that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our operations and profitability.

8. *Based on certain qualifications noted by our auditors, there are deficiencies in certain aspects of our internal controls of our company.*

In connection with the audits of our financial statements, our Auditors have reported a qualification in respect to matters specified in the Companies (Auditors Report) Order, 2003, as amended, in the annexure to their audit reports for each of fiscal 2013-14 that the scope and coverage of internal audit system of the company is required to be enlarged and should commensurate with size of the Company and nature of its business. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment.

Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Further, as on date, we have not entered into any hedging transactions for managing the risk of foreign currency movements. Therefore, in the event there is sustained appreciation in the Rupee, our revenues in Rupee terms will be adversely affected although there may not be a fall in sales in actual terms. The interests of the Promoter and Promoter Group as the Company’s controlling shareholders could conflict with the Company’s interests or the interests of its other shareholders. We cannot assure you that the Promoter and Promoter Group will act to resolve any conflicts of interest in the Company’s or your favour.

36. *We may not be able to sustain effective implementation of our business and growth strategies.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

45. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing of the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares

46. The requirements of being a listed company may strain our resources.

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulations, 2015 which will require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

47. There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.

Prior to the Issue, there has not been a public market for our Equity Shares. We cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling our Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of our Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors.

48. Any future issuance of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Issue paid-up share capital, held by our Promoter or other shareholders will be locked-in for a period of 1 (one) year and minimum promoter contribution subject to a minimum of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the sub-section titled "*Notes to the Capital Structure*" under the section titled "*Capital Structure*" beginning on page 48 of the Draft Prospectus. The future issuance or sale of the equity shares of our company by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

49. We may decide not to proceed with the Issue at any time before Allotment. If we decide not to proceed with the Issue after the Issue Opening Date but before Allotment, the unblocking of Application amounts will be subject to us complying with our obligations under applicable laws.

We, in consultation with the Lead Manager, reserve the right not to proceed with the Issue at any time before the Allotment. If we withdraw the Issue after the Issue Opening Date, we will be required to unblocking of all Application amounts of the Issue Closing Date. Notwithstanding the foregoing, the Issue is also subject to obtaining (i) the final listing and trading approvals of the Stock Exchanges, which the Company shall apply for after Allotment and (ii) the final RoC approval.

50. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Subsequent to listing, we will be subject to a daily circuit breaker imposed on listed companies by the BSE, which will not allow transactions beyond certain volatility in the price of the Equity Shares. Circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the Securities and Exchange Board of India, or SEBI, on Indian Stock Exchanges. The percentage limit for the circuit breaker is set by the Stock Exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

51. *The stock price may be volatile, and you may be unable to resell your shares at or above the Issue price or at all. Also, there is no existing market for our Equity Shares and we cannot assure you that such a market will develop.*

Prior to this Public Issue, there is no public market for the Equity Shares of our company, and an active trading market may not develop or be sustained upon the completion of this Issue. Even though a Market Maker has been appointed for our stock, since there has been no public market for our Company's Equity Shares, an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Issue. The Issue Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to:

- Volatility in the Indian and Global economy
- Company's result and performance
- Performance of competitors.
- Significant development with respect to the fiscal, political and financial condition in the economy.

The risk of loss associated with this characteristic may be greater for investors expecting to sell Equity Shares purchased in this Issue soon after the Issue.

52. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

53. *There can be no assurance that Our Company's securities will continue to be listed on the Stock Exchanges.*

Pursuant to the listing of our Equity Shares on the Stock Exchanges, we will be required to comply with certain regulations and/or guidelines as prescribed by SEBI and the Stock Exchanges. However, in the event that we fail to comply with any of the aforesaid regulations and/or guidelines, there can be no assurance that our Equity Shares will continue to be listed on the Stock Exchanges.

Risks Relating to India /External Risk Factors

54. *Our business is dependent on economic growth in India.*

Our performance is dependent on the health of the overall Indian economy. There have been periods of slowdown in the economic growth of India. India economic growth is affected by various factors including domestic consumption and savings, balance of trade movements primarily resulting from export demand and movements in key imports, such as oil and oil products, and annual rainfall, which affect agricultural production. For example, in the monsoon of 2009, Several parts of the country experienced below average rainfall, leading to reduced farm output which impaired economic growth. In the past, economic slowdowns have harmed industries and industrial development in the country. Any future slowdown in the Indian economy could harm our business, financial condition and results of operations.

55. *Any downgrading of India's debt rating by a domestic or international rating agency could have a negative impact on our business.*

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares.

56. *Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.*

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, such as the attacks in Mumbai in November 2008 and in July 2011, may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

57. *If the rate of Indian price inflation increases, our results of operations and financial condition may be adversely affected.*

In recent years, India's wholesale price inflation index has indicated an increasing inflation trend compared to prior periods. An increase in inflation in India could cause a rise in the price of transportation, wages, raw materials or any other expenses. In particular, the prices of raw materials required for manufacturing of our products are subject to increase due to a variety of factors beyond our control, including global commodities prices and economic conditions. If this trend continues, we may be unable to reduce our costs or pass our increased costs on our customers and our results of operations and financial condition may be materially and adversely affected.

58. *Any changes in regulations or applicable government incentives would materially affect our operations and growth prospects.*

We are subject to various regulations and policies. For details see section titled "**Key Industry Regulations and Policies**" beginning on page 114 of the Draft Prospectus. Our business could be materially affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that we will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which would have a material adverse effect on our business, financial condition and results of operations.

59. *Instability of economic policies and the political situation in India could adversely affect the fortunes of the industry.*

Unstable internal and international political environment could impact the economic performance in both the short term and the long term. The Government of India has pursued the economic liberalization policies including relaxing restrictions on the private sector over the past several years. The present Government has also announced policies and taken initiatives that support continued economic liberalization. The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Our Company's business, and the market price and liquidity of the Equity Shares, may be affected by changes in interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments affecting India.

60. *The extent and reliability of Indian infrastructure could adversely affect our results of operations and financial condition.*

India's physical infrastructure is less developed than that of many developed countries. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have an adverse effect on our results of operations and financial condition.

61. *The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.*

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factors. The extent and severity of these natural disasters determines their effect on the Indian economy. Although the long term effect of diseases such as the H5N1 "avian flu" virus, or H1N1, the swine flu virus, cannot currently be predicted, previous occurrences of avian flu and swine flu had an adverse effect on the economies of those

countries in which they were most prevalent. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

62. *If certain labour laws become applicable to us, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

63. *The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

A majority of the provisions and rules under the Companies Act, 2013 have come into effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital (including provisions in relation to issue of securities on a private placement basis), disclosures in offering documents, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in futures trading. Further, the Companies Act, 2013 imposes greater monetary and other liability on us and our directors for any non-compliance.

To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited jurisprudence on them. In the event our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

64. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, the RBI must approve the sale of the Equity Shares from a non-resident of India to a resident of India if the sale does not meet the requirements of the RBI Circular dated October 4, 2004, as amended by circulars dated April 22, 2009 and May 4, 2010. Additionally, any person who seeks to convert Indian Rupee proceeds from such sale into foreign currency and repatriate that foreign currency from India is required to obtain a no-objection or tax clearance certificate from the Indian income tax authorities. The RBI is required to approve the price at which the Equity Shares are transferred based on a specified formula and a higher price per share may not be permitted. The approval from the RBI or any other government agency may not be obtained on terms favorable to a non-resident investor in a timely manner or at all. Because of possible delays in obtaining requisite approvals, investors in the Equity Shares may be prevented from realizing gains during periods of price increases or limiting losses during periods of price declines.

65. *Political, economic and social developments in India could adversely affect our business.*

The Central and State Governments serve multiple roles in the Indian economy, including as producers, consumers and regulators, which have significant influence on the manufacturing industry and us. Economic liberalization policies have encouraged private investment in various sectors, and changes in these governmental policies could have a significant impact on the business and economic conditions in India in general and the manufacturing sector in particular, which in turn could adversely affect our business, future financial condition and results of operations. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares.

66. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

- The GoI has proposed a comprehensive national goods and services tax (“GST”) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure which is proposed to be effective from April 1, 2016. While the

GoI and other state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

- Further, the General Anti Avoidance Rules (“GAAR”) are proposed to be made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

We have not determined the impact of these proposed legislations on our business. Uncertainty in the applicability, Interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, the GoI may introduce a waiver or incentive scheme in relation to specific population segments such as MSEs in public interest, pursuant to which we may be required to offer our products and services at discounted rates. This may affect our business and results of operations.

SUMMARY OF OUR INDUSTRY

This is only a summary and does not contain all the information that you should consider before investing in our Equity Shares. Global Economy Outlook

Economic growth across the world is losing growth momentum. Slowdown in emerging market economies as well as developed countries has dampened the prospects for modest economic growth in 2015 and 2016. Among major economies, growth in United States and United Kingdom is on track, while Japan is struggling for growth. Economic growth in Euro area showed divergent growth pattern across countries. While Spain grew at strong pace in Q2 2015, growth in Germany and Italy slowed down. On the other hand, economic growth in France remained flat in quarter ending June 2015.

On September 17, 2015, Federal Open Market Committee (FOMC) kept the benchmark interest rate in U.S unchanged, amid risk of financial panic and turmoil in emerging markets and slowing export growth in United States. An interest rate hike by the Federal Reserve poses a risk of jump in global crude oil prices due to strengthening of US Dollar. This could further suppress the demand for crude oil globally. Besides, it could also cause further slowdown in major emerging market economies such as China, India, Brazil, Russia etc., leading to overall global economic downturn.

Organisation for Economic Co-operation and Development (OECD), in its interim Economic Outlook report released in September 2015, has downgraded the global growth forecast for 2015 (by 0.1 percentage point) to 3 per cent and for 2016 (by 0.2 percentage point) to 3.6 per cent. As per OECD, the growth rate forecast for United States for 2015 and 2016 stood at 2.4 per cent and 2.6 per cent, respectively. While, the projection for real GDP growth in India was 7.2 per cent in 2015 and 7.3 per cent in 2016.

Indian Economy Outlook

With 1.2 billion people and the world’s fourth-largest economy, India’s recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

Historic changes are unfolding, unleashing a host of new opportunities to forge a 21st-century nation. India will soon have the largest and youngest workforce the world has ever seen. At the same time, the country is in the midst of a massive wave of urbanization as some 10 million people move to towns and cities each year in search of jobs and opportunity. It is the largest rural-urban migration of this century.

The historic changes unfolding have placed the country at a unique juncture. How India develops its significant human potential and lays down new models for the growth of its burgeoning towns and cities will largely determine the shape of the future for the country and its people in the years to come.

Massive investments will be needed to create the jobs, housing, and infrastructure to meet soaring aspirations and make towns and cities more livable and green. Generating growth that lifts all boats will be key, for more than 400 million of India’s people—or one-third of the world’s poor—still living in poverty. And, many of those who have recently escaped poverty (53 million people between 2005-10 alone) are still highly vulnerable to falling back into it. In fact, due to population growth, the absolute number of poor people in some of India’s poorest states actually increased during the last decade.

Packaging Industry in India

With advancement in technology and general awareness, the packaging sector in India is well poised as most of the raw materials for packaging are abundantly available in the country. Moreover, the per capita spending has increased tremendously, leading to changing rural markets and a growing middle class who demand the best of products. Various upgraded technologies are being used in industry

such as aseptic packaging, retort packaging and biodegradable packaging to enhance the life of food product. Moreover, the plastic packaging market is expanding rapidly registering a growth of 20-25 per cent per annum and is valued at 6.8 million tonne while the paper packaging industry stands at 7.6 million tonne. The packaging industry is poised to grow rapidly led by the increasing use of innovative packaging equipments and the rising flexible packaging market.

Plastics Industry in India

The Indian plastics industry made a promising beginning in 1957 with the production of polystyrene. Thereafter, significant progress has been made, and the industry has grown and diversified rapidly. The industry spans the country and hosts more than 2,000 exporters. It employs about 4 million people and comprises more than 30,000 processing units, 85-90 per cent of which are small and medium-sized enterprises.

Steady Growth in Exports and Advantage India

India is one of the most promising exporters of plastics among developing countries. The plastics industry produces and exports a wide range of raw materials, plastic-moulded extruded goods, polyester films, laminates, moulded/soft luggage items, writing instruments, plastic woven sacks and bags, polyvinyl chloride (PVC), leather cloth and sheeting, packaging, consumer goods, sanitary fittings, electrical accessories, laboratory/medical surgical ware, tarpaulins, laminates, fishnets, travel ware, and others.

Demand from original equipment manufacturers (OEMs) has led to producers focusing more on delivering products customised in line with end-user needs. Moreover, the Indian plastics industry has started manufacturing specific items to meet customer requirements. Design, style, and pattern are set based on the requirements of customers in export markets.

The Indian plastics industry offers excellent potential in terms of capacity, infrastructure and cheap labour availability. It is supported by a large number of polymer producers, and plastic process machinery and mould manufacturers in the country.

Among the industry's major strengths is the availability of raw materials in the country. Thus, plastic processors do not have to depend on imports. These raw materials, including polypropylene, high-density polyethylene, low-density polyethylene and PVC, are manufactured domestically.

Indian Textile Industry

The textile and apparel industry can be broadly divided into two segments - yarn and fibre, and processed fabrics and apparel. India accounts for 14 per cent of the world's production of textile fibres and yarns (largest producer of jute, second largest producer of silk and cotton, and third largest in cellulosic fibre). India has the highest loom capacity (including hand looms) with 63 per cent of the world's market share.

The domestic textile and apparel industry in India is estimated to reach US\$ 141 billion by 2021 from US\$ 67 billion in 2014. Increased penetration of organised retail, favourable demographics, and rising income levels are likely to drive demand for textiles. India is the world's second largest exporter of textiles and clothing.

Textile and apparel exports from India are expected to increase to US\$ 82 billion by 2021 from US\$ 40 billion in 2014. Readymade garments remain the largest contributor to total textile and apparel exports from India. In FY15 the segment had a share of 40 per cent of all textile and apparel exports. Cotton and man-made textiles were the other major contributors with shares of 31 per cent and 16 per cent, respectively.

Rising government focus and favourable policies is leading to growth in the textiles and clothing industry. Foreign direct investment (FDI) in textile sector increased to US\$ 1,587.8 million in FY15 from US\$ 1,424.9 million in FY14. The Ministry of Textiles is encouraging investments through increasing focus on schemes such as Technology Up-gradation Fund Scheme (TUFS). To promote apparel exports, 12 locations have been approved by the government to set up apparel parks for exports. As per the 12th Five Year Plan, the Government plans to provide a budgetary support of US\$ 4.25 billion to textiles. Free trade with ASEAN countries and proposed agreement with European Union will also help boost exports.

Global Economy Outlook

Economic growth across the world is losing growth momentum. Slowdown in emerging market economies as well as developed countries has dampened the prospects for modest economic growth in 2015 and 2016. Among major economies, growth in United States and United Kingdom is on track, while Japan is struggling for growth. Economic growth in Euro area showed divergent growth pattern across countries. While Spain grew at strong pace in Q2 2015, growth in Germany and Italy slowed down. On the other hand, economic growth in France remained flat in quarter ending June 2015.

On September 17, 2015, Federal Open Market Committee (FOMC) kept the benchmark interest rate in U.S unchanged, amid risk of financial panic and turmoil in emerging markets and slowing export growth in United States. An interest rate hike by the Federal Reserve poses a risk of jump in global crude oil prices due to strengthening of US Dollar. This could further suppress the demand for crude oil globally. Besides, it could also cause further slowdown in major emerging market economies such as China, India, Brazil, Russia etc., leading to overall global economic downturn.

Organisation for Economic Co-operation and Development (OECD), in its interim Economic Outlook report released in September 2015, has downgraded the global growth forecast for 2015 (by 0.1 percentage point) to 3 per cent and for 2016 (by 0.2 percentage point) to 3.6 per cent. As per OECD, the growth rate forecast for United States for 2015 and 2016 stood at 2.4 per cent and 2.6 per cent, respectively. While, the projection for real GDP growth in India was 7.2 per cent in 2015 and 7.3 per cent in 2016.

United States:

- According to the "second" estimate by BEA, quarterly real GDP grew by 0.9% (Q-o-Q) in Q2 of 2015. In annualize terms it grew by 3.7% in Q2, 2015.
- Annual CPI inflation was stable at 0.2% in August 2015, the same rate as in previous month.
- In August 2015, the unemployment rate stood at 5.1%.

United Kingdom

- According to "second" estimate by ONS, UK GDP growth rate was 0.7% (Q-o-Q) during Q2, 2015.
- Annual CPI inflation stood at 0.0% in August 2015.
- The unemployment rate stood at 5.5% for May 2015 to July 2015' period.

Japan:

- According to "second" preliminary estimate by Cabinet Office of Japan, GDP contracted by 0.3 % (Q-o-Q) in Q2, 2015. In annualize terms it contracted by 1.2% in Q2, 2015.
- CPI inflation slowed down to 0.2% in July 2015 from 0.4% in previous month.
- Unemployment rate fell to 3.3% in July 2015 from 3.4% in previous month.

Euro Zone:

- According to the "second" estimate by the Eurostat, real GDP (Q-o-Q) grew at 0.4% in both Euro Area (EA18) and EU28 during Q2, 2015.
- During August 2015, annual inflation in Euro Area and EU28 were 0.1 per cent and 0.0 per cent respectively.
- During July 2014, unemployment rate in the EA18 and EU28 were 10.9% and 9.5%, respectively.

BRIC Nations:

- Real GDP of Brazil fell by 1.85% (Q-o-Q) in Q2 of 2015. Annual CPI inflation fell to 9.53% in August 2015. Unemployment stood at 7.5% in July 2015.
- Russia's real GDP growth was -4.6% (Y-o-Y) during Q2 of 2015. Annual CPI inflation increased to 15.8% in August 2015. Unemployment rate in Russia stood at 5.3% in August 2015.
- India's real GDP grew by 7.0% (Y-o-Y) in Q1 of 2015-16. IIP grew by 4.2% (Y-o-Y) in July 2015. The headline WPI inflation stood at -4.95% in August 2015

Indian Economy Outlook

With 1.2 billion people and the world's fourth-largest economy, India's recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

Historic changes are unfolding, unleashing a host of new opportunities to forge a 21st-century nation. India will soon have the largest and youngest workforce the world has ever seen. At the same time, the country is in the midst of a massive wave of urbanization as some 10 million people move to towns and cities each year in search of jobs and opportunity. It is the largest rural-urban migration of this century.

The historic changes unfolding have placed the country at a unique juncture. How India develops its significant human potential and lays down new models for the growth of its burgeoning towns and cities will largely determine the shape of the future for the country and its people in the years to come.

Massive investments will be needed to create the jobs, housing, and infrastructure to meet soaring aspirations and make towns and cities more livable and green. Generating growth that lifts all boats will be key, for more than 400 million of India’s people—or one-third of the world’s poor—still living in poverty. And, many of those who have recently escaped poverty (53 million people between 2005-10 alone) are still highly vulnerable to falling back into it. In fact, due to population growth, the absolute number of poor people in some of India’s poorest states actually increased during the last decade.

India: Commitments by Fiscal Year (in millions of dollars)*

*Amounts include IBRD and IDA commitments

Inequity in all dimensions, including region, caste and gender, will need to be addressed. Poverty rates in India’s poorest states are three to four times higher than those in the more advanced states. While India’s average annual per capita income was \$1,410 in 2011—placing it among the poorest of the world’s middle-income countries— it was just \$436 in Uttar Pradesh (which has more people than Brazil) and only \$294 in Bihar, one of India’s poorest states. Disadvantaged groups will need to be brought into the mainstream to reap the benefits of economic growth, and women—who “hold up half the sky”—empowered to take their rightful place in the socioeconomic fabric of the country.

Fostering greater levels of education and skills will be critical to promote prosperity in a rapidly globalizing world. However, while primary education has largely been universalized, learning outcomes remain low. Less than 10 percent of the working-age population has completed a secondary education, and too many secondary graduates do not have the knowledge and skills to compete in today’s changing job market.

Improving health care will be equally important. Although India’s health indicators have improved, maternal and child mortality rates remain very low and, in some states, are comparable to those in the world’s poorest countries. Of particular concern is the nutrition of

India’s children whose well-being will determine the extent of India’s much-awaited demographic dividend; at present, an overwhelming 40 percent (217 million) of the world’s malnourished children are in India.

FDI in India

(Source: <http://www.ibef.org/economy>)

The country’s infrastructure needs are massive. One in three rural people lack access to an all-weather road, and only one in five national highways is four-lane. Ports and airports have inadequate capacity, and trains move very slowly. An estimated 300 million people are not connected to the national electrical grid, and those who are face frequent disruptions. And, the manufacturing sector—vital for job creation—remains small and underdeveloped.

Nonetheless, a number of India’s states are pioneering bold new initiatives to tackle many of India’s long-standing challenges and are making great strides towards inclusive growth. Their successes are leading the way forward for the rest of the country, indicating what can be achieved if the poorer states were to learn from their more prosperous counterparts.

India now has that rare window of opportunity to improve the quality of life for its 1.2 billion citizens and lay the foundations for a truly prosperous future—a future that will impact the country and its people for generations to come.

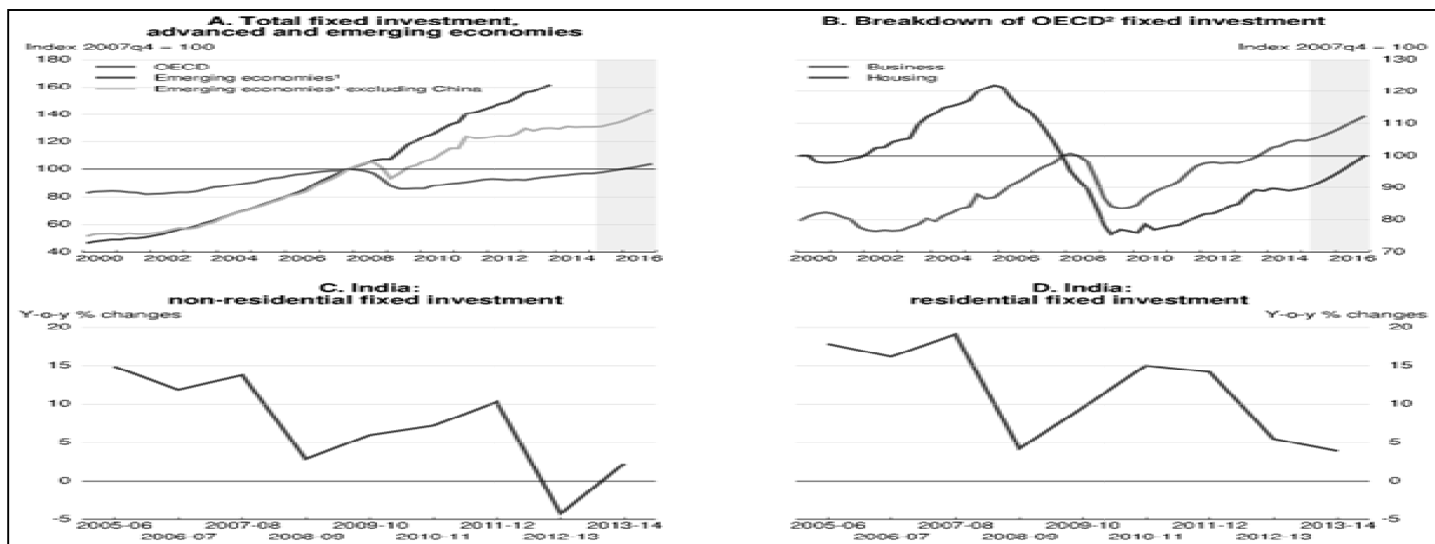

(Source: <http://www.worldbank.org/en/country/india/overview#1>)

Economic growth will remain high, supported by a revival in investment. The FY 2015-16 fiscal consolidation target has been relaxed to allow for increased infrastructure investment while structural reforms to improve the ease of doing business and the Make in India initiative should boost corporate investment. Export growth will be held back by the currency appreciation. The decline in oil prices will reduce pressures on the current account deficit, inflation and subsidies.

Improved public spending efficiency and increased revenue are required to fund needed public investment in physical and social infrastructure. Fiscal consolidation would also make room for the authorities to reduce requirements on banks to hold government bonds, which would release funds for private credit. Subsidy to food, fertiliser and oil products should be better targeted, and the envisaged sales tax (GST) and corporate tax reforms should be implemented swiftly. The reduction in inflation expectations provides room for monetary easing. Addressing non-performing loans would strengthen monetary policy transmission.

Investment failed to rebound in 2014, reflecting poor infrastructure and delays in administrative procedures. The government has deregulated the coal sector, taken measures to improve the business environment and opened up new sectors – including construction, rail and insurance — to foreign direct investment. The 2015/16 Budget raises investment in the rail sector. To revive corporate investment, further reforms are needed to reduce uncertainties surrounding land acquisition and tax regulations and to improve the quality of electricity and transport systems

Packaging Industry in India

With advancement in technology and general awareness, the packaging sector in India is well poised as most of the raw materials for packaging are abundantly available in the country. Moreover, the per capita spending has increased tremendously, leading to changing rural markets and a growing middle class who demand the best of products. Various upgraded technologies are being used in industry such as aseptic packaging, retort packaging and biodegradable packaging to enhance the life of food product. Moreover, the plastic packaging market is expanding rapidly registering a growth of 20-25 per cent per annum and is valued at 6.8 million tonne while the paper packaging industry stands at 7.6 million tonne. The packaging industry is poised to grow rapidly led by the increasing use of innovative packaging equipments and the rising flexible packaging market.

Polyester Film

Polyester film is a high-performance film made from polyethylene terephthalate (PET) resin. The Polyethylene Terephthalate (PET) resin is made from Ethylene Glycol and dimethyl terephthalate (DMT). In comparison with other common plastic films, polyester film is characterized by high tensile strength, excellent dimensional stability, low moisture absorption, good retention of physical properties over a fairly wide temperature range (-70Å° to 150Å°C), excellent electrical properties, and good optical clarity. Because of its higher price relative to PVC, polyethylene, and polypropylene film, polyester film is generally considered a specialty film among all plastic films; however, markets of considerable volume have developed that require this strong, dimensionally stable film. Prices are higher than most commercial plastic films primarily because the manufacturing process is much more costly due to the need for an orientation step.

Plastics Industry in India

The Indian plastics industry made a promising beginning in 1957 with the production of polystyrene. Thereafter, significant progress has been made, and the industry has grown and diversified rapidly. The industry spans the country and hosts more than 2,000 exporters. It employs about 4 million people and comprises more than 30,000 processing units, 85-90 per cent of which are small and medium-sized enterprises.

Steady Growth in Exports and Advantage India

India is one of the most promising exporters of plastics among developing countries. The plastics industry produces and exports a wide range of raw materials, plastic-moulded extruded goods, polyester films, laminates, moulded/soft luggage items, writing instruments, plastic woven sacks and bags, polyvinyl chloride (PVC), leather cloth and sheeting, packaging, consumer goods, sanitary fittings, electrical accessories, laboratory/medical surgical ware, tarpaulins, laminates, fishnets, travel ware, and others.

Demand from original equipment manufacturers (OEMs) has led to producers focusing more on delivering products customised in line with end-user needs. Moreover, the Indian plastics industry has started manufacturing specific items to meet customer requirements. Design, style, and pattern are set based on the requirements of customers in export markets.

The Indian plastics industry offers excellent potential in terms of capacity, infrastructure and cheap labour availability. It is supported by a large number of polymer producers, and plastic process machinery and mould manufacturers in the country.

Among the industry’s major strengths is the availability of raw materials in the country. Thus, plastic processors do not have to depend on imports. These raw materials, including polypropylene, high-density polyethylene, low-density polyethylene and PVC, are manufactured domestically.

Plastics Export Promotion Council

The Plastics Export Promotion Council (PLEXCONCIL) is the apex government body responsible for the promotion of plastic exports. PLEXCONCIL members comprise large-/medium-/small-scale manufacturers and exporters. The council supports exporters by participating in international trade fairs, exploring new markets, organising buyer- seller meets both in India and overseas, and engaging in through various other promotion and need- based activities. The council acts as an interface between the exporting community and the Government of India; sponsors delegations to target markets; and invites business delegations from overseas to India. It actively organises events such as exhibitions, fairs and conferences/workshops to promote the Indian plastics industry at national and international levels.

Metallic Fibre

The term metallic fibre, in its general sense, means simply a fibre that is made from metal. The generic term “metallic” was adopted by the U.S. Federal Trade Commission and is defined as: A manufactured fibre composed of metal, plastic-coated metal, metal-coated plastic, or a core completely covered by metal. Thus, metallic fibres are: fibres produced from metals, which may be alone or in conjunction with other substances

These metal filaments were made by beating soft metals and alloys, such as gold, silver, copper and bronze, into thin sheets, and then cutting the sheets into narrow ribbon-like filaments. The filaments were used entirely for decorative purposes, providing a glitter and sparkle that could not be achieved by other means.

As textile fibres, these metal filaments had inherent short comings which restricted their use. They were expensive to produce; they tended to be inflexible and stiff, and the ribbon-like cross-section provided cutting edges that made for a harsh, rough handle; they were troublesome to knit or weave, and they had only a limited resistance to abrasion. Apart from gold, the metals would tend to tarnish, the sparkle being dimmed with the passage of time.

Despite these shortcomings, the metallic ribbon-filament has remained in use for decorative purposes right up to the present day. The development of modern techniques of surface-protection has brought cheaper metals into use; aluminium foil, for example, may be anodized and dyed before being slit into filaments which are colourful and corrosion-resistant.

Ribbon-filaments are now manufactured in considerable quantity, e.g. as tinsel, but they remain an essentially decorative material. The filaments are weak and inextensible, and are easily broken during wear; they lack the flexibility that is essential in a genuine textile fibre.

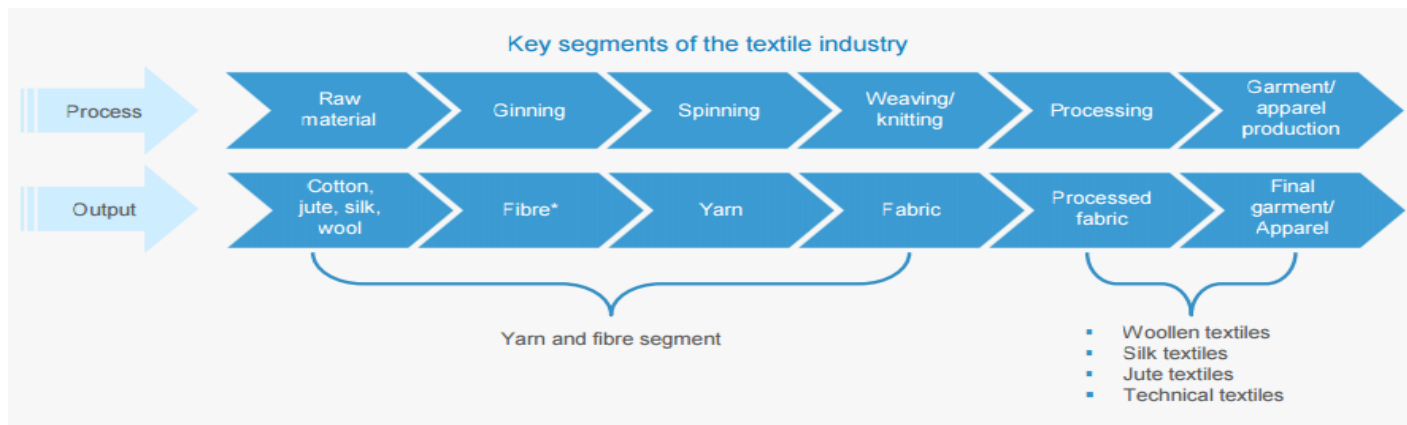

Metallic yarn

Metallic yarns are by and large made from strips of a synthetic film, such as polyester, coated with metallic particles. In one more method, aluminum foil strips are sandwiched amid layers of film. Metallic yarns may also be made by twisting a strip of metal around a natural or man-made core yarn, producing a metal surface. It is made of thin film and supported by nylon or polyester or rayon yarn according to the type of yarn.

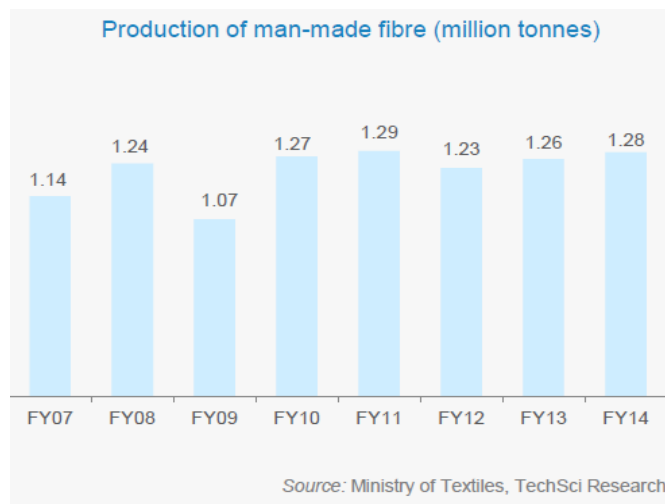

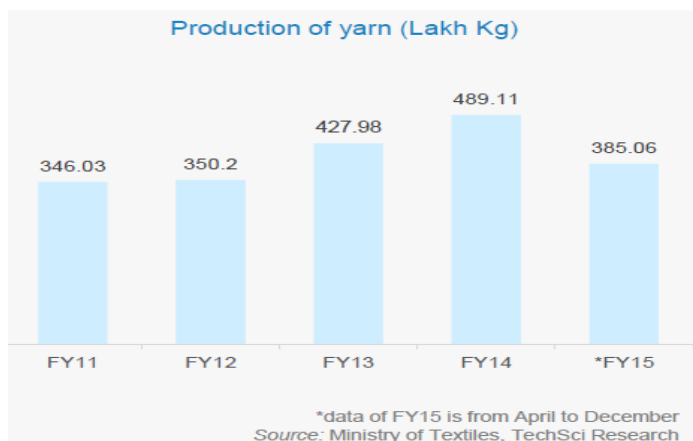

Metallic Yarn is used in manufacturing knitting wears, knit and woven fabrics, embroideries, labels etc. Some end uses have been in automotive fabrics, television front fabrics, bath towels and face cloths, clerical vestments, bathing suits, hosiery, upholstery, hat bands, etc. Also in theatrical clothing, theatre back drops, doll clothing, banners and uniforms.

Indian Textile Industry

The textile and apparel industry can be broadly divided into two segments - yarn and fibre, and processed fabrics and apparel. India accounts for 14 per cent of the world's production of textile fibres and yarns (largest producer of jute, second largest producer of silk and cotton, and third largest in cellulosic fibre). India has the highest loom capacity (including hand looms) with 63 per cent of the world's market share.

The domestic textile and apparel industry in India is estimated to reach US\$ 141 billion by 2021 from US\$ 67 billion in 2014. Increased penetration of organised retail, favourable demographics, and rising income levels are likely to drive demand for textiles. India is the world's second largest exporter of textiles and clothing.

Textile and apparel exports from India are expected to increase to US\$ 82 billion by 2021 from US\$ 40 billion in 2014. Readymade garments remain the largest contributor to total textile and apparel exports from India. In FY15 the segment had a share of 40 per cent of all textile and apparel exports. Cotton and man-made textiles were the other major contributors with shares of 31 per cent and 16 per cent, respectively.

(Source: <http://www.ibef.org/download/Textiles-and-Apparel-August-2015.pdf>)

Rising government focus and favourable policies is leading to growth in the textiles and clothing industry. Foreign direct investment (FDI) in textile sector increased to US\$ 1,587.8 million in FY15 from US\$ 1,424.9 million in FY14. The Ministry of Textiles is encouraging investments through increasing focus on schemes such as Technology Up-gradation Fund Scheme (TUFS). To promote apparel exports, 12 locations have been approved by the government to set up apparel parks for exports. As per the 12th Five Year Plan, the Government plans to provide a budgetary support of US\$ 4.25 billion to textiles. Free trade with ASEAN countries and proposed agreement with European Union will also help boost exports.

Road Ahead of Indian Textile Industry

The future for the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market. The organised apparel segment is expected to grow at a Compound Annual Growth Rate (CAGR) of more than 13 per cent over a 10-year period.

MANUFACTURING PROCESS

A description of the manufacturing process followed by the Company is discussed hereunder:

1. Metalized Films:-

Metalizing

Metallization is performed using a physical vapour deposition process. Polyester (BOPET)/BOPP/PP/LDPE films are used in metalizing, as per Customer's requirement. Film rolls are taken into vacuum metalizing machine chambers in which aluminium wire (of 99.99% purity) is heated and evaporated under vacuum, which is then condensed on the film. This process of metalizing brings glossy metallic appearance of an aluminium foil on the film.

Inspection and Testing

Inspection and testing process are then carried on metalized film rolls to check if any defects are present in the films.

Slitting of Metalized Films

After inspection and testing, metalized films are slitted on slitter machines in accordance with size as per Customer's requirement.

2. Slitted Films (Polyester (BOPET) and BOPP Films):-

Slitting of Films

BOPET/BOPP Film rolls are put on slitter machine. The slitter machine slits the jumbo roll into small pancakes in accordance with predefined size as per Customer's requirement. Slitting Machines are fully automatic with 1650 mm width.

Inspection and Testing

Inspection and testing process are then carried on slitted film rolls to check if any defects are present in the films.

3. Epoxy Resins

Preparation of Modified Lacquer

Fixed Formulated chemicals are mixed and then heated at a set temperature in a reactor for a period ranging from 24 to 36 hours to form modified lacquers.

Inspection and Testing

Such lacquers are then tested in the laboratory for confirming required performance. The approved lacquers are then used for making Lacquered (Coated) Metalized Polyester Film (LMPF).

4. Lacquered (Coated) Metalized Polyester Film (LMPF) -

Resin Mixing

The epoxy resins produced in our factory are mixed with certain chemicals and pigments to get the desired colour.

Coating Process

Mixed resins are then applied on metalized films, which are then cured at a temperature ranging from 150° to 180° in the heating chamber of coating machine. The cured film is called as lacquer coated film.

Inspection and Testing

Such films are inspected on slitter machines and laboratory for checking any defects in the film.

Slitting of LMPF

Once the films are approved, they are slitted on slitter machines as per customer's requirement. Slitted LMPF are then sold to customers or are used for production of glitter powder, metallic fibre and metallic yarn.

5. Glitter Powder/ Metallic Fibre

Conversion of films into glitter powder/Metallic Fibre

The LMPF, Metallized film and clear films are selected on the basis of Customer's colour and size specifications of glitter powder/metallic fibre. Such films are sent for Job Work for conversion into Glitter Powder/Metallic Fibre. Glitter Powder is very fine and even shape powder, prepared on automatic machines.

Inspection and Testing

Glitter Powder/ Metallic Fibre received from Job Work are then inspected and tested to check that they are produced as per Customer's specifications.

6. Metallic Yarn (Polyester Badla)

Conversion of films into Metallic Yarn

The LMPF, Metallized film and clear films are selected on the basis of Customer's colour and size specifications of metallic yarn. Such films are sent for Job Work for conversion into Metallic Yarn. Metallic Yarn is formed with the help of micro-slitting and rewinding machine, in which they are micro slitted into narrow continuous long strips, which is known as metallic yarn. This yarn is wound on bobbins simultaneously.

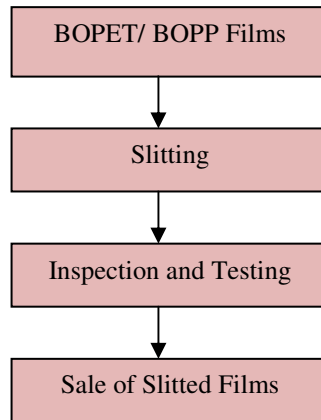

Inspection and Testing

Metallic Yarn received from Job Work are then inspected and tested to check that they are produced as per Customer's specifications.

Tax Related Legislations

Central Sales Tax Act, 1956 (“CST Act”)

The CST Act formulates principles for determining (a) when a sale or purchase takes place in the course of inter-state trade or commerce; (b) when a sale or purchase takes place outside a State and (c) when a sale or purchase takes place in the course of imports into or export from India. This Act provides for levy, collection and distribution of taxes on sales of goods in the course of inter-state trade or commerce and also declares certain goods to be of special importance in inter-State trade or commerce and specifies the restrictions and conditions to which State laws imposing taxes on sale or purchase of such goods of special importance (called as declared goods) shall be subject. Central Sales tax is levied on inter State sale of goods. Sale is considered to be inter-state when (a) sale occasions movement of goods from one State to another or (b) is effected by transfer of documents during their movement from one State to another.

A sale or purchase of goods shall be deemed to take place in the course of inter-state trade or commerce if the sale or purchase is affected by a transfer of documents of title to the goods during their movement from one state to another. When the goods are handed over to the carrier, he hands over a receipt to the seller. The seller sends the receipt to buyer. The buyer gets delivery of goods on submission of the receipt to the carrier at other end. The receipt of carrier is ‘document of title of goods’. Such document is usually called Lorry Receipt (LR) in case of transport by Road or Air Way Bill (AWB) in case of transport by air. Though it is called Central Sales Tax Act, the tax collected under the Act in each State is kept by that State only. Central Sales Tax is payable in the State from which movement of goods commences (that is, from which goods are sold). The tax collected is retained by the State in which it is collected. The Central Sales Tax Act is administered by sales tax authorities of each State. The liability to pay tax is on the dealer, who may or may not collect it from the buyer.

VAT is a system of multi-point levy on each of the entities in the supply chain with the facility of set-off input tax whereby tax is paid at the stage of purchase of goods by a trader and on purchase of raw materials by a manufacturer. Only the value addition in the hands of each of the entities is subject to tax. VAT is based on the value addition of goods, and the related VAT liability of the dealer is calculated by deducting input tax credit for tax collected on the sales during a particular period. VAT is essentially a consumption tax applicable to all commercial activities involving the production and distribution of goods, and each State that has introduced VAT has its own VAT Act, under which, persons liable to pay VAT must register themselves and obtain a registration number.

Restated Standalone Summary Statements have been prepared specifically for inclusion in the offer document to be filed by the Company with the Securities and Exchange Board of India ('SEBI') in connection with its proposed Initial Public Offering.

2. USE OF ESTIMATES

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities, if any, as at the date of the financial statements and reported amounts of income and expenses during the year. Examples of such estimates include provisions for doubtful debts, provision for income tax and the useful lives of fixed assets. The difference between the actual results and estimates are recognized in the period in which results are known or materialized.

3. FIXED ASSETS

Fixed assets are stated at historical cost less accumulated depreciation and impairment losses. Cost includes purchase price and all other attributable cost to bring the assets to its working condition for the intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Projects under which assets are not ready for their intended use are shown as Capital Work-in-Progress. Cost includes cost of land, materials, construction, services, borrowing costs and other overheads relating to projects.

4. DEPRECIATION

Tangible Fixed Assets

5. BORROWING COSTS

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

6. IMPAIRMENT OF ASSETS

The company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount. An asset's (including goodwill) recoverable amount is the higher of an asset's net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

(ii) After impairment, depreciation/ amortization is provided on the revised carrying amount of the asset over its remaining useful life.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

8. INVENTORIES

Inventories are stated at cost or net realizable value whichever is lower.
