in ₹ Lakhs)			
	September 30, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Net cash generated from/(used in) operating activities	298.12	123.41	44.51	(42.37)

Net cash generated from/ (used in) financing activities	(27.29)	(9.93)	-	0.06

Cash flows of a company is a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details, see section titled “*Financial Statements*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on pages 136 and 164, respectively of this Prospectus.

15. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement for additional working capital requirement, as detailed in the section titled “Objects of the Issue” is to be funded from the proceeds of this IPO. However, we have not identified any alternate source of funding and we meet our working capital requirements through our owned funds, internal accruals and debt and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule, and we may have to obtain additional borrowings. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “Objects of the Issue” beginning on page 60 of this Prospectus.

16. Our inability to identify and understand evolving industry trends, technological advancements, client preferences and develop new services to meet our client’s demands may adversely affect our business.

The Global Market is characterized by technological advancements, introduction of innovative services, price fluctuations and intense competition. Changes regulatory or industry requirements or in competitive technologies may render certain of our services less attractive or obsolete. Our ability to anticipate changes in technology and regulatory standards and to successfully develop and introduce new and enhanced services to create new or address yet unidentified needs among our current and potential clients in a timely manner, is a significant factor in our ability to remain competitive. However, there can be no assurance that we will be able to secure the necessary technological knowledge, through our own research and development or through technical assistance agreements that will allow us to continue to develop our service portfolio or that we will be able to respond to industry trends by developing and offering cost effective products. We may also be required to make significant investments in research and development, which may strain our resources and may not provide results that can be monetized. If we are unable to obtain such knowledge in a timely manner, or at all, we may be unable to effectively implement our strategies, and our business and results of operations may be adversely affected.

Moreover, we cannot assure you that we will be able to achieve the technological advances that may be necessary for us to remain competitive or that certain of our services will not become obsolete. Further, if we do not continue to distinguish our services through distinctive, technologically advanced features and design, as well as continue to build and strengthen our brand recognition, we could lose market share and our revenues and earnings could decline. We are also subject to the risks generally associated with lack of market acceptance and failure of services to operate properly due to reasons beyond our control.

We need to identify and understand the key market trends and evolving needs proactively and on a timely basis. As a result, we may incur, and have in the past incurred, capital expenditures for development of new services to meet the demands of the markets. This could have a material adverse effect on our business, financial condition, results of operations and future prospects.

17. We may not be able to adequately protect or continue to use our intellectual property.

Our Corporate logo is not registered and we have filed 12 trademark application for registering the name and logo of our Company under class 16,19,35, 40,41 and 42 of the Indian Trademarks Rules, 2002. Further out of 12 trademark applications, 4 trademark application has been marked for examination, 7 trademark application has been objected and 1 trademark application has been accepted. For further details, please refer “Business – Intellectual Property” on page no. 101 of this Prospectus. Some of our trademarks have been opposed and there can be no assurance that our

trademark applications will be accepted and the trademarks will be registered. Pending the registration of these trademarks, any other vendor in the similar line of business as ours may use the above-mentioned trademarks and we may have a lesser recourse to initiate legal proceedings to protect our intellectual property. In the event we are not able to obtain registrations due to opposition by third parties or if any injunctive or other adverse order is issued against us in respect of any of our trademarks for which we have applied for registration, we may not be able to use such trademarks and / or avail the legal protection or prevent unauthorized use of such trademarks by third parties, which may adversely affect our goodwill and business.

The registration of intellectual property including trademarks is a time-consuming process and there can be no assurance that any registration applications we may pursue will be successful and that such registration will be granted to us. If we fail to register the appropriate intellectual property, or our efforts to protect relevant intellectual property prove to be inadequate, the value attached to our brand and proprietary rights could deteriorate, which could have a material adverse effect on our business growth and prospects, financial condition, results of operations, and cash flows.

Further, if any of our unregistered trademarks are registered in favor of a third party, we may not be able to claim registered ownership of such trademarks and consequently, we may be unable to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities. If our application is objected to, we will not have the right to use this trademark or prevent others from using this trademark or its variations. Our inability to obtain or maintain this trademark in our business thus could adversely affect our reputation, goodwill, business, prospectus and results of operations

18. We are heavily dependent on our Promoter and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Promoters and Key managerial personnel, particularly Nalin Gagrani and Manoj Bhushan Tiwari. We depend significantly on them for executing our day-to-day activities. The loss of any of our Promoter or Key Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section “Our Management” on page 119 of this Prospectus.

19. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.

We consistently assess the risks associated with our business operations at project sites to ensure comprehensive coverage for known risks. Our company maintains insurance policies that we believe are reasonably adequate to safeguard against typical risks within our industry standards. Specifically, we have secured group health insurance for our employees, a fire and burglary policy for our offices, materials, and equipment & machinery, as well as coverage for risks related to electronic equipment and equipment & machinery. However, it's important to note that we currently do not possess a Key Men Insurance policy for our Key Managerial Persons. While our existing insurance provides a level of protection, there is no guarantee that these policies will fully cover potential losses resulting from any business interruptions. In the event of a substantial uninsured loss or a situation where an insured loss surpasses our coverage limits, there is a possibility that our business, financial condition, and operational results could be significantly and adversely impacted.

20. Our inability to effectively manage our growth could have an adverse effect on our business, results of operations and financial condition.

We have experienced considerable growth over the past three years and we have significantly expanded our operations and product portfolio. Our total revenues grew from Rs. 421.04 lakhs for the financial year 2021 to ₹ 1594.96 lakhs for the financial year 2023 and Rs. 1322.68 lakhs for the period ended on September 30, 2023 while our profit for the period grew from Rs. 20.06 lakhs for the financial year 2021 to Rs. 200.33 lakhs for the financial year 2023 and Rs. 291.78 lakh for the period ended September 30, 2023 We cannot assure you that our growth strategy will continue to be successful or that we will be able to continue to grow further, or at the same rate. Our inability to manage our business plans effectively and execute our growth strategy in a timely manner, or within budget estimates or our inability to meet the expectations of our customers and other stakeholders could have an adverse effect on our business, results of operations and financial condition. Further, our future prospects will depend on our ability to grow our business and operations, which could be affected by many factors, including our ability to maintain the quality of our products, general political and economic conditions in India, government policies or strategies in respect of specific industries, prevailing interest rates, price of equipment and raw materials, energy supply and currency exchange rates.

In order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or

if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to meet our customers' needs or operate our business effectively. Moreover, our ability to sustain our rate of growth depends significantly upon our ability to select and retain key managerial personnel. We cannot assure you that our existing or future management, operational and financial systems, procedures and controls will be adequate to support future operations, or establish or develop business relationships beneficial to future operations. 22. Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its business operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions to our business operations due to disputes or other problems with our work force in the past; there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

Further the Company has not complied with the AS-15 (Employee Benefit) in the past which was duly complied by the Company in restated financial statements. Please refer the section titled Reconciliation of Restated Profit on page no.136 of Prospectus. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business and reputation. Although, no show cause notice in respect of the non-compliance has been received by the Company till date, any penalty imposed for such noncompliance in future by the any regulatory authority could affect our financial conditions to that extent.

24. Our company has encountered challenges in meeting the designated timelines for filing employee provident fund returns, a circumstance that carries significant implications for our financial standing.

There have been delays in filing EPF and ESIC returns by our Company, typically ranging from 3-7 days in 1-2 months each year. After conducting an internal review, we have identified that the primary reasons for these delays are related to salary reconciliation and cash flow discrepancies. Inconsistencies in salary data and cash flow timing can occasionally lead to delays in processing EPF and ESIC returns.

Our company has encountered challenges in meeting the designated timelines for filing employee provident fund and ESIC returns, a circumstance that carries significant implications for our financial standing. Delays in the submission of these returns may result in financial penalties and potential legal consequences, exacerbating the financial impact on our operations. Non-compliance with the prescribed deadlines not only poses a direct financial risk through imposed penalties but also opens the door to a broader range of financial liabilities. Furthermore, delayed provident fund and ESIC returns can adversely affect our relationship with regulatory authorities, potentially leading to increased scrutiny and further financial repercussions. It is imperative for the company to address this issue promptly, implementing robust internal controls and procedural improvements to ensure the timely and accurate submission of employee provident fund and ESIC returns, mitigating both immediate financial risks and the potential long-term consequences associated with non-compliance.

To address this issue, we have implemented corrective measures to mitigate future delays. These measures include - Enhancing our salary reconciliation process to minimize discrepancies, implementing improved cash flow forecasting and management practices, strengthening communication and coordination within our team to expedite EPF and ESIC return filing.

25. We have entered into and may enter into related party transactions in the future also.

Our Company had entered into various related party transactions with our Promoters and Directors. These transactions, inter-alia includes salary, remuneration, loans and advances, Professional fees etc. Our Company entered into such transactions at arm length price due to easy proximity and quick execution. The transaction is in compliance with Companies act and other applicable regulations. However, there is no assurance that we could not have obtained better and more favorable terms that our Company not entered into such related party transactions. Our Company may enter into such transactions in future also and we cannot assure that in such an event there would be no adverse effect on results of our operations. For details, please refer to Related Party Transactions of the Auditor's Report under Section titled "**Financial Information of the Company**" beginning on page 136 of this Prospectus.

We cannot guarantee that our Promoters and Promoter Group will act in our interest while exercising their rights

27. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

28. Dependence upon third party transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a needs basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

29. We depend on skilled and creative personnel and if we are unable to recruit and retain skilled personnel, our ability to operate or grow our business could be affected.

Our services are skilled and creative manpower intensive and we engage a considerable number of skilled personnel every year to sustain our growth. Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

The services provided by our company are subject to operating risks, including but not limited to breakdown of the printing & designing machineries & mishaps which could affect our service providing capabilities. Though we take all the possible measure to reduce the risk of any such breakdown, there may be events which may be beyond our control. While, till date, there have not been any notable incidents involving mishaps or major accidents, we cannot assure that these may not occur in the future. Any consequential losses arising due to such events will affect our operations and financial condition. Further, our operations are heavily dependent on printing & designing and cutting machinery. Any significant malfunction or breakdown of our machinery or equipment may entail significant repair and maintenance costs and cause delays in our operations. Further, if we are unable to repair the malfunctioning machinery or equipment, our operations may need to be suspended until we procure machinery or equipment to replace the same. Any malfunction or breakdown of our machinery or equipment may also cause the quality of products stored with us to be affected, including perishable products. Consequently, we may be liable for losses due to damage to our customers' products. Any breach of our obligations may result in termination of our contracts with our customers, which could have an adverse effect on our business, reputation and financial results. Further, we may also be open to public liability from the end consumer for defects in the quality of perishable products we store and transport. Accordingly, any breakdown of our machinery or equipment may have a significant effect on our business, reputation, financial results and growth.

Our ability to pay dividends in the future will depend on our earnings, financial condition, future cash flows, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. The declaration and payment of dividends will be recommended by the Board of Directors and approved by the Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act, 2013.

We may retain all future earnings, if any, for use in the operations and expansion of the business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future. For details of our Dividend history refer to the Section "Dividend Policy" on page 135 of the Prospectus.

32. We may not be able to detect or prevent fraud or other misconduct committed by our employees or third parties.

It could subject us to financial loss while seriously damaging our reputation. While we have not experienced any material instances of fraud or other misconduct in the past, we cannot assure you that fraud or other misconduct will not occur in the future. In such event, our ability to effectively attract prospective stakeholders, obtain financing on favorable terms and conduct other business activities may be impaired.

The deployment of funds as stated in the "**Objects of the Issue**" beginning on page 60 of this Prospectus is entirely at the discretion of our management and has not been appraised by any independent agency. Further, the purposes for which the Net Proceeds are to be utilized have not been appraised by an independent entity and are based on our estimates and on third-party quotations. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability.

37. Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by our significant shareholders may dilute your shareholding and adversely affect the trading price of the Equity Shares.

Any future issuance of the equity shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in the Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

38. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.

The proposed fund requirement for our business, as detailed in the section titled "**Objects of the Issue**" is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled "**Objects of the Issue**" beginning on page 60 of this Prospectus.

39. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The issue price of the equity shares has been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled “**Basis for Issue Price**” beginning on page 68 of the Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

40. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

We are currently engaged in the business of providing services relating to designing and engineering including interior and exterior works which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. 41. *We have not independently verified certain data in this Prospectus.*

We have not independently verified data from the Industry and related data contained in this Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

While our Company is required to complete Allotment pursuant to the Offer within six Working Days from the Offer Closing Date, events affecting the Bidders decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidder’s ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

EXTERNAL RISK FACTORS

43. *The continuing effect of the COVID-19 pandemic on our business, results of operations and financial condition is highly uncertain and cannot be predicted.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our consumers. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID- 19 will cause an economic slowdown and it is possible that it could cause a global recession.

44. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details, please refer to the chapter “**Government and Other Approvals**” on page 176 of this Prospectus, for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax (“GST”) regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

45. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by Centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. Further, there have been periods of slowdown in the economic growth of India. India’s economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors’ reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

46. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

47. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India’s economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby

affect our business.

48. *Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, man-made disasters, including acts of war, terrorist attacks, environmental issues and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

49. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The issue price of the equity shares has been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information, please refer the section titled “**Basis for Issue Price**” beginning on page 68 of the Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

50. *If certain labour laws become applicable, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

Key assumptions for working capital projections made by Our Company:

Particulars	31-03-2021	31-03-2022	31-03-2023	30-09-2023	31-03-2024	31-03-2025

Creditors (in days)	248	201	106	73	91	39
Inventories (in days)	39	11	18	17	31	35

Justification:

Particulars	Justification
Inventories	Inventory levels are maintained by our Company depending upon the demand and delivery schedules. We had Inventories turnover days around 17 during the period half year ended in 30 September 2023 and will be 31 days for F.Y. 2023-24 and 35 for F.Y. 2024-25. Our inventories are significant and are expected to grow in line with the growth in our business.
Debtors	The historical holding days of trade receivables was 81 days during F.Y.2022-23 and 61 days for the period ended 30-09-2023. As per the current credit terms and prevalent trend of the industry & in order to expand company's operations, the holding level for debtors is anticipated at 76 days and 74 of total revenue from operations during F.Y 2023-24 & FY 2024-25 respectively. The projected increase in trade receivables days is a strategic decision aimed at fostering higher sales growth. We intend to provide our customers with extended credit periods, allowing them more time to settle their invoices. By offering this flexibility, we expect to stimulate increased sales volume and foster stronger customer relationships.
Creditors	Past trend of Trade payables holding days has been 106 days during FY 2022-23 and 73 days for the period ended 30-09-2023. However, with additional working capital funding, our Company intends to reduce trade payable to 91 days during F.Y 2023-24 & 39 days during F.Y 2024-25 to avail cash discount as well as competitive purchase price to increase overall profitability of our Company. By reducing the time, it takes to settle our payables we aim to negotiate more favorable terms and conditions with our suppliers, enabling us to access competitive pricing for the goods we procure

Justification of increase in working capital requirement:

Company has experienced significant growth in last three financial years and stub period. Revenue from Operations has increased from Rs. 421.04 Lakhs in F.Y 2020-21 to Rs. 547.85 Lakhs and Rs. 1592.49 Lakhs in Financial Years 2021-22 and 2022-23 respectively. This growth represents a Compound Annual Growth Rate (CAGR) of approximately 94% over the past three years.

This increase in revenue has led to an increase in requirement of Inventories in FY 2022-23 to Rs. 105.17 lakhs in comparison to Rs. 5.36 Lakhs in FY 2021-22. And further in FY 2022-23, Trade Receivables of the Company increased to Rs. 493.04 Lakhs from Rs. 217.42 Lakhs in FY 2021-22, involving more funds getting blocked in Trade Receivables. Additionally, company has continuously reduced the trade payable days from 248 days in FY 2020-21 to 106 days in FY 2022-23. Hence, this increase in Inventories and Trade Receivables on one hand and reduction in payment days of Trade Payables on other hand, has led to an increase in the working capital requirement.

The company foresees a rise in working capital needs on account of continuous increase in the revenue from business operations of the company. Further, the Company is entering into “Digital and Immersive Solutions” which will help Company in increasing Company’s turnover and will further result in increased working capital requirement.

It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. SECTION V- ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

GLOBAL ECONOMIC OVERVIEW

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation’s invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. The resilience that global economic activity exhibited earlier this year is expected to fade. Growth in several major economies was stronger than envisaged at the beginning of the year, with faster-than-expected economic reopening in China and resilient consumption in the United States. Nonetheless, for 2023 as a whole, global activity is projected to slow, with a pronounced deceleration in advanced economies and a sizable pickup in China (figure 1.1.A). Inflation pressures persist, and the drag on growth from the ongoing monetary tightening to restore price stability is expected to peak in 2023 in many major economies. Recent banking sector stress will further tighten credit conditions. This will result in a substantial growth deceleration in the second half of this year. This slowdown will compound a period of already-subdued growth—over the first half of the 2020s (2020-2024), growth in EMDEs is expected to average just 3.4 percent, one of the weakest half-decades of the past 30 years (figure 1.1.B). This slowdown reflects both cyclical dynamics and the current trend of declining global potential output growth (figure 1.1.C).

Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability. Many banks experienced substantial unrealized losses due to the sharp rise in policy interest rates. Concerns about the viability of balance sheets of some banks led to depositor flight and market volatility in the United States and Europe earlier in the year, which were stemmed by a swift and extensive policy response. Financial markets remain highly sensitive to evolving expectations about the future path of interest rates of major central banks. Spillovers from banking turmoil in advanced economies to EMDEs have so far been limited. However, countries with more pronounced macroeconomic policy vulnerabilities, as reflected by lower credit ratings, have experienced slower growth and greater financial stress, including large currency depreciations and a sharp widening of sovereign spreads. Projections for 2023 growth in these economies have fallen by more than half over the past year (figure 1.1.D).

FIGURE 1.1

C. Contributions to potential growth

D. EMDE growth in 2023, by credit rating

Inflation pressures persist. Although global headline inflation has been decelerating as a result of base effects, abating supply chain pressures, and falling commodity prices, core inflation in many countries remains elevated, and inflation is above target in almost all inflation-targeting economies. Inflation is expected to continue to be above its pre-pandemic level beyond 2024 (figure 1.1.E). That said, inflation expectations in most inflation targeting countries have so far not undergone a major shift and appear to remain anchored.

Energy prices have eased considerably since their peak in 2022 on account of weaker global growth prospects and a warmer-than-expected Northern winter, which reduced natural gas and electricity consumption. Metal prices increased in early 2023, reflecting signs of a stronger-than anticipated recovery in China, but subsequently retraced those gains. Agricultural prices have been easing on the back of good production prospects for most crops.

In all, global growth is forecast to slow from 3.1 percent in 2022 to 2.1 percent in 2023, before edging up to 2.4 percent in 2024. Relative to the January projections, this is 0.4 percentage point stronger in 2023 and 0.3 percentage point weaker in 2024. Greater-than-expected resilience of major economies at the end of 2022 and early in 2023 led to the overall upgrade to growth in 2023.

However, the drag on activity from tighter monetary policy is increasingly apparent, particularly in more interest-rate-sensitive activities such as business and residential investment, including construction. Growth over the rest of 2023 is set to slow substantially as it is weighed down by the lagged and ongoing effects of monetary tightening, and more restrictive credit conditions. These factors are envisaged to continue to affect activity heading into next year, leaving global growth below previous projections. Notwithstanding a continued recovery in tourism, global trade growth is likewise expected to slow in view of the ongoing rotation of consumption toward services, which tend to be less trade-intensive. Fiscal policy is expected to have little net impact on global growth over the forecast horizon, with modest tightening in EMDEs generally offsetting support in advanced economies.

Growth in advanced economies is set to decelerate substantially for 2023 as a whole, to 0.7 percent, and to remain feeble in 2024, due to monetary tightening, less favorable credit conditions, softening labor markets, and still-high energy prices. In EMDEs, aggregate growth is projected to edge up to 4 percent in 2023, almost entirely due to a rebound in China following the removal of strict pandemic-related mobility restrictions. Excluding China, growth in EMDEs is set to slow substantially to 2.9 percent this year. This projection is predicated on the assumption of a protracted period of tight global monetary policy, fiscal consolidation in most EMDEs, and weak external demand. The slowdown is expected to be even more severe for EMDEs with elevated fiscal vulnerabilities and external financing needs. Persistent weak growth means that, excluding China, EMDEs are expected to continue making next to no progress at closing the differential in per capita incomes relative to advanced economies (figure 1.1.F). By 2024, economic activity in EMDEs will still be about 5 percent below levels projected on the eve of the pandemic.

E. Government net interest payments in EMDEs and LICs

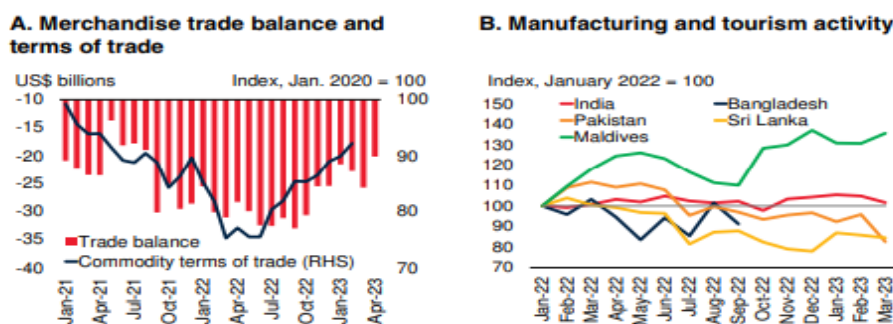

F. Global potential growth under reform scenarios

In 2022, South Asia (SAR) endured significant negative spillovers from rapid monetary policy tightening in advanced economies, weak growth in China, and the Russian Federation’s invasion of Ukraine. The peak impact of these shocks appears to have passed, and regional economic conditions have improved so far in 2023, however, the economic and financial consequence of these shocks persist. Terms of trade have become more favorable since the second half of 2022, and large trade deficits caused by high import commodity prices have partially receded (figure 2.5.1.A). Maldives, the region’s fastest-growing economy in 2022, benefited from sustained high levels of tourists from Europe, India, and Russia, and returning tourism from China since early this year (figure 2.5.1.B). Import restrictions imposed by several economies (Bangladesh, Nepal, Pakistan, Sri Lanka), which adversely affected economic activity, have been relaxed as external imbalances have improved and exchange rate pressures have eased. Food export bans, however, are expected to remain in place in Bangladesh, India, and Pakistan through 2023 despite falling global prices.

In India, which accounts for three-quarters of output in the region, growth in early 2023 remained below what it achieved in the decade before the pandemic as higher prices and rising borrowing costs weighed on private consumption. However, manufacturing rebounded into 2023 after contracting in the second half of 2022, and investment growth remained buoyant as the government ramped up capital expenditure. Private investment was also likely boosted by increasing corporate profits. Unemployment declined to 6.8 percent in the first quarter of 2023, the lowest since the onset of the COVID-19 pandemic, and labor force participation increased. India’s headline consumer price inflation has returned to within the central bank’s 2-6 percent tolerance band.

Indian Economy

India to witness GDP growth of 6.0 per cent to 6.8 per cent in 2023-24, depending on the trajectory of economic and political developments globally. Economic survey 2022-23 projects a baseline GDP growth of 6.5 per cent in real terms in FY24.

Although domestic consumption rebounded in many economies, the rebound in India was impressive for its scale. It contributed to a rise in domestic capacity utilisation. Domestic private consumption remains buoyant in November, 2022. Moreover, RBI’s most recent survey of consumer confidence released in December, 2022 pointed to improving sentiment with respect to current and prospective employment and income conditions.

In FY21, the Government announced the Emergency Credit Line Guarantee Scheme, which succeeded in shielding micro, small and medium enterprises from financial distress. A recent CIBIL report (ECLGS Insights, August, 2022) showed that the scheme has supported MSMEs in facing the COVID shock, with 83 per cent of the borrowers that availed of the ECLGS being micro-enterprises. Among these micro units, more than half had an overall exposure of less than Rs.10 lakh.

Furthermore, the CIBIL data also shows that ECLGS borrowers had lower non-performing asset rates than enterprises that were eligible for ECLGS but did not avail of it. Further, the GST paid by MSMEs after declining in FY21 has been rising since and now has crossed the pre-pandemic level of FY20, reflecting the financial resilience of small businesses and the effectiveness of the pre-emptive government intervention targeted towards MSMEs.

It says, growth is expected to be brisk in FY24 as a vigorous credit disbursement, and capital investment cycle is expected to unfold in India with the strengthening of the balance sheets of the corporate and banking sectors. Further support to economic growth will come from the expansion of public digital platforms and path-breaking measures such as PM GatiShakti, the National Logistics Policy, and the Production-Linked Incentive schemes to boost manufacturing output.

In India, building codes and regulations play a pivotal role in ensuring safe and sustainable construction practices, upholding structural integrity, and safeguarding the environment. The cornerstone of these regulations is the National Building Code (NBC), initially published in 1970 and periodically updated to incorporate advancements in construction technology and safety standards. The NBC serves as a comprehensive set of guidelines for building design, materials, fire safety, plumbing, electrical systems, accessibility, and energy conservation. While it serves as a model code, individual states and union territories often tailor it to align with regional needs. Local municipal bodies and development authorities enforce these regulations and grant construction approvals.

For an interior work company in India, adherence to the National Building Code holds paramount importance. The NBC serves as an all-encompassing regulatory framework governing various aspects of building design, construction, and safety. While its primary focus is on overall building construction, its guidelines also extend to interior modifications within existing structures. This includes ensuring structural stability, fire safety measures, accessibility considerations, compliance with electrical and plumbing systems, appropriate material selection, and adherence to environmental sustainability guidelines.

Competition Act, 2002

The Competition Act, 2002 prohibits anti-competitive agreements, abuse of dominant positions by enterprises and regulates combinations in India. The Competition Act also established the Competition Commission of India (the —CCI) as the

authority mandated to implement the Competition Act. The provisions of the Competition Act relating to combinations were notified recently on March 4, 2011 and came into effect on June 1, 2011. Combinations which are Likely to cause an appreciable adverse effect on competition in a relevant market in India are void under the Competition Act. A combination is defined under Section 5 of the Competition Act as an acquisition, merger or amalgamation of enterprise(s) that meets certain asset or turnover thresholds. There are also different thresholds for those categorized as Individuals and Group. The CCI may enquire into all combinations, even if taking place outside India, or between parties outside India, if such combination is Likely to have an appreciable adverse effect on competition in India. Effective June 1, 2011, all combinations have to be notified to the CCI within 30 days of the execution of any agreement or other document for any acquisition of assets, shares, voting rights or control of an enterprise under Section 5(a) and (b) of the Competition Act (including any binding document conveying an agreement or decision to acquire control, shares, voting rights or assets of an enterprise); or the board of directors of a company (or an equivalent authority in case of other entities approving a proposal for a merger or amalgamation under Section 5(c) of the Competition Act. The obligation to notify a combination to the CCI falls upon the acquirer in case of an acquisition, and on all parties to the combination jointly in case of a merger or amalgamation.

Specific Relief Act, 1963

The Specific Relief Act, 1963 is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. Specific performance means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

Sale of Goods Act, 1930

The law relating to the sale of goods is codified in the Sale of Goods Act, 1930. It defines sale and agreement to sell as a contract whereby the seller transfers or agrees to transfer the property in goods to the buyer for a price and provides that there may be a contract of sale between part owner and another and that the contract of sale may be absolute or conditional.

Consumer Protection Act, 2019 (“Consumer Protection Act”) and Rules Made Thereunder

The Consumer Protection Act was designed and enacted to provide simpler and quicker access to redress consumer grievances. It seeks, amongst other things, to promote and protect the interests of consumers against deficiencies and defects in goods or services and secure the rights of a consumer against unfair trade practices, which may be practiced by manufacturers, service providers and traders. The definition of “consumer” under the Consumer Protection Act includes persons engaged in offline or online transactions through electronic means or by tele-shopping or direct-selling or multi-level marketing. It provides for the establishment of consumer disputes redressal forums and commissions for the purposes of redressal of consumer grievances. In addition to awarding compensation and/or passing corrective orders, the forums and commissions under the Consumer Protection Act, in cases of misleading and false advertisements, are empowered to impose imprisonment for a term which may extend to two years and fine which may extend to ten lakhs.

In line with the Consumer Protection Act, the Ministry of Consumer Affairs, Food and Public Distribution, Government of India (“Ministry of Consumer Affairs”) has also notified the Consumer Protection (E-Commerce) Rules, 2020 (“E-Commerce Rules”) on July 23, 2020, which provide a framework to regulate the marketing, sale and purchase of goods and services online. The E-Commerce Rules govern e-commerce entities which own, operate, or manage, a digital or electronic facility or platform for electronic commerce, but does not include a seller offering his goods or services for sale on a marketplace e-commerce entity. The Ministry of Consumer Affairs has also released draft amendments to the E-Commerce Rules for public comments. The aforesaid draft amendments require e-commerce entities to, amongst other things, register themselves with the Department for Promotion of Industry and Internal Trade, and appoint a chief compliance officer, a nodal contact person and a resident grievance officer. Additionally, the draft amendments prohibit e-commerce entities from misleading users by manipulating search results, prohibit flash sales and abuse of dominant position, and mandate e-commerce entities to identify sponsored listings of products and services with clear and prominent disclosures.

Code of Civil Procedure, 1908

The Code of Civil Procedure, 1908 is a procedural law related to the administration of civil proceedings in India. The Civil Procedure Code consolidates and amends the law relating to the procedure of the Courts of Civil jurisdiction. The Code of Civil Procedure is an adjective law it neither creates nor takes away any right. It is intended to regulate the procedure to be followed by Civil Courts. The Civil Procedure Code consists of two parts. 158 Sections form the first part and the rules

and orders contained in Schedule I form the second part. The object of the Code generally is to create jurisdiction while the rules indicate the mode in which the jurisdiction should be exercised.

The Code does not affect any special or local laws nor does it supersede any special jurisdiction or power conferred or any special form of procedure prescribed by or under any other law for the time being in force. The Code is the general law so that in case of conflict between the Code and the special law the latter prevails over the former. Where the special law is silent on a particular matter the Code applies, but consistent with the special enactment.

Code of Criminal Procedure Code, 1973

It is the main legislation on procedure for administration of substantive criminal law in India. It was enacted in 1973 and came into force on 1st April, 1974. It provides the machinery for the investigation of crime, apprehension of suspected criminals, collection of evidence, determination of guilt or innocence of the accused person and the determination of punishment of the guilty.

Criminal law occupies a pre-dominant place among the agencies of social control and is regarded as a formidable weapon that society has forged to protect itself against anti-social behaviour. The law of criminal procedure is meant to be complimentary to criminal law. It is intended to provide a mechanism for the enforcement of criminal law. The Code of Criminal Procedure creates the necessary machinery for apprehending the criminals, investigating the criminal cases, their trials before the criminal courts and imposition of proper punishment on the guilty person. The Code enumerates the hierarchy of criminal courts in which different offences can be tried and then it spells out the limits of sentences which such Courts are authorized to pass.

The law of criminal procedure is intended to provide a mechanism for the enforcement of criminal law. Without the proper procedural law the substantive criminal law which defines offences and provides punishment for them would be almost worthless.

Prevention of Money Laundering Act, 2002

Money laundering is the processing of criminal proceeds to disguise its illegal origin. Terrorism, illegal arms sales, financial crimes, smuggling, and the activities of organized crime, including drug trafficking and prostitution rings, generate huge sums. Embezzlement, insider trading, bribery and computer fraud also produce large profits and create an incentive to legitimise the ill-gotten gains through money laundering. When a criminal activity generates substantial profits, the individual or group involved in such activities route the funds to safe heavens by disguising the sources, changing the form, or moving the funds to a place where they are less likely to attract attention.

Information Technology Act, 2002 (“Information Technology Act”)

The Information Technology Act seeks to (i) provide legal recognition to transactions carried out by various means of electronic data interchange involving alternatives to paper-based methods of communication and storage of information; (ii) facilitate electronic filing of documents; and (iii) create a mechanism for the authentication of electronic documentation through digital signatures. The Information Technology Act facilitates electronic commerce by recognizing contracts concluded through electronic means, protects intermediaries in respect of third party information liability and creates liability for failure to protect sensitive personal data. The Information Technology Act empowers the Government of India to formulate rules with respect to reasonable security practices and procedures and sensitive personal data. In exercise of this power, the Department of Information Technology, Ministry of Electronics and Information Technology, Government of India (“DoIT”), on April 11, 2011, notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011 (“IT Security Rules”) which prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate. The IT Security Rules require every such body corporate to provide a privacy policy for handling and dealing with personal information, including sensitive personal data, ensuring security of all personal data collected by it and publishing such policy on its website. The IT Security Rules further require that all such personal data be used solely for the purposes for which it was collected and any third party disclosure of such data is made with the prior consent of the information provider, unless contractually agreed upon between them or where such disclosure is mandated by law. The DoIT also notified the Information Technology (Intermediaries Guidelines and Digital Media Ethics Code) Rules, 2021 (“IT Intermediaries Rules”) on February 25, 2021, requiring intermediaries receiving, storing, transmitting, or providing any service with respect to electronic messages to not knowingly host, publish, transmit, select or modify any information prohibited under the IT Intermediaries Rules, to disable hosting, publishing, transmission, selection or modification of such information once they become aware of it, as well as specifying the due diligence to be observed by intermediaries.

Arbitration & Conciliation Act, 1996

The Arbitration and Conciliation Act, 1996 is an act to consolidate and amend the law relating to domestic arbitration, international commercial arbitration and enforcement of foreign arbitral awards as also to define the law relating to conciliation and for matters connected therewith or incidental thereto. It aims at streamlining the process of arbitration and facilitating conciliation in business matters. The Act recognizes the autonomy of parties in the conduct of arbitral proceedings by the arbitral tribunal and abolishes the scope of judicial review of the award and minimizes the supervisory role of Courts. A significant feature of the Act is the appointment of arbitrators by the Chief Justice of India or Chief Justice of High Court. The autonomy of the arbitral tribunal has further been strengthened by empowering them to decide on jurisdiction and to consider objections regarding the existence or validity of the arbitration agreement.

The Energy Conservation (Amendment) Act, 2022

The Energy Conservation Act, 2001 was enacted to provide for efficient use of energy, its conservation and for matters connected therewith and/ or incidental thereto. The amended Act provides for regulation of energy consumption by equipment, appliances, vehicles, vessels, industrial units, buildings or establishments that consume, generate, transmit or supply energy. With special focus on promotion of new and renewable energy and the National Green Hydrogen Mission, the amendment seeks to (i) facilitate the achievement of “Panchamrit” — the five nectar elements presented by India in COP-26 (Conference of Parties -26) in Glasgow 2021.

In addition to facilitating the achievement of ‘Panchamrit’, the amended Act aims to promote renewable energy and develop the domestic carbon market to combat climate change and introduce new concepts such as carbon trading and mandate the use of non-fossil sources to ensure faster decarbonisation and help achieve sustainable development goals in line with the Paris Agreement and various other actions related to climate change.

2.9. Borrowing costs

Borrowing costs are interest and other costs that the Company incurs in connection with the borrowing of funds and is measured with reference to the effective interest rate applicable to the respective borrowing.

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use. Other borrowing costs are expensed in the period in which expense incurred.

2.10. Employee benefits

Provision for employee benefits including gratuity in respect of employees is accounted for on the basis of liability estimated by the management.

(i) Short-term Obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled.

(ii) Post-employment Obligations

The Company operates the following post-employment scheme:

(a) Defined benefit plan (Gratuity) : The liability or asset recognised in the Balance Sheet in respect of defined benefit gratuity plan is the present value of the defined benefit obligation at the end of the reporting period. The defined benefit obligation is calculated annually by Actuarial Valuer

2.11. Accounting for taxes on income

- a) Current tax is determined as the amount of tax payable in respect of taxable income for the year as per the provisions of the Income Tax Act, 1961.
- b) Deferred tax is recognized, subject to consideration of prudence, on timing difference, being the difference between taxable incomes and accounting income that originate in one period and are capable of reversal in one or more subsequent periods and measured using relevant enacted tax rates.

2.12. Operating lease

A. Where Co is lessee

Lease of assets under which all the risk and rewards of ownership are effectively retained by the lessor are classified as operating leases. Lease payments under operating leases are recognized as an expense on accrual basis in accordance with the respective lease agreements.

B. Where Co is lessor

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight line basis over the term of the relevant lease.

2.13. Foreign currency transactions

Transactions in foreign currencies are recognised at the prevailing exchange rates on the transaction dates. Realised gains and losses on settlement of foreign currency transactions are recognised in the Statement of Profit and Loss.

Monetary foreign currency assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

2.14. Earnings per share

Basic earnings per share are computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for the events for bonus issue, bonus element in a rights issue to existing shareholders, share split and reverse share split (consolidation of shares). Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income (net off any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on conversion of all dilutive potential equity shares.

2.15. Provisions

A provision is recognised when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

2.16. Contingent Liabilities and Contingent Assets

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases, where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements unless the probability of outflow of resources is remote.

Contingent assets are not recognised in the financial statements. If the inflow of economic benefits is probable, then it is disclosed in the financial statements.

2.17. Impairment of property, plant and equipment

At each balance sheet date, the Company reviews the carrying amount of assets to determine whether there is an indication that those assets have suffered impairment loss. If any such indication exists, the recoverable amount of assets is estimated in order to determine the extent of impairment loss. The recoverable amount is higher of the net selling price and value in use, determined by discounting the estimated future cash flows expected from the continuing use of the asset to their present value.

2.18. Current and Non-current Classification

All assets and liabilities have been classified as current and non-current as per the Company's normal operating cycle (Twelve months) and other criteria set out in Schedule III to the Act.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted-average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

Subsequently, for applications by Retail Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later ("UPI Phase II"), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Prospectus. Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/P/2022/45 dated April 5, 2022, all individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹ 500,000 shall use the UPI Mechanism.

Furthermore, SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public issue from existing 6 working days to 3 working days from the date of the closure of the issue. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars and the Previous UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the SCSBs only after such banks provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. The Offer will be made under UPI Phase III of the UPI Circular.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India.
