An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Prospectus, particularly the **“Financial Information of the Company”** and the related notes, **“Our Business”** and **“Management’s Discussion and Analysis of Financial Condition and Results of Operations”** on page 167, 113 and 223 respectively of this Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. 1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in **“Risk Factors”** on page 26 and **“Management Discussion and Analysis of Financial Condition and Results of Operations”** on page 223 of this Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the **“Restated Financial Statements”** on page 167 of this Prospectus.

1. **We are primarily dependent upon few key suppliers within limited geographical location for procurement of raw materials. Any disruption in the supply of raw materials from such selective suppliers and geographical location could have a material adverse effect on our business operations and financial conditions.**

We procure a large portion of our raw materials, such as low-carbon wire rod and medium-carbon wire rod, from a few key suppliers, with whom we do not have any long-term supply contracts. Therefore, we cannot assure you that we will always have a steady supply of raw materials at prices favorable to us. For the period ending September 30, 2025, and the financial years ended March 31, 2025, 2024, and 2023, purchases from our top ten suppliers amounted to Rs. 1342.30 Lakhs, Rs. 2403.41, Rs. 2,923.63 Lakhs and Rs. 2,593.12 Lakhs, Lakhs, respectively, which represented 84.89%, 76.79%, 90.54% and 99.74%, of our total raw material purchases.

For the period ended September 30, 2025 and for the financial years ended March 31, 2025, 2024 and 2023, our product procurement from our Top 1, 3, 5 and 10 suppliers are as follows:

(Amount in Rs. Lakhs)

Particulars	For the period/ year ended							
	September 30, 2025		March 31, 2025		March 31, 2024		March 31, 2023	
	Amount	% of Total Sales	Amount	% of Total Sales	Amount	% of Total sales	Amount	% of Total Sales
Top 1 Suppliers	471.05	29.79	904.83	28.91	865.67	26.81	1,077.37	41.44
Top 3 Suppliers	862.64	54.56	1597.74	51.05	2177.65	67.44	2058.00	79.16
Top 5 Suppliers	1110.84	70.26	1945.27	62.15	2694.78	83.45	2451.42	94.29
Top 10 Suppliers	1342.3	84.89	2403.41	76.79	2923.63	90.54	2593.12	99.74

A significant portion of our raw material and traded goods purchases is sourced from the state of Maharashtra, accounting for 83.07%, 82.71%, 92.61% and 96.46% of the total purchases for the period ending September 30, 2025, and the financial years ended March 31, 2025, 2024 and 2023 respectively. Given our dependence on suppliers in Maharashtra, any adverse social, political, or economic developments, civil disruptions, labor unrest, or changes in state policies may impact the supply chain and disrupt our business operations. Such disruptions could lead to supply shortages, delays in production, increased procurement costs, and difficulties in meeting customer demands, potentially affecting our profitability and reputation in the industry. Additionally, any increase in logistics costs due to supply chain disruptions or fuel price fluctuations, if not passed on to customers, may further impact our profitability.

Further, discontinuation of such supply or a failure of these suppliers to adhere to the delivery schedule or the required quality could hamper our production schedule and therefore affect our business and results of operations. There can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials. If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Any delay in the supply or delivery of raw materials to us by our suppliers in may in turn delay our process of manufacture and delivery of products to our customers and this may have an adverse effect on our business, cash flows and results of operations. Additionally, our inability to predict market conditions may result in us placing supply orders for inadequate quantities of such raw materials. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms.

2. Substantial portion of our revenues has been dependent upon few customers. The loss of any one or more of our major customer would have a material adverse effect on our business, cash flows, results of operations and financial condition.

The substantial portion of our revenues has been dependent upon few customers. For instance, our top 10 customers for the period ended September 30, 2025 and for the financial year ended on March 31, 2025, March 31, 2024 and March 31, 2023 accounted for Rs. 2114.04 Lakhs, Rs. 3714.98, Rs. 3489.74 Lakhs and Rs. 3049.39 Lakhs respectively 65.98%, 65.19% 70.16% and 82.14% of our revenue from operations for the respective year. We cater to a diverse range of industries, including construction, engineering, warehousing, logistics, mining, infrastructure, and automotive. Our reliance on a limited number of customers for our business exposes us to risks, that may include, but are not limited to, reductions, delays or cancellation of orders from our significant customers, a failure to negotiate favorable terms with our key customers or the loss of these customers, all of which would have a material adverse effect on the business, financial condition, results of operations, cash flows and future prospects of our Company.

For the period ended September 30, 2025 and for the financial years ended March 31, 2025, 2024 and 2023 and our Top 1, 3, 5 and 10 customers are as follows:

(Amount in Rs. Lakhs)

Particulars	For the period/ year ended							
	September 30, 2025		March 31, 2025		March 31, 2024		March 31, 2023	
	Amount	% of Total Sales	Amount	% of Total Sales	Amount	% of Total sales	Amount	% of Total Sales
Top 1 Customer	781.82	24.40	562.22	9.87	995.00	20.00	892.30	24.04
Top 3 Customers	1401.27	43.73	1598.72	28.06	2,116.11	42.54	2,012.36	54.21
Top 5 Customers	1639.93	51.18	2332.88	40.94	2,620.61	52.68	2,525.92	68.04
Top 10 Customers	2114.04	65.98	3714.98	65.19	3,489.74	70.16	3,049.39	82.14

In addition, we have not entered into long term agreements with our customers and the success of our business is accordingly significantly dependent on maintaining good relationship with them. The loss of one or more of these significant customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial

condition and cash flows. Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources. Additionally, our revenues may be adversely affected if there is an adverse change in any of our customers' supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows, results of operations and financial condition.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and whether they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

3. *Our Company does not have long-term agreements with suppliers for input materials. A significant increase in the cost or shortfall in the availability of such materials, along with price fluctuations, could adversely impact our business, financial condition, and operational results.*

Our business relies on the availability of low-carbon and medium-carbon wire rods with specific properties such as dimensional stability, machinability, workability, heat resistance, corrosion resistance, and impact resistance. The price and availability of these raw materials are subject to supply-side disruptions and factors beyond our control, including global market conditions, foreign exchange rates, production levels, competition, taxes, duties, and the prevailing regulatory environment in India.

The cost of raw materials accounted for 41.08%, 52.22%, 56.27% and 65.38% of our revenue from manufacturing activities for the period ended September 30, 2025, and the financial years ended March 31, 2025, 2024 and 2023 respectively. We are exposed to the risk of rising and fluctuating raw material prices, which are influenced by demand and supply conditions in both global and domestic markets. Any unexpected price fluctuations after order placement, shortages, delivery delays, quality defects, or other supply chain disruptions may adversely impact our business, financial performance, and cash flows.

Our manufacturing operations may also face significant cost overruns or losses due to unforeseen raw material shortages, price increases, higher production costs, changes in taxation or regulatory requirements, supply chain disruptions, adverse weather conditions, or force majeure events. Since we do not enter into long-term supply agreements and procure all raw materials on a need basis, primarily through the spot market, we remain vulnerable to price fluctuations. While we aim to diversify our supplier base, increased raw material costs may not always be passed on to customers, potentially affecting our margins and profitability.

Steel prices, a key component of our raw material costs, are influenced by supply and demand dynamics, trade policies, transportation costs, indirect taxes, import duties, tariffs, and currency fluctuations. Any increase in steel prices can directly impact our production costs and operating margins. Since we do not have long-term contracts with suppliers, we remain exposed to short-term supply challenges and price volatility. We rely on a few key suppliers for critical raw materials. Purchases from our top ten suppliers amounted to ₹1342.30 Lakhs, ₹ 2403.41 lakhs, ₹2,923.63 lakhs, ₹2,593.12 lakhs for the period ended September 30, 2025, and the financial years ended March 31, 2025, 2024 and 2023 respectively, representing a significant portion of our total raw material purchases. Dependence on a limited supplier base increases our exposure to supply disruptions, pricing fluctuations, and potential delays in procuring essential materials. There is no assurance that we will consistently secure an adequate supply of raw materials at competitive prices. Any material shortages or price increases could lead to higher production costs, affecting our ability to meet customer demand and potentially resulting in lost orders, reduced market share, and revenue decline. Our competitors may have stronger supplier relationships and greater bargaining power, giving them a competitive advantage in procurement.

While we do not rely on imports for raw materials, domestic supply chain disruptions due to unforeseen regulatory changes, tariff adjustments, or government-imposed restrictions could impact material availability and pricing. Any such disruptions may delay production schedules, affect customer commitments, and create operational inefficiencies. Identifying alternative suppliers or negotiating favorable terms in such situations may be challenging, further impacting our business performance. Additionally, any increase in raw material costs may not be fully passed on to customers, which could negatively impact our profitability. If we raise product prices to offset higher costs, it may lead to order cancellations or reduced demand. Our inability to effectively manage raw material price fluctuations and procurement risks may materially and adversely affect our business, financial condition, operating results, and cash flows.

4. Our Company is yet to place orders for the machinery for the expansion of the proposed manufacturing unit. Any delay in placing orders or procurement of such machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.

Our Company proposes to utilize a portion of the IPO proceeds for the Electrical and Mechanical Equipments, Interior work and acquisition of plant, machinery, and other equipment to be installed at our proposed manufacturing unit located at Additional Amravati MIDC Textile Zone, Nagpur Road, Sawardi, Teosa, Amravati, Maharashtra, 444903. We have already acquired the land for 95 years lease vide agreement dated August 05, 2024 and the civil construction of work already initiated. Further, We have identified the required machinery and obtained quotations from suppliers; however, we have not yet placed final orders for Interior work, Mechanical and electrical work and certain machinery and equipment aggregating to ₹ 720.40 lakhs, Orders have already been placed for machinery worth ₹698.38lakhs, with an advance payment of ₹89.71 lakhs, representing 49.22% of the total estimated expenditure for our expansion plan, which is proposed to be funded through the IPO proceeds.

The cost of the proposed machinery acquisition is based on quotations received from third-party vendors and contractors, which are subject to validity periods and potential revisions due to commercial and technical factors. For further details, please refer to the chapter titled “**Objects of the Issue**” beginning on page 82 of this Prospectus.

Our expansion plans remain subject to the potential problems and uncertainties including cost overruns or delays. Problems that could adversely affect our expansion plans include increased costs of equipment, inadequate performance of the equipment and machinery to be installed at our proposed factory, delays in completion, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory and other regulatory approvals, incremental pre- operating expenses, taxes and duties, interest and finance charges, and other external factors which may not be within the control of our management. There can be no assurance that the proposed expansions will be completed as planned or on schedule, and if they are not completed in a timely manner, or at all, our budgeted costs may be insufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. There can be no assurance that we will be able to complete the aforementioned expansion and additions in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

Further, after procurement of new machineries, we may face a risk that our expected capacity expansion may not be absorbed by the market, if future sales are insufficient to break even the production from new unit. This could adversely impact the company's existing profitability and the financial position.

5. Risks associated with recent acquisition and revenue dependence on our subsidiary.

We have recently acquired Durafloor Concrete Solutions LLP, which provides concrete flooring solutions. As this subsidiary operates in the service sector and was acquired recently, our consolidated restated financial statements for the stub period ended September 30, 2025, and the fiscal year ended March 31, 2025 and March 31, 2024, do not yet provide a sufficient track record for investors to reliably assess its long-term performance or future prospects. The subsidiary's revenue has only recently been included in our financials, and any fluctuations in its operations or profitability could affect our overall financial performance.

Currently, 45.74% of our total revenue for the stub period ended September 30, 2025, is derived from this subsidiary. Given its recent integration, the long-term stability and expansion of this segment remain uncertain. Any challenges related to operations, market conditions, or other external factors affecting the LLP could have a significant impact on our financial condition and overall business performance.

6. Our Business is dependent on our manufacturing unit. Any disruption, breakdown or failure of machinery, disruption to power sources or any temporary shutdown of our manufacturing unit, may have a material adverse effect on our business, results of operations, financial condition and cash flows.

We have all three manufacturing unit at Amravati MIDC in Maharashtra, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe climate conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to repair breakdown of machinery in a timely manner or at all, our operations may need to be suspended until we procure new machinery to replace the same. In addition, we may be required to carry out planned shutdowns of our manufacturing unit for cleaning and maintenance, statutory inspections and testing, or may shut down certain manufacturing unit for capacity expansion and equipment upgrades.

Obsolescence, destruction, theft or breakdowns of our machineries may significantly increase our machineries purchase cost and the depreciation of our plants and machineries, as well as change the way our management estimates the useful life of our plants

and machineries. In such cases, we may not be able to acquire new plants or machineries or repair the damaged plants or machineries in time or at all. Some of our major machineries or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability. Such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an effect on our business, cash flows, financial condition and results of operations.

Although we have not experienced any significant disruptions at our manufacturing unit in the past, we cannot assure you that there will not be any disruptions in our operations in the future. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shut-down of our operations for limited time or under-utilization of our manufacturing unit, which in turn may have an adverse effect on our business, results of operations and financial condition.

7. Our Company had negative cash flows in the past, details of which are given below. Sustained negative cash flow could impact our growth and business. We have experienced negative cash flows in the past which have been set out below:

8. Company derives significant portion revenue from manufacturing of Steel Fiber and any reduction in the demand of such products could have an adverse effect on the business, results of operations and financial condition.

We are engaged in the manufacturing of Steel Fiber and Steel Wool Fiber which are used in industrial flooring, precast tunnel lining and brake pads and linings. We generate a significant portion of our revenue from our key product i.e. Duraflex Steel Fiber which contributed to 37.62%, 41.13%, 61.15% and 65.68% of our revenue from operations for period ended September 30, 2025, Fiscal 2025, 2024 and 2023 respectively. We cannot assure you that we will be able to maintain the same levels of sales for Duraflex Steel Fiber in the future. Any inability on our end to anticipate and adapt to technological changes or evolving consumer preferences and/or any decrease in the demand for our key product may adversely impact our business prospects and financial performance.

Such reclassification has resulted in corresponding changes in cash generated from operations, net cash flow from operating activities, purchase of fixed assets and loan received for the relevant financial years.

Although such modifications and reclassifications do not impact our underlying profitability or cash position, they may affect the comparability of our financial information with previously reported figures. There can be no assurance that these changes will not be subject to further review, interpretation or scrutiny by regulatory authorities, investors or analysts. Any perceived inconsistency or misunderstanding may adversely affect investor understanding of our financial condition and results of operations, and could have an adverse effect on the market price, demand and valuation of our Equity Shares.

11. We operate in a labor-intensive industry and are subject to stringent labor laws and any strike, work stoppage or increased wage demand by our employees or any other kind of disputes with our employees could adversely affect our business, financial condition, results of operations and cash flows.

Our manufacturing processes are labor-intensive, and our operations rely on the availability and retention of skilled labor. If we are unable to negotiate favorable terms with the workforce, it may lead to work stoppages, disruptions, or increased operating costs due to higher-than-anticipated wages or benefits. Any shortage of labor or difficulty in retaining skilled workers could adversely affect our business operations. We cannot guarantee that we will continue to secure labor on favorable terms, and any failure in this regard may impact our production, business processes, and profitability.

While we have not experienced any strike in the past. There can be no assurance that we will not experience any strike or work stoppage in the future. In addition, work stoppages or slowdowns experienced by our customers or key suppliers could result in slow-downs or closures of our facilities where our products are included in the end products. If we or one or more of our customers or key suppliers experience a work stoppage, such work stoppage could have an adverse effect on our business, financial condition, cash flows and results of operations.

During periods of shortages in labor, we may not be able to manufacture our products according to our previously determined time frames, at our previously estimated product costs, or at all, which may adversely affect our business, results of operations, cash flows and reputation.

We are also subject to a number of stringent labor laws that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes financial obligations on employers upon retrenchment. If labor laws become more stringent, it may become more difficult for us to maintain flexible human resource policies, discharge employees or downsize, any of which could have a material adverse effect on our business, financial condition, results of operations, cash flows and prospects.

12. We generate our major portion of turnover from our operations in certain geographical regions and any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations

A significant portion of our revenue is derived from Tamil Nadu, contributing 38.16%, 27.82, 28.47% and 28.31% of our total revenue from operations for the period ended September 30, 2025, and the financial years ended March 31, 2025, 2024 and 2023 respectively. Additionally, we carry our entire manufacturing operations from our 3 manufacturing unit located at Amravati MIDC, Maharashtra. This geographical concentration makes our business vulnerable to local, regional, and environmental factors. Any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state governments or state or local governments, may require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at our manufacturing unit could result in significant loss due to an inability to meet customer orders and production schedules, which could materially affect our business reputation within the industry. The occurrence of or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects.

We sell our products across multiple states, including Tamilnadu, Odisha, Maharashtra, Rajasthan, Telangana, Haryana, Pundicherry Madhya Pradesh, Goa etc. To drive future growth, we plan to expand into new regions within India and explore export opportunities. However, entering new markets may bring increased competition from well-established players who have stronger local presence, deeper market knowledge, established customer relationships, and better access to suppliers and regulatory bodies. These factors may give them a competitive advantage over us. Failure to successfully expand into new geographies could impact our business growth, financial performance, and overall market positioning.

If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. For the details of the cases please refer the chapter titled “**Outstanding Litigations and Material Developments**” beginning on page 233 of this Prospectus.

14. The Company has encountered certain issues and discrepancies in its corporate records and regulatory compliance, which present potential risks.

We manage regulatory compliance by monitoring and evaluating our internal controls to ensure adherence to all relevant statutory and regulatory requirements. However, we cannot guarantee that deficiencies in our filings will not arise in the future or that we will be able to effectively implement or maintain adequate measures to rectify or mitigate any deficiencies in our internal controls. Several discrepancies have been noted in our corporate records related to e-forms filed with the Registrar of Companies such as Form-2 for allotment of 7250 equity shares in F.Y. 2009-10 was not found in the Company's records, however, the details have been verified from other available corporate records. Further, in the past our company has inadvertently, has given loan to M/s Kasturi Petroleum in which the director of the company was proprietor, which was later repaid and no such loan or advance is pending as on date of this Prospectus.

Further, in the past, our Company has made some clerical errors in documents and forms filed with the Registrar of Companies, for instance, the company has mistakenly attached the incorrect resolutions in the form PAS-3 filed for allotment of Bonus Share dated February 24, 2022 and allotment dated June 25, 2019 for preferential issue of shares. Further, clerical errors were made in the attachment in Form DIR-12 filed for the resignation of Surendra Fatechand Singhai, Lata Surendra Singhai, and Alka Samit Singhai and Pallavi Akash Singhai.

Although, no show cause notice in respect of the non-compliance has been received by the Company till date, any penalty imposed for such non-compliance in future by the any regulatory authority could affect our financial conditions to that extent. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our

business. Though, as a remedial action, the Company has started filing forms on or before its due date and has also appointed and authorized Company Secretary & Compliance Officer of the company to keep proper check on the filing in due time.

15. Changes in technology render our current fleet of equipment obsolete and require us to make substantial capital investments.

Our production equipment for Steel Fiber and Steel Wool Fiber products is subject to continuous technological advancements. The introduction of newer and more efficient technologies may render our existing equipment obsolete, necessitating frequent upgrades to meet client demands and stay competitive. Keeping pace with these advancements requires significant capital investment, and failure to do so may impact our operational efficiency and market position. Moreover, rapid shifts in technology and evolving market demands could result in asset write-downs or substantial capital expenditures for equipment replacement. If we are unable to adopt new technologies in a cost-effective and timely manner, our production costs may rise, impacting pricing competitiveness and service quality. Additionally, if we fail to anticipate or respond to client requirements and industry trends, our business, financial condition, and growth prospects could be materially and adversely affected.

16. Our Company and Our Subsidiary operates under several statutory and regulatory approvals in respect of our operations. Failure to obtain or maintain licenses, registrations, permits and approvals may affect our business and results of operations.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. We believe that we have obtained requisite permits and licenses which are adequate to run our business, however we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

We have applied for a name, status and address change in the Professional Tax Enrolment Certificate (PTEC) and PF Registration on February 15, 2025, and March 27, 2024, respectively. We are also in the process of updating our name in certain government approvals that are still registered under the previous name. Additionally, some company records, including the Consent to Establish for Unit-1, are not traceable. However, the company has submitted a formal application dated July 07, 2025 to issue a certified copy of consent to establish for the company's Unit-1 at D-13/1, MIDC, Amravati, Maharashtra, India, 444605. Furthermore, our subsidiary, Durafloor Concrete Solutions LLP, has applied for a change of address in its PF Registration, and ESIC Registration vide application dated January 22, 2025, which are still pending approval. For details regarding pending approvals, please refer to section titled **"Government and Other Approvals"** beginning on page 238 of the Prospectus. There can be no assurance that the relevant authorities will issue or renew these approvals or licenses in a timely manner, or at all. In the event of any unanticipated delay in receipt of such approvals, the proposed capacity expansion plan may extend and any such delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

The approvals required by our Company are subject to numerous conditions and there can be no assurance that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

17. We derive a limited portion of our revenues from various countries outside India. Any adverse developments in these markets, along with fluctuations in exchange rates, may negatively impact our results of operations.

Our Company has diversified revenue from multiple geographical locations, including export sales to countries including **Nepal, New Zealand, Bhutan, Dubai** etc. Revenue from the sale of products outside India amounted to ₹60.12 Lakhs, ₹94.33 Lakhs, ₹227.09 Lakhs and ₹436.67 Lakhs for the period ending September 30, 2025 and financial year ended March 31, 2025, 2024 and 2023 respectively, representing 1.88%, 1.66%, 4.56% and 11.76% of our revenue from operation in such periods, respectively.

The details of domestic and international sales including export details for the stub period ending September 30, 2025, and financial years ending March 31, 2025, 2024 and March 31, 2023`:

Our revenues from the export of goods may decline due to increased competition, regulatory actions, pricing pressures, fluctuations in the demand for or supply of our products, or the outbreak of an infectious disease such as COVID-19. Our failure to effectively respond to these situations or successfully introduce new products could adversely affect our business prospects, results of operations, and financial condition. Additionally, international operations are subject to risks specific to each country and region in which we operate, as well as risks associated with international business in general. These risks include complying with changes in foreign laws, regulations, and policies, such as restrictions on trade, import and export license requirements, tariffs and taxes, intellectual property enforcement issues, and changes in foreign trade and investment policies.

Further, due to such export transactions conducted in foreign currencies, including the US dollar, NPR, Bhutanese ngultrum and other foreign currencies. we are exposed to foreign exchange-related risks. While we make provisions for foreign exchange fluctuations, significant or frequent changes in the exchange rate between the Indian Rupee and other currencies may adversely affect our results of operations. The exchange rate between the Indian Rupee and foreign currencies, primarily the USD, has fluctuated in the past and has impacted our results of operations. For example, when the Indian Rupee strengthens, our revenue from overseas offerings is negatively impacted as foreign currency received translates into fewer Indian Rupees. However, the depreciation of the Indian Rupee may not consistently show a positive effect due to other variables impacting our business during the same period.

Our ability to foresee future foreign currency fluctuations is limited. Due to the time gap between the accounting of sales and actual receipts, the foreign exchange rate at which sales are recorded in our books may differ from the rate at which receipts are made. This can benefit or adversely affect us, depending on the appreciation or depreciation of the Rupee. We may be exposed to risks arising from exchange rate fluctuations and may not always be able to pass on losses due to foreign currency fluctuations to our clients, potentially resulting in losses. There is no guarantee that we will effectively manage foreign currency risks or mitigate exchange exposures at all times, which could harm our results of operations and cause fluctuations in our financial performance.

18. Geographical concentration of our manufacturing facilities may adversely affect our operations, business and financial condition.

We manufacture and supply our products to customers in different geographies within and outside India from our all three manufacturing units located in Amravati, Maharashtra. Any disruption to our manufacturing units may result in production shutdowns. Further, any communal agitations in any parts of Amravati causing significant loss to infrastructure, shutdown of business and industry or damage to property may affect our operations. Additionally, if our manufacturing facility is harmed or rendered inoperable by natural or man-made disasters, including earthquakes, fire, floods, acts of terrorism and power outages, it may render it difficult or impossible for us to efficiently operate our business for some period of time which may adversely affect our business, financial condition, result of operations and cash flows. Our manufacturing operations require significant labour and are also reliant on government policies in terms of taxes, duties and incentives made applicable by the state government. As a result, any unfavourable policies of the state government or state or local governments in this region, could adversely affect our business, financial condition and results of operations.

19. We are subject to strict quality requirements and are consequently required to incur significant expenses to maintain our product quality. Any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.

Quality of our product is very important for our customers and their brands equity. All our products go through various quality checks at various stages. We supply Steel Fiber and Steel Wool Fiber products covering a variety of applications for the industrial segments each of which have different product specifications. Our Company is committed to provide quality products to our customers and in this relation has also received quality certification i.e. ISO 9001:2015 for our products. Our Company ensures that its products are tested for various application tests such as sample test, performance, durability, product safety etc., in line with applicable standards. Failure of our products to meet prescribed quality standards may result in rejection and reworking and replacement of product. Any failure on our part to successfully maintain quality standards for our products may affect our business and operations.

20. Any failure to protect or enforce our rights to own or use trademarks and brand names and identities could have an adverse effect on our business and competitive position.

Our Company has applied for trademark registration in relation to our Company. The application made by our Company for registration of trademark **DURABOND** under Class 12 of the Trademark Act has been Applied via dated February 10, 2025 and its last status was formalities chk pass. We have also applied registration of the trademark **DURO-CRETE** under Class 19 and trademark **DURAFlex** under Class 6 of the Trademark Act and their last status was opposed. Further, the

Company has made an application on November 12, 2024 for registration of our corporate logo  under the Trademark Act, 1999 with the Registrar of Trademarks and the same is pending. Furthermore, we have filed a patent application under the Indian Patents Act, 1970 for our newly developed product, High Tensile Strength Steel Fiber with Inverted Loop Ends, which is currently in the “The status is “awaiting Publication on official patent journal” status. Our Subsidiary has also applied registration of the trademark namely “DURACURE”, “DURASLEEVE”, “DURASHIELD” and “DURASHRINK” dated November 29, 2024 and their last status was “formalities chk pass”. Further, our subsidiary has made an application on November 29, 2024 for registration of our logo “Duraflor Concrete Solutions LLP” its last status was “formalities chk pass”. We cannot assure you that our trademark application or patent application will be approved. In the absence of trademark or patent registrations, we may not be able to initiate an infringement action against any third party who may be infringing our trademarks or patent. For further details pertaining to the intellectual property of our Company, see “**Our Business –Intellectual Property**” and “**Government and Other Statutory Approvals**” on pages 113 and 238, respectively of this Prospectus.

We may not be able to prevent infringement of our trademarks. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. Further, if we do not maintain our brand identity, which is an important factor that differentiates us from our competitors, we may not be able to maintain our competitive edge. If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability.

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we are infringing any existing third-party intellectual property rights, which may force us to alter our offerings. We may also be susceptible to claims from third parties asserting infringement and other related claims. If similar claims are raised in the future, they could result in costly litigation, divert management’s attention and resources, subject us to significant liabilities and require us to enter into potentially expensive royalty or licensing agreements or to cease certain offerings. Any of the foregoing could have an adverse effect on our business. The application of laws governing intellectual property rights in India is uncertain, evolving and could involve substantial risks to us.

21. Certain Offices of the company and Our subsidiary operates from a premise taken by us/Our Subsidiary on lease basis. If we/our subsidiary are unable to comply with the terms of the lease deed, the same may adversely affect our Company’s/Our Subsidiary’s ability to operate its current operations thus affecting its financial performance.

The premises used by our Subsidiary, Duraflor Concrete Solutions LLP (“DCSL”), have been obtained on a lease or rental basis, including the registered office located at Akshar Business Park, S Wing, First Floor, Office No. S-1063A, Janta Market Road, Sector-25, Vashi, Navi Mumbai, Maharashtra-400703, India, and an office at Gen-2/1/C Part, Unit/Gala No. 435, Building, Raheja Tesla, 1, Block, TTC Industrial Area, MIDC, Juinagar, Nerul, Thane, Maharashtra, India. Further, we have obtained a No Objection Certificate (NOC) dated September 1, 2024 from the owner to use an area of 250 sq. ft. out of the total area of 1200 sq. ft. the registered office of our Subsidiary at Akshar Business Park, as the corporate office of our Company. There is no separate sub-lease or rent-sharing agreement between our Company and its Subsidiary.

We and our subsidiary cannot assure the renewal of lease or rental agreements on favorable terms or at all. If the lease is not renewed, terminated before its tenure, or if the NOC is withdrawn, we may need to invest significant time and financial resources to secure an alternative location. Additionally, we may face delays or challenges in relocation, and there is no assurance that a new office will be commercially viable. If the vacated premises are leased or sold to a competitor, we may face increased competition in the region, which could impact our market share. Any such disruptions could adversely affect our business, financial condition, and operational results. For further details on our properties, refer to the section “**Our Business**” on page 113 of this Prospectus.

22. Our Subsidiary is dependent upon third parties for manufacture and supply of substantially all of our products with which we do not have long term contracts or exclusive supply arrangements. Any delay or failure on the part of such vendors to deliver products, may adversely affect our business, profitability and reputation.

Our subsidiary, Duraflor Concrete Solutions LLP (“DCSL”), obtain substantially all of the products from third parties, with whom we generally do not have long-term contracts or agreements. The orders for the materials are placed on requirement basis. In the event that, there are any delays or disruptions in the supply of these materials from our manufactures/vendors, our ability to deliver the products may be affected. Any of our supplier’s failure to adhere to agreed timelines, whether due to their inability to comply

with, or obtain, regulatory approvals, or otherwise, may result in delays and disruptions to our sales, increased costs, delayed payments for our products and damage to our reputation leading to an adverse effect on our results of operations.

As of September 30, 2025, we source our products for industrial flooring from multiple domestic manufactures/vendors. All our products are procured from third-party suppliers, with some sourced from a limited number of suppliers or even a single supplier. Additionally, some of our suppliers may have more established relationships with our competitors, and as a result of these relationships, such suppliers may choose to limit or terminate their relationships with us or prioritize our competitors' orders in the case of supply shortages.

Therefore, our subsidiary is subject to risks of shortages or discontinuation in supply, long lead times, cost increases and quality control issues with our suppliers. In the event of any such interruption in supply, we would need to identify and obtain acceptable replacement sources on a timely basis. There is no guarantee that we would be able to obtain such alternative sources of supply on a timely basis, if at all, and an extended interruption in supply, particularly of a high-sales volume product, could result in a significant disruption in our sales and operations, as well as damage to our relationships with customers and our reputation. We believe we have maintained stable relationships with these vendors in the past, we cannot assure you that, we will be able to source adequate quantities of products in a timely manner from our existing vendors in the future or we will be able to find alternative vendors at acceptable prices and quality levels or at all.

In addition, any restrictions, either from the Central or state governments of India or any adverse change in policies by India or other countries, in terms of tariff and non-tariff barriers, may adversely affect on business, prospects, financial condition and results of operations of our subsidiary. Further, there can be no assurance that, under these circumstances, we will be successful in identifying alternate vendors for products or we will be able to source the products at favorable terms in a timely manner. Any restriction on import of products could have an adverse effect on our ability to deliver products to our customers, business and results of operations.

23. Our failure to adapt to technological developments or industry trends could affect the performance and features of our products, and reduce our attractiveness to our customers.

As our operations grow in scope and size, whether through offering of new products or expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced products, features and functionality ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition. For further details regarding our business, please refer to chapter titled “***Our Business***” beginning on Page 113 of this Prospectus.

24. Our Entry into New Overseas Markets May Involve Significant Operational, Regulatory, and Geopolitical Challenges

We are exploring opportunities to expand into new international export markets to enhance our growth prospects. However, such expansion involves various risks, including unfamiliarity with local regulations and cultural practices, language barriers, challenges in managing remote operations, and limited brand recognition. These factors may increase operational complexity and associated costs. Additionally, we may be subject to foreign investment regulations, trade restrictions, local tax and labor laws, and data protection requirements. Political or economic instability in target markets may further impact our ability to establish and sustain operations. Failure to effectively manage these risks could adversely affect our international expansion plans, business operations, financial performance, and reputation.

25. Dependence upon transportation services for supply and transportation of our products are subject to various uncertainties and risks, and delays in delivery may result in rejection of products by customer.

We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation of our finished products to our customers. For this purpose, we hire services of transportation companies. However, we have not entered into any definitive agreements with any third-party transport service providers and engage them on a need basis. Additionally, availability of transportation solutions in the markets we operate in is typically fragmented. The cost of our goods carried by such third-party transporters is typically much higher than the consideration paid for transportation, due to which it may be difficult for us to recover compensation for damaged, delayed or lost goods.

Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lockouts,

shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, movement of goods encounters additional risks such as accidents, spoilage, and our inability to claim insurance may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

26. *Since our incorporation in the year 2005, we have expanded our business, scale of operations and delivered variety of products, creating our position in the steel fiber and steel wool fiber products. However, we face competitive pressures in our business in the future and our inability to compete effectively would be detrimental to our business and prospects for future growth.*

Since our incorporation in the year 2005, we have expanded our business, scale of operations and delivered variety of products, creating our position in the steel fiber and steel wool fiber products. However, we face competitive pressures in our business in the future and our inability to compete effectively would be detrimental to our business and prospects for future growth. We face competition in our business from other manufacturers and suppliers of steel fiber and steel wool fiber products. For details, please see sections titled “**Industry Overview**” and “**Our Business**” on pages 101 and 113, respectively. The industry and markets for our products are characterized by factors such as rapid technological change, the development of new end products and their rapid obsolescence, evolving industry standards and significant price erosion over the life of a product. We primarily compete based on the following:

- a. product functionality, quality and reliability;
- b. design, technical, research and production capabilities;
- c. ability to meet customers’ order requirements and delivery schedules; and
- d. product price.

There can be no assurance that we will maintain our competitiveness in any of these areas with respect to any of our products. While we work consistently to advance our technological capability, improve our services or enhance our production efficiency to reduce costs, such efforts may not be successful. Also, as we plan to expand our offerings to launch new products, we may face strong competition from other players in the same markets. Many of our existing and potential competitors may seek to equal or exceed us in terms of their financial, production, sales, marketing and other resources. If we fail to compete effectively in the future, our business and prospects could be materially and adversely affected.

Due to the fragmented nature of the steel products industry and price advantage that the unbranded players generally enjoy, there can be no assurance that we will maintain our competitiveness in steel fiber and steel wool fiber product industry with respect to any of our products. In addition, as a result of the intense competition and accelerated innovation in the steel fiber and steel wool fiber products industry, our ability to achieve and maintain profitability depends on a number of factors, including expanding manufacturing capacities at necessary levels, the customer perception of our products and the pricing levels of our competitors, some of which is beyond our control.

While we work consistently to offset pricing pressures, produce new products, advance our technical capability, improve our services or enhance our production efficiency to reduce costs, such efforts may not be successful. Also, as we plan to expand our offerings to launch new products, we may face competition from other players in the same markets. Many of our existing and potential competitors may seek to equal or exceed us in terms of their financial, production, sales, marketing and other resources. If we fail to compete effectively in the future, our business and prospects could be materially and adversely affected.

27. *Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.*

Our operations are subject to various risks inherent to any business, including employee accidents, fire, earthquakes, floods, other force majeure events, acts of terrorism, explosions, and accidents that may result in injury, loss of life, and severe damage to property, equipment, and the environment. We have obtained the SBI General Bharat Laghu Udhya Suraksha Policy from SBI General Insurance Company Limited for our registered office and all three manufacturing units, which provides coverage against losses due to fire, explosions, lightning, earthquakes, volcanic eruptions, riots, strikes, and physical damage, among others. Additionally, we have secured a Package Policy (Commercial Vehicle – Goods Carrying) from The New India Assurance Company Limited and Group Health (Floater) Insurance Policy from ICICI Lombard for our employees. However, we have not obtained Key Man Insurance Policy, Machinery breakdown policy and General Liabilities Insurance Policy. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if

insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

28. Our profitability and business operations is significantly dependent on our ability to successfully anticipate the industry and client requirements. Any failure on our part to do so, may have an impact on our operations, which could have an adverse effect on our revenue, reputation, financial conditions, results of operations and cash flows.

Our profitability, business operations and its success is significantly dependent on our ability to ensure continued demand for our products in existing and proposed markets, which requires us to continuously anticipate and respond in a timely manner to customer requirements and preferences. If we are unable to successfully anticipate customer requirements or are unable to modify our current portfolio of products or develop new products, in a timely manner, we may lose customers.

Though we are committed to product innovation to respond to changing technology in the Steel industry, there can be no assurance that we would be successful in developing new products that respond to such changes or changes in customer requirements and preferences or that our products would gain acceptance in our existing or new markets. Any enhancement to our existing offerings or new offerings that we develop and introduce involves significant commitment of time and resources and is subject to a number of risks and challenges including:

- ensuring the timely deployment of new offerings and features;
- adapting to emerging and evolving industry standards, technological developments by our competitors and changing client requirements;
- operating effectively with existing or newly-introduced technologies, systems, or applications of our existing and prospective clients.

The development of alternative technologies or a fundamental shift in technologies in key markets for our steel fiber could have an adverse effect on our business. Moreover, failure to correctly anticipate trends and adapt to the changing technological environment may result in reduced demand for our products which could have adverse effect on our revenue, reputation, financial conditions, results of operations and cash flows.

29. Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain our historical growth rates.

Our revenue from operations increased from ₹3,711.94 lakhs in FY 2022-23 and ₹4,974.55 lakhs in FY 2023-24 and 5697.22 in FY 2024-25 Sustaining this growth will require significant investments, including in assets, and will put pressure on our ability to effectively manage and mitigate both historical and emerging risks. The expansion of our business, along with the increasing scope and complexity of our operations, may strain our internal control framework and processes, potentially resulting in delays, increased costs, and compromises in product and service quality. We may not be able to effectively manage this growth or achieve the desired profitability within the expected timeframe or at all.

In the steel fiber products manufacturing industry, we operate competition from both organized and unorganized players from various regions in India. These competitors offer products similar to ours, potentially gaining a competitive edge in aspects such as pricing, durability, product quality, user experience, operational efficiency, timely delivery, and reliability. Keeping pace with the ever-changing technology landscape in the industry is crucial, and our ability to adapt will significantly impact our competitive standing.

Additionally, several of our strategic initiatives are currently in their nascent stages. While initial success is a possibility, the long-term success of these initiatives is not guaranteed. The inherent uncertainties in the early stages of strategic endeavours necessitate a cautious approach, and we cannot assure sustained success without potential challenges and adjustments along the way. We remain vigilant and adaptable, ready to navigate the evolving landscape and optimize our strategies for long-term success.

30. Our operating results could be materially harmed if we are unable to accurately forecast customer demand for our products or manage our inventory.

We strive to keep optimum inventory to control our costs and working capital requirements. To maintain an optimal inventory, we monitor our inventory levels based on our projections of demand as well as on a real-time basis, hence the balance of the inventory can be maintained, but we need to keep a strict check on the requirement. However, unavailability of products, due to high demand or inaccurate forecast, may result in loss of sales and adversely affect our customer relationships. We manage our inventory by constantly monitoring and tracking our current inventory levels, while keeping a small portion of reserve stock, based on our forecast customer demand. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. Inventory levels in excess of customer demand may result in inventory write-offs and the sale of excess inventory at discounted prices, which may cause our gross margin to suffer and could impair the strength of our brand. On the other hand, in the case we experience shortage of products, we may be unable to meet the demand for our products, and our business and

operating results could be adversely affected.

Therefore, an inaccurate forecast can also result in an over-supply of products, which may increase inventory costs, negatively impact cash flow, reduce the quality of inventory, shrinkages and ultimately lead to reduction in margins. Further, some of our products can become obsolete in terms of designs, and any inventory that we hold with respect to old designs may not get sold or replaced by our suppliers. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition. During the stub period ended on September 30, 2025 and Fiscal 2025, 2024 and 2023 our inventories were 851.94 lakhs, Rs. 874.98 lakhs, Rs. 697.94 lakhs and Rs. 466.48 lakhs respectively. For details regarding inventories, please refer to section titled “**Financial information of the company**” beginning on page 167 of the Prospectus.

31. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

Our Company is engaged in manufacturing and production which attracts tax liability such as Goods and Service Tax, Income Tax, and custom duties as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contribution with Provident Fund and ESI. Though, we have submitted the required returns under various applicable Acts but any delay in submission of the requisite returns or the tax amount with the relevant authority or any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

For instance, our company in the past had delayed payments of GST and ESI due to operational reasons and accordingly paid late fees and penalties on the same. Though, as a remedial action Company has started making such payments before its due date and has also authorized CFO of the company to keep proper check on the payment and filing of all the statutory payments and returns in due time. The delayed payments of GST and ESI in fiscal years ended on March 2022, 2023, 2024, 2025 and for period ended September 30, 2025 are as follows:

32. We are subject to restrictive covenants under our credit facilities that limit our operational flexibility.

The loan agreements entered into by us with bank contain specific covenants which require us to obtain the prior approval/ permission from the bank on the occurrence of certain events such as formulation of any scheme of amalgamation or reconstruction, undertaking of any new project or expansion, making any substantial change in our management set up, any change in our capital structure resulting in reduction of capital, etc. We are required to obtain consent/ approval from our lender before undertaking any such steps which have been mentioned in the loan agreements. There can be no assurance that we will be able to comply with the financial covenants under our financing arrangements. In the event we breach any financial or other covenants contained in any of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows. For further details on the Cash Credit Limits and other banking facilities, please see “**Statement of Financial Indebtedness**” on page 221 of this Prospectus.

33. Compliance with and changes in safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.

Due to the nature of our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labour, workplace and related law and regulations. We are also subject to environmental laws and regulations, including but not limited to:

- Environment (Protection) Act, 1986
- Air (Prevention and Control of Pollution) Act, 1981
- Water (Prevention and Control of Pollution) Act, 1974
- Hazardous Waste Management & Handling Rules, 2008

- Other regulations promulgated by the Ministry of Environment and Forests and the Pollution Control Boards of the state of Maharashtra

which govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from the operations of our business. The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and management time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations

34. Our business is dependent on key industries, and any downturn in these sectors may adversely affect our operations and financial performance.

We cater to a diverse range of industries, including construction, engineering, warehousing, logistics, mining, infrastructure, and automotive. Our business performance is directly influenced by the demand and growth trends in these sectors. Any downturn, slowdown, or adverse regulatory changes in these industries may significantly impact our sales volume, order inflow, and revenue generation.

Several external factors, such as economic slowdowns, reduced infrastructure spending, supply chain disruptions, raw material price volatility, and regulatory changes in key industries, may negatively affect the demand for our products. Additionally, reduced investments, lower capacity utilization, or increased competition in industries that rely on our products may lead to delays, order cancellations, or lower-value contracts, adversely impacting our operations and profitability.

Further, shifts in customer preferences, advancements in technology, or evolving industry-specific sustainability requirements may necessitate product modifications or investments in new technologies to maintain competitiveness. Failure to adapt to industry changes or a decline in spending by key customer industries may materially and adversely impact our business, financial health, and growth prospects.

35. We are heavily dependent on our Promoters and Key Managerial Personnel for the continued success of our business through their continuing services and strategic guidance and support.

Our success heavily depends upon the continued services of our Key managerial personnel, along with support of our Promoters. We also depend significantly on our Key Managerial Persons and Senior Management Persons for executing our day-to-day activities. The loss of any of our Promoter, Key Management Personnel and Senior Management Persons, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and key managerial personnel, please refer to Section **“Our Management”** on page 145 of this Prospectus.

36. Information in relation to our installed capacity and capacity utilization of our manufacturing facilities included in this Prospectus is based on various assumptions and estimates, and future production and capacity utilization may vary.

Information relating to our installed capacities and the capacity utilization of our manufacturing facilities included in this Prospectus is based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials, actual product mix vis-à-vis the products mix envisaged for computation of our installed capacity and assumptions relating to potential utilization levels and operational efficiencies. While we have obtained a certificate dated December 18, 2025 from Dr. R Z Chandak, Chartered Engineer (Reg no- F-108534/0), actual capacities and utilization rates may differ significantly from the estimated installed capacities or estimated capacity utilization information of our facilities. Undue reliance should therefore not be placed on our installed capacity or estimated capacity utilization information for our existing facility included in this Prospectus.

For further details of our Business, please refer to chapter titled **“Our Business”** beginning on page 113 of this Prospectus.

37. Activities involving our manufacturing process can cause injury to people or property in certain circumstances. A significant disruption at any of our manufacturing facility may adversely affect our production schedules, costs, sales and ability to meet customer demand.

Although we employ safety procedures in the operation of our manufacturing facilities and maintain what we believe to be adequate insurance, there is a risk that an accident may occur at any of our manufacturing facility. An accident may result in personal injury to our employees, destruction of property or equipment, environmental damage, manufacturing or delivery delays, or may lead to

suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend such litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations, cash flows and prospects. In particular, if operations at our manufacturing facilities were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, terrorism, adverse weather conditions, labour dispute, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. While we have not experienced any interruption in our manufacturing activities in the past on account of any workplace accident, any future interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

38. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected. However, there have been no instances of employee misconduct or error in the past that have had any impact on our business, financial condition, or results of operations.

39. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in its first year of operation, there is no guarantee that we can implement the same on time and within the estimated budget going forward or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

40. Loans availed by Our Company has been secured on personal guarantees of our Director. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees provided by our Directors.

Our Promoters, Samit Surendra Singhai, Akash Surendra Singhai, Surendra Fatechand Singhai & Lata Surendra Singhai and promoter group, Alka Samit Singhai & Pallavi Akash Singhai has provided personal guarantee to secure a significant portion of our existing borrowings taken from the banks and may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the personal guarantees provided by the aforesaid may be invoked which could negatively impact their reputation and net worth. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation. We may also not be successful in procuring alternate guarantees/ alternate security satisfactory to the lenders, as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer “**Statement of Financial Indebtedness**” on page 221 of this Prospectus.

41. Our lenders have charge over properties in respect of finance availed by us.

We have secured our lenders by creating a charge over our movable properties of the company along with immovable properties of our directors, in respect of CC limit and term loan availed by us from ICICI Bank Limited. We have been extended such loan against hypothecation of our Company’s current assets and immovable assets of directors. For further information on the financing and loan agreements along with the total amounts outstanding and the details of the repayment schedule, please refer to chapter “**Statement of Financial Indebtedness**” beginning on page 221 of this Prospectus.

42. Adverse publicity regarding our products could negatively impact us.

Adverse publicity regarding any of our products or similar products marketed or sold by others could negatively affect us. If any studies raise or substantiate concerns regarding the efficacy or safety of our products or other concerns, our reputation could be harmed and demand for our products could diminish, which could have a material adverse effect on growth in new customers and sales of our product, leading to a decline in revenues, cash collections, and ultimately our ability to meet operating cash flow requirements.

43. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our operations may be subject to incidents of theft or damage to inventory. The business may also encounter some inventory loss on account of employee theft, vendor fraud and general administrative error. While we have not experienced any such instance in the past, there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse or similar incidents in the future, which could adversely affect our results of operations and financial condition. Though we have insurance, losses due to theft, fire, breakage or damage caused by other casualties, could adversely affect our results of operations and financial condition.

44. *We have in the past entered into related party transactions and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company's financial condition and results of operations.*

Our Company has entered into various transactions with our directors, promoters and group companies. These transactions, inter-alia includes purchases, sales, loans and advances etc. For details, please refer to “**Note 30- Related Party Transactions**” under Section titled “**Financial Information of the Company**” and Chapter titled “**Capital Structure**” beginning on page 167 and 64 respectively of this Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favorable terms if such transactions are not entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in the aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

45. *If we fail to maintain an effective system of internal controls, we may not be able to successfully manage or accurately report our financial risk.*

Effective internal controls are necessary for us to prepare reliable financial reports and effectively prevent and detect any frauds or misuse of funds. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may decline over time. There can be no assurance that additional deficiencies or lacks in our internal controls will not arise in the future, or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies or lacks in our internal controls. If internal control weaknesses are identified in a delayed manner, our actions may not be sufficient to correct such internal control weakness. Such instances may also adversely affect our reputation, thereby adversely impacting our business, results of operations and financial condition.

46. *Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “**Dividend Policy**” on page 166 of the Prospectus.

47. *Any future issuance of Equity Shares, or convertible securities or other equity linked securities by us and any sale of Equity Shares by our significant shareholders may dilute your shareholding and adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in the Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

48. Certain data mentioned in this Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. 49. The average cost of acquisition of Equity Shares by our Promoters, is lower than the face value of Equity Share.

The average cost of acquisition of Equity Shares of our Promoter i.e., Samit Surendra Singhai, Akash Surendra Singhai, Surendra Fatechand Singhai & Lata Surendra Singhai are lower than the face value of Equity Shares i.e., Rs. 10/-. 50. Our Promoters and the Promoter Group will jointly continue to retain majority shareholding in our Company after the issue, which will allow them to determine the outcome of the matters requiring the approval of shareholders.

Our promoters along with the promoter group will continue to hold collectively 67.90% of the post issue equity share capital of the company. As a result of the same they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder’s vote. Such a concentration of the ownership may also have the effect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoters will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

51. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The issue price of the equity shares has been based on many factors and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled “**Basis for Issue Price**” beginning on page 93 of the Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. 54. Significant differences exist between Indian GAAP and other accounting principles, such as Ind AS, IFRS and U.S. GAAP, which may be material to investors’ assessments of our financial condition, result of operations and cash flows.

Our restated summary statements of assets and liabilities, restated summary statements of profit and loss and cash flows for the period ended September 30, 2025 and Fiscals 2025, 2024 and 2023 have been prepared in accordance with the Indian GAAP. We

Ind AS, US GAAP and IFRS differ in significant respects from Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

55. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE (BSE SME) in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

56. *The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.*

The fund requirement and deployment, as mentioned in the “*Objects of the Issue*” on page 82 of this Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter “*Objects of the Issue*” is at the discretion of our Board of Directors and will be subject to monitoring by an external independent agency appointed for the purpose. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter “*Objects of the Issue*” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

57. *We may be subject to surveillance measures, such as the Additional Surveillance Measures (ASM) and the Graded Surveillance Measures (GSM) by the Stock Exchanges which may adversely affect trading price of our Equity Shares.*

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility. On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the issue due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation. In the event our Equity Shares are subject to such pre-emptive surveillance measures implemented by the Stock Exchange, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares.

58. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities

would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favor of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future

59. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

60. *Any of the Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the SEBI ICDR Regulations, Any of the Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. While we are required to complete Allotment, listing and commencement of trading pursuant to the Offer within three (3) Working Days from the Bid/ Offer Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Offer or may cause the trading price of our Equity Shares to decline on listing.

EXTERNAL RISK FACTORS

61. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Recent developments in the ongoing conflict between Russia and Ukraine has resulted in and may continue to result in a period of sustained instability across global financial markets, induce volatility in commodity prices, increase borrowing costs, cause outflow of capital from emerging markets and may lead to overall slowdown in economic activity in India.

62. Disruptions in Global Maritime Routes, including the Ongoing Red Sea Crisis, Could Adversely Affect Our Operations and Financial Performance

We derive a portion of our revenue from exports to countries such as Nepal, New Zealand, Bhutan, and the United States and Dubai. Export revenue amounted to ₹60.12 Lakhs, ₹94.33 Lakhs, ₹227.09 Lakhs and ₹436.67 Lakhs for the period ended September 30, 2025 and financial years ended March 31, 2025, 2024 and 2023, respectively, representing 1.88%, 1.66%, 4.56% and 11.76% of our revenue from operations in such periods. The recent crisis in the Red Sea region, caused by geopolitical instability and attacks on commercial shipping vessels, has led to significant rerouting of global cargo ships away from the Suez Canal. As a result, shipping costs have increased, transit times have lengthened, and supply chains have become less predictable. These disruptions have adversely affected our ability to serve certain export markets, particularly those reliant on ocean freight such as the United States and New Zealand. However the company has not exported from US and New Zealand in last 2 and 1 year respectively. Yet in future, if company receives export order then the business operations might get affected. Any continued or worsening disruption in global shipping routes may impact our export competitiveness, delay order fulfilment, and adversely affect our business, cash flows, and profitability.

63. We are exposed to risks associated with fluctuation in steel prices or shortages in supply of steel components.

Our manufacturing activities depend on fluctuation in steel prices, being M.S. Wires are one of the important raw materials and supply of steel components. Changes in macroeconomic conditions generally impact these industries and could negatively impact our business or profitability. Accordingly, our business is highly dependent on the state of development of the Indian economy and the macroeconomic environment prevailing in India. Changes in government policies that may have adverse effect on the development associated industries, may have an adverse impact on our business.

64. If certain labour laws become applicable to us, our profitability may be adversely affected.

India has stringent labour legislations that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Any change or modification in the existing labour laws may affect our flexibility in formulating labour related policies.

65. A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

66. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "**Government and Other Statutory Approvals**" on page 238 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows. In addition, unfavourable changes in or interpretations of existing, or the

promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. We are involved in various disputes with tax authorities. For details of these disputes, see “**Outstanding Litigation and Material Developments**” on page 233. Moreover, any change in Indian tax laws could have an effect on our operations. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

67. Instability in financial markets could materially and adversely affect our results of operations and financial condition. The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions.

Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE’s benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

68. Natural calamities could have a negative impact on the Indian economy and cause Our Company’s business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

69. Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares. Foreign ownership of Indian securities is subject to government regulation.

Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

70. Our performance is linked to the stability of policies and the political situation in India.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the ESDM sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India’s economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

Details of Utilization of Net Proceeds

The details of utilization of the Net Proceeds are set forth herein below:

1. Funding the capital expenditure towards, mechanical and electrical works, interior work and procurement of plant and machinery for setting up a new manufacturing facility at Amravati, Maharashtra ("Proposed Factory IV")

Our Company is engaged in the manufacturing, supply, and export of steel fiber products for industrial applications. Our product portfolio includes Loose Hook-End Steel Fiber, Glued Hook-End Steel Fiber, and Flat Crimped Steel Fiber, available in various sizes for fiber-reinforced concrete. Additionally, we manufacture Steel Wool Fiber, used in friction linings for brake pads and clutches, and trade Macro Synthetic Polypropylene (PP) Fibres for concrete applications.

We operate three manufacturing units in MIDC, Amravati, Maharashtra. Unit 1 (1,950 sq. m.) specializes in fine wire drawing, Unit 2 (2,925 sq. m.), also serving as our Registered Office, focuses on steel fiber and steel wool fiber production. Unit 3 (2,000 sq. m.) is dedicated to mild steel wire production. Our production facilities are optimally utilized to meet industry demands while maintaining operational efficiency and quality standards.

We also trade Macro Synthetic PP Fibers which is used in concrete reinforcement. These fibers are corrosion-resistant, durable, and enhance crack control, impact resistance, and flexibility while reducing installation costs. Their application extends to tunnels, bridges, and marine structures, where moisture resistance is crucial.

Expansion Plan

As part of our growth strategy, we are establishing a new manufacturing unit (Unit IV) at Plot No. B-2/4, Additional Amravati MIDC Textile Zone, Nagpur Road, Sawardi, Teosa, Amravati, Maharashtra, 444903. This facility, spread across 15,300 sq. mtr, has been leased for 95 years through an Agreement dated August 5, 2024, with possession obtained on August 2, 2024. The planned unit will include a steel fiber production plant with an annual capacity of 6000 MT and a Macro Synthetic PP Fiber production plant with an annual capacity of 500 MT.

The civil construction and PEB work of the factory building will be funded through internal accruals, while plant and machinery will be procured using net proceeds from our IPO. The fund requirements, deployment, and intended use of net proceeds for setting up this new unit are based on our current business plan, supplier quotations, and technical assessments. However, these estimates have not been appraised by any bank, financial institution, or independent agency.

GLOBAL ECONOMIC OVERVIEW:

After a succession of adverse shocks in recent years, the global economy is facing another substantial headwind, with increased trade tension and heightened policy uncertainty. This is contributing to a deterioration in prospects across most of the world’s economies. For emerging market and developing economies (EMDEs), the ability to narrow per capita income gaps with richer countries, boost job creation, and reduce extreme poverty remains insufficient. Downside risks to the outlook predominate, including an escalation of trade barriers, persistent policy uncertainty, rising geopolitical tensions, and an increased incidence of extreme climate events. Conversely, policy uncertainty and trade tensions may ease if major economies succeed in reaching lasting agreements that address ongoing trade disputes. The challenging global context faced by EMDEs is compounded by the fact that foreign direct investment inflows into these economies have fallen to less than half of their peak level in 2008 and are likely to remain subdued. Global cooperation is needed to restore a more stable and transparent global trade environment and scale up support for vulnerable countries grappling with conflict, debt burdens, and climate change. Across EMDEs, domestic policy action is also critical to contain inflation risks, strengthen fiscal resilience through improved revenue mobilization, and reprioritize spending. To unlock job creation and long-term growth, structural reforms must focus on raising institutional quality, attracting private investment, and strengthening human capital and labor markets. In particular, countries in fragile and conflict situations (FCS) face daunting development challenges that will require tailored domestic policy reforms, underpinned by well-coordinated multilateral support.

Global growth is slowing due to a substantial rise in trade barriers and the pervasive effects of an uncertain global policy environment. Growth is expected to weaken to 2.3 percent in 2025, with deceleration in most economies relative to last year. This would mark the slowest rate of global growth since 2008, aside from outright global recessions. In 2026-27, a tepid recovery is expected, leaving global output materially below January projections. Progress by emerging market and developing economies (EMDEs) in closing per capita income gaps with advanced economies and reducing extreme poverty is anticipated to remain insufficient. The outlook largely hinges on the evolution of trade policy globally. Growth could turn out to be lower if trade restrictions escalate or if policy uncertainty persists, which could also result in a build-up of financial stress. Other downside risks include weaker-than-expected growth in major economies with adverse global spillovers, worsening conflicts, and extreme weather events. On the upside, uncertainty and trade barriers could diminish if major economies reach lasting agreements that address trade tensions. The ongoing global headwinds underscore the need for determined multilateral policy efforts to foster a more predictable and transparent environment for resolving trade tensions, some of which stem from macroeconomic imbalances. Global policy efforts are also needed to confront the deteriorating circumstances of vulnerable EMDEs amid prevalent conflict and debt distress, while addressing long-standing challenges, including the effects of climate change. National policy makers need to contain risks related to inflation as well as strengthen their fiscal positions by raising additional domestic revenues and reprioritizing spending. To facilitate job creation and boost long-term growth prospects in EMDEs, reforms are essential to enhance institutional quality, stimulate private investment growth, develop human capital, and improve labor market functioning.

After being buffeted by a series of adverse shocks over 2020-24, the global economy is facing another significant headwind this year, with increased trade barriers and heightened policy uncertainty leading to a notable deterioration of the outlook relative to January. In particular, global output is expected to grow at its weakest pace since 2008, aside from outright global recessions. The sharp increase in tariffs and the ensuing uncertainty are contributing to a broad-based growth slowdown and deteriorating prospects in most of the world’s economies. Subdued global growth prospects are unlikely to improve materially without policy actions to address increasing trade restrictions, geopolitical tensions, heightened uncertainty, and limited fiscal space. The global outlook is predicated on tariff rates close to those of late May prevailing throughout the forecast horizon. Accordingly, pauses to previously announced tariff hikes between the United States and its trading partners are assumed to persist. This baseline nonetheless entails the highest U.S. average effective tariff rate in nearly a century. In addition, in view of recent rapid shifts in trade policies and the

potential for a return to even higher tariffs, consumers and businesses continue to grapple with unusually elevated uncertainty. In this context, a prospective recovery in global trade and investment—two important drivers of long-term development that have been relatively subdued in recent years—has been disrupted.

Against this backdrop, global growth is set to slow this year, to 2.3 percent—substantially weaker than previously projected amid the impact of higher trade barriers, elevated uncertainty, increased financial volatility, and weakened confidence. Thereafter, growth is forecast to firm to about 2.5 percent over 2026-27, as trade flows continue adjusting to higher tariffs such that global trade edges up, while policy uncertainty moderates from record-high levels. The downgrade to global growth this year is principally driven by advanced economies. This slowdown is projected to be concentrated on investment, including foreign direct investment (FDI) and portfolio flows—which tend to respond more to demand shifts than aggregate output—and trade, with widespread adverse spillovers to other economies.

Global trade conditions experienced a large shock in early April when the United States announced prospective tariffs on most trading partners, with rates proportional to bilateral goods trade deficits, in addition to previously announced tariffs. A sharp escalation of trade barriers between China and the United States followed. Subsequently, country-specific tariffs were reduced to a universal 10 percent—including in the case of China, with initially prohibitively high tariff rates being rolled back sharply in May. However, other tariff increases remain on China and other large trade partners. As a result, the effective U.S. tariff rate has been brought to levels not seen in almost a century. Tariff rates in effect as of May 27 are assumed to prevail throughout the forecast period, but there is notable uncertainty in this regard. The baseline projections for global trade also incorporate important carve-outs for USMCA-compliant goods, pharmaceuticals, semiconductors, bullion, energy, copper, and other critical minerals, as well as retaliatory measures in place as of late May. Shifting policy announcements have led to heightened global trade policy uncertainty, measures of which reached historical highs over the past few months. This reflects uncertainty over whether current tariff rates will endure, their implementation, and the scale and timing of potential retaliatory responses. New tariff measures mark an intensification of the upward trend in trade-restrictive measures seen in recent years, with a significant risk of further escalation in trade barriers, as announced policies could generate substantial spillovers to third markets. These markets may respond by adopting protectionist measures to shield domestic industries from a surge in imports.

Global headline consumer price inflation has remained elevated above pre-pandemic norms over the past year, briefly edging higher in some advanced economies in early 2025. Continued tightness in labor markets has kept core inflation at a somewhat elevated level in many economies. In EMDEs, monthly headline inflation readings were volatile earlier this year, with a pickup in core inflation partly reflecting rising services prices and wage pressures. The outlook for global inflation has become more uncertain since last year due to a combination of shocks. Most notably, substantial tariff hikes are set to exert upward pressure on consumer inflation in key economies by raising prices for imported consumer goods and inputs into production and redirecting demand toward domestic production that is relatively inelastic in the short run (Barbiero and Stein 2025). Indeed, manufacturing purchasing managers in advanced economies have already reported accelerating input and output prices so far this year. Even so, outside economies where import duties have significantly increased, higher trade barriers are likely to be generally deflationary as they weaken external demand. There may nevertheless be other upside risks to inflation in these economies that are indirectly associated with trade restrictions. These include the potential for damage to global supply chains to push up prices in unpredictable ways, and the possibility of sizable currency depreciations.

Against the backdrop of a more challenging external environment, EMDE growth is forecast to slow significantly in 2025, to 3.8 percent, with only a modest projected pickup in 2026-27. The expected rate of growth is well below prepandemic averages and the pace that is needed to create sufficient jobs to meet working-age population growth and make progress in closing large per capita income gaps with advanced economies. The deterioration in EMDE growth prospects is driven in large part by economies with a high degree of trade and investment openness. In these economies, large manufacturing sectors high global value chain participation, and reliance on global financial markets amplify the negative spillovers from the recent shocks to global trade and confidence and the sharp rises in uncertainty and financial market volatility. However, the softness in the EMDE outlook is anticipated to be broad-based, with growth expected to slow in nearly 60 percent of EMDEs in 2025. More generally, the capacity of many EMDEs to respond to negative shocks has diminished due to sharp pandemic-related increases in debt, elevated poverty rates, and waning official development assistance.

OVERVIEW OF THE INDIAN ECONOMY:

India's economic journey over the past few years has been marked by remarkable growth and a steady rise in its position on the global stage. After overtaking the United Kingdom (UK) to become the fifth largest economy in Q1 FY23, India has continued this upward trajectory to surpass Japan in June 2025 to become the fourth largest economy in the world. With a nominal Gross Domestic Product (GDP) of Rs. 3,31,03,000 crore (US\$ 3.78 trillion), India's growth reflects a combination of strong domestic demand and policy reforms positioning the country as a key destination for global capital.

Further, India is projected to reach a GDP of Rs. 4,26,45,000 crore (US\$ 5 trillion) by 2027 and is on course to surpass Germany by 2028. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Market Overview

India's Real Gross Domestic Product (GDP) or GDP at Constant Prices stood at Rs. 47.89 lakh crore (US\$ 544.20 billion) in Q1 of FY26, up from Rs. 44.42 lakh crore (US\$ 504.77 billion) in Q1 FY25, registering a growth rate of 7.8%. Nominal GDP or GDP at Current Prices for the same period was estimated at Rs. 86.05 lakh crore (US\$ 977.84 billion), compared to Rs. 79.08 lakh crore (US\$ 898.64 billion) in the corresponding quarter of the previous year, showing a growth rate of 8.8%.

As on October 14, 2025, India is home to 123 unicorns, with six new startups achieving unicorn status in 2025.

India's current account recorded a deficit of Rs. 21,288 crore (US\$ 2.37 billion) in Q1 FY26 (April-June), compared to Rs. 76,282 crore (US\$ 8.6 billion) in the same period of FY25, according to the Reserve Bank of India (RBI). The improvement reflects a narrower merchandise trade gap and steady growth in service exports. Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With India's economy showing resilient growth, supported by strong domestic demand, policy reforms, and a healthy investment pipeline, several new projects and developments are underway across key sectors. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- On the FDI front, according to the Department for Promotion of Industry and Internal Trade (DPIIT), India's cumulative FDI inflow stood at Rs. 97,22,411 crore (US\$ 1.09 trillion) between April 2000-June 2025; with major share coming from Singapore at Rs. 12,57,392 crore (US\$ 142.88 billion) with a total share of 24%, followed by Mauritius at Rs. 11,10,692 crore (US\$ 126.22 billion) with 21%, the USA at Rs. 5,41,654 crore (US\$ 61.56 billion) with 10%, the Netherlands at Rs. 3,68,694 crore (US\$ 41.90 billion) with 7%, and Japan at Rs. 2,88,090 crore (US\$ 32.74 billion) with 6%.

- India registered 301 Private Equity (PE) deals worth Rs. 49,745 crore (US\$ 5.7 billion) in Q3 2025, recording a 7% rise over the previous quarter. India-focused PE-VC funds raised Rs. 21,576 crore (US\$ 2.47 billion) across 22 funds, a 148% YoY increase, driven by strong inflows into the IT & ITeS sector (US\$ 2.4 billion). Mumbai led in investment value, while Bangalore topped in deal volume, reaffirming their positions as India's leading investment hubs.
- Foreign Institutional Investors (FIIs) have been net sellers in the Indian equity market since July, withdrawing over Rs. 1 lakh crore (US\$ 11.36 billion) between July 1, 2025, and September 8, 2025, including Rs. 7,800 crore (US\$ 886.4 million) in September, while in August 2025, Domestic Institutional Investors (DIIs) recorded their 25th straight month of net inflows, investing Rs. 94,829 crore (US\$ 10.8 billion), the highest in 10 months. In the first five months of FY26, DIIs invested Rs. 3.24 lakh crore (US\$ 37.6 billion), already 53% of the total investment made in FY25.
- India's manufacturing sector strengthened further in August 2025, supported by firm demand that drove higher factory orders and production. Firms increased input purchases and hiring, backed by improved business confidence. Input inventories continued to rise and finished goods stocks expanded for the first time in nine months. The HSBC India Manufacturing Purchasing Managers' Index (PMI) rose from 59.1 in July to 59.3 in August, marking the strongest improvement in operating conditions in over 17 years, with moderate cost pressures and a sharper rise in selling prices.
- India's Consumer Price Index (CPI)-based inflation eased to an over eight-year low of 1.54% in September 2025, down from 2.05% in August 2025, driven by lower food and fuel prices, according to data from the Ministry of Statistics and Program Implementation (MOSPI).

- India's GST collections reached an all-time high of Rs. 2.37 lakh crore (US\$ 26.93 billion) in April 2025, rising 12.6% YoY. The growth was supported by strong domestic demand and higher imports, with domestic revenues up 10.7% and import revenues up 20.8%.
- Indian airlines carried over 1.36 crore passengers (13.6 million) in June 2025, marking an increase from the same period last year, as per official data.
- The government is focusing on renewable energy sources and has achieved a major clean energy milestone by generating 50% of its power from renewable sources, five years ahead of its 2030 target. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- In May 2025, the overall Index of Industrial Production (IIP) stood at 156.6 (base 2011–12 = 100), reflecting a YoY growth of 1.2%. The mining, manufacturing and electricity sectors stood at 136.6, 154.3 and 216 respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- India's wheat procurement for FY26 has reached 29.7 million tonnes as of May 22, 2025, the highest in four years and up 13.5% YoY. Strong production of 115.43 million tonnes, favourable weather, and bonuses above the Minimum Support Price (MSP) in key states have driven this growth. The Food Corporation of India expects procurement to hit 32.5 million tonnes by season end, raising stocks to 44 million tonnes, well above the 18.4 million tonnes needed for the Public Distribution System.

Road Ahead

India's economy grew by 6.5% in FY25. With a 7.4% growth rate in Q4 FY25, the RBI has revised India's GDP growth forecast for FY26 upwards to 6.8% from earlier estimate of 6.5%. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. In 2024, India rose to 15th place globally in FDI rankings and retained its position as South Asia's top recipient.

In H1 FY25, India's growth-focused approach was underscored by the government's capital expenditure outlay of Rs. 15,02,000 crore (US\$ 176 billion), reinforcing its commitment to infrastructure-led development. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10% to Rs. 11,21,000 crore (US\$ 131 billion) over Rs. 10,18,000 crore (US\$ 119 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

India's total goods and service exports surged by 76% over the past decade, touching Rs. 70,36,425 crore (US\$ 825 billion) in FY25, driven by strong performance in engineering goods, electronics, and pharmaceuticals. With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

STEEL SECTOR IN INDIA

The World Steel Association's 'World Steel in Figures 2025' profiles India as the world's second-largest crude steel producer.

- Demand for steel from different sectors will drive this industry.
- Consumption of steel by India's infrastructure segment is expected to increase to 11% by FY26.
- Steel demand from the automotive sector is expected to increase due to rise in the demand for automobiles.
- The new Vehicle Scrappage policy will help in reducing steel prices as the policy enables recycling of materials used in old vehicles.
- On the healthcare front, key steel producers are now exceeding their capacities to produce oxygen cylinders for COVID patients.
- The Smart Cities' Affordable Housing and industrial corridors are a few government initiatives to boost the steel industry
- As of July 30, 2025, India's green steel demand is forecasted to climb from negligible levels today to 4.49 million tonnes (MT) by FY30, driven by the construction sector, infrastructure and automobiles with projections rising to 24 MT by FY35, 73 MT by FY40 and peaking at 179 MT by FY50.

Demand has outpaced supply over the last five years

In FY26 (April-July 2025), the consumption of finished steel stood at 51.45 MT.

- In FY25, the consumption of finished steel stood at 150.23 MT.
- The per-capita consumption of steel stood at 100 kgs in FY26 (April-August 2025) and the National Steel Policy aims to increase it to 160 kgs by FY31.
- It is expected that consumption per capita would increase, supported by rapid growth in the industrial sector and rising infra expenditure projects in railways, roads and highways, etc.
- The government has a fixed objective of increasing rural consumption of steel from the current 19.6 kg/per capita to 38 kg/per capita by 2030-31.

OUR MANUFACTURING PROCESS

Steel Fiber Manufacturing Process:

- **Raw Material Selection:**

The process begins with selecting good quality low-carbon steel wire rods or stainless steel wires. The chemical composition and grade of the steel are carefully evaluated to ensure durability, tensile strength, and flexibility in the final product. This step is essential for achieving consistent and reliable performance in reinforcement applications.

- **Wire Drawing:**

The selected steel wire rods are drawn into thin wires using Straight Line Wire Drawing Machines and High-Speed Wet Drawing Machines. These machines are designed to achieve precise diameters and a smooth surface finish, ensuring uniformity and structural integrity in the final product.

- **Gluing:**

Once drawn, the wires are coated with a specialized adhesive to enhance their bonding properties. This coating improves the adhesion of steel fibers to concrete, ensuring better crack resistance and increased tensile strength in construction applications.

- **Forming:**

The glued wires are shaped into specific geometries such as hook-end, crimped, or straight fibers. These shapes are designed to improve the mechanical interlock and bonding between the fibers and concrete, enhancing load-bearing capacity and resistance to pull-out forces.

- **Cutting:**

The shaped wires are cut into precise lengths using cutting equipment. Maintaining consistency in length and the aspect ratio

(length-to-diameter ratio) is critical for ensuring even distribution in concrete mixes and achieving optimal reinforcement performance.

- **Quality Inspection:**

Quality inspection plays a key role in the steel fiber manufacturing process. Every batch undergoes rigorous testing to meet industry standards, such as ASTM A820 or EN 14889. Critical parameters like length, thickness, aspect ratio, tensile strength, and deformation are thoroughly examined. Random samples are also subjected to performance tests to ensure compliance with specifications before the batch proceeds further. This detailed inspection process guarantees that only a good quality steel fibers reach the final stage.

- **Final Packaging:**

After successfully passing quality checks, the steel fibers are packaged in moisture-proof bags or containers to prevent rust, contamination, or damage during transit and storage. Each package is clearly labeled with product specifications and handling instructions, ensuring easy identification and proper usage.

Steel Wool Fiber Manufacturing Process:

- **Raw Material Selection:**

The process begins with the selection of a good quality steel wool or low-carbon steel wire. The steel used must have the right balance of tensile strength, flexibility, and wear resistance to meet the requirements for brake linings.

- **Wire Drawing:**

Steel wire rods are drawn through wire drawing machines (such as OTO Blocks) to reduce their diameter to the desired size. This step ensures that the wire is uniform and suitable for the next stages of production.

- **Scraping and Shredding:**

The steel wires are then scraped and shredded into thin strands or strips. This step prepares the wires for the refinement process, breaking them down into smaller, more manageable pieces.

- **Steel Wool Formation:**

The shredded steel is processed into fine steel wool fibers. This is done through a mechanical process where the strands are twisted and pulled into a wool-like texture, which is essential for creating a consistent powder.

- **Pulverizing:**

The steel wool fibers are then sent to a pulverizing machine, such as a ball mill or hammer mill, to break the fibers into a fine powder. The grinding process is critical to ensure that the powder has the right consistency for use in brake linings.

- **Sieve Grading:**

After pulverizing, the steel wool powder is sifted through sieves to classify the particles by size. This ensures the powder is uniform and within the desired specifications for brake lining production.

- **Heat Treatment:**

In some cases, the powder may be subjected to heat treatment to remove oils or impurities and enhance its hardness. This step ensures that the powder has the necessary properties for friction material in brake linings.

- **Blending with Additives:**

To optimize the powder for brake lining applications, it may be mixed with other materials such as friction modifiers or binding agents. These additives help improve the powder's performance in terms of heat dissipation, wear resistance, and friction control.

- **Final Quality Inspection:**

The powder undergoes a final quality check to ensure it meets the required standards. Key aspects such as particle size, friction properties, and moisture content are carefully inspected to ensure the powder is suitable for brake linings.

- **Packaging and Distribution:**

After passing the quality inspection, the steel wool powder is packaged in moisture-proof containers or bags to ensure it remains uncontaminated. It is then distributed to manufacturers for use in the production of brake linings. Proper packaging and distribution ensure that the powder maintains its quality during storage and transportation and is ready for use in the production process.

All these codes have received the assent of President of India with effect from November 21, 2025. While the Central Government has notified the implementation as of November 2025, various States and Union Territories are still in the final stages of notifying their specific rules. Therefore, a "dual compliance" period may exist in some regions where legacy state rules still apply alongside the new Central Codes.

Brief descriptions of each of the codes are given below:

Code of Wages, 2019

The Code aims to consolidate the laws relating to wages and bonus and matters connected therewith or incidental thereto. It received the assent of President of India on August 08, 2019 and through notification dated November 21, 2025, the GoI brought into force the said code. The Code contains procedure for fixing minimum wage, limit for fines and deductions in wages, minimum and maximum bonus, calculation of allocable and available surplus, as well as gender neutral consideration in fixing wages. The Code has given the power to Central Government to fix a “floor wage” and the State governments cannot fix any minimum wage less than the “floor wage”. The Code will apply to all employees. The central government will make wage-related decisions for employments such as railways, mines, and oil fields, among others. State governments will make decisions for all other employments. Wages include salary, allowance, or any other component expressed in monetary terms. This does not include bonus payable to employees or any travelling allowance, among others. The central or state government may fix the number of hours that constitute a normal working day. In case employees work in excess of a normal working day, they will be entitled to overtime wage, which must be at least twice the normal rate of wages. The Code prohibits gender discrimination in matters related to wages and recruitment of employees for the same work or work of similar nature. Work of similar nature is defined as work for which the skill, effort, experience, and responsibility required are the same.

The Code on Social Security, 2020

The Code on Social Security, 2020, is a comprehensive legislation in India designed to consolidate and amend existing laws relating to social security with the aim of extending social security benefits to all employees and workers, including those in the unorganized sector. This Code merges nine existing laws: the Employees' Provident Funds and Miscellaneous Provisions Act, 1952; the Employees' State Insurance Act, 1948; the Employees' Compensation Act, 1923; the Maternity Benefit Act, 1961; the Payment of Gratuity Act, 1972; the Cine Workers Welfare Fund Act, 1981; the Building and Other Construction Workers Welfare Cess Act, 1996; the Unorganised Workers' Social Security Act, 2008; and the Employment Exchanges (Compulsory Notification of Vacancies) Act, 1959.

The Code on Social Security, 2020, aims to create a universal social security system for all workers, including those in the gig and platform economy. It mandates the establishment of a Social Security Fund to provide benefits such as provident fund, employment

injury benefits, housing, educational schemes for children, skill upgradation, funeral assistance, and old-age homes. The Code also outlines the roles and responsibilities of various bodies such as the Central Board of Trustees of the Employees' Provident Fund and the Employees' State Insurance Corporation in administering social security schemes. Additionally, the Code includes provisions for the registration of all employees and workers to ensure they receive their entitled benefits. It emphasizes the use of technology for the implementation and monitoring of social security schemes to improve transparency and efficiency. Employers are required to contribute to various social security funds, and the government may provide financial support to ensure the sustainability of these schemes.

The Industrial Relations Code, 2020

This Code received the assent of President of India on September 28, 2020 and through its notification dated November 21, 2025, the GoI brought into force the provisions of this code. The Code aims to streamline the laws regulating industrial disputes and trade unions in India. For the benefit of the employers, the Code has introduced various aspects such as increasing the threshold of workers to three hundred (300) for obtaining the consent of the concerned government in case of lay off, retrenchment or closure of the establishment, notice of change not required to be given subject to the conditions stipulated in the Code, increasing the wage threshold to INR 18,000 (Indian Rupees Eighteen Thousand) for exclusion from the definition of worker, etc. The Industrial Relations Code also introduces the concept of deemed certification of standing orders. The Code subsumes three labour laws relating to industrial relations, namely, the Trade Unions Act, 1926, the Industrial Employment (Standing Orders) Act, 1946 and the Industrial Disputes Act, 1947.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion ("DIPP"), Ministry of Commerce and Industry, Government of India.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the "FDI Policy"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.
