Once our company gets listed on the stock exchange we would be subject to circuit breakers limits imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges may also change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

51. Any future issuance of Equity Shares may dilute the shareholding of the Investor or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Issue paid-up share capital, held by our Promoters or other shareholders will be locked-in for a period of 1 (one) year and minimum promoter contribution subject to a minimum of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled “*Capital Structure*” beginning on page 50 of the Draft Prospectus. Any future issuance or sale of the equity shares of our company by our Promoter or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

52. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by Fixed Price method. The price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled “*Basis for Issue Price*” beginning on page 70 of the Draft Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

53. The stock price may be volatile, and you may be unable to resell your shares at or above the Issue price or at all. Also, there is no existing market for our Equity Shares and we cannot assure you that such a market will develop.

Prior to this Public Issue, there is no public market for the Equity Shares of our company, and an active trading market may not develop or be sustained upon the completion of this Issue. Even though a Market Maker has been appointed for our stock, since there has been no public market for our Company’s Equity Shares, an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Issue. The Issue Price of the Equity Shares may bear no relationship to the market price of the

Equity Shares after the Issue. The market price of the Equity Shares after the Issue may be subject to significant fluctuations in response to:

- Volatility in the Indian and Global economy
- Company's result and performance
- Performance of competitors.
- Significant development with respect to the fiscal, political and financial condition in the economy.

The risk of loss associated with this characteristic may be greater for investors expecting to sell Equity Shares purchased in this Issue soon after the Issue.

54. Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.

Pursuant to the SEBI ICDR Regulations, Non-Institutional Investors are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the issue within six Working Days from the issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

55. Certain data mentioned in this Draft Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

EXTERNAL RISK FACTORS

56. The Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 have effected significant changes to the existing Indian company law/ listing framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have come into effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital (including provisions in relation to issue of securities on a private placement basis), disclosures in offering documents, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in futures trading. Further, the Companies Act, 2013 imposes greater monetary and other liability on us and our directors for any non-compliance.

To ensure compliance with the requirements of the Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited jurisprudence on them. In the event our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to be notified. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

57. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax (STT) has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India, if securities transaction tax has been paid on the transaction. Any gain realized on the sale of shares held for more than 36 months to an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of equity shares held for a period of 36 months or less which are sold other than on a recognized stock exchange and on which no STT has been paid, may be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

58. Any downgrading of India's debt rating by a domestic or international rating agency could have a negative impact on our business.

India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of our Equity Shares.

59. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time to time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India, may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

60. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter **"Government and Other Approvals"** on page 180 for details of the laws currently applicable to us. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax ("**GST**") regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

61. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an

outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

62. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

63. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

64. *If certain labour laws become applicable to us, our profitability may be adversely affected.*

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

65. *Political, economic and social changes in India could adversely affect our business.*

Our business, and the market price and liquidity of our Company's shares, may be affected by changes in Government policies, including taxation, social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms including significantly relaxing restrictions on the private sector. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares.

66. *Our transition to IFRS reporting could have an adverse effect on our reported results of operations or financial condition.*

Our Company may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, the IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 ("IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 32 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined and will be notified by the Ministry of Corporate Affairs after various tax related issues are resolved. We have not yet determined with certainty what impact the adoption of IFRS will have on our financial reporting. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of IFRS may affect our reported results of operations or financial condition.

SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

Global growth: moderate recovery expected.

Global growth is estimated to have fallen to 2.3 percent in 2016—the weakest performance since the global financial crisis (Figure 1.A). Anemic global investment was accompanied by a further weakening of global trade. Mitigating these headwinds for emerging market and developing economies (EMDEs), commodity prices strengthened. However, the rapid rise in U.S. bond yields and appreciation of U.S. dollar towards the end of the year led to a notable tightening of financing conditions for EMDEs, and in some cases significant portfolio outflows. In 2017, global growth should pick up to 2.7 percent, with the recovery mainly driven by receding obstacles to activity in commodity-exporting EMDEs.

Advanced economies continue to be afflicted by weak underlying growth and low inflation, while uncertainty about future policy direction increased. Growth is projected to recover modestly to 1.8 percent in 2017 (from 1.6 percent in 2016), although the range of possible outcomes has markedly widened after the electoral outcome in the United States and the United Kingdom's decision to leave the European Union. In particular, current forecasts do not incorporate the potential effects of policy proposals suggested by the new U.S. administration, as their scope is still highly uncertain. Fiscal stimulus, if implemented, could result in stronger U.S. growth than currently predicted. However, some other policy changes, or persistent policy uncertainty, could dampen U.S. and international growth prospects.

EMDE growth is expected to accelerate to 4.2 percent in 2017 and to an average of 4.7 percent in 2018-19 (Figure 1.B). EMDEs are forecast to contribute 1.6 percentage points to global growth in 2017, accounting for about 60 percent of global growth for the first time since 2013. Given the expected increases in commodity prices, particularly for oil, the divergence in growth outlooks between commodity exporters and importers is on track to narrow. However, the outlook for EMDE regions with large numbers of commodity exporters remain mixed. Growth in Latin America and the Caribbean, and in Europe and Central Asia, is expected to accelerate in 2017, mainly reflecting a bottoming out in activity in Brazil and Russia. Growth in the Middle East and North Africa will pick up modestly as oil prices recover. While growth should also rebound in Sub-Saharan Africa, the improvement is notably weaker than previously expected, as some commodity exporters struggle to adjust to past deterioration in their terms of trade. EMDE regions with substantial numbers of commodity-importing economies—East Asia and the Pacific, and South Asia—are projected to continue to experience solid growth.

Indian Economy Outlook

With projected annual growth of 7.5% in 2017-18, India will remain the fastest growing G20 economy. Private consumption will be supported by the hike in public wages and pensions and by higher agricultural production, on the back of a return to normal rain fall. Private investment will revive gradually as excess capacity in some sectors diminishes, infrastructure projects mature, corporates deleverage, banks clean their loan portfolios, and the Goods and Service Tax (GST) is implemented.

Despite commendable fiscal consolidation efforts at the central government level, the combined debt of states and central government remains high compared with other emerging economies. Inflation expectations are adjusting down only slowly. Overall there is little room for accommodative policies, although some monetary impulse is still to come, as recent cuts in policy rates are yet to be reflected fully in lower lending rates. Repairing public banks' balance sheets and improving their governance would support the revival in investment. Creating more and better jobs will require policies to improve the ease of doing business further, in particular faster and more predictable land acquisition, and upgrading social and physical infrastructure.

Despite the high public deficit compared with other emerging economies, there is room to make public finance more growth-friendly and inclusive. The ongoing landmark GST and subsidy reforms are promising. The government plan to cut the corporate income tax rate while broadening the base is also welcome. More revenue could be raised from the personal income tax, and its redistributive impact enhanced, to finance higher spending on health, education, housing, transport and water infrastructure and make growth more inclusive.

Global growth: moderate recovery expected.

Global growth is estimated to have fallen to 2.3 percent in 2016—the weakest performance since the global financial crisis (Figure 1.A). Anemic global investment was accompanied by a further weakening of global trade. Mitigating these headwinds for emerging market and developing economies (EMDEs), commodity prices strengthened. However, the rapid rise in U.S. bond yields and appreciation of U.S. dollar towards the end of the year led to a notable tightening of financing conditions for EMDEs, and in some cases significant portfolio outflows. In 2017, global growth should pick up to 2.7 percent, with the recovery mainly driven by receding obstacles to activity in commodity-exporting EMDEs.

Advanced economies continue to be afflicted by weak underlying growth and low inflation, while uncertainty about future policy direction increased. Growth is projected to recover modestly to 1.8 percent in 2017 (from 1.6 percent in 2016), although the range of possible outcomes has markedly widened after the electoral outcome in the United States and the United Kingdom's decision to leave the European Union. In particular, current forecasts do not incorporate the potential effects of policy proposals suggested by the new U.S. administration, as their scope is still highly uncertain. Fiscal stimulus, if implemented, could result in stronger U.S. growth than currently predicted. However, some other policy changes, or persistent policy uncertainty, could dampen U.S. and international growth prospects.

EMDE growth is expected to accelerate to 4.2 percent in 2017 and to an average of 4.7 percent in 2018-19 (Figure 1.B). EMDEs are forecast to contribute 1.6 percentage points to global growth in 2017, accounting for about 60 percent of global growth for the first time since 2013. Given the expected increases in commodity prices, particularly for oil, the divergence in growth outlooks between commodity exporters and importers is on track to narrow. However, the outlook for EMDE regions with large numbers of commodity exporters remain mixed. Growth in Latin America and the Caribbean, and in Europe and Central Asia, is expected to accelerate in 2017, mainly reflecting a bottoming out in activity in Brazil and Russia. Growth in the Middle East and North Africa will pick up modestly as oil prices recover. While growth should also rebound in Sub-Saharan Africa, the improvement is notably weaker than previously expected, as some commodity exporters struggle to adjust to past deterioration in their terms of trade. EMDE regions with substantial numbers of commodity-importing economies—East Asia and the Pacific, and South Asia—are projected to continue to experience solid growth.

Figure 1: Global Outlook and Risks

After reaching a post-crisis low of 2.3 percent, global growth is expected to recover to 2.7 percent in 2017, mainly supported by stronger growth in EMDEs. Growth in commodity exporters is expected to pick up, while growth in commodity importers is projected to remain robust. Downside risks to global growth still dominate. They are associated with heightened policy uncertainty, protectionist pressures, and risk of financial market disruptions. A prolonged period of elevated policy uncertainty could weigh on EMDE investment growth. In turn, weak investment could adversely affect productivity growth, which has slowed considerably in the post-crisis period.

Indian Economy Outlook

With projected annual growth of 7.5% in 2017-18, India will remain the fastest growing G20 economy. Private consumption will be supported by the hike in public wages and pensions and by higher agricultural production, on the back of a return to normal rain fall. Private investment will revive gradually as excess capacity in some sectors diminishes, infrastructure projects mature, corporates deleverage, banks clean their loan portfolios, and the Goods and Service Tax (GST) is implemented.

Despite commendable fiscal consolidation efforts at the central government level, the combined debt of states and central government remains high compared with other emerging economies. Inflation expectations are adjusting down only slowly. Overall there is little room for accommodative policies, although some monetary impulse is still to come, as recent cuts in policy rates are yet to be reflected fully in lower lending rates. Repairing public banks' balance sheets and improving their governance would support the revival in investment. Creating more and better jobs will require policies to improve the ease of doing business further, in particular faster and more predictable land acquisition, and upgrading social and physical infrastructure.

Despite the high public deficit compared with other emerging economies, there is room to make public finance more growth-friendly and inclusive. The ongoing landmark GST and subsidy reforms are promising. The government plan to cut the corporate income tax rate while broadening the base is also welcome. More revenue could be raised from the personal income tax, and its redistributive impact enhanced, to finance higher spending on health, education, housing, transport and water infrastructure and make growth more inclusive.

MANUFACTURING PROCESS

1. Procurement of Raw Material

Our production process starts with the procurement of raw material. On receiving the sales order from the client our first step is the identification of the raw material required for manufacturing. This also involves identification of the vendor from whom the material is to be procured and the quantity of the material required. Once the raw material is received from the vendor they are sent to the Quality control department.

2. Quality Inspection of the Raw Material

Quality control is one of the most important factors as quality of the finished product is also determined from the quality of the raw material. On receipt of the raw material the same is received by the quality control department. An inspection of the material received is done, samples are taken from the material received and records are maintained for the sample and the results of the inspection.

3. Reaction/Batch Processing

Reaction process is undertaken in batches. Complete production is taken down in batches and issued for production. The material are then reacted at controlled temperature and pressure in the Glass line reactors or Stainless steel reactors as per the requirement of the production process.

4. Drying, Blending and Pulversing

After the reaction is over the reaction mass is centrifuged, washed with water, dried and pulverised. Pulverised product is blended for homogenization & to maintain uniformity of quality, as required. Once the reactions are completed products are purified and taken for further processing.

5. Quality Inspection of finished goods

On receipt of the material from the production process the same are sent to the quality department for quality inspection. Inspection of the material received is done, samples are taken from the material received and records are maintained for the sample and the results of the inspection.

2. USE OF ESTIMATES

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities, if any, as at the date of the financial statements and reported amounts of income and expenses during the year. Examples of such estimates include provisions for doubtful debts, employee retirement benefit plans, provision for income tax and the useful lives of fixed assets. The difference between the actual results and estimates are recognized in the period in which results are known or materialized.

3. FIXED ASSETS

Fixed assets are stated at historical cost less accumulated depreciation and impairment losses, if any. Cost includes purchase price and all other attributable cost to bring the assets to its working condition for the intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Projects under which assets are not ready for their intended use are shown as Capital Work-in-Progress. Cost includes cost of land, materials, construction, services, borrowing costs and other overheads relating to projects.

Intangible assets are stated at acquisition cost, Net of accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortized on a straight line basis over their estimated useful lives.

Gains or losses arising from the retirement or disposal proceeds and the carrying amount of the asset and recognized as income or expense in the Statement of Profit & Loss.

4. DEPRECIATION

Depreciation on tangible fixed assets is computed based on Straight Line Method considering useful life provided in the Schedule - II of the Act. During the preceding years, the Company was providing depreciation on Straight Line Method basis at the rate prescribed in Schedule XIV of the Companies Act, 1956.

Pursuant to Companies Act, 2013 ('the Act') being effective from April 1, 2014, the Company has revised depreciation rates on tangible fixed assets as per useful life specified in Part 'C' of Schedule II of the Act. And due to the same there has been a change in the estimated useful life of depreciable tangible assets which affects the depreciation in the current period and in each period during the remaining useful life of the assets. As the change is only in regard to accounting estimate requiring an adjustment of the carrying amount of tangible assets. The same do not require adjustment in the financial information for the years ended on March 31, 2014, 2013, and 2012. The Company has consistently calculated depreciation based on SLM method.

In respect of assets whose useful life had already exhausted as on 1 April 2014, **Rs.1,87,156/-** has been adjusted in Reserves and Surplus as on 31.03.2014 in accordance with requirements of Para 7 of Part C of Schedule II of the Act.

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

6. IMPAIRMENT OF ASSETS

- (i) The company assesses, at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount. An asset's (including goodwill) recoverable amount is the higher of an assets net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.
- (ii) After impairment, depreciation/ amortization is provided on the revised carrying amount of the asset over its remaining useful life.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

a) Accounting of Depreciation

During financial years 2014-15 & 2015-16 the company wrongly charged triple shift depreciation on plant and machinery which was used for manufacturing under the impression of continuous process plant. However, the company being in pharmaceutical industry the plant and machinery is specified under the equipment which is not eligible for claiming Extra shift depreciation as per Schedule II of the Companies act 2013. The same was identified during the process of Interim Audit for the year ended December 31,2016 and the company had passed necessary rectification entries by reversing the excess depreciation charged in earlier financial year 2014-15 of Rs. 37,01,177/- and of Financial year 2015-16 of Rs. 33,10,287/- resulting into total rectification for Rs. 70,11,464/- in interim period's statement of profit and loss.

However in the Restated Accounts, the entries have been passed in the respective years and accordingly effect thereof has been stated in Table 1 (Statement of Profit and Loss after Tax

b) Adjustment on account of Provision of Deferred Tax:

Due to changes in Depreciation and Provision for Gratuity, Disallowances, etc, the Company has recalculated the deferred tax liability and deferred tax assets at the rate of normal Tax rate applicable at the end of relevant year.

In the absence of certainty regarding availability of sufficient future taxable income, the recognition of Deferred Tax Assets was restricted to the extent of closing Deferred Tax Liability in the audited financial statements for the years 11-12,12-13,13-14 and 14-15. However the certainty for sufficient taxable income has been established as of December 31,2016, hence the deferred tax Assets have been recognized in the respective years

c) Adjustment on account of Tax Provision and MAT Credit Entitlement and Set-off thereof

Due to changes in accounting policies and other adjustments as stated above, the Company has recalculated the Income-tax provision and MAT Credit Entitlement and Set-off thereof at the rate of normal Tax rate applicable at the end of relevant year and accordingly, their amounts have been readjusted in restated financials.

11. Realizations:

In the opinion of the Board and to the best of its knowledge and belief, the value on realization of current assets, loans and advances will, in the ordinary course of business, not be less than the amounts at which they are stated in the Balance sheet.

12. Contractual liabilities

All other contractual liabilities connected with business operations of the Company have been appropriately provided for.

13. Amounts in the financial statements

Amounts in the financial statements are rounded off to nearest Rupees. Figures in brackets indicate negative values.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government, the FDI Policy (as defined below) and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidates FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 7, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

Subscription by foreign investors (NRIs/FPIs)

FPIs are permitted to subscribe to Equity Shares of an Indian Company in a public offer without the prior approval of the RBI, so long as the price of the Equity Shares to be issued is not less than the price at which the Equity Shares are issued to residents. SEBI registered FPIs have been permitted to purchase shares of an Indian company through offer, subject to total FPI investment being within the individual FPI/sub account investment limit of 10 per cent subject to the total sectoral cap of all FPIs/sub-accounts put together being 24 per cent of the paid-up capital of the Indian company.

The transfer of shares between an Indian resident and a Non-resident does not require prior approval of FIPB or RBI, subject to fulfillment of certain conditions as specified by DIPP / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the foreign direct investment (“FDI”) Policy and the non-resident shareholding is within the sectoral limits under the FDI policy; and (ii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.
