The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some events may not be material individually but may be found material collectively.*
- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “Risk Factors” beginning on page 22 and “Management Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 150 unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “Audited Financial Statements, as restated” prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP).

- 1. Excessive dependence on single or limited number of products may have an adverse effect on our operation and result of operations.***

We are an Agri-based company, engaged in the business of farming and cultivation of fruits and vegetables namely pomegranate, dragon fruit, water melon, chilly and wood plantation like sagwan. Though, we have in the past diversified into different fruits and vegetable but we rely on pomegranate production for the major portion of our sale revenue. Pomegranate accounts for more than 95% of our sales revenue. Further, with the growing trend of organic farming and increase in demand for the organically grown products, there may be a reduction in the demand for our products, which may affect our business operations and financial conditions. Thus, such reliance on a single product for major portion of our revenue or any change in the consumers taste or preference, may have an adverse effect on our business operation in case the demand of the same is reduced due to any factor beyond our control. In case there is any reduction in the demand for the pomegranate which is our major product, may have an adverse effect on our business operations, results and financial conditions.

2. Unfavorable weather patterns may have an adverse effect on our business, results of operations and financial condition.

We are an Agri-based company, our business is dependent on weather conditions, including extreme conditions such as drought and natural disasters. Further, the growth and production of the fruits and vegetables may be adversely effected by any change in the temperatures, weather patterns and the frequency and severity of extreme weather and natural disasters. The longer than usual periods of heavy rainfall in certain regions or a drought in India caused by changes in weather patterns may cause harm to the plantation and effect cultivation/harvesting of the fruits and vegetables. Further, adverse weather conditions may also cause volatility in the prices of commodities, which may affect our sales revenue. Consequently, the occurrence of any such unfavorable weather patterns may adversely affect our business, results of operations and financial condition.

3. Any improper handling, processing or storage of finished products, or spoilage of and damage to, or any real or perceived contamination in our products, could subject us to regulatory and legal action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.

The farm produce may be subject to risks such as improper packaging & contamination during their packaging, transport or storage which may affect the product quality and usability. In case the product delivered by us are not of the desired quality or spoiled at the delivery to the customers, we may be subject to product liability or recall claims or are alleged to result in losses to our customers. Also, we rely on third parties for warehousing and cold storage facilities required for storing our produce. Further, our finished products are required to be stored, handled and transported under certain food safety conditions. Further, our products may be subject to contamination by disease producing organisms or pathogens, as a result of improper handling at the processing, storing or transportation. Such risks may be controlled, but not eliminated, by adherence to good practices. We face the risk of legal proceedings and product liability claims being brought by various entities, including consumers, distributors and government agencies for various reasons including for defective or contaminated products sold. Also, if we experience a product recall or are a party to a product liability case, we may incur considerable expense in litigation. We cannot assure you that we will not experience product recalls or product liability losses in the future. Any product recall, product liability claim may adversely affect our reputation and brand image, as well as entail significant costs, which could adversely affect our reputation, business, results of operations and financial condition

4. Our business is subject to seasonal variations that could result in fluctuations in our results of operations.

Our businesses are subject to seasonal variations. For example, every crop have a definite harvesting period during with the farm produce are higher compared to other parts of the year, hence the supply of the same is increased during the said period. Though, we maintain sufficient arrangements with storing facilities to store the farm produce and deliver in case of high demands during off period. However, in case we are not able to properly estimate demand and there is a shortage of farm produce and the estimated time period for which the produce can be stored without affecting its quality may have an adverse effect on our production cycle and sales. As a result of such seasonal fluctuations, our sales and results of operations may also vary by fiscal quarter, and the sales and results of operations of any given fiscal quarter may not be relied upon as indicators of the sales or results of operations of other fiscal quarters or of our future performance.

5. The lease agreements of the farm land used in our business operations and certain other agreements may be inadequately stamped or may not have been registered as a result of which our operations may be impaired.

The lease agreements of the farm land used in our business operations and certain other agreements entered into by us may not be adequately stamped and registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Further, as the lease of land is not registered hence the government has the right for ceiling the property on which the crop is grown due to unregistered tenancy contract. Any such act could have an adverse effect on our business operations and financial conditions. Any potential dispute vis-à-vis the said premises and our non-compliance of local laws relating to stamp duty and registration may adversely impact the continuance of our activity from such premises. For instance, we have entered into lease arrangement for the use of the land under cultivation which are not registered. There can be no assurance that we will be able to continue to occupy the said premises in the future on commercially acceptable terms. If any of these lease or license agreements is terminated for any reason or not renewed on commercially acceptable terms or at all, we may suffer a disruption in our operations or increased costs, or both, which may adversely affect our business, financial condition and results of operations.

6. The farm land on which we undertake our business operations and the registered office have been taken on lease or rent basis. Our inability to seek renewal or extension of such leases may materially affect our business operations.

We have entered into a lease arrangement with our Promoter, their relatives and other third parties to use the farm land situated in the state of Rajasthan to produce the fruits and vegetables. Our Promoter and the Company has entered into a rent agreement for use of the farm land by the Company. There can be no assurance that we will be able to continue with these arrangements in the future. In the event that the existing arrangement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our operations. We may be required to shift our operations to a new location and there can be no assurance that the arrangement we enter into in respect of new farm land would be on such terms and conditions as the present one. If alternative farm lands are not available at the same or similar costs, size or locations, our business, financial condition and results of operations may be adversely affected.

Further, the registered office of our company from where we operate have been taken on lease or license basis. There can be no assurance that we will be able to continue with these arrangements in the future. In the event that the existing arrangement is terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our operations. For further details, see “Our Business – Property” on page 81. Similarly, if we are not able to renew our lease or continue to cultivate on these farms due to non-renewal of licenses or any other reason, our existing plantation and business operation will be adversely affected which will have an adverse impact on our operations and financial condition.

7. *Our company has been recently formed by conversion of the erstwhile LLP into the company, thus we have limited operating history as a Company which may make it difficult for investors to evaluate our historical performance or future prospects.*

Our Company was incorporated as a limited Company under the Companies Act, 2023 with Registrar of Companies, dated December 27, 2023. The company has been incorporated by conversion of the erstwhile LLP, thus we have limited operating history as a company from which one can evaluate our business, future prospects and viability. Our future business operation and financial position may not comparable with that of the LLP and difficult to estimate and could fluctuate significantly and as a result the price of our Equity Shares may remain volatile. Also, there can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits post conversion of the LLP to company. Any inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects. For further details, see the chapter titled “History and Corporate Structure” and “Restated Financial Statements” on page 119 and 98 respectively of the Draft Prospectus.

8. *The plantation we grow take a substantial portion of time to grow, until they are ready to harvest and grow the required quality and quantity of fruits and vegetables.*

We are an Agri-based company, engaged in the business of farming and cultivation of fruits and vegetables namely pomegranate, dragon fruit, water melon, chilly and wood plantation like sagwan. For every crop to yield the desired fruits, have to go through the different stages of growth including the plantation, irrigation, flowering and then fruitification. Further, apart from the production stages, every fruit or vegetable require different climate conditions where the plants and crop can be grown and harvested. In case the said climate condition are not provided the crop may not yield the desired output. Thus, it is very difficult for us to frequently change the crop as it require substantial portion and specific climate conditions to yield the desired produce. In case we are required to change the crop from one period to another, it may have an adverse effect on our business operations and financial conditions.

9. *We operate in limited geographies for a significant portion of our revenue. Entering into new geographies may not be as profitable at the current scenario.*

We currently operate from our registered office located in Gujarat and farms located in Rajasthan. Most of our farm produce are currently being sold in the state of Gujarat and Rajasthan. Also, all of our farms are located in the state of Rajasthan. Expanding our customers and farms where we grow our produce to new geographies and with other different mandis and retails chain stores may not be as profitable as our current customers. This may have a material adverse effect on our business, results of operations and financial condition. Further, as majority of our operations are limited to the state of Gujarat and Rajasthan, any significant social, political or economic disruption, or natural calamities or civil disruptions in these states, or any changes in the policies of the state or local governments of these state or the Government of India, could require us to incur significant capital expenditure and change our business strategy. The occurrence of, or our inability to effectively respond to any such event, could have an adverse effect on our business, results of operations, financial condition and cash flows.

10. *Our top customers contribute majority of our revenues from operations. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top 5 customers contribute majority of our revenues from operations i.e. 87%, 99%, 89% and 73% for the period November 30,

2023, Fiscal year 2023, 2022 and 2021 respectively. Further, our top customer, generate over 80% of our revenue from operations for the Fiscal years 2023 & 2022 and over 67% in the fiscal 2021 and generate 55% of our revenue from operations for the period ended November 30, 2023 respectively as per the Restated Financial Statements respectively. Such concentration of our business on few clients may have an adverse effect on our results of operations and result in a significant reduction in the revenue from operations which could also adversely effect on our business if we do not achieve our expected revenues from such clients. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations. As our business is currently concentrated to a select number of customers, any adverse development with such customer, including as a result of a dispute with such major customers, may result in us experiencing significant reduction in our cash flows and liquidity. If our customers are able to fulfil their requirements through any of our existing or new competitors, with better and / or cheaper cost, we may lose significant portion of our business.

11. Our Company and our Directors are involved in certain legal proceedings. Any adverse decision in such proceedings may render us/them liable to liabilities/penalties and may adversely affect our business and results of operations.

Our Company and our Directors are currently involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The summary of outstanding litigation in relation to criminal matters, direct tax matters, indirect tax matters, actions by regulatory/ statutory authorities and matters above the materiality threshold against our Company and Directors have been set out below.

Litigations/Matters involving our Company: -

Nature of Cases	No. of Outstanding Cases	Amount Involved (in ₹ Lacs)*
Direct Tax	3	69.85

Amount mentioned to the extent quantifiable. The amount may be subject to additional interest/other charges being levied by the concerned authorities which are unascertainable as on date of this Draft Prospectus.

Litigations/Matters involving our Directors:

Name of Director	Nature of Cases	No. of Outstanding Cases	Amount Involved (in ₹ Lacs)*
Indrajeet Anath Mitra	Direct Tax	4	264.81
Hursh Pareshbhai Jani*	Other pending litigation	1	unascertainable
Niraj Chhaganraj Gemawat	Direct Tax	1	1.43

Amount mentioned to the extent quantifiable. The amount may be subject to additional interest/other charges being levied by the concerned authorities which are unascertainable as on date of this Draft Prospectus.

*Further, the company is not in possession of the case papers pertaining to the abovementioned case, hence it is difficult to ascertain the next hearing date and amount involved in the above matter.

For further details, see “Outstanding Litigation and Material Developments” on page 159. Decisions in any of the aforesaid proceedings adverse to our interests may have a material adverse effect on our business, results of operations, financial condition and prospects. If the courts or tribunals rule against us or our Company, our Directors and Promoter, we may face monetary and/or reputational losses and may have to make provisions in our financial statements, which could increase our expenses and our liabilities.

12. Use of defective inputs like seeds, plant nutrients, pesticides or any loss to the fertile soil could adversely affect our business and results of operation.

Quality defects in the inputs used in the farm like seeds, plant nutrients or pesticides would directly affect the quality of our products. If defective or contaminated inputs are used at our farms, it may lead to a large-scale crop failure thus substantially increasing our potential liability. Further, in order to attain the desired levels of yield, certain precautions like utilization of the soil application, proper application of fertilizers, timely application of pesticides, timely supply of water etc. have to be followed. Moreover, weather conditions must be favorable. In the event of any failure on the part of the farm workers/supervisors or adverse weather conditions, it may lead to loss of crops. Any of the aforesaid factors would have a material adverse effect on business, financial condition and results of operations.

13. We have not placed orders for the purchase of plant and machinery for which part of the funds are being raised through the Issue.

Our Company has identified the machineries to be acquired and has received the quotations from the suppliers, but we have not placed final orders for all the machineries, equipment’s and utilities aggregating to Rs. 172.04 lakhs which is approximately [●]% of the Issue

Proceeds are proposed to be acquired for our expansion plan by utilization of Issue Proceeds. Our Company is further subject to risks on account of inflation in the price of plant and machinery.

Since the part funding for the plant and machinery is from the IPO proceeds, any delay in access to IPO proceeds may eventually delay the process of placing the orders. The purchase of machineries and equipment's would require us to consider factors including but not limited to pricing, delivery schedule and after-sales maintenance. There may be a possibility of delay at the supplier's end in providing timely delivery of these machineries, equipment's and utilities, which in turn may delay the implementation of our expansion plan. Further, the quotations relied upon by us in arriving at the total cost of machineries, equipment's and utilities are valid for a specific period of time and may lapse after the expiry of the specific period. Consequent upon which, there could be a possible escalation in the cost of machineries and equipment's proposed to be acquired by us at the actual time of purchase, resulting in increase in the cost, which may result in cost overruns, and may affect our profitability. For further details read section "Objects of the Issue" beginning on page 58 of the Draft Prospectus

14. We are subject to fluctuations in agricultural commodity and other raw material prices caused by factors outside of our control that could adversely affect our operating results.

Prices for agricultural commodities and their by-products are often volatile and sensitive to local and international changes in supply and demand caused by factors outside of our control, government agriculture programs and policies, global inventory levels, weather and crop conditions and demand for and supply of, competing commodities and substitutes. Further, sometimes the government also regulate the prices and limit the quantity of the agricultural produce through various policies and notifications, in case any such policy or notification regulating the prices affects our crop, it may affect the pricing and marketability of the product which may affect our business operations and financial conditions. These factors may cause volatility in our operating results and have an adverse effect of our business, results of operation and financial conditions.

15. Outbreaks of any plant or crop diseases in particular, can significantly restrict our ability to conduct our operations.

We take all reasonable precautions to ensure that our plants, farms and storage facilities operate in a hygienic and environmentally sound manner. However, events beyond our control, such as the outbreak of any disease, could significantly restrict our ability to conduct our operations. Further, the outbreaks of any disease or epidemic affecting the health of plants or the farm produce or any pest/insect attack on our plants may result in a decrease in the production of the fruits and vegetable and affect our revenue from operations. Any of these factors, or a combination thereof, can adversely affect our quality and inventory levels, could increase our cost of operations, strain our operating margins and reduce our operating revenue, which could materially and adversely affect our business, financial condition and results of operations.

16. Our insurance coverage may not adequately protect us against all material hazards, which may affect our business, results of operations and financial condition.

Our Company has covered itself against certain risks. In case of any casualty, that occur at our farm or otherwise arising out of our operations or in the event of personal injuries, fires or other accidents suffered by our employees or other people or any loss to the crop due to any other factors beyond our control, we could face subsequent losses and damages. There can be no assurance that any claim under the insurance policies obtained by our Company will be honored fully/ in part on time. Our principal types of coverage include vehicle insurance policy. However, we do not maintain any insurance policies to cover the risk of workman compensation, burglary, machine breakdown policy, crop insurance etc. We cannot assure you that any claim under the insurance policies maintained by us will be honored fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected.

17. Crops been perishable in nature, any inability on our part to deliver our crops at the right time in the markets could have a material adverse effect on our business, results of operation and financial condition.

The fruits and vegetables which we produce are perishable in nature, any delay in the packaging and dispatch of the same to the customers may affect the quality of the produce. Hence, we have to ensure that right quantity and quality of our farm produce reach the markets in a timely manner. Any interruption in supply of our fruits or vegetables to the various markets, due to any reason including those not within our control, could have a material adverse effect on our business, results of operation and financial condition.

18. The lack of sufficient water would severely impact our ability to produce fruits or vegetables.

Our business operations are majorly dependent upon the sufficient water supply. As a player in agricultural industry, our operations are majorly impacted by the quantum of rainfall. Our business operations are adversely affected by uneven monsoon, which affects our agriculture produce. India, predominantly an agriculture-based economy, is largely dependent on the monsoon. Though, we have made arrangements for proper irrigation of the farms like using water dripping system, borewell and ponds near our farm but the impact of the monsoon is also crucial for farm produce as it has an overall impact on the ground water and also reservoirs which are critical for irrigation. Any variation in the rainfall and the changes in pattern of monsoon affect the availability of the water and thereby cause a negative impact on the agricultural produce.

19. Pricing pressure from customers may adversely affect our gross margin, profitability and inability to increase our prices, which may in turn materially adversely affect our results of operations and financial condition.

We are engaged in the production of fruits and vegetables which are generally sold to retailers, wholesalers, mandis and retail chain stores. We may in the future experience pressure from our customers to reduce our prices, which may affect our profit margins going forward. In addition, as any price reduction is the result of negotiations and factors which may be beyond our control, we, may be able to reduce operating costs and increase operating efficiencies in order to maintain profitability to some extent. If we are unable to offset customer price reductions in the future through improved operating efficiencies, increasing farm produce and other cost reduction initiatives, our results of operations and financial condition may be materially adversely affected. Further, we cannot directly impact the farm produce to generate operational efficiencies and reduce cost, which may not be fully recovered from our customers. If we are unable to generate sufficient cost savings in the future to offset price reductions arising from pricing pressure from our customers, our results of operations and financial condition may be materially adversely affected.

20. We have not registered the trademarks which we are using for our business. If we are unable to protect our intellectual property against third party infringement or are found to infringe on the intellectual property rights of others, it could have a material adverse effect on our business, results of operations and financial condition.

As on the date of this Draft Prospectus, our logo is not registered with the Trade Mark registration authority. We may in the future be, subject to intellectual property infringement claims, which may be expensive to defend and may disrupt our business. Our business may be affected due to our inability to protect our existing and future intellectual property rights. Currently, we do not have a registered

trademark over our logo  under the Trade Marks Act, 1999, and consequently do not enjoy the statutory protections accorded to a trademark registered in India and cannot prohibit the use of such logo by anybody by means of statutory protection. We had made an application for registration of our logo but we cannot guarantee that all the pending applications will be decided in the favour of the Company. If any of our trademarks are not registered, it can allow any person to use a deceptively similar mark and market its product which could be similar to the products offered by us. Such infringement will hamper our business as prospective clients may go to such user of mark and our revenues may decrease. For further details, please see the chapter “Our Business – Intellectual Property Rights” on page 81 of this Draft Prospectus.

In addition, the use of similar trade names by third parties may result in confusion among our customers, and we are exposed to the risk that entities in India and elsewhere could pass off their products as our products, which may adversely affect sale of our products, resulting in a decrease in market share due to a decrease in demand for our products. Such products may not only result in loss of sales but also adversely affect our reputation and consequently our future sales and results of operations.

21. A shortage or non-availability of electricity, transportation services or water used in irrigation may adversely affect our operations and have an adverse effect on our business, results of operations and financial condition.

We are engaged in the business of farming of fruits and vegetables. Our operations require a significant amount and continuous supply of electricity and water for irrigation and related activities and any shortage or non-availability may adversely affect our operations. We currently source our power requirements from state electricity boards for majority of our energy requirements. The water is sourced from the borewell and ponds in the vicinity of the farm land. Also, we require uninterrupted transportation services for movement of farm produce from our farms to the customer premises within time to maintain the quality of the product being perishable in nature. In case of any disruption in the transportation services our operations may be adversely affected. Any failure on our part to obtain alternate sources of electricity, water or transport services, in a timely fashion, and at an acceptable cost, may have an adverse effect on our business, results of operations and financial condition.

22. *We generally do not enter into any firm supply agreements with our customers. If our customers choose not to source their requirements from us, our business and results of operations may be materially adversely affected.*

We do not generally have firm supply agreements with most of our customers and instead we rely on the purchase orders issued by our customers from time to time that set out the volume and other terms of our sales of products. Many of the purchase orders we receive from customers specify the price and delivery schedule, with the quantities to be delivered. However, such orders may be amended or cancelled and in case of any such amendment or cancellation we may be unable to seek compensation for any surplus products that are unpurchased. Further, there is no commitment on the part of the customer to continue to place orders with us and accordingly, we may be unable to forecast our revenue, production volume or sales. Any failure to meet customers' expectations could result in the cancellation or non-renewal of our orders with them. Further, there may be factors which are beyond our control and may cause the loss of a customer such as price reductions, change in consumer preference or replace their existing products with alternative products, any of which may have an adverse effect on our business and results of operations.

23. *Competition in the industries in which we operate could result in a reduction in our market share or require us to incur substantial expenditures on marketing, which could adversely affect our business, results of operations and financial conditions.*

The industry in which we operate are intensely competitive. We compete with several regional and local companies, as well as local farmers, small produces and numerous unorganized players engaged in the agricultural sector. We also face competition from new entrants who may have more flexibility in responding to changing business and economic conditions. We expect competition to continue to be intense as our existing competitors expand their operations and use new techniques and technologies. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on marketing, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability.

24. *We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may adversely affect our operations.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek fresh approvals, from time to time, as and when required in the ordinary course of our business. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations.

Also, we don't have the FSSAI license and mandi license in the name of our company. Further, we are yet to apply for change in the status of the LLP to company under the different approvals undertaken by the company pursuant to the conversion of the LLP. In case the licenses are not applied or renewed in timely manner, it may affect our production and operations may be adversely affected. For Further details, please see the chapter entitled "Government and other Approvals" on page 162 of this Draft Prospectus.

25. *Our inability to maintain good relationship and network in Local Market may have an adverse effect on our results of operations and financial condition.*

The challenge in the agriculture business lies in reaching a geographically dispersed end-user at the right time at the right place with the right product. Our Company relies on local market players for distribution, marketing and selling our farm produce in the regions in which we operate. Competition for our products is intense in local markets. Hence, the business of our Company is dependent on maintaining good relationship in local markets to ensure continuous supply to our customers. If we do not succeed in maintaining the stability of our network with local market, our market share may decline and our crops may not reach the end customers, materially adversely affecting our results of operations and financial condition.

26. *We enjoy certain direct tax and indirect tax related policy benefits in our business. Any changes in regulations or applicable tax laws would materially affect our operations and growth prospects.*

Our business is subject to various regulations and policies. For details of the applicable key industry regulations and policies please refer chapter titled "Key Industry Regulations and Policies" beginning on page no. 90 and chapter titled "Statement of Possible Tax Benefits" beginning on page no. 70 of the Draft Prospectus. Our business model could be materially affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations as well as changes in direct or indirect tax regime applicable to us. For e.g. Currently; substantial portion our sales represent sales of agro commodities; and does not bear any indirect taxes etc. There can be no assurance that we will continue

to obtain benefits of government policies or that change in government policies and tax regimes would not impact our business adversely.

27. Any inability on our part to collect amounts owed to us could result in the reduction of our profits.

Our operations involve extending credit for extended periods of time to our customers and consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. As a result of the industry conditions, we have and may continue to have high levels of outstanding receivables. For the period November 30, 2023 and financial years 2023, 2022 and 2021, our trade receivables were Rs. 68.41 lakhs, Nil, Rs. 1.68 lakhs and 1.52 lakhs, respectively, which constituted 40.08%, nil, 0.83% and 0.85% of our total revenues for the same periods. If our customers delay or default in making these payments, our profits could be adversely affected.

Further, the outstanding amount receivable from the customer may fluctuate from period to period considering the crop harvesting period and the season period when maximum sales are made to the customers. In case there is a default in the repayment of the amount which we have provided to these parties may have an require additional working capital to fund our business operations. If we are not able to secure such additional funds, this may have an adverse effect on our business operations and financial conditions.

28. Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.

Our business activities are dependent on availability of labour. We primarily utilize labour to grow, harvest and deliver our agriculture produce. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers which may adversely affect our business and result of operations. We employ casual labour or temporary labour on need basis. Though we have not faced any labour problem in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force. Such issues could have adverse effect on our business, and results of operations.

Further, the purposes for which the Net Proceeds are to be utilized have not been appraised by an independent entity and are based on our estimates. In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability. The cost estimated by our management are based on their experience. However, we may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost and other financial and operational factors. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

49. *Regulation of foreign ownership of Indian securities by the GoI may have an adverse effect on the price of the Equity Shares. Further, our ability to raise foreign capital may be constrained by Indian law.*

Foreign ownership of Indian securities is subject to GoI regulation. Under the foreign exchange regulations currently in force in India, transfers of equity shares between non-residents and residents are permitted (subject to certain exceptions) if they comply with inter alia, the pricing guidelines specified by the RBI, sectoral caps and reporting requirements specified under the Indian foreign exchange regulations. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI or the competent authority under the FEMA Rules and the FDI Policy, as applicable, will be required. In accordance with foreign exchange regulations currently in effect in India, under certain circumstances the RBI must approve the sale of the Equity Shares from a non-resident of India to a resident of India or vice-versa if the sale does not meet certain requirements specified by the RBI. Additionally, any person who seeks to convert the Rupee proceeds from any such sale into foreign currency and repatriate that foreign currency from India is required to obtain a no-objection or a tax clearance certificate from the Indian income tax authorities. As provided in the foreign exchange controls currently in effect in India, the RBI has provided that the price at which the Equity Shares are transferred be calculated in accordance with internationally accepted pricing methodology for the valuation of shares at an arm's length basis, and a higher (or lower, as applicable) price per share may not be permitted. We cannot assure you that any required approval from the RBI or any other government agency can be obtained on terms favourable to a non-resident investor in a timely manner or at all. Because of possible delays in obtaining requisite approvals, investors in the Equity Shares may be prevented from realising gains during periods of price increase or limiting losses during periods of price decline.

Further, the GoI on April 22, 2020 amended the FEMA Rules pursuant to which any investment into India by an entity of a country which shares a land border with India, or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, shall require the approval of the GoI. Further, in terms of the FDI Policy and the FEMA Rules, foreign investment in the agriculture sector, other than a) Floriculture, Horticulture, and Cultivation of Vegetables & Mushrooms under controlled conditions; b) Development and Production of seeds and planting material; c) Animal Husbandry (including breeding of dogs), Pisciculture, Aquaculture, Apiculture; and d) Services related to agro and allied sectors is not allowed. For details, including in relation to the restriction on foreign investment while issuance of fresh equity shares, see "Restrictions on Foreign Ownership of Indian Securities" on page 207.

Accordingly, investment under FDI route in our Company may be restricted. We cannot assure you that any required approval or clearance from the RBI or any other governmental agency can be obtained on any particular terms or at all. As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources for our projects and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition, cash flows and results of operations.

50. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by our significant shareholders may dilute your shareholding and adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in the Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

51. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The issue price of the equity shares has been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled “*Basis for Issue Price*” beginning on page 65 of the Draft Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

52. *We have not independently verified certain data in this Draft Prospectus.*

We have not independently verified data from the Industry and related data contained in this Draft Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

EXTERNAL RISK FACTORS

53. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*

Our Company is subject to various regulations and policies. For details see section titled “Key Industrial Regulations and Policies” beginning on page no. 90 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

54. *If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations*

The Government of India may implement new laws or other regulations that could affect the industry, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please see “Statement of Tax Benefits” on page no. 70 of this Draft Prospectus. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

55. *A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.*

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations. Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

56. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and any other country might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

57. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also in the past experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

58. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

59. Natural disasters, draught, floods, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India, or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

GLOBAL ECONOMY OVERVIEW

The global economy continues to recover slowly from the blows of the pandemic, Russia’s invasion of Ukraine, and the cost-of-living crisis. In retrospect, the resilience has been remarkable. Despite the disruption in energy and food markets caused by the war, and the unprecedented tightening of global monetary conditions to combat decades-high inflation, the global economy has slowed, but not stalled. Yet growth remains slow and uneven, with growing global divergences. The global economy is limping along, not sprinting.

Global activity bottomed out at the end of last year while inflation—both headline and underlying (core)—is gradually being brought under control. But a full recovery toward prepandemic trends appears increasingly out of reach, especially in emerging market and developing economies. According to our latest projections, global growth will slow from 3.5 percent in 2022 to 3 percent this year and 2.9 percent next year, a 0.1 percentage point downgrade for 2024 from our July projections. This remains well below the historical average. Headline inflation continues to decelerate, from 9.2 percent in 2022, on a year-over-year basis, to 5.9 percent this year and 4.8 percent in 2024. Core inflation, excluding food and energy prices, is also projected to decline, albeit more gradually than headline inflation, to 4.5 percent in 2024.

Figure 1.2. The COVID-19 Shock: Returning to Normal

As a result, projections are increasingly consistent with a “soft landing” scenario, bringing inflation down without a major downturn in activity, especially in the United States, where the forecast increase in unemployment is very modest, from 3.6 to 3.9 percent by 2025. But important divergences are appearing. The slowdown is more pronounced in advanced economies than in emerging market and developing ones. Within advanced economies, the US surprised on the upside, with resilient consumption and investment, while euro area activity was revised downward. Many emerging market economies proved quite resilient and surprised on the upside, with the notable exception of China, facing growing headwinds from its real estate crisis and weakening confidence.

Three global forces are at play. First, the recovery in services is almost complete. Over the past year, strong demand for services supported service-oriented economies—including important tourism destinations such as France and Spain—relative to manufacturing powerhouses such as China and Germany. High demand for labor-intensive services also translated into tighter labor markets, and higher and more persistent services inflation. But services activity is now weakening alongside a persistent manufacturing slowdown, suggesting services inflation will decrease in 2024 and labor markets and activity will soften.

Second, part of the slowdown is the result of the tighter monetary policy necessary to bring inflation down. This is starting to bite, but the transmission is uneven across countries. Tighter credit conditions are weighing on housing markets, investment, and activity, more so in countries with a higher share of adjustable-rate mortgages or where households are less willing, or able, to dip into their savings. Firm bankruptcies have increased in the US and the euro area, although from historically low levels. Countries are also at different points in their hiking cycles: advanced economies (except Japan) are near the peak, while some emerging market economies, such as Brazil and Chile, have already started easing.

Third, inflation and activity are shaped by the incidence of last year’s commodity price shock. Economies heavily dependent on Russian energy imports experienced a steeper increase in energy prices and a sharper slowdown. Some of our recent work shows that the pass-through from higher energy prices played a large role in driving core inflation upward in the euro area, unlike in the United States, where core inflation pressures reflect instead a tight labor market.

Despite signs of softening, labor markets in advanced economies remain buoyant, with historically low unemployment rates helping to support activity. So far, there is scant evidence of a “wage-price spiral,” and real wages remain below prepandemic levels. Further, many countries experienced a sharp—and welcome—compression in the wage distribution. Some of this compression reflects the higher amenity value of flexible and remote work schedules for high earners, reducing wage pressures for that group.

Indian Economy Overview

India’s economy has demonstrated resilience despite a challenging external environment, says the World Bank in its latest India Development Update, a World Bank flagship publication. The report titled “Navigating the Storm”, finds that while the deteriorating external environment will weigh on India’s growth prospects, the economy is relatively well positioned to weather global spillovers compared to most other emerging markets. Impact of a tightening global monetary policy cycle, slowing global growth and elevated commodity prices will mean that the Indian economy will experience lower growth in 2022-23 financial year compared to 2021-22. Despite these challenges, the update expects India to register a strong GDP growth and remain one of the fastest growing major economies in the world, due to robust domestic demand.

The World Bank has revised its 2022-23 GDP forecast upward to 6.9 percent from 6.5 percent (in October 2022), considering a strong outturn in India in the second quarter (July-September) of the 2022-23 financial year. "India’s economy has been remarkably resilient to the deteriorating external environment, and strong macroeconomic fundamentals have placed it in good stead compared to other emerging market economies," said Auguste Tano Kouame, World Bank's Country Director in India. “However, continued vigilance is required as adverse global developments persist.”

The report forecasts that the India economy will grow at slightly lower rate of 6.6 percent in the 2023-24 fiscal year. A challenging external environment will affect India’s economic outlook through different channels. The report states that rapid monetary policy tightening in advanced economies has already resulted in large portfolio outflows and depreciation of the Indian Rupee while high global commodity prices have led to a widening of the current account deficit. However, it argues that India’s economy is relatively insulated from global spillovers compared to other emerging markets. This is partly because India has a large domestic market and is relatively less exposed to international trade flows. The report finds that while a 1 percentage point decline in growth in the US is associated with a 0.4 percentage point decline in India’s growth, the effect is around 1.5 times larger for other emerging economies. Analysis for growth spillovers from the EU and China also yields similar results.

India’s external position has also improved considerably over the past decade. The current-account deficit is adequately financed by

improving foreign direct investment inflows and a solid cushion of foreign exchange reserves (India has one of the largest holdings of international reserves in the world). Policy reforms and prudent regulatory measures have also played a key role in developing resilience in the economy. Increased reliance on market borrowings has improved the transparency and credibility of fiscal policy and the government has diversified the investor base for government securities. The introduction of a formal inflation targeting framework during the past decade was an important step in lending credibility to monetary policy decisions. While there are still some challenges in the financial sector, the adoption of several regulatory and policy measures—including the introduction of a new Insolvency and Bankruptcy Code and the creation of the new National Reconstruction Company Limited—facilitated an improvement in financial sector metrics over the past five years; these policy interventions are also expected to help alleviate pressures related to non-performing loans.

“A well-crafted and prudent policy response to global spillovers is helping India navigate global and domestic challenges,” said Dhruv Sharma, Senior Economist, World Bank, and lead author of the report. The report notes that both levers of macroeconomic policy – fiscal and monetary – have played a role in managing the challenges that have emerged over the past year. The report notes that the RBI withdrew accommodative monetary policy settings in a measured approach as it balanced the need to rein in inflation while continuing to support economic growth. Fiscal policy supported the central bank’s rate actions by cutting excise duty and other taxes on fuel to moderate the impact of higher global oil prices on inflation. However, the report also cautions that there is a trade-off between trying to limit the adverse impact of global spillovers on India’s growth and available policy space.

As per the 2nd advance estimates for 2022-23, the total horticulture production is estimated to be 351.92 Million Tonne, surpassing the total foodgrain production of 329.69 Million Tonne during the year. At present, India is the second largest producer of vegetables and fruits in the world. Country ranks first in the production of number of crops like Banana, Lime & Lemon, Papaya, Okra.

The Horticulture production in the country has been steadily increasing over the years due to the proactive policies and initiatives of the Government of India and the State Governments and the improved crop production technologies and management practices. For the holistic development of horticulture, for increasing area, production and creation of post-harvest infrastructure, the Government is implementing Mission for Integrated Development of Horticulture (MIDH), a Centrally Sponsored Scheme in the States/UTs since 2014-15. Under MIDH, support for production of quality planting material, area expansion of fruits, vegetables, spices and plantation crops, protected cultivation and creation of post-harvest management infrastructures, training and capacity building etc., of farmers are provided.

The project proposals of State Governments for horticulture development are also supported under Rashtriya Krishi Vikas Yojana (RKVY). The details of State-wise horticulture production in the country during the last ten years are given below –

Agricultural Sector

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India's population. India has the world's largest cattle herd (buffaloes), the largest area planted for wheat, rice, and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. The agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country's population. Thus, farmers become an integral part of the sector to provide us with a means of sustenance.

Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

Foodgrain production in India touched 330.5 million metric tonnes (MT) in 2022-23 (3rd Advance Estimate). India is the world's 2nd largest producer of food grains, fruits and vegetables and the 2nd largest exporter of sugar. A total of 521.27 LMT rice has been anticipated for procurement for the upcoming KMS 2023-24, up from 496 LMT produced during the previous KMS 2022-23.

Market Size

According to Inc42, the Indian agricultural sector is predicted to increase to US\$ 24 billion by 2025. Indian food and grocery market is the world's sixth largest, with retail contributing 70% of the sales. India's agricultural and processed food products exports stood at US\$ 43.37 billion in FY23 (April 2022-January 2023). As per third Advance Estimates for FY23 (Kharif only), total foodgrain production in the country is estimated at 330.5 million tonnes. As per the Second Advance Estimates of National Income, the share of GVA of agriculture and allied sectors in the total economy in 2022-23 was 18.3%, with a growth rate of 3.3%.

Rabi crop area has increased by 3.25%, from 697.98 lakh hectares in 2021-22 to 720.68 lakh hectares in 2022-23. This is a 22.71 lakh hectare, a 13.71% increase over the average sown area in 2021-22. In the current crop year (July 2022-June 2023), India's horticulture output is expected to have hit a record 350.87 million tonnes (MT), as production of fruits, vegetables, spices, and plantation crops surged dramatically. In 2022-23, of the 141 million hectares of gross sown area in the country, nearly 73 million hectares, or 52%, had irrigation access. The Agriculture and Allied industry sector has witnessed some major developments, investments and support from the Government in the recent past. Between April 2000-June 2023, FDI in agriculture services stood at US\$ 4.75 billion.

According to the Department for Promotion of Industry and Internal Trade (DPIIT), the Indian food processing industry has cumulatively attracted a Foreign Direct Investment (FDI) equity inflow of about US\$ 12.15 billion between April 2000-June 2023. This accounts for 1.88% of total FDI inflows received across industries.

Rapid population expansion in India is the main factor driving the industry. The rising income levels in rural and urban areas, which have contributed to an increase in the demand for agricultural products across the nation, provide additional support for this. In accordance with this, the market is being stimulated by the growing adoption of cutting-edge techniques including blockchain, artificial intelligence (AI), geographic information systems (GIS), drones, and remote sensing technologies, as well as the release of various e-farming applications.

In terms of exports, the sector has seen good growth in the past year. India's agricultural and processed food products exports stood at US\$ 53.12 billion in 2022-23. The exports for principal commodities (April 2023-June 2024) were the following:

- Wheat and Other Cereals: US\$ 253.19 million.
- Non-Basmati Rice: US\$ 1.52 billion.
- Oil Meal: US\$ 445.79 million.
- Raw Cotton: US\$ 231.26 million.
- Sugar: US\$ 711.43 million.
- Spices: US\$ 1.11 million.

3. IMPAIRMENT

The Management periodically assesses, using external and internal sources, whether there is an indication that an asset may be impaired. An impairment loss is recognized wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

4. FOREIGN EXCHANGE TRANSACTIONS

Foreign-currency denominated monetary assets and liabilities if any are translated at exchange rates in effect at the Balance Sheet date. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Costs incurred in raising funds are amortized equally over the period for which the funds are acquired. All other borrowing costs are charged to profit and loss account.

- Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income tax payable in India is determined in accordance with the provisions of the Income Tax Act, 1961.

Accordingly, MAT is recognised as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with it will fructify.
- Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.
- Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.
- The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

10. EARNINGS PER SHARE

11. PROVISIONS AND CONTINGENT LIABILITIES

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the likely future outflow of economic benefits required to settle the obligation at the reporting date.

Where no reliable estimate can be made, a disclosure is made as contingent liability. A disclosure for a contingent liability is also made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

12. CASH & CASH EQUIVALENTS

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS

You should read the following discussion in conjunction with our restated financial statements attached in the chapter titled “Financial Information of the Company” beginning on page 119. You should also read the section titled “Risk Factors” on page 22 and the section titled “Forward Looking Statements” on page 16 of this Draft Prospectus, which discusses a number of factors and contingencies that could affect our financial condition and results of operations. The following discussion relates to us, and, unless otherwise stated or the context requires otherwise, is based on our Restated financial Statements.

Our financial statements have been prepared in accordance with Indian GAAP, the Companies Act and the SEBI (ICDR) Regulations and restated as described in the report of our auditor dated December 30, 2023 which is included in this Draft Prospectus under “Financial Statements”. The Restated Financial Information has been prepared on a basis that differs in certain material respects from generally accepted accounting principles in other jurisdictions, including US GAAP and IFRS. Our financial year ends on March 31 of each year, and all references to a particular financial year are to the twelve-month period ended March 31 of that year.

BUSINESS OVERVIEW

Our Company has been incorporated on December 27, 2023 pursuant to the conversion of the limited liability partnership i.e. “TGIF Agribusiness LLP”. The erstwhile LLP was previously known as “ARV Farmpro LLP” which was formed by the conversion of the partnership firm i.e. “Arvee Farm Products”. The partnership firm i.e. “Arvee Farm Products” was formed by our current promoter Niraj Chhaganraj Gemawat and her wife Rachna Gemawat pursuant to a deed of partnership dated February 28, 2014. For further details, please refer to section titled “Our History and Corporate Structure” beginning on page 98 of this Draft Prospectus.

We are primarily a horticulture company engaged in open farming of certain fruits and vegetables. Our farm land is spread over an area of over 110 acres and is situated in the vicinity of three villages i.e. Ajari, Kasindra and Kojra, all of which are located in the tehsil of Pindwara, district Sirohi, Rajasthan. We have obtained all our farm lands on lease basis from our Promoter, Niraj Chhaganraj Gemawat, Rachna Gemawat, Niraj Chhaganraj Gemawat HUF and Vipin Moharir vide a lease deed dated April 01, 2023.

Our company is mainly engaged in the farming of pomegranate which contribute to more than 95% of our revenue from operations. Apart from the farming of pomegranate we are also engaged in the farming and cultivation of dragon fruits and Sagwan trees. In the last three financial years, i.e. F.Y. 2020-21, 2021-22 and 2022-23, apart from pomegranate, which has remained our main crop, we have also grown and harvested lemon, water melon and chilly.

We follow different farming practices so as to produce quality fruits such as fruit thinning, wherein some portion of fruit crop from the tree is removed before its maturity, in order to improve the general size and quality of the remaining crop, leaf vegetative growth practice to reduce tolerance level of external appearance, protecting fruit with protection material, measuring soil moisture to determine the water application. Under our farming model, wherein we generally employ farmers and workers in the vicinity of our farms. We also engage ourselves in to supervision of farmers and croppers to constantly monitor the quantity and quality of crops.

With the growing consumer knowledge, interest, and purchasing power the demand for the fruits have also increased. This, in turn, played an important role in increasing our product demand in the market. We maintain adherence to quality and safety standards including plant quality, product quality, use of plant nutrients, fertilizers, pesticides to safeguard the plants and produce etc. These steps ensure the fulfilment of food safety and quality control and helps us in increasing the farm produce. We use drip irrigation systems for each of our farms to ensure proper irrigation of the farms and also minimise time spent on irrigation activity. The post-harvest facility has been designed to avoid contamination and to maintain food hygiene in the process. The products are packed as per individual client requirement and delivered to the customers.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant

to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases.

The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly, Department of Industrial Policy and Promotion) (“DPIIT”), issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. In terms of FDI Policy and FEMA Rules, FDI in a company engaged in agricultural activities, other than a) Floriculture, Horticulture, and Cultivation of Vegetables & Mushrooms under controlled conditions; b) Development and Production of seeds and planting material; c) Animal Husbandry (including breeding of dogs), Pisciculture, Aquaculture, Apiculture; and d) Services related to agro and allied sectors is not allowed.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that: (i) the activities of the investee Company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Each Investor should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Investor shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

For further details, see chapter titled “Issue Procedure” on page 186 of this Draft Prospectus.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Equity Shares are only being offered and sold (i) within the United States only to persons reasonably believed to be “qualified institutional buyers” (as defined in Rule 144A under the Securities Act and referred to in this Prospectus as “U.S. QIBs”) in transactions exempt from, or not subject to, the registration requirements of the U.S. Securities Act, and (ii) outside the United States in offshore transactions in compliance with Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur. For the avoidance of doubt, the term “U.S. QIBs” does not refer to a category of institutional investors defined under applicable Indian regulations and referred to in this Prospectus as “QIBs”.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Issue may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Investors. Our Company, and the LM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Prospectus. Investors are advised to make their independent investigations, seek independent legal advice about its ability to participate in the Issue and ensure that the number of Equity Shares Issue for do not exceed the applicable limits
