**1. Our Company has been involved in certain legal proceedings/ received few show cause notices, which may have financial implication on the business of our Company**

Our Company is involved in a number of legal proceedings, which are classified under various legal heads, as under:

Sr. No.	Nature of Cases	No. of outstanding cases	Amount involved
<b>(I) Proceedings against our Company</b>			
<b>Direct Tax Liabilities</b>			
1.	Income Tax	5	13,21,550
<b>Indirect Tax Liabilities</b>			
1.	Service Tax	4	2,99,242
2.	Excise	2	3,44,831

For further details, please refer to section titled "Outstanding Litigation and Material Developments" beginning on page 151 of this Draft Red Herring Prospectus.

**2. We derive a significant portion of our revenues from a limited number of clients. Any reduction or interruption in the business of a key customer or a substantial decrease in orders placed by a key customer may have an adverse impact on the revenues and operations of our Company**

We are dependent on a few customers for our business. The loss of a major customer and/or reduction in any of our key customers' sales, resulting in lower demand for our services and any material delay, cancellation from any of our key customers would materially affect our business and financial condition. There is no assurance that we will be able to maintain historic levels of business from all the existing customers or to retain all the existing customers, or that we

will be able to replace our customer base in a timely manner or at all. In the event our existing customers do not continue to purchase our services, it may affect our revenues and the financial condition of our Company.

**3. *Our inability to effectively manage our rapid growth could have a material adverse effect on our operations, results of operations and financial condition.***

Since we were founded in December 2007, we have experienced rapid growth and significantly expanded our operations. From fiscal 2007 through fiscal 2016, our total income has grown at a compound annual growth rate of 18 % from Rs. 784.50 Lakhs in fiscal 2011 to Rs. 1521.08 Lakhs in fiscal 2016. We intend to continue expansion in the foreseeable future to pursue existing and potential market opportunities. This rapid growth places significant demands on our management and operational resources. In order to manage growth effectively, we must implement and improve operational systems, procedures and internal controls, technology on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to service our clients' needs, hire and retain new employees, pursue new business or operate our business effectively. Failure to effectively transfer new client business to our service delivery centres, properly budget transfer costs or accurately estimate operational costs associated with new contracts could result in delays in executing client contracts, trigger service level penalties, give the client the right to terminate the contract for breach, or cause our profit margins not to meet our expectations or our historical profit margins. Our inability to execute our growth strategy, to ensure the continued adequacy of our current systems or to manage our expansion effectively could have a material adverse effect on our business, results of operations, financial condition and cash flows.

**4. *We may fail to attract and retain enough sufficiently trained employees to support our operations, as competition for highly skilled personnel is intense and we experience significant employee turnover rates.***

The BPO industry is highly labour intensive and our success depends to a significant extent on our ability to attract, hire, train and retain qualified employees, including our ability to attract employees with needed skills in the geographic areas in which we operate. The industry, including our Company, experiences high employee turnover. For the twelve months ended March 31, 2016. There is significant competition for professionals in India with skills necessary to perform the services we Issue to our clients. Increased competition for these professionals, in the BPO industry or otherwise, could have an adverse effect on us. High attrition rates among our tenured employees, in particular, could result in a loss of domain and process knowledge, which could result in poor service quality and lead to breaches by us of our contractual obligations. Some of our contracts may be terminated by the client if certain of our key personnel working on the client project leave our employment and we are unable to find suitable replacements. A significant increase in the turnover rate among our employees in India, particularly among the highly skilled workforce needed to provide BPO services, would increase our recruiting and training costs and decrease our operating efficiency, productivity and profit margins and could lead to a decline in demand for our services. High turnover rates increase our expenditures and therefore impact our profit margins due to higher recruitment, training and retention costs as a result of maintaining larger hiring, training and human resources departments and higher operating costs due to having to reallocate certain business processes among our operating facilities where we have access to the skilled workforce needed for the business. Our ability to maintain and renew existing engagements and obtain new business will depend, in large part, on our ability to attract, train and retain personnel with skills that keep pace with the demand for outsourcing, evolving industry standards and changing client preferences. A lack of sufficiently qualified personnel could also inhibit our ability to establish operations in new markets and our efforts to expand geographically. Our failure either to attract, train and retain personnel with the qualifications necessary to fulfill the needs of our existing and future clients or to assimilate new employees successfully could have a material adverse effect on our business, results of operations, financial condition and cash flows.

**5. *Our selling cycle in relation to certain services Issued to clients may require significant investments of management time and capital resources in addition to significant commitments during the implementation cycle.***

The services we Issue to our clients require significant investment of capital, resources and time by both our clients and us. Our potential clients may require us to provide pilot studies to assess the feasibility of integrating with our systems. Thereafter, they may choose to evaluate the quality of our services before deciding whether to engage us. Due to these processes, our selling cycle, which averages eight months, is subject to many risks and delays over which we have little or no control, including our clients' decision to choose our competitors over us or the timing of our clients' budget cycles and approval processes. In addition, implementing our services involves a significant commitment of resources over an extended period of time from both our clients and us. Our clients (including future

clients) may not be willing or able to invest the time and resources necessary to implement our services, and we may fail to close sales with potential clients (on whom we would have devoted significant time and resources), which could have a material adverse effect on our business, results of operations, financial condition and cash flows. Implementation processes, including integration of the client's systems with ours, are subject to a number of potential delays similar to those affecting our selling cycle. Revenues are recognized only on actual provision of services and the benefit of a client acquisition may be delayed in case of any delay in implementation or ramp up.

**6. *If we are not able to obtain, renew or maintain the statutory and regulatory permits and approvals required to operate our business it may have a material adverse effect on our business.***

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained other permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Also, few of our approvals are in the name of our previous name which is not yet changed. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

**7. *Our business is subject to a significant number of legal and tax regulations and there may be changes in legislation governing the rules implementing them or the regulator enforcing them. Changes in the operating environment, including changes in tax law, may impact the determination of our tax liabilities for any given year, which may have an adverse impact on our profitability.***

We are currently located in Madhya Pradesh and operate for services across India. Consequently, we are subject to the jurisdiction of various laws, tax authorities and regulations. The final determination of our tax liabilities involve the interpretation of local tax laws and related authorities in each jurisdiction as well as the significant reliance on estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given year. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, VAT, income tax, service tax and other taxes, duties or surcharges introduced from time to time

**8. *We operate in a highly competitive environment and if we are not able to compete effectively, our income and profitability will be adversely affected.***

The market for BPO services is rapidly evolving and is highly competitive. We expect that the competition we face will continue to intensify. We face competition from: (i) The BPO divisions of IT companies located in India, such as Infosys Technologies Limited and Wipro Technologies Limited; and (ii) Companies, including certain of our clients, that choose to perform their own business processes internally through business processing units established specifically for this purpose.

**9. *Our success depends largely on our senior management and our ability to attract and retain our key personnel.***

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition. We do not maintain 'key man' life insurance for our Promoters, senior members of our management team or other key personnel.

**10. *Our profitability will suffer if we are not able to maintain our asset usage levels and pricing and control our costs.***

Our profit margin, and therefore our profitability, is largely a function of our asset usage and the rates we are able to recover for our services. If we are not able to maintain the pricing for our services or appropriate asset usage, without corresponding cost reductions, our profitability will suffer. Our profitability is also a function of our ability to control our costs and improve our efficiency. As we increase the number of our employees and execute our strategies for

growth, we may not be able to manage a significantly larger and more geographically diverse workforce, which could adversely affect our ability to control our costs or improve our efficiency. Similarly, any change in the mix of income from services could also impact our results, as certain of our services have much higher margins than others.

- 11. Unauthorized disclosure of sensitive or confidential client and client’s customer data, whether through a breach of our computer systems or otherwise, could expose us to protracted and/or costly litigation and cause us to lose clients.**

We are typically required to collect and store sensitive data in connection with our services. We take precautions to protect confidential client and client’s customer data. However, if any person, including any of our employees, penetrates our network security or otherwise misappropriates sensitive data, we could be subject to significant liability claims from our clients or their own customers for breaching contractual v confidentiality provisions or privacy laws. Further, penetration of the network security of our data centers could have a negative impact on our reputation, which could harm our business.

- 12. Our revenues are significantly dependent upon sales of our main services that are DMS, Inbound/Outbound, IT Infrastructure, Training and E-Commerce.**

Our core business is Business Process Outsourcing such as DMS/ Ecommerce Training etc. and we have an existing open end and ring spinning unit. Consequently, our income is significantly dependent on services that we provide and over the years, such services have emerged as the largest single contributor to our revenue and business. Our continued reliance on Services that we Issue for a significant portion of our revenue exposes us to risks, including the potential reduction in the demand for such services in the future; increased competition; cost-effective technology; fluctuations in the price and availability of the man power; changes in regulations; and the cyclical nature of our customers’ businesses. One or more such reasons may affect our revenues and income from services Issued and thereby adversely affects our business, profitability, cash flows and results of operations.

- 13. We have experienced negative cash flows in previous years. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions**

The details of Cash flows of our Company are as follows:

Particulars	For the year ended (in ₹)				
	31.03.2016	31.03.2015	31.03.2014	31.03.2013	31.03.2012
<b>Net Cash used in Investing Activities</b>	(42,74,645)	(104,09,008)	(20,75,900)	(73,54,572)	(26,50,730)
<b>Net Cash from Financing Activities</b>	(37,03,349)	(11,38,546)	(12,57,092)	5,84,023	(14,60,431)

Cash flow of a Company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and to make new investments without raising finance from external resources. **36. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.***

The market for our services is competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as quality of products, distribution network, skilled man power, pricing and timely delivery and quality of services. ## EXTERNAL RISKS

**38. *The Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 have effected significant changes to the existing Indian company law/ listing framework, which may subject us to higher compliance requirements and increase our compliance costs.***

A majority of the provisions and rules under the Companies Act, 2013 have come into effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital (including provisions in relation to issue of securities on a private placement basis), disclosures in Issuing documents, corporate governance norms, accounting policies and audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in futures trading. Further, the Companies Act, 2013 imposes greater monetary and other liability on us and our directors for any non-compliance.

To ensure compliance with the requirements of the Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to the limited jurisprudence on them. In the event our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to be notified. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

**39. *Our business is dependent on economic growth in India.***

Our performance is dependent on the health of the overall Indian economy. There have been periods of slowdown in the economic growth of India. India economic growth is affected by various factors including domestic consumption and savings, balance of trade movements primarily resulting from export demand and movements in key imports, such as oil and oil products, and annual rainfall, which affect agricultural production. For example, in the monsoon of 2009, Several parts of the country experienced below average rainfall, leading to reduced farm output which impaired economic growth. In the past, economic slowdowns have harmed industries and industrial development in the country. Any future slowdown in the Indian economy could harm our business, financial condition and results of operations.

**40. *The extent and reliability of Indian infrastructure could adversely affect our results of operations and financial condition.***

India's physical infrastructure is less developed than that of many developed countries. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have an adverse effect on our results of operations and financial condition.

If the rate of Indian price inflation increases, our results of operations and financial condition may be adversely affected. In recent years, India's wholesale price inflation index has indicated an increasing inflation trend compared to prior periods. An increase in inflation in India could cause a rise in the price of transportation, wages, raw materials or any other expenses. In particular, the prices of raw materials required for manufacturing of our products are subject to increase due to a variety of factors beyond our control, including global commodities prices and economic conditions. If this trend continues, we may be unable to reduce our costs or pass our increased costs on to our customers and our results of operations and financial condition may be materially and adversely affected.

**41. *Global economic downturn and adverse market conditions could cause our business to suffer. A slowdown in economic growth in India could cause our business to suffer***

The developed economies of the world viz. U.S., Europe, Japan and others are in midst of a downturn affecting their economic condition and markets general business and consumer sentiment has been adversely affected due to the global slowdown and there can be no assurance whether the developed economies or the emerging market economies will see good economic growth in the near future. Consequently, this has also affected the global stock and commodity markets. Our performance and growth is directly related to the performance of the Indian economy. The performance of the Indian economy is dependent among other things on the interest rate, political and regulatory actions, liberalization policies, commodity and energy prices etc. A change in any of the factors would affect the growth prospects of the Indian economy, which may in turn adversely impact our results of operations, and consequently the price of our Equity Shares.

**42. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise debt financing.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our capital expenditure plans, business and financial performance.

**43. *Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.***

Some parts of India have experienced communal disturbances, terrorist attacks and riots during recent years. If such events recur, our operational and marketing activities may be adversely affected, resulting in a decline in our income. The Asian region has, from time to time, experienced instances of civil unrest and hostilities among neighbouring countries. Since May 1999, military confrontations between countries have occurred in Kashmir. The hostilities between India and its neighbouring countries are particularly threatening because India and certain of its neighbours possess nuclear weapons. Hostilities and tensions may occur in the future and on a wider scale. Also, since 2003, there have been military hostilities and continuing civil unrest and instability in Afghanistan. There has also recently been hostility in the Korean Peninsula. In July 2006 and November 2008, terrorist attacks in Mumbai resulted in numerous

casualties. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares.

**44. *The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.***

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factor. The extent and severity of these natural disasters determines their effect on the Indian economy. Although the long term effect of diseases such as the H5N1 “avian flu” virus, or H1N1, the swine flu virus, cannot currently be predicted, previous occurrences of avian flu and swine flu had an adverse effect on the economies of those countries in which they were most prevalent. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

**45. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

- The GoI has proposed a comprehensive national goods and services tax ("**GST**") regime that will combine taxes and levies by the Central and State Governments into a unified rate structure which is proposed to be effective from April 1, 2016. While the GoI and other state governments have announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.
- Further, the General Anti Avoidance Rules ("**GAAR**") are proposed to be made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.

We have not determined the impact of these proposed legislations on our business. Uncertainty in the applicability, Interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. Further, the GoI may introduce a waiver or incentive scheme in relation to specific population segments such as MSEs in public interest, pursuant to which we may be required to Issue our products and services at discounted rates. This may affect our business and results of operations.

## SECTION III: INTRODUCTION

### SUMMARY OF INDUSTRY

#### Introduction

##### Global Economic Overview

Since the Economic Survey and Budget were presented a year ago, the Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Inflation, the fiscal deficit, and the current account deficit have all declined, rendering India a relative haven of macro stability in these turbulent times. Economic growth appears to be recovering, albeit at varying speeds across sectors.

At the same time, the upcoming Budget and 2016-17 (FY2017) economic policy more broadly, will have to contend with an unusually challenging and weak external environment. Although the major international institutions are yet again predicting that global growth will increase from its current subdued level, they assess that risks remain tilted to the downside. This uncertain and fragile outlook will complicate the task of economic management for India.

The risks merit serious attention not least because major financial crises seem to be occurring more frequently. The Latin American debt crisis of 1982, the Asian Financial crisis of the late 1990s, and the Eastern European crisis of 2008 suggested that crises might be occurring once a decade. But then the rapid succession of crises, starting with Global Financial Crisis of 2008 and proceeding to the prolonged European crisis, the mini-crises of 2013, and the China provoked turbulence in 2015 all hinted that the intervals between events are becoming shorter.

This hypothesis could be validated in the immediate future, since identifiable vulnerabilities exist in at least three large emerging economies—China, Brazil, Saudi Arabia—at a time when underlying growth and productivity developments in the advanced economies are soft. More flexible exchange rates, however, could moderate full-blown eruptions into less disruptive but more prolonged volatility.

One tail risk scenario that India must plan for is a major currency re-adjustment in Asia in the wake of a similar adjustment in China; as such an event would spread deflation around the world. Another tail risk scenario could unfold as a consequence of policy actions—say, capital controls taken to respond to curb outflows from large emerging market countries, which would further moderate the growth impulses emanating from them.

In either case, foreign demand is likely to be weak, forcing India—in the short run— to find and activate domestic sources of demand to prevent the growth momentum from weakening. At the very least, a tail risk event would require Indian monetary and fiscal policy not to add to the deflationary impulses from abroad. The consolation would be that weaker oil and commodity prices would help keep inflation and the twin deficits in check. ### The Indian Economy

With 1.2 billion people and the world’s fourth-largest economy, India’s recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally

recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

Historic changes are unfolding, unleashing a host of new opportunities to forge a 21<sup>st</sup>-century nation. India will soon have the largest and youngest workforce the world has ever seen. At the same time, the country is in the midst of a massive wave of urbanization as some 10 million people move to towns and cities each year in search of jobs and opportunity. It is the largest rural-urban migration of this century.

The historic changes unfolding have placed the country at a unique juncture. How India develops its significant human potential and lays down new models for the growth of its burgeoning towns and cities will largely determine the shape of the future for the country and its people in the years to come.

Massive investments will be needed to create the jobs, housing, and infrastructure to meet soaring aspirations and make towns and cities more livable and green. Generating growth that lifts all boats will be key, for more than 400 million of India's people—or one-third of the world's poor—still live in poverty. And, many of those who have recently escaped poverty (53 million people between 2005-10 alone) are still highly vulnerable to falling back into it. In fact, due to population growth, the absolute number of poor people in some of India's poorest states actually increased during the last decade.

Inequity in all dimensions, including region, caste and gender, will need to be addressed. Poverty rates in India's poorest states are three to four times higher than those in the more advanced states. While India's average annual per capita income was \$1,410 in 2011—placing it among the poorest of the world's middle-income countries— it was just \$436 in Uttar Pradesh (which has more people than Brazil) and only \$294 in Bihar, one of India's poorest states. Disadvantaged groups will need to be brought into the mainstream to reap the benefits of economic growth, and women—who “hold up half the sky”—empowered to take their rightful place in the socioeconomic fabric of the country.

Fostering greater levels of education and skills will be critical to promote prosperity in a rapidly globalizing world. However, while primary education has largely been universalized, learning outcomes remain low. Less than 10 percent of the working-age population has completed a secondary education, and too many secondary graduates do not have the knowledge and skills to compete in today's changing job market.

Improving health care will be equally important. Although India's health indicators have improved, maternal and child mortality rates remain very low and, in some states, are comparable to those in the world's poorest countries. Of particular concern is the nutrition of India's children whose well-being will determine the extent of India's much-awaited demographic dividend; at present, an overwhelming 40 percent (217 million) of the world's malnourished children are in India.

The country's infrastructure needs are massive. One in three rural people lack access to an all-weather road, and only one in five national highways is four-lane. Ports and airports have inadequate capacity, and trains move very slowly. An estimated 300 million people are not connected to the national electrical grid, and those who are face frequent disruptions. And, the manufacturing sector—vital for job creation—remains small and underdeveloped

Nonetheless, a number of India's states are pioneering bold new initiatives to tackle many of India's long-standing challenges and are making great strides towards inclusive growth. Their successes are leading the way forward for the rest of the country, indicating what can be achieved if the poorer states were to learn from their more prosperous counterparts.

India now has that rare window of opportunity to improve the quality of life for its 1.2 billion citizens and lay the foundations for a truly prosperous future—a future that will impact the country and its people for generations to come.

For further details on the method and procedure for Bidding, please see section entitled “Issue Procedure” on page 183 of this Draft Red Herring Prospectus.

**Illustration of Book Building and Price Discovery Process:** *(Investors should note that this example is solely for illustrative purposes and is not specific to the Issue)*

Bidders can bid at any price within the price band. For instance, assume a price band of ₹20 to ₹24 per equity share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centers during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Amount(₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The issuer, in consultation with the Book Running Lead Manager will finalize the issue price at or below such cut-off price, i.e., at or below ₹ 22.00. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

**Steps to be taken by the Bidders for Bidding:**

- 1) Check eligibility for making a Bid (see section titled —”*Issue Procedure*” on page 183 of this Draft Red Herring Prospectus);
- 2) Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form;
- 3) Ensure correctness of your PAN, DP ID and Client ID mentioned in the Bid cum Application Form. Based on these parameters, the Registrar to the Issue will obtain the Demographic Details of the Bidders from the Depositories.

The exemption for Central or State Governments and officials appointed by the courts and for investors residing in Sikkim is subject to the Depository Participant’s verification of the veracity of such claims of the investors by collecting sufficient documentary evidence in support of their claims

5) Ensure that the Bid cum Application Form is duly completed as per instructions given in the Draft Red Herring Prospectus and in the Bid cum Application Form;

In case of discrepancy in the data entered in the electronic book vis-à-vis the data contained in the physical or electronic Bid Cum Application Form, for a particular ASBA Bidder, the Registrar to the Issue shall ask the relevant SCSBs / Syndicate Member / RTAs / DPs / Stock Brokers, as the case may be, for rectified data.

#### Introduction

##### Global Economic Overview

Since the Economic Survey and Budget were presented a year ago, the Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. Inflation, the fiscal deficit, and the current account deficit have all declined, rendering India a relative haven of macro stability in these turbulent times. Economic growth appears to be recovering, albeit at varying speeds across sectors.

At the same time, the upcoming Budget and 2016-17 (FY2017) economic policy more broadly, will have to contend with an unusually challenging and weak external environment. Although the major international institutions are yet again predicting that global growth will increase from its current subdued level, they assess that risks remain tilted to the downside. This uncertain and fragile outlook will complicate the task of economic management for India.

The risks merit serious attention not least because major financial crises seem to be occurring more frequently. The Latin American debt crisis of 1982, the Asian Financial crisis of the late 1990s, and the Eastern European crisis of 2008 suggested that crises might be occurring once a decade. But then the rapid succession of crises, starting with Global Financial Crisis of 2008 and proceeding to the prolonged European crisis, the mini-crises of 2013, and the China provoked turbulence in 2015 all hinted that the intervals between events are becoming shorter.

This hypothesis could be validated in the immediate future, since identifiable vulnerabilities exist in at least three large emerging economies—China, Brazil, Saudi Arabia—at a time when underlying growth and productivity developments in the advanced economies are soft. More flexible exchange rates, however, could moderate full-blown eruptions into less disruptive but more prolonged volatility.

One tail risk scenario that India must plan for is a major currency re-adjustment in Asia in the wake of a similar adjustment in China; as such an event would spread deflation around the world. Another tail risk scenario could unfold as a consequence of policy actions—say, capital controls taken to respond to curb outflows from large emerging market countries, which would further moderate the growth impulses emanating from them.

In either case, foreign demand is likely to be weak, forcing India—in the short run—to find and activate domestic sources of demand to prevent the growth momentum from weakening. At the very least, a tail risk event would require Indian monetary and fiscal policy not to add to the deflationary impulses from abroad. The consolation would be that weaker oil and commodity prices would help keep inflation and the twin deficits in check. (Source: *Economic Survey 2015-16- Volume-I; www.indianbudget.nic.in*)

**The Indian Economy**

With 1.2 billion people and the world’s fourth-largest economy, India’s recent growth and development has been one of the most significant achievements of our times. Over the six and half decades since independence, the country has brought about a landmark agricultural revolution that has transformed the nation from chronic dependence on grain imports into a global agricultural powerhouse that is now a net exporter of food. Life expectancy has more than doubled, literacy rates have quadrupled, health conditions have improved, and a sizeable middle class has emerged. India is now home to globally recognized companies in pharmaceuticals and steel and information and space technologies, and a growing voice on the international stage that is more in keeping with its enormous size and potential.

Historic changes are unfolding, unleashing a host of new opportunities to forge a 21<sup>st</sup>-century nation. India will soon have the largest and youngest workforce the world has ever seen. At the same time, the country is in the midst of a massive wave of urbanization as some 10 million people move to towns and cities each year in search of jobs and opportunity. It is the largest rural-urban migration of this century.

The historic changes unfolding have placed the country at a unique juncture. How India develops its significant human potential and lays down new models for the growth of its burgeoning towns and cities will largely determine the shape of the future for the country and its people in the years to come.

Massive investments will be needed to create the jobs, housing, and infrastructure to meet soaring aspirations and make towns and cities more livable and green. Generating growth that lifts all boats will be key, for more than 400 million of India’s people—or one-third of the world’s poor—still live in poverty. And, many of those who have recently escaped poverty (53 million people between 2005-10 alone) are still highly vulnerable to falling back into it. In fact, due to population growth, the absolute number of poor people in some of India’s poorest states actually increased during the last decade.

Inequity in all dimensions, including region, caste and gender, will need to be addressed. Poverty rates in India’s poorest states are three to four times higher than those in the more advanced states. While India’s average annual per capita income was \$1,410 in 2011—placing it among the poorest of the world’s middle-income countries— it was just \$436 in Uttar Pradesh (which has more people than Brazil) and only \$294 in Bihar, one of India’s poorest states. Disadvantaged groups will need to be brought into the mainstream to reap the benefits of economic growth, and women—who “hold up half the sky”—empowered to take their rightful place in the socioeconomic fabric of the country.

Fostering greater levels of education and skills will be critical to promote prosperity in a rapidly globalizing world. However, while primary education has largely been universalized, learning outcomes remain low. Less than 10 percent of the working-age population has completed a secondary education, and too many secondary graduates do not have the knowledge and skills to compete in today’s changing job market.

Improving health care will be equally important. Although India’s health indicators have improved, maternal and child mortality rates remain very low and, in some states, are comparable to those in the world’s poorest countries. Of particular concern is the nutrition of

India's children whose well-being will determine the extent of India's much-awaited demographic dividend; at present, an overwhelming 40 percent (217 million) of the world's malnourished children are in India.

The country's infrastructure needs are massive. One in three rural people lack access to an all-weather road, and only one in five national highways is four-lane. Ports and airports have inadequate capacity, and trains move very slowly. An estimated 300 million people are not connected to the national electrical grid, and those who are face frequent disruptions. And, the manufacturing sector—vital for job creation—remains small and underdeveloped.

Nonetheless, a number of India's states are pioneering bold new initiatives to tackle many of India's long-standing challenges and are making great strides towards inclusive growth. Their successes are leading the way forward for the rest of the country, indicating what can be achieved if the poorer states were to learn from their more prosperous counterparts.

India now has that rare window of opportunity to improve the quality of life for its 1.2 billion citizens and lay the foundations for a truly prosperous future—a future that will impact the country and its people for generations to come.

### **Growth in Indian Information Technology / Information Technology Enabled Services (IT-ITES)**

The Indian Information Technology / Information Technology Enabled Services (IT-ITES) industry has emerged as one of the most dynamic sectors in India's economy and is responsible for the global recognition of India as a “soft” power. The consistent and upward growth of the IT segment has created phenomenal wealth, employment, exports and a significantly large reservoir of highly competent technocrats and knowledge workers.

Majority of the Fortune 500 and Global 2000 corporations are sourcing IT-ITES from India. Indian IT companies have set up over 600 delivery centers across the world and are engaged in providing services in over 200 cities across 78 countries. In terms of the national GDP, the sector revenues have grown from 1.2 per cent in FY1997-98 to nearly 9.3 per cent in FY2015-16. India continues to maintain leadership position in the global sourcing arena, accounting for almost 56 per cent of the global sourcing market size in 2016 as compared to 52 per cent in 2012. (Source: <http://meity.gov.in/>)

### **Review of Major Developments in Indian Economy**

In the Advance Estimates of GDP that the Central Statistics Office (CSO) released recently, the growth rate of GDP at constant market prices is projected to increase to 7.6 per cent in 2015-16 from 7.2 per cent in 2014-15, mainly because private final consumption expenditure has accelerated. Similarly, the growth rate of GVA for 2015-16 is estimated at 7.3 per cent vis-à-vis 7.1 per cent in 2014-15. Although agriculture is likely to register low growth for the second year in a row on account of weak monsoons, it has performed better than last year. Industry has shown significant improvement primarily on account of the surprising acceleration in manufacturing (9.5 per cent vis-à-vis 5.5 per cent in 2014-15). Meanwhile, services continue to expand rapidly.

Even as real growth has been accelerating, nominal growth has been falling, to historically low levels, an unusual trend highlighted in the Mid-Year Economic Analysis (MYEA), 2015-16. According to the Advance Estimates, nominal GDP (GVA) is likely to increase by just 8.6 (6.8) percent in 2015-16. In nominal terms, construction is expected to stagnate, while even the dynamic sectors of trade and finance are projected to grow by only 7 to 73/4 percent.

Inflation remains under control. The CPI-New Series inflation has fluctuated around 5 1/2 percent, while measures of underlying trends core inflation, rural wage growth and minimum support price increases have similarly remained muted. Meanwhile, the WPI has been in negative territory since November 2014, the result of the large falls in international commodity prices, especially oil. As low inflation has taken hold and confidence in price stability has improved, gold imports have largely stabilized, notwithstanding the end of a period of import controls.

Similarly, the external position appears robust. The current account deficit has declined and is at comfortable levels foreign exchange reserves have risen to US\$351.5 billion in early February 2016, and are well above standard norms for reserve adequacy net FDI inflows have grown from US\$21.9 billion in April-December 2014-15 to US\$27.7 billion in the same period of 2015-16; and the nominal value of the rupee, measured against a basket of currencies, has been steady. India was consequently well-positioned to absorb the volatility from the U.S. Federal Reserve actions to normalize monetary policy that occurred in December 2015. Although the rupee has declined against the dollar, it has strengthened against the currencies of its other trading partners.

The fiscal sector registered three striking successes ongoing fiscal consolidation, improved indirect tax collection efficiency; and an improvement in the quality of spending at all levels of government. Despite the decline in nominal GDP growth relative to the Budget assumption (11.5 per cent in Budget 2015-16 vis-à-vis 8.6 per cent in the Advance Estimates), the central government will meet its fiscal deficit target of 3.9 per cent of GDP, continuing the commitment to fiscal consolidation. Even on the IMF's definition, the fiscal deficit is expected to decline from 4.2 per cent of GDP in 2014-15 to 4.0 per cent of GDP in 2015-16. Moreover, the consolidated revenue deficit has also declined in the first 8 months by about 0.8 percentage points of GDP.

Government tax revenues are expected to be higher than budgeted levels. Direct taxes grew by 10.7 per cent in the first 9 months (9M) of 2015-16. Indirect taxes were also buoyant. In part, this reflected excise taxes on diesel and petrol and an increase in the Swachh Bharat cess. The central excise duty collection from petroleum products during April to December 2015-16 recorded a growth of 90.5 per cent and stood at Rs. 1.3 lakh crore as against Rs. 0.7 lakh crore in the same period last year. Tax performance also reflected an improvement in tax administration because revenues increased even after stripping out the additional revenue measures (ARMs).

The main findings are that a welcome shift in the quality of spending has occurred from revenue to investment, and towards social sectors. Aggregate public investment has increased by about 0.6 per cent of GDP in the first 8 months of this fiscal year, with contributions from both the Centre (54 per cent) and states (46 per cent). ### **Introduction to Information Technology / Information Technology Enabled Services (IT-ITES)**

India is the world's largest sourcing destination for the Information Technology (IT) industry, accounting for approximately 67 per cent of the US\$ 124-130 billion market. The IT industry has more than 16000 firms; of which 1000+ are large firms with ~ 50 delivery locations in India. The industry employs about 10 million workforces. More importantly, the industry has led the economic transformation of the country and altered the perception of India in the global economy. India's cost competitiveness in providing IT services, which is approximately 3-4 times cheaper than the US, continues to be the mainstay of its Unique Selling Proposition (USP) in the global sourcing market. However, India is also gaining prominence in terms of intellectual capital with several global IT firms setting up their innovation centers in India.

The IT industry has also created significant demand in the Indian education sector, especially for engineering and computer science. The Indian IT and ITeS industry is divided into four major segments – IT services, Business Process Management (BPM), Software Products and Engineering services, and Hardware.

The IT-BPM sector which is currently valued at US\$ 143 billion is expected to grow at a Compound Annual Growth Rate (CAGR) of 8.3 per cent year-on-year to US\$ 143 billion for 2015-16. The sector is expected to contribute 9.5 per cent of India's Gross Domestic Product (GDP) and more than 45 per cent in total services export in 2015-16. ##### **2. USE OF ESTIMATES**

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities, if any, as at the date of the financial statements and reported amounts of income and expenses during the year. Examples of such estimates include provisions for doubtful debts, employee retirement benefit plans, provision for income tax and the useful lives of fixed assets. The difference between the actual results and estimates are recognized in the period in which results are known or materialized.

##### **3. FIXED ASSETS**

Fixed assets are stated at historical cost/revalued value (as valued by registered valuer) less accumulated depreciation and impairment losses, if any. Cost includes purchase price and all other attributable cost to bring the assets to its working condition for the intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

#### 4. DEPRECIATION

##### Tangible Fixed Assets

In accordance with AS-6 “Depreciation”, depreciation on tangible fixed assets is computed on considering useful life provided in the Schedule - II of the Act. During the preceding years, the Company was providing depreciation on written down value basis at the rate prescribed in Schedule XIV of the Companies Act, 1956.

Pursuant to Companies Act, 2013 (‘the Act’) being effective from April 1, 2014, the Company has revised depreciation rates on tangible fixed assets as per useful life specified in Part ‘C’ of Schedule II of the Act. And due to the same there has been a change in the estimated useful life of depreciable tangible assets which affects the depreciation in the current period and in each period during the remaining useful life of the assets. As the change is only in regard to accounting estimate requiring an adjustment of the carrying amount of tangible assets. The same do not require adjustment in the financial information for the years ended on March 31, 2014, 2013, and 2012. The Company has consistently calculated depreciation based on WDV method.

In respect of assets whose useful life had already exhausted as on 1 April 2014, Rs. 0.67 Lacs has been adjusted in Reserves and Surplus as on 31.03.2015 in accordance with requirements of Para 7 of Part C of Schedule II of the Act.

#### 5. BORROWING COSTS

Borrowing cost includes interest and amortization of ancillary costs incurred in connection with the arrangement of borrowings. Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

#### 6. IMPAIRMENT OF ASSETS

- (i) The company assesses, at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset’s recoverable amount. An asset’s (including goodwill) recoverable amount is the higher of an assets net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.
- (ii) After impairment, depreciation/ amortization is provided on the revised carrying amount of the asset over its remaining useful life.

#### 7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

For details in relation to allocation, the Bidder/Applicant may refer to the RHP/Prospectus.
- b) Under-subscription in any category (except QIB Category) is allowed to be met with spillover from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- c) In case of under subscription in the Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/Applicants may refer to the RHP.
- d) Illustration of the Book Building and Price Discovery Process Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount(₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the BRLMs, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

e) **Alternate Method of Book Building**

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of bidding (“**Alternate Book Building Process**”).

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Government usually updates the consolidated circular on FDI Policy once every Year and therefore, Consolidated FDI Policy Circular of 2015 will be valid until the DIPP issues an updated circular.
